"On the basis of an order issued by the SS garrison physician Auschwitz CC, a 3-week quarantine is imposed with immediate effect on all SS members of the Central Construction Office who live in the construction-office lodging barracks. The prisoner cleaning squad employed there will not be allowed to enter the barracks as of tomorrow. Similarly, no SS member may come into contact with prisoners, otherwise there is danger of infection."

Radio message from the 1st camp physician of Dachau CC, SS-Hauptsturmführer Waldemar Wolter, to the "SS garrison physician Auschwitz CC": TNA. HW 16-23. ZIP/GPDD 369b/3.2.43, n. 34/35.

"The 1 camp physician inquires whether the rumors circulating here are true, that the inmate nurses JOERL, Ludwig, born 28 Feb. 06, and LUGER, Josef, born 10 Jan. 10. are to be transferred back to here. According to a … available here, 25 inmate nurses are to be transferred to AUSCHWITZ CC in the near future. It is inexplicable to the camp physician that, when prisoner nurses are transferred from here, at the same time others are sent back from there to DACHAU."

Letter from SS-WVHA, head of Office Group C, to various subordinate agencies, including the Central Construction Offices and Construction Offices, subject "Uniform Representations in Development & Site Plans." RGVA, 502-1-9, pp. 8-9.

"(1.) <u>Massive permanent buildings:</u>
Planned = red, dashed perimeter lines, area not filled out;

"Overview of inmate deployment at CC Auschwitz U/S. Month of January 1943." Occupancy. Total number in women's camp: 8,290, of whom unfit for labor and deployment: 1,663. — AGK, NTN, 134, p. 283; transcript by J. Sehn.

Letter from the Central Construction Office to the SS-WVHA, head of Office Group C, with the subject "Securing Key Personnel for the Central Construction Office, Auschwitz". Request regarding SS personnel to "secure at least 1 key personnel as indispensable", exempting them from transfer. The following personnel are requested: — RGVA, 502-1-28, pp. 247-250.

"I.) Central Construction Office of the Waffen-SS and Pol. Auschwitz SS-Ustuf. (F) Eggeling. […]
II.) Construction Office K.L. and agriculture Auschwitz, Head of Construction SS-Ustuf (F) Kirschnek […].
III.) Construction Office Prisoner of War Camp Auschwitz (Implementation of the Special Action) Head of Construction SS-Ustuf. (F) Janisch
By order of the Führer, the construction of the camp is to be carried out in a particularly accelerated manner.
The camp comprises:
324 lodging barracks,
64 wash- and toilet barracks,
20 utility barracks,
23 warehouse barracks,
15 infirmary barracks,
Headquarters and guard building,
delousing barracks,
4 crematoria,
1 large disinfestation facility including
30 effects barracks,
railroad siding
extensive sewage treatment plants
road construction,
square fortification,
warehouse,
16 Lodging barracks
3 utility barracks
8 toilet barracks
10 chamber barracks
1 infirmary barracks
1 sauna with disinfestation facility

Of the above barracks, only 50% have been erected, and the subsequent installations have only begun for the western part of Constr. Section II."
IV) Construction Office Industrial Area Auschwitz, Head of Construction SS-Strm. Jothann
V.) Carpentry Shop, Head SS-Unterscharführer Vieth.

The J.A. Topf & Sons company, Erfurt, sends the Central Construction Office invoice No. 69, order D 2249 concerning "Erection of 5 pieces of three-muffle cremation furnaces", materials and work for Crematorium II. Letter from headquarters Auschwitz CC to Department IIIa and to the Central Construction Office with the subject "Necessary urgent completion of all crematorium buildings": — RGVA, 502-1-313, p. 50.
"As a result of the urgency of the completion of these buildings, the camp commandant has ordered that the prisoner units and guards assigned to these buildings also move out, work and do duty on Sunday, 31 Jan. 43, exactly as on workdays."

Letter from the Central Construction Office to the SS-WVHA, head of Office Group C, with the subject "Crematorium II, state of construction": — APMO, BW 30/34, p. 100.
"Crematorium II was completed with the use of all available forces in spite of unspeakable difficulties and freezing weather during day and night operation, except for minor structural details. The furnaces were fired up in the presence of Mr. Prüfer, the chief engineer of the company carrying out the work, Topf and Sons, Erfurt, and are functioning perfectly. The formwork on the reinforced concrete ceiling of the morgue could not yet be stripped due to frost. However, this is insignificant, since the gassing cellar can be used for this purpose.
The Topf Company was unable to deliver the aeration and deaeration system on time as requested by the Central Construction Office due to the rail-car blockage. Upon arrival of the aeration and deaeration system, however, installation will start immediately, so that the system is expected to be completely ready for operation on February 20, 43.
A report by the test engineer of the Topf company, Erfurt, is enclosed."

Inspection report by Chief Engineer Kurt Prüfer for the Central Construction Office on the state of construction of Crematoria II-V: — RGVA, 502-1-313, pp. 48-49.
"On the basis of the meeting held this morning with the Construction Office and the subsequent inspection of Crematoria II, III, IV and V, I have established the following:
<u>Crematory II</u>
This building complex is structurally complete except for minor ancillary work (ceiling of Morgue 2 cannot yet be stripped due to frost).
The 5 three-muffle cremation furnaces have been completed and are currently being dry-heated. The delivery of aeration and deaeration system for the morgue cellars was delayed due to the rail-car blockage, so that installation will probably not take place for another 10 days. Thus, the start-up of Crematory II will certainly be possible on 15 Feb. 43.
<u>Crematorium III</u>
The outer walls of the furnace building and the chimney are finished. Installation of the smoke ducts for the cremation furnaces will begin in 8 days. The installation of the 5 pieces of three-muffle cremation furnaces can be done in about 5 weeks. Commissioning of these cremation furnaces is possible at the earliest on 17 April 43.
<u>Crematorium IV</u>
The shell and the foundations have been completed. Construction of the eight-muffle cremation furnace will begin on Monday, 1 Feb. 43. The work will be completed by 28 Feb. 43.
<u>Crematory V</u>
The foundations of the outer walls and a chimney are under construction. The completion of this crematorium will depend largely on the weather.

The inspection of the crematoria listed above, including their interiors, has shown that, despite the great construction tasks, the weather and material procurement difficulties, the work has proceeded briskly."

"File memo" by the Central Construction Office: APMO. BW 30/34, pp. 105-106.

"On the basis of the meeting held this morning with the Construction Office and the subsequent inspection of Crematoria II, III, IV and V, the following completion dates were agreed upon and considered quite possible by me.

Crematory II

In this building complex, I found that the furnace-room building with its adjoining rooms is completely finished, as is the large morgue, Cellar 1.

Morgue 2 is completed except for the ceiling, which is dependent on frost-free days. The 5 3-muffle cremation furnaces have been completed and are currently being dry-heated. The electrical connections for the motors belonging to the furnace for the compressed-air blowers are currently being installed. The 3 large forced-draft units, located at the chimneys, have been installed and are ready for operation. Here, too, the electrical connections for the motors are currently being installed.

The corpse elevator is currently being installed provisionally (as a plateau elevator). The aeration and deaeration system for the morgue cellars has not yet arrived as a result of the rail-car blockade, which was lifted only a few days ago; the cars are rolling and [it is] *expected that these materials will arrive daily. The installation can take place in about 10 days.*

Thus, the complete commissioning of Crematorium II can certainly take place on 13 Feb. 1943.

The waste incinerator located in the building complex of the above crematorium will be completed in the next few days. The annex for this furnace is also already completed.

Crematory III

At this crematorium, the outer walls of the building are finished, and the formwork for the furnace-room ceiling is currently being set. The chimney with 3 ducts will be ready in 3 days. Thus, at this crematorium, the installations of the 5 pieces of 3-muffle cremation furnaces will take place in 5 weeks. However, the smoke ducts from the furnaces will be started in 8 days. The trough for the groundwater insulation, as well as the three-layer cardboard insulation including protective concrete, has been completed, as well as the drainage within the two morgue basements. Currently, loading concrete is being poured. The commissioning of the 3-muffle cremation furnaces is possible on 17 April 1943.

Crematory IV

The furnace building, together with the two chimneys and the adjoining rooms, is completed to the extent that the furnace foundation has been laid. Construction of the 8-muffle cremation furnace begins on Monday, Feb. 1, 1943, and the furnace will ne completed on Feb. 28, 1943.

Crematorium V

The building materials are lying on the storage site. The foundations for the building perimeter walls are started, as well as the foundation for one chimney. Work on this crematorium is proceeding at a particularly fast pace. The completion of the crematorium will mainly depend on weather conditions. If the weather in February and March is favorable and work can proceed at full speed, the crematorium will be ready for operation by the end of April.

The inspection of the crematory buildings and interiors listed above has shown that, despite the great construction tasks and the difficulties in procuring materials, the work has progressed briskly."

Central Construction Office. File memo by SS-Unterscharführer Heinrich Swoboda with the subject "Power supply and installation of the CC and PoW Camp": RGVA, 502-126, p. 23.

"Meeting on 29 Jan. 43 between Central Construction Office Auschwitz and AEG-

Kattowitz, present:
Ing. Tomischek – AEG and
SS-Uscha. Swoboda – Central Construction Office.
AEG reports that it has not yet been provided with valid iron and metal certificates in response to its iron and metal requisitions, some of which were put out to tender as early as November 1942. For this reason, it has not yet been possible for this company to start work on the device components ordered. There is a great risk that further delays in the allocation of these orders will significantly extend the delivery dates.
For this reason, it is also not possible to complete the installation and power supply of Crematorium II at PoW Camp by 31 Jan. 43. The crematorium can only be completed from stored materials intended for other buildings to such an extent that commissioning can take place on 15 Feb. 43 at the earliest. However, this commissioning can only extend to limited use of the existing machines (whereby incineration with simultaneous special treatment is made possible), since the supply line leading to the crematorium is too weak for its power consumption. Iron and metal certificates have also not yet been allocated for the overhead-line material required for this purpose.
For the above reasons, a power supply to Crematorium III is not possible at all at present."

The accounting books of the Tesch & Stabenow company in Hamburg show a delivery of 999 kg of Zyklon B to Auschwitz CC, equivalent to RM 5,994. TNA, WO 309-1603.

February 1943

1. "Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943" Occupancy. Total number in men's camp: 31,772, of whom unfit for labor and deployment: 3,891. — AGK, NTN, 134, p. 279; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in women's camp: 10,069, of whom unfit for labor and deployment: 1,755. — AGK, NTN, 134, p. 283; transcript by J. Sehn.

2. "Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in men's camp: 31,991, of whom unfit for labor and deployment: 3,862. — AGK, NTN, 134, p. 279; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in women's camp: 10,449, of whom unfit for labor and deployment: 1,720. — AGK, NTN, 134, p. 283; transcript by J. Sehn.

Letter from H. Kori, central-heating and ventilation devices, to the SS-WVHA, Main Office CIII, with the subject "Delousing system for Concentration Camp Auschwitz": — RGVA, 502-1-332, pp. 15-15a; *ibid.*, pp. 17-18; *ibid.*, pp. 20-21.
"We refer to the consultation we had with you concerning a new hot-air delousing system for the above camp with a capacity of about 2500-3000 garments within 8 hours, and enclose our offer with a brief explanation. This delousing plant should be able to delouse 320-380 garments per hour, and since in the present case we are dealing with prisoners' clothing, which is not as bulky as, for example, military equipment, it will be possible to accommodate about 80-90 garments in two rows next to each other in a delousing chamber about 3.8 m deep and 2 m wide. We therefore need four such large delousing chambers with a corresponding heat output in order to be able to maintain the delousing temperature of about 100°C for 8-10 hours despite the insertion and removal of the trolleys. According to our rough calculation, per delousing chamber, taking into account the heat input for heating the garments, about 40,000, i.e. for both chambers more than 80,000 calories are necessary, so that 2 Kori calorifiers Type II Gr. No. 6e, each with a heating surface of 22 square meters, are to be installed."
"List of the quantities of iron required for a hot-air delousing plant, Auschwitz Concentration Camp."

Total requirement: 4,152 kg.

26.) 3 horse-stable barracks for D.A.W.
27.) 1 residential barrack for supervisory personnel of D.A.W.
28.) delousing plant I for civilian workers
29.) 4 lodging barracks for civilian workers
30.) delousing plant II for civilian workers
31.) 2 toilet barracks for civilian workers
32.) 2 wash barracks for civilian workers.
Construction sum: RM 13,760,000.

Letter from the J.A. Topf & Sons company, Erfurt, to the Central Construction Office with the subject "Crematorium, construction site visit by our Mr. Prüfer": RGVA, 502-1-313, p. 46.
"We received your telegram
'Due to extensive and urgent construction work, the presence of Chief Engineer Prüfer is absolutely necessary every week for 2 – 3 days,'
which we hereby confirm.
Hereupon we inform you that we are gladly prepared to send our chief engineer Prüfer to Auschwitz from time to time for the purpose of inspecting the work there."

The Central Construction Office transmits to the camp commandant the inspection report of Engineer Prüfer dated January 29, 1943, on the state of construction of Crematoria II-V. RGVA, 502-1-313, p. 47.

Headquarters Order No. 4/43 describes procedure for leave requests; moves the time of the taps; reaffirms ban on photography in camp area; explains rules of greeting and salutation; closes Budy branch camp of women's CC to SS men; commends two SS men for prudent conduct as guards; explains rules for reporting to off-duty headquarters members at alarm; requests headquarters members without weapons to receive rifle and ammunition; redefines duty hours at CC headquarters; reminds of duty to attend dental screening; and has a long list of lost items and two found objects. Frei, pp. 213-217

3. "Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in men's camp: 32,357, of whom unfit for labor and deployment: 3,816. AGK, NTN, 134, p. 279; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in women's camp: 10,608, of whom unfit for labor and deployment: 1,772. AGK, NTN, 134, p. 283; transcript by J. Sehn.

Letter from the President of the Kattowitz Police to the district president in Kattowitz with the subject "Typhus cases in the backup police prison in Myslowitz". The situation: 55 sick persons and 62 suspects. By February 2, 1943, 58 inmates had died. APK, RK 2903, pp. 31f.
"The evacuation of the inmates of the backup police prison in Myslowitz to Auschwitz is still being sought and hopefully can be achieved."

Handwritten note by the fitter of the J.A. Topf & Sons company, Erfurt, Heinrich Messing, about missing parts: APMO, BW 30/34, p. 97.
"Fresh air blower No. 450 for Morgue Basement I with intake and discharge connection [and] *throttle valve.*
Exhaust air blower No. 550 for Morgue Basement II with suction and discharge connections and throttle valve
Exhaust blower no. 550 for furnace room with discharge connection [and] *throttle*

damper
Suction and discharge connection for blower 375 for dissecting, wash and laying-out room.
Wood throttle valve for Morgue Basement I."

In a circular letter, training courses in German, shorthand and typewriting are announced for SS members. — Frei, p. 217

4. "Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in men's camp: 32,091, of whom unfit for labor and deployment: 3,875. — AGK, NTN, 134, p. 279; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in women's camp: 10,651, of whom unfit for labor and deployment: 1,776. — AGK, NTN, 134, p. 283; transcript by J. Sehn.

5. "Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in men's camp: 32,423, of whom unfit for labor and deployment: 3,875. — AGK, NTN, 134, p. 279; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in women's camp: 11,046, of whom unfit for labor and deployment: 1,789. — AGK, NTN, 134, p. 283; transcript by J. Sehn.

Letter from the J.A. Topf & Sons company, Erfurt, to the Central Construction Office with the subject "Disinfestation plant, Offer. No. 43/072/1": — RGVA, 502-1-336, pp. 99-99a.
"Politely referring to the discussion between your very honored head of construction Hauptsturmführer Bischoff and Engineer Jährling and our Chief Engineer Prüfer, we submit to you, as requested, a drawing D 60256 for the manufacture of the 2 Topf disinfestation furnaces with double chamber. The 3 drawings on the construction of the disinfestation plant we gave Mr. Prüfer, he will hand over to you shortly when he is there."
The letter contains a detailed description of the disinfestation plant.

J.A. Topf & Sons, Erfurt, to the Central Construction Office. "Cost estimate for a disinfestation plant consisting of 2 furnaces with 4 chambers". The price for one furnace is RM 19,014, including 2 rail cars for freight; each additional rail car comes with an additional cost of RM 582. — RGVA, 502-2-27, pp. 27-30.

Letter from the J.A. Topf & Sons company, Erfurt, to the Central Construction Office with the subject "Aearation and deaeration system in Crematorium II": — APMO, DZ-Bau/2544/2.
"As we have heard through our fitter Messing, individual blowers, throttle valves and part of the piping are still missing. We therefore immediately contacted our plant and were able to learn that these parts were stacked for shipment at another warehouse.
[…]
At the same time we inform you that we have ordered two more furnace fitters, namely Mr. Holick and Mr. Seyffarth, to come there, who have arrived in the meantime. In addition, a locksmith fitter will be coming to Auschwitz shortly so that the installation of the aearation and deaeration system can proceed more quickly.
The cost estimate for the large ring-cremation furnace will be in your hands by Tuesday of next week at the latest. If the purchase is planned, please place your order as soon as possible, so that we can order or manufacture the cast- and wrought-iron parts immediately."

The 188-page directory "WL – *Schlosserei*" begins with this date, in which orders No. 1-1870 are noted; the execution of the last order on the last page is dated November 18, 1944. — APMO, Höss Trial, Vol. 11a, pp. 79-97.
The directory was examined by the investigating judge Jan Sehn, who transcribed

the orders for the crematoria (with mixed German and Polish entries).

Request of the camp physician of PoW Camp Birkenau to the camp commandant for a toilet barrack in Construction Section II of Birkenau. — RGVA, 502-1-26, p. 107.

Construction Office of the Waffen-SS and Police Auschwitz U/S.-Oswiecim. Work card. Order No. 183/301. To electricians:
"For Crematorium III PoW camp B.W. No. 30a the following work is to be carried out:
Mounting of the lightning conductor system on the chimney, including grounding.
Started: 21 June 43. Finished: 22 June 43." — RGVA, 502-1-315, p. 22.

Letter from the Central Construction Office to the Reichsbahn Central Office Berlin with the subject "New construction of a private siding for the Waffen-SS prisoner of war camp with connection to Auschwitz station, application for supply of permanent way materials":
"The construction project of the Waffen-SS Prisoner-of-War Camp at Auschwitz is important to the war effort and is included in the defense district's priority list under VIII Up a 2. Justification.
The siding must meet the following requirements:
1. access of all building materials still missing for the expansion of the camp;
2. access of all food and materials for camp operations (heating fuel, clothing, linen, and furnishings);
3. direct access for admission transports. — RGVA, 502-1-186, pp. 244-246.

It is noted that these tasks cannot be accomplished at all with existing motor vehicles."
Transportation of the materials required for item 1. will require 8,865 rail cars or 35,460 truckloads.
"Regarding 2.) When the camp is fully occupied, 50 truck trips per day are required to bring the food, clothing, and lodging items to the camp. […]
Regarding 3.) At the moment, an average of 4 transports of 30 rail cars each arrive at the camp. Since these transports will continue for some time, an average of 120 rail cars per day can be expected.
From the above it is clear that initially a daily vehicle movement of 150-160 rail cars is to be expected, and that later at least 20 rail cars will have to be loaded."

A circular announces a compulsory training evening for SS officers and NCOs as well as a cultural evening on "Goethe – serious and cheerful". Frei, p. 219

10. "Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in men's camp: 32,068, of whom unfit for labor and deployment: 4,473. AGK, NTN, 134, p. 279; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in women's camp: 11,017, of whom unfit for labor and deployment: 1,816. AGK, NTN, 134, p. 283; transcript by J. Sehn.

Central Construction Office. "File memo on barracks and solid buildings currently used for storing effects": RGVA, 502-1-26, pp. 73f.
"The erection of the 30 pieces of effects barracks requested for PoW camp. was begun immediately after approval by the Supreme Command of the Army and delivery of the same. At the present time 25 pieces of effects barracks have been erected and the carpentry work for the remaining 5 pieces will be completed in about 14 days. It should be noted that the remaining 5 barracks have wooden floors and can be used immediately after installation. Placement of the floor of the 25 horse-stable barracks will begin tomorrow.
It is expected that in the next 14 days another 10 of these already erected barracks will be ready for use.
At present the following barracks and buildings are available to the administration for storing effects:

1	*At Sonderkommando 1*	*3 pcs horse-stable barracks*
2.	*" " 2*	*3 " " "*
3.	*Effect barracks between Block 25 and 26 at CC*	*1 " " "*
4.	*Behind DAW*	*5 " " "*
5.	*In the stable yard behind DAW, of which only 3 are occupied*	*5 " " "*
6.	*At women's CC Birkenau*	*3 " " "*
7.	*Furthermore, effects are currently stored in the ancillary kitchen in the women's CC*	*1 " " "*
8.	*In Construction Section II PoW Camp were provided for the storage of effects, 5 pieces of which are occupied with effects, 5 pieces with lodging objects.*	*10 " " "*

Thus, there are currently 31 horse-stable barracks in use for storing effects and lodging objects, not including the following solid buildings and blocks, which are also occupied by effects:"
The subsequent list, which includes the theater building, shows a total area of 4,306 square meters. The area of the 31 horse-stable barracks mentioned above is 12,090 m², and the total area is 16,396 m².

In a circular letter all SS members are offered a cultural evening of European artists in the es *Kameradschaftsheim*. Frei, pp. 220f.

11. "Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in men's camp: 32,013, of whom unfit for labor and deployment: 4,640. AGK, NTN, 134, p. 279; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in women's camp: 10,613, of whom unfit for labor and deployment: 1,825. AGK, NTN, 134, p. 283; transcript by J. Sehn.

SS-WVHA. Letter from the chief of Office C VI (SS-Standartenführer Eirenschmalz) to the chief of Office Group C with the subject "Auschwitz CC. Disinfestation and Sauna Facilities in the Men's CC and Women's CC." RGVA, 502-1-332, pp. 37f.
"On 2 Feb. 1943 an inspection of the disinfestation and sauna facilities in Auschwitz CC was carried out by SS-Hauptsturmführer Kother.
1.) Disinfestation facilities. The hot-air devices installed there […] *were intended for hydrogen-cyanide disinfestation and, according to the ban on hydrogen-cyanide disinfestation*[14] *were then used for hot-air disinfestation."*
Hydrogen-cyanide equipment operates at a temperature of +30°C, hot-air equipment at +95°C, so the existing equipment overheated, causing the fires that occurred.
"The daily increase in the number of prisoners in protective custody causes increased stress on the equipment, and the only way to counteract the wear and tear caused by continuous use is to install suitable coke-fired air heaters."
"2.) Sauna facilities in the women's CC, men's CC, and troop saunas.
The sauna facilities erected in the prisoner camps are also subject to wear and tear due to daily uninterrupted operation, and require urgent repair."

Letter from the Central Construction Office to the J.A. Topf & Sons company, Erfurt, with the subject "Disinfestation plant in PoW Camp (solid construction) BW 32": RGVA, 502-1-336, p. 79
"Order No. 148.
On the basis of the above estimate, the undersigned department entrusts you with the delivery and carrying out of a disinfestation plant consisting of 2 furnaces with 4 chambers and 6 carts at a total price of RM 39192. The price is for the ready-to-operate plant including a trial heating period of one week, during which time the operating personnel is to be trained by your staff. Furthermore, 3 pcs. of operating instructions with 3 drawings are to be provided at or before handover. Operating instructions with 3 drawings, sufficiently explained, are to be submitted."

Letter from the Central Construction Office to the J.A. Topf & Sons company, Erfurt, with the subject "Waste incineration furnaces for Crem. III, PoW Camp (5 x 3-muffle furnaces)": APMO, BW 30/34, pp. 88f.
"Order No.: 149
On the basis of your offer of 5 Feb. 1943, the order already placed verbally for the delivery and construction of a refuse-incineration furnace for Crematorium III in PoW Camp Auschwitz
is confirmed. The total amount of the fixed and finished furnace including the smoke duct is: RM 5791.- […].
The delivery of the required materials is to be carried out in such a way that the furnace is completed together with Crematorium III on the agreed date of April 10, 1943."

Letter from the Central Construction Office to the Topf Company, Erfurt, with the subject "Crematorium III – PoW Camp – Auschwitz-U/S": APMO, BW 30/34, pp. 90f.
"The commissioning of the entire plant [Crematorium III] *must certainly take place on April 10, 1943.*

---

[14] See the entry for June 5, 1940.

The Central Construction Office expects that by meeting the deadline for this plant you will make up for the shortcomings in the deliveries of furnaces for Crem. II PoW Camp. For example, on 21 Jan. 1943 you wrote that all the materials for the aeration and deaeration system would be shipped on 22 Jan. 43. When the rail car arrived, these parts were missing, so that your fitter Messing could not proceed. On the phone, your Herr Prüfer said that all materials had gone off. On complaining again, another gentleman said that the remaining materials were not ready. […]
Now a consignment note is received with dispatch advice dated 6 Feb. 1943. After examination of the same and consultation with your fitter, it is found that a blower No. 450 with 3.5 HP motor is again missing, and of all things the blower for M.[orgue] *Basement I, which is most urgently needed. Also, 1 7.5 hp motor for No. 550 exhaust blower for M.*[orgue] *Basement II."*
The Central Construction Office requests that this equipment be shipped immediately, "otherwise [the] plant cannot be put into operation."

12. "Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in men's camp: 31,327, of whom unfit for labor and deployment: 4,273. AGK, NTN, 134, p. 279; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in women's camp: 10,493, of whom unfit for labor and deployment: 1,831. AGK, NTN, 134, p. 283; transcript by J. Sehn.

Letter from the J.A. Topf & Sons company, Erfurt, to the Central Construction Office with the subject "Crematorium II and III PoW Camp": APMO, BW 30/34, p. 84.
"The receipt of your telegram of the 10th of this month reading:
'For Crematorium III PoW Camp, 5 times three-muffle furnaces, the order already placed for the entire machine equipment, including 2 pieces of final corpse elevators and a provisional ash-transport device deliverable at short notice, is reconfirmed. You are therefore to supply and erect the C III plant in its entirety. It is expected therefore that now all efforts are made to immediately finalize the shipment of all machine parts and to dispatch it. Commissioning of the complete plant must certainly take place by 10 April 43.'
we hereby confirm. In this connection, we would like to note that the delivery of the 5 three-muffle furnaces, as already agreed with our Chief Engineer Prüfer, will certainly take place on March 20. Confirmation of the order for the 2 electric corpse elevators and the Demag elevator will follow."
In reference to the Central Construction Office inquiry of February 11, 1943, the Topf Company states:
"Blower no. 450 arrived for shipment on 8 Nov. 42 and blower no. 450 (wood blower) on 25 Jan. 43. The 7.5 HP motor was still missing for the latter blower, about which we reminded our supplier already on several occasions – by telephone and telegraph. Therefore, we decided to send a 10 HP motor with the same speed by express freight to you. This motor could then be exchanged later. We took this measure so that the commissioning of the plant would not be called into question by the absence of the motor."
This is followed by a note from Rudolf Jährling, which states:
"According to the fitter Messing, the blower [no. 450 (wood blower)] *is not included but blower no. 375."*

Letter from the Central Construction Office to the camp commandant, SS-Obersturmbannführer Höss, with the subject "Crematorium VI": APMO, BW 30/34, p. 80.
"With reference to the discussion between the undersigned and Engineer Prüfer of the Topf and Sons Company on 29 Jan. 43, the planning of a 6th crematorium (an open-incineration chamber with dimensions of 48.75 x 3.76 m) was considered. The Central

Construction Office had then commissioned the Topf and Sons Company to prepare a design for this open cremation site, which is enclosed.[15]
Should the construction of this 6th crematorium be carried out, it is requested that an appropriate application be submitted by Office Group D to Office Group C.
In the event that this facility is carried out, in addition to the manpower now in service, new manpower must be provided by the headquarters. The following are required for this purpose:
150 prisoner masons
200 prisoner construction workers.
Carrying out the construction work is dependent on the provision of the aforementioned labor force."

Letter from the Central Construction Office to the Head of Office Group C of the SS-WVHA with the subject "Increase of Typhus Diseases": RGVA, 502-1-28, p. 225; 502-1-332, p. 108.
"As a result of a strong increase in typhus cases among the guards, SS-Brigadeführer and Major General of the Waffen-SS Glücks imposed a total camp lockdown on Auschwitz CC on February 9, 1943. In connection with this, since 11 Feb. 43 all prisoners have been disinfested and are not allowed to leave the camp, which means that the construction works, on which mainly prisoners were employed, had to be shut down. The resumption of work will be reported by the Central Construction Office."

SS-WVHA. Letter from the head of Office Groups C to the camp commandant of Auschwitz CC with the subject "Sanitary facilities in the Buna Branch Camp": RGVA, 502-1-332, p. 260.
"The proposal of SS-Obersturmführer Dr. Entress was brought to my attention by SS-Obersturmbannführer Maurer.
The establishment of a hospital with operating room, diet kitchen, etc. is out of the question. The Buna Branch Camp is a labor camp. Sick and incapacitated prisoners are to be transferred to the Auschwitz Camp, sick SS men to the SS infirmary of the Main Camp. Only a small infirmary for outpatient treatment is to be maintained. Likewise, there is no need to establish a crematorium. In case of deaths, the crematorium of Auschwitz CC is to be used. The permanent presence of a physician is omitted. There is to be a consultation hour in the morning and afternoon. This is the procedure in all labor camps."

Central Construction Office. Memorandum with the subject "Failure of inmate units to go to work on 11 and 12 February 1943": RGVA, 502-1-26, p. 37; 502-1-21, p. 31.
"On the occasion of a prisoner delousing of all units, which was carried out and is currently still continuing, the units requested by the local office were only able to go to work partially or not at all on February 11 and 12, 1943."
Information about other inmate units follows.

Letter from SS-Obergruppenführer and Major General of the Waffen-SS Pohl with the subject "Working hours for all field offices of the SS-W.V.H.A.". Since March 1, 1943, the weekly working time has been 53 hours. RGVA, 502-1-1, p. 317.

J.A. Topf & Sons, Erfurt. Internal memo from engineer Fritz Sander: Schüle, p. 456
"In the matter of: Central Construction Office of the Waffen-SS, Auschwitz /Ost-Oberschl.
Subject: Aeration and deaeration system.
17 Feb. 43 Mr. Schulze calls and informs of the following:
1). Aeratio blower no. 450 for the gas cellar cannot be found there, although it is said to have left with us. In the meantime, Mr. Heinemann has determined that the blower actually left on November 18, 1942, so it should actually be in stock there. However, according to Mr. Schultze, it cannot be found and is urgently needed, so we should immediately ship it again and manufacture it faster.
2). There are still 20 pieces of hand winches missing from the company Schiess-Defries, which are urgently needed. Our purchasing department had already recently sent a reminder to the delivery company, and Mr. Schultze urgently requests that we call again and arrange for their immediate shipment to Auschwitz.
3). Furthermore, the ventilation grilles for the deaeration system in the dissection and laying-out room are missing, as well as the nozzles for the ducts in the M.[orgue] *basement. These should also be sent immediately.*
4). Mr. Prüfer then spoke and informed us that he would have to remain in Auschwitz for a few more days. Mr. Schultze will return in such a way that he will be here again on Friday afternoon."

Letter from the Central Construction Office to the *Deutsche Ausrüstungswerke*, Auschwitz, with the subject "Follow-up order for Crematorium II BW 30": APMO. BW 30/34, p. 76.
"For a structural modification of the above-mentioned building, a 2-leaf entrance door 'to the basement', wall clearance 185/275 with fanlight, is to be urgently supplied in accordance with the drawing provided by the Central Construction Office No. 1341."

X-ray book No. 10 of the prisoner infirmary of Auschwitz CC begins with this date. It runs from February 18 to March 18 and contains entries numbered 18885 to 19826. APMO, D-AuI-5/9. ISD, folder 67n.

Letter from the Central Construction Office to the SS-WVHA, head of Office Group C, with the subject "Rise of Typhus":
"With reference to the above letter [of 12 Feb. 1943]*, the Central Construction Office dutifully informs that the disinfestation of the prisoners has been carried out and work resumed on 16 Feb. 1943."* RGVA, 502-1-332, p. 106; 502-1-28, p. 216.

Construction Office of the Waffen-SS and Police Auschwitz. Work card, order no. 200/4 to paint shop:
"For Crematorium II, PoW Camp BW N° 30, the following work is to be carried out: Whitening of all rooms of the crematorium.
Started: 18 Feb. 43. Finished: 23 Feb. 43." RGVA, 502-1-314, p. 26.

A circular announces the performance of an operetta at the *Kameradschaftsheim*. Frei, p. 223

Headquarters Order No. 5/43 mentions the result of a collection for the Winter Relief Charity; recalls that SS members newly transferred to Auschwitz are to be instructed on special CC regulations and conditions:
"In this instruction, it is to be pointed out that in particular offenses of milit. disobedience (forbidden contact with prisoners, sexual intercourse with prisoners, etc.) and milit. theft (appropriation of property) are to be punished. Theft (appropriation of prisoner effects or effects of new arrivals) will be punished only by the SS and police court."
The order explains a newly established camp garbage service; points out rules regarding rations on official trips, etc.; commends one SS member for thwarting escape, another as an honest cash finder; announces a bicycle roll call; lists two lost and three found objects. Frei, pp. 224-226

19. "Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in men's camp: 31,465, of whom unfit for labor and deployment: 4,750. AGK, NTN, 134, p. 280; transcript by J. Sehn.

Central Construction Office. Order No. 103. crematorium BW 20:
"Przedmiot [Subject]*: Protective grids in front of the deaeration holes made of 10 mm Ø iron according to the attached sketch. Order Nn. 2575 of 3 Feb. 43 from the Central Constr. Off. Order taken over from the former inmate locksmith shop. Ukończono* [Finished]*: 15 March 43."* APMO, Höss Trial, Vol. 11a, p. 84.

Central Construction Office. Order No. 109, PoW Camp B.W. 30b:
"Przedmiot [Subject]*: 4 tight doors, with door lining – according to Construction Office information dimensions 100 x 205 cm high. Order no. 2261/80/17 of 18 Jan. 43 from the Central Construction Office. Order taken over from the former prisoner carpenter's workshop."* APMO, Höss Trial, Vol. 11a, p. 84.

Special Headquarters Order No. 2[/43] establishes new hours of service for the headquarters. Frei, p. 226

A circular commemorates the demise of the 6th Army at Stalingrad and calls for donations. Frei, pp. 226f.

20. "Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in men's camp: 31,266, of whom unfit for labor and deployment: 4,905. AGK, NTN, 134, p. 280; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in women's camp: 10,608, of whom unfit for labor and deployment: 1,818. AGK, NTN, 134, p. 283; transcript by J. Sehn.

Letter from the Central Construction Office to headquarters Auschwitz CC, Dept. IIIa, with the subject "Inmate deployment at Dept. Above-Ground Construction I": APMO, BW 30/34, p. 74.
"It is requested that the units for the buildings Crematorium II and III PoW Camp (BW 30 and 30a), as well as the inmate unit Yard Barn Birkenau be sent out in full strength, in accordance with the request of the Central Construction Office. At Crematorium II, the unit was only 40 prisoners strong instead of 200 on 18 Feb. 43, and only 80 prisoners strong instead of 200 on 19 Feb. 43. Since this is particularly urgent work, it is absolutely necessary to insist on the requested number."

SS Economic and Administrative Main Office, head of Office Group D – Concentration Camps, to the camp commandants of all CCs with the subject "Processing and recording of deaths": PS-3677.
"Enclosed I am sending an age classification for deaths. According to this pattern, all deaths occurring each month from the first to the last of the month are to be recorded exactly. The final numbers must necessarily correspond to the number of deaths indicated on the report of the protective-custody camp. The classification shall be made for the first time for the deaths of the month of February 1943, and shall be submitted here together with the protective-custody report.
The Chief of the Central Office
sgd. Liebehenschel, SS-Obersturmbannführer."

I.G. Farbenindustrie A.G. "Weekly Report No. 90/91, Part I, for the Period 8-21 Feb. 1943": NI-15256/5.
"10 Feb. Visit by Obersturmbannführer Maurer. The numerical reinforcement of Camp IV was discussed. Obersturmbannführer Maurer promised to increase the number of inmates to 4000, possibly 4500 prisoners in the near future. The use of these quantities, in view of the small number of posts, can only be accomplished with employment behind factory fences and conversion of the terrain. It was therefore decided to fence in the entire synthesis section. Further, Obersturmbannführer Maurer agreed that all weak prisoners could be transferred, so that the guarantee of almost full performance could be extracted, comparable with a German unskilled worker."

22. "Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in men's camp: 30,933, of whom unfit for labor and deployment: 4,929. AGK, NTN, 134, p. 280; transcript by J. Sehn.

Letter from the SS garrison physician to the SS-WVHA, Office Group D, chief of Office D III, with the subject "Fighting Typhus in Auschwitz CC": RGVA, 502-1-68, pp. 115-116.
"As already reported, after the typhus epidemic in Auschwitz CC had been practically extinguished in the months of November and December, there has been a renewed increase in typhus cases both among the inmates of Auschwitz CC, and among the SS troop members due to the transports arriving from the East. Despite immediate control measures, it has not yet been possible to completely eradicate typhus.
After consultation with the camp commandant, SS-Obersturmbannführer Höss, the labor-deployment leader, SS-Obersturmführer Schwarz, as well as the first leader of the protective-custody camp, SS-Hauptsturmführer Aumeier, the SS garrison physician Auschwitz considers it necessary, in the interest of increasing the use of labor in the war-important and war-decisive factories of Auschwitz CC, to try once again, with all available means, to finally extinguish the typhus illnesses."
He proposes to take drastic measures to eradicate the epidemic once and for all, the most important measure being a general disinfestation:
"With the exception of the few vital units (food enterprises, agricultural workers caring for livestock, and office personnel), the entire work force in the large camps of Auschwitz CC, namely Main Camp, men's CC and women's CC – Birkenau, and PoW Camp, Construction Section 2, would be closed for a period of 3 weeks. During this time, thorough delousing and disinfestation of these camps will be carried out twice, so that at the end of the 3-week quarantine period, there will be no more talk of lice in the camp, and the danger of renewed typhus infections will be eliminated."

26. "Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in men's camp: 28,904, of whom unfit for labor AGK, NTN, 134, p. 280; transcript

"Overview of inmate deployment at CC Auschwitz U/S. Month of February 1943." Occupancy. Total number in women's camp: 10,031, of whom unfit for labor and deployment: 1,973. — AGK, NTN, 134, p. 283; transcript by J. Sehn.

Letter from the Central Construction Office to the J.A. Topf & Sons company, Erfurt, with the subject "PoW Camp = Crem. II and III BW 30 (electr. elevators)": — APMO, BW 30/34, p. 69.
"Order No.: 155.
On the basis of the above cost estimate [of February 22, 1943]*, the orders already placed verbally with your Herr Chief Eng. Prüfer are hereby confirmed in writing:*
Delivery and installation of:
1. 2 complete electrically operated elevator machines incl. electric motors for three-phase current 220/380 V, each 7.5 HP in special design, with motor-protection switches, overrun switches, brake units, otherwise as listed in the above cost estimate. Prices of RM 9371.-- each = RM 18742.--.
The delivery time was agreed to be approx. 7 months, which is to be shortened as much as possible. […]
2. 1 Patent Demag electric hoist for 750 kg load capacity, single rope, which can be increased to 1500 kg load capacity by installing the 2nd rope, at a price of RM 968.--. This Demag electric hoist is to be delivered immediately, as it must be used until the elevators mentioned under item 1 arrive."

Letter from the Central Construction Office to the SS-WVHA, the chief of Office C V, with the subject "Labor Deployment Auschwitz. Compensation for lost work hours by ordering a special action." — Bartosik, Doc. 72, p. 251.
"In the above-mentioned letter [of 29 Dec. 1942]*, the Central Construction Office requested notification of the titles and chapters to which the costs incurred as a result of a special action carried out among the inmates and civilian workers deployed at the various buildings are to be charged. This matter was already discussed by telephone last week, and it was promised to be settled immediately. In the interest of a smooth business transaction, we ask to be informed as soon as possible."*

March 1943

1. "Overview of inmate deployment at CC Auschwitz U/S. Month of March 1943." Occupancy. Total number in men's camp: 28,554, of whom unfit for labor and deployment: 3,913. — AGK, NTN, 134, p. 280; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of March 1943." Occupancy. Total number in women's camp: 10,016, of whom unfit for labor and deployment: 1,828. — AGK, NTN, 134, p. 283; transcript by J. Sehn.

SS-Brigadeführer and Major General der Waffen SS Kammler establishes a "Construction Operations Office of the Waffen-SS at the Administration of the Auschwitz CC," which is subordinate to SS-Oberscharführer Hatzinger (civil engineer), "in order to ensure construction maintenance and construction needs in the area of the Administration of the Auschwitz CC in a technically and economically expedient manner." — RGVA, 502-1-1, p. 280.

Central Construction Office. "File memo about inmate deployment in the PoW Camp": — RGVA, 502-1-67, pp. 161-164.
"Based on a discussion between the camp commandant, SS-Obersturmbannführer Höss, and the head of the Central Construction Office, SS-Sturmbannführer Bischoff, in addition to the prisoners already deployed in the PoW Camp, more units were to be requested, since several thousand prisoners were not being used in the camp. By letter

from the Central Construction Office, Corr.Reg. No: 22690/43/Ja/L., dated 7 Feb. 1943, the following prisoner commandos were therefore additionally requested anew:
[…]
4.) Fence-building unit II at Crematorium II and III
60 unskilled inmate workers and 20 inmate bricklayers.
5.) Fence-building unit III at Crematorium IV and V
60 unskilled inmate workers and 20 inmate bricklayers."
A Central Construction Office summary for 5 units from February 6-27, 1943, indicates that the number of inmates requested was far below the number assigned.
"Today the camp commandant, SS-Obersturmbannführer Höss, convinced himself that the requested units could not be provided, because there were not enough inmates in the camp who were fit for work. […]
On this occasion, it was also stated by the leader of labor service, SS-Uscha Emmerich, that a large part of the inmates refuses to work by pretending to be sick when they are marched out, and then running around again in the camp. Furthermore, a considerable number of them drop out overnight, so that the individual units become smaller and smaller."

2. "Overview of inmate deployment at CC Auschwitz U/S. Month of March 1943." Occupancy. Total number in men's camp: 28,381, of whom unfit for labor and deployment: 4,138. — AGK, NTN, 134, p. 280; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of March 1943." Occupancy. Total number in women's camp: 9,925, of whom unfit for labor and deployment: 1,837. — AGK, NTN, 134, p. 283; transcript by J. Sehn.

Central Construction Office. Plan "Disinfection and disinfestation plant in PoW Camp Auschwitz", drawn by prisoner No. 538, Leo Sawka. — APMO, Neg. No. 20930/8.

Letter from the Central Construction Office to the SS-WVHA, head of Office Group C, with the subject "Installation of Disinfestation Barracks" [*recte*: effects barracks]: — RGVA, 502-1-336, pp. 77-78.
"Enclosed, the Central Construction Office submits a file from which the inadequate conditions concerning the storage of prisoner effects can be seen.
As can be seen from the letter by the Central Construction Office to the Commandant of CC, everything has been done on this side to create storage facilities for the accumulating effects. If the accumulating articles of clothing and other items from the transports are piled up in the open, it is merely due to the improper storage of the same, which is the concentration -camp administration's business. If a large part of the effects stored in the open is now lost due to the effects of the weather, then this office is completely blameless in this. […]
In particular, it is pointed out that the effects in the available barracks are not stored properly, but are thrown into piles. Due to improper storage, it is very easy for the effects to ignite and cause a fire, which can have unforeseeable consequences."

Letter from the J.A. Topf & Sons company, Erfurt, to the Central Construction Office with the subject "Crematorium, gas testers": — RGVA, 502-1-313, p. 44.
"We acknowledge receipt of your telegram, reading:
'Immediately send 10 gas testers as discussed. Submit cost offer later.'
We would like to inform you that 2 weeks ago we already asked 5 different companies for the indicator devices for hydrogen cyanide residues you requested. We have received refusals from 3 companies, and a reply from 2 others is still pending. When we receive communication on this matter, we will come closer to you immediately so that you can contact a company that builds these devices."

Letter from the Central Construction Office to the SS-WVHA, the chief of Office C V, with the subject "List of ration coupons for 32 sqm hardwood boards and 60 — RGVA, 502-1-336, p. 40.

kg glue for disinfestation plant BW 32 PoW Camp":
"The Topf and Sons Company, Erfurt, is requesting ration coupons for 32 square meters of hardwood boards and 60 kg of glue for the production of 8 double doors for the disinfestation chambers. It is requested to apply to the Raw-Materials Office – Personal Staff – for the ration coupons and to send them to here. The local office will send them to the Topf Company, Erfurt, after accounting for them."

Construction Office of the Waffen-SS and Police Auschwitz U/S.-Oswiecim. Work card. Order No. 286. PoW Camp. BW. 30b. To the installers:
"For Crematorium 4 & 5 in PoW Camp, BW 30 B & C, the following work is to be carried out:
Implementing sanitary installation. Started: 15 March 1943. Finished: 23 April 1943.
653 skilled worker hours
163 unskilled worker hours."
RGVA, 502-2-54, p. 38.

Telex from SS-WVHA, SS-Obersturmbannführer Arthur Liebehenschel, to the Commandant Auschwitz CC, with the subject "Evacuation of Jews":
"As known there, the transports of Jews from Berlin will begin on 1 March 43. It is pointed out once again that these transports include about 15,000 healthy Jews who are completely fit for work and who have so far worked in the Berlin armaments industry. Every effort must be made to ensure that they can continue to work."
APMO, D-Aul-3a/p. 85a.

Letter from the Central Construction Office to the headquarters, Dept. III, with the subject "Provision of female office workers (steno typists) for the administration dept. of the Central Construction Office Auschwitz": — RGVA, 502-1-256, p. 163.
"The Central Construction Office has requested in the above-mentioned letter [dated March 6, 1943] *the assignment of an additional 4 female inmates (steno typists). The office here requests that, if possible, only Reich German prisoners be considered for the requested women."*

Central Construction Office. File memo with the subject "Water Connection and Commissioning of the Disinfestation Barracks in the Civilian Workers' Community Camp": — RGVA, 502-1-149, p. 351.
"This morning the entire shower system in the disinfestation barracks, including the rest of the water supply of the communal camp, was put into operation on a trial basis. The water supply is provided by a centrifugal pump with an hourly capacity of 23,000 liters, which can be started up with an automatic float switch. The pump delivers the water from the well, which is equipped with filter pipes, directly into the pressure line as well as into the reservoir (1500 l capacity). During the 70-minute test operation, all showers were opened without the help of the hot-water boilers. It was perfectly established that there was sufficient water available at sufficient pressure even for the maximum demand."

Construction Office of the Waffen-SS and Police Auschwitz. Work card. Order No. 238. To the roofers: — RGVA, 502-1-36, p. 441.
"For storage barracks for effects PoW Camp, Con. Sect. II, BW. 33 the following work is to be done:
Tiling of 30 pieces of horse-stable barracks in Con. Sect. II PoW Camp with existing material.
Started: 9 March 43. Finished: 4 May 43."
The work required 1,425 man-hours.

"As of Monday, March 15, 43, the working hours of the prisoners will be as follows: from 6 a.m. to 12 p.m.
" 1 p.m. " 5.30 p.m." — RGVA, 502-1-31, p. 4.

Letter from the Central Construction Office to *Tarnowitzer Eisen- und Baustoffhandel* (Iron and Construction Material Monger Tarnowitz) with the subject "Delivery of fireclay powder for BW 30 PoW Camp [Crematorium II]": RGVA, 502-1-313, p. 42.
"With reference to the personal conversation held with your Mr. Bracht, the Central Construction Office of the Waffen-SS and Police Auschwitz requests that another rail car of fireclay flour or fireclay mortar be called for immediate delivery."

Letter from the Central Construction Office to the Commandant of Auschwitz CC with the subject "Coke consumption for crematoria II, III, IV + V PoW camp," Written by civilian employee Rudolf Jährling: APMO. BW 30/34, p. 67 *Ibid.*, p. 68.
"Enclosed is a file memo on the estimated coke consumption in the above crematoria for your kind attention."
"File Memo
Subject: Estimate of coke consumption for crematorium II PoW camp according to information provided by the Topf company (builder of the ovens) on 11.3.43.
10 firings = 350 kg/stdl.
In 12 h = 12 · 350 = 4200 kg. 2 crematoria therefore 8400 kg.
In continuous operation, this quantity decreases considerably, so that 2/3 of the quantity can be calculated. For crematoria II and III, consumption in 12 hours

$$= \frac{350 \cdot 12}{3 \cdot 2} = 2800 \cdot 2 = 5600 \text{ kg.}$$

Crematorium IV + V:
with 4 furnaces each together =

$$\frac{350 \cdot 4}{3 \cdot 2} = 932 \cdot 2 = 1864 \text{ kg in 12 hours.}$$

Crematorium	*II*	=	*2800 kg*
"	*III*	=	*2800 kg*
"	*IV*	=	*932 kg*
"	*V*	=	*932 kg*
together			*8264 kg in 12 hours*

These are peak performances! An annual requirement cannot be given, since it is not known in advance how many hours or days heating is required."

Letter from the Central Construction Office to the headquarters, Department III a, with the subject "Restocking of Prisoner Units Reduced by Departure." On February 16, 1943, the Central Construction Office sent Department III a list of the names and numbers of the prisoners employed by it with the request that they not be transferred. — RGVA, 502-1-256, p. 162.
"Nevertheless, during the last transports, a larger part of skilled workers has been withdrawn, so that some units have been very much reduced."
The following are needed to complete the units: bricklayers, concrete workers, painters, electricians, carpenters, technicians.

Central Construction Office. Order No. 271/15 for the Painting Column of the Central Construction Office with the subject "PoW camp Crematorium II BW. No. 30". — RGVA, 502-1-314, p. 24; *ibid.*, p. 25.
"Painting of all windows of the cremation room and adjoining rooms with blue or black blackout paint (dissecting room with white paint to prevent viewing from outside up to the top rung)."
"Delivery time: urgent".
The corresponding work card is dated March 17, 1943. Dates:
"Started: 24 April, finished: 30 April 43."

17. "Overview of inmate deployment at CC Auschwitz U/S. Month of March 1943." Occupancy. Total number in men's camp: 29,982, of whom unfit for labor and deployment: 3,521. — AGK, NTN, 134, p. 280; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of March 1943." Occupancy. Total number in women's camp: 13,584, of whom unfit for labor and deployment: 2,094. — AGK, NTN, 134, p. 284; transcript by J. Sehn.

Letter from the Central Construction Office to the J.A. Topf & Sons company, Erfurt, with the subject "Disinfestation plant PoW Camp, BW 32": — RGVA, 502-1-336, p. 42.
"In the drawing D 60283 sent to the office here by letter of February 26, 1943, the weight specification of a disinfestation furnace is missing, which is required for the static calculation of the foundation pit. You are requested to supply this information as soon as possible."

Letter from the Central Construction Office to Konrad Segnitz, Construction Company, Beuthen, with the subject "PoW Camp. Disinfestation Plant, BW 32": — RGVA, 502-1-336, p. 45.
"Enclosed you will now receive the final plans for Building 32 (disinfestation plant), viz.
No. 2151 dated 1 March 1943,
No. 2157 of 8 March 1943,
No. 2183 dated 2 March 1943 [sic]
with the request to correct the already started static calculation according to the new plans, and to return the plans no. 1841, no. 1845, no. 1850 sent to you by letter of 7 Dec. 1942 together with the confirmation to the local office."

Letter from the Central Construction Office to Ingenieurbüro Badzura, Bytom, with the subject "Preparation of structural calculations and reinforcement drawings for BW 32 (PoW camp. disinfestation plant)": — RGVA, 502-1-336, pp. 46-47.
"Order No. 166.
The local office entrusts you with the preparation of static calculations, implementation drawings and bending plans for
the concrete floor and perimeter walls of the watertight tank of the boiler room,
the solid slab above the boiler room,
the floor slab and perimeter walls of the watertight foundation pit of the disinfestation furnace, and
the reinforced concrete window and door lintels
of the above structure.
The information about the ground conditions and loads can be seen from drawings no. 2151, no. 2159, no. 2183, no. 2184 attached in the appendix. The highest groundwater level is assumed to be 0.30 m below upper edge of the terrain.
The silt layer found at a depth of -2.50 to -3.80 m will be excavated and replaced by slurried pit gravel, so that a permissible load of 1.0 – 1.5 kg/m² can be expected on the building ground below the basement floor."

Letter from the German Railway, Board of the Railway Management Office Auschwitz, to the Central Construction Office with the subject "Relocation of the ramp for special transports of the camp": — RGVA, 502-1-186, p. 217.
"The hump yard operation at the west end of Auschwitz Station requires an accessible pull-out track west of the hump yard. However, this is obstructed by the ramp for transports for the camp, which was built by you. I request that the ramp be moved 150 meters in the direction of Dzieditz, so that the hump yard operation will not be impeded."

Construction Office of the Waffen-SS and Police Auschwitz. Work card, order no. 271/15 to paint shop: — RGVA, 502-1-314, p. 25.
"For PoW Camp, Crematorium I, BW. No. 30, the following work is to be carried out: Painting of all windows of the cremation room and adjoining rooms with blue or black blackout paint.
Started: 24 April. Finished: 30 April 43.
24 skilled labor hours."

APMO, BW 30/34, p. 54.

"File Memo
Subject: Estimate of coke consumption for crematorium II PoW camp according to information provided by the Topf company (builder of the ovens) on 11.3.43.
10 firings = 350 kg/stdl.
In 12 h = 12 · 350 = 4200 kg. 2 crematoria therefore 8400 kg.
In continuous operation, this quantity decreases considerably, so that 2/3 of the quantity can be calculated. For crematoria II and III, consumption in 12 hours
$= \frac{350 \cdot 12}{3 \cdot 2} = 2800 \cdot 2 = 5600$ *kg.*
Crematorium IV + V:
with 4 furnaces each together =
$\frac{35 \cdot 4 \cdot 12}{3} \cdot 2 = 1120 \cdot 2 = 2240$ *kg in 12 hours (1 day of operation).*

Crematorium	*II*	=	*2800 kg*
"	*III*	=	*2800 kg*
"	*IV*	=	*1120 kg*
"	*V*	=	*1120 kg*
together			*7840 kg in 12 hours (1 day of operation)*

These are peak performances! An annual requirement cannot be given, since it is not known in advance how many hours or days heating is required."
In this memo, Jährling corrected the erroneous information on Crematoria IV and V in the memo of March 12.

APMO, Höss Trial, Vol. 11a, p. 87.

Central Construction Office. Order No. 192 Central Construction Office. PoW Camp, Crematorium III-BW 30a:
"Przedmiot: [Subject…] *5/ 45 pieces of protective grids for the deaeration holes made of round iron Ø 10 mm.*
6/ 95 pieces of zinc sheet sieves 7 x 19 cm/: f. Basement 1. delivery time: urgent. Const.Office order no. 83 dated 14 March 43. Wykonawcy [executor]*: Dyntar, Puzyger, Durski, Kostkowski. Ukończono* [finished]*: 22 March 43."*

"Overview of inmate deployment at CC Auschwitz U/S. Month of March 1943." Occupancy. Total number in women's camp: 13,650, of whom unfit for labor and deployment: 2,008.

APMO, D-Aul-5/10. ISD, folder 67e.

X-ray book No. 10 of the prisoner infirmary of Auschwitz CC begins with this date. It extends from March 18 to April 13, 1943, and contains entries numbered 19827 to 20882.

TNA. HW 16-24. ZIP/GPDD 421a/14.4.43, n. 27/28.

Radio message from the headquarters SS military training area Heidelager, SS-Brigadeführer and Major General der Waffen-SS Voss, to the SS Leadership Main Office (*Führungshauptamt)*:
"Subject: Conversion of truck to wood-gas operation, SLT HPK 557.
AU CC requests a local truck today for conversion to wood-gas operation. According to previous instructions from there, conversion is supposed to have taken place to their own wood-gas system. Therefore decision is requested whether this conversion should take place at the army's motor pool. Conversion to wood gas is undesirable because of operating difficulties."

RGVA, 502-1-332, p. 102.

Letter from the Central Construction Office to the camp commandant with the subject "Letter from the Bielitz State Health Office dated 8 March 1943, S 653/63":
"On 12 March 43, a copy of the measures demanded by the State Health Office Bielitz

because of a typhus case which occurred in House 162, Auschwitz, was sent to the above office.
Point 8 of this order imposes a strict three-week quarantine for all inhabitants of the house (meaning a ban on going out to work and visiting).
There are 123 civilian workers lodged in this house, and a work ban would result in the shutdown of several construction sites.
The local office asks for final clarification with the Bielitz Health Department as to whether the work ban must absolutely be implemented."

Letter from the Central Construction Office to the SS garrison physician Auschwitz with the subject "Delousing of residential communities as well as civilian workers": RGVA, 502-1-332, p. 236.
"In response to your letter of 27 Feb. 43, the office here informs you that the delousing of all civilian workers employed on the buildings of Auschwitz CC was carried out in the week of March 8-12 under the supervision of the disinfector, SS-Rottenführer Barsch, in the delousing barracks of the communal camp.
Furthermore, disinfestation and final disinfection of all quarters was carried out.
The passage of the civilian workers through the delousing barracks began on 17 March 43.
In agreement between the Labor Deployment Office and the disinfector, SS-Rottenführer Barsch, it was decided that all civilian workers would be deloused at the beginning of each month. Lice checks are to be carried out in the civilian workers' quarters every month."

Central Construction Office. Order No. 204. PoW Camp, Crematorium II. BW 30: APMO, Höss Trial, Vol. 11a, p. 88.

"Overview of inmate deployment at CC Auschwitz U/S. Month of March 1943." Occupancy. Total number in women's camp: 14,242, of whom unfit for labor and deployment: 2,180. AGK, NTN, 134, p. 284; transcript by J. Sehn.

Central Construction Office. "Inventory of Crematorium II, PoW Camp Auschwitz", plan no. 2197 drawn by prisoner no. 71134 Ernst Kohn. "Situation", "West view", "South view", "North view", "East view", "Ground floor", 2 sections. APMO, BW 30/14, Neg. No. 20946/1.

Headquarters, Department II. Letter to five CC divisions with the subject "Inmate no. 18849, Gajewski Teomir, born 18 Aug. 1914, inmate no. 97451, Luczak Boleslaus, born 23 April 1908": AGK, NTN, 135, p. 217.
"The above are to be transferred immediately by order of the SS Economic and Administrative Main Office, Office Group D, Oranienburg, in individual transport to the concentration camp (labor camp) in Riga. The prisoners will be placed at the disposal of the camp physician as inmate doctors. The transfer is scheduled for Tuesday, March 23, 1943. It is therefore requested that the above-named persons be reported to the Polit. Department on that day. The prisoners will immediately be placed in special quarantine in Riga."

Central Construction Office. "Handover negotiation": RGVA, 502-2-54, pp. 25-26.
"Construction no. PoW camp – 30b – Crematorium 4, erected by the Central Construction Office of the Waffen-SS and Police Auschwitz, was handed over today to the headquarters (lodgings administration) of Auschwitz CC."
The work was carried out by the following companies:

– Industrie-Bau-A.G., Bielitz
– W. Riedel & Sohn, Bielitz
– J.A. Topf & Sons, Erfurt
– Josef Kluge, Old Gliwice
– Robert Koehler, Myslowitz.
"Building description:"
"1 vestibule, 4 rooms, 2 coal rooms, 1 doctor's room, 1 sluice and equipment room, 1 staff room, 1 wash and toilet room with vestibule, 1 incineration room. […] 2 chimneys 16,- m high, 1 eight-muffle cremation furnace."

Central Construction Office. Meeting minutes with the subject "Track connection to the prisoner-of-war camp and railroad line Neuberun-Dwory": RGVA, 502-1-186, p. 231.
"SS-Obersturmbannführer Höss pointed out that the extension of the railroad siding to the POW Camp has become urgently necessary, since the rail crossing to the POW Camp is very often blocked by stopping trains, and the railroad bridge cannot be driven over by heavy trucks. […]
In addition, there is the difficulty that the incoming rail cars have to be unloaded on the private siding leading to the camp, and from there they have to be transported to the PoW camp by car on the constantly blocked way. As a result of the start of operations by the Krupp Works, the private siding leading to the camp must also be unloaded if difficulties are not to arise here as well."

Place and time: Central Construction Office of the Waffen-SS and Pol. Auschwitz, on 24 March and 25 March 1943."
"Crematorium II:
After the three forced-draft units have not proved themselves in any way, and even suffered damage after the first full use due to excessively high temperatures, they will be removed at the expense of the Topf and Sons Company and taken back by this company. The Central Construction Office expects that this will not result in any loss of ID numbers for itself, and that the quantity of iron concerned will be credited. The three electric motors (15 hp each) with clutch, switch and starter will be taken over by the Central Construction Office in case they have not been damaged by the high temperatures. The hot-air supply system for Morgue I will have to be eliminated due to the design change and will be stocked by the Central Construction Office. A wrought-iron blower will be selected as the design in lieu of the wood blower for the Morgue I deaeration system. The additional cost of the blower housing will be paid by the Central Construction Office. For the 5 pieces of three-muffle furnaces, the coffin introduction

cart will be replacedwith light stretchers; the cart will come into stock of the Central Construction Office. The installation of the Demag platform elevator is carried out by a fitter from the Topf Company.
Crematory III:
Due to the experience at Crematory II, the intended and delivered forced-draft equipment will not be installed, but will be taken into stock by the Central Construction Office. (Intended for district heating plant).”

Central Construction Office. "Handover Negotiation": — RGVA, 502-1-54, pp. 77-80. APMO, Neg. No. 20995/460.
"Structure No. PoW Camp 30 Crematorium II, erected by the Central Construction Office of the Waffen-SS and Police Auschwitz, was handed over today to the headquarters (lodging administration) of Auschwitz CC."
"The work was carried out partly by 'Huta' Inc., partly by prisoners. Roof truss by Industriebau A.G. Bielitz, machinery and furnace by Topf and Sons Company, Erfurt."
"Building description:"
"Basement: 1 morgue basement 30.0 x 7.0 with ventilation aeration and deaeration ducts, 1 gas-tight door, 1 morgue basement 50.0 x 7.93, W.F. and forecourt, 1 gold processing room, 1 office with safe, 1 vestibule with elevator, 3 staircases, 1 chute.
First floor: 1 vestibule, 1 corridor, 1 dissecting room with dissecting table, 1 laboratory, 1 toilet, 1 lavatory, 1 washroom, 1 incineration room with 5 x 3-muffle furnaces and compressed-air supply with corpse transport carts on rails, and coal or slag carts on rails, 1 brick partition wall for corpse ash, 1 engine room, 1 garbage-incineration room with complete garbage-incineration plant, 1 brick partition wall for garbage, 1 fuel store, 1 capo room, 1 equipment room, 1 urinal and toilet room, 1 staff room for inmates, 1 corridor, 1 staircase.
Attic: living room for inmates in Heraklith construction, 1 attic room with deaeration ducts of the furnace room, 1 attic room and deaeration of the whole crematorium, and 1. prov. elevator device. […]
1 chimney system 15.46 m high."
Inventory list of the basement: Room 2 – morgue [Morgue 2]: 4 wire-net insertion device, 4 wooden screens.
Part of the documentation is also the "Inventory of Crematorium II PoW Camp Auschwitz", plan no. 2197.

Letter from the Central Construction Office to the *Deutsche Ausrüstungswerke* Auschwitz with the subject "Order 2261/80/17 of 18 Jan. 43 Bw 30 b": — APMO, BW 30/34, p. 49; *ibid.*, p. 50.
"It is communicated in response to the above letter [of March 24, 1943] *that three gas-tight towers are to be manufactured in accordance with the order of 18 Jan. 43 for Bw 30 b and 30 c, exactly according to the dimensions and type of the towers delivered so far.*
On this occasion, we would like to remind you of another order dated 6 March 43 for the delivery of a 100/192 gas door for Morgue I of Crematorium III, Bw 30 a, which is to be manufactured exactly according to the type and dimensions of the basement door of Crematorium II opposite with a peephole made of double 8-mm glass with rubber seal and fitting. This order is to be considered particularly urgent.
The attic closing door ordered for Bw 30 in the order of 23 Jan. 43, as well as 1 piece of frame door, need not be manufactured; this order is no longer valid.
The prepared 10 cbm firewood will be collected at the next opportunity."

In a carbon copy of the document, the first word "towers" is corrected in pen to "doors", the second word remained unchanged.

Special Headquarters Order: Frei, p. 239
"Effective immediately, I forbid all SS members, as a matter of principle, to enter the lodgings of the female supervisors in the staff building."

April 1943

1. "Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in men's camp: 30,743, of whom unfit for labor and deployment: 3,790. AGK, NTN, 134, p. 280; transcript by J. Sehn.

Letter from the SS garrison physician to the Central Construction Office with the subject "Total delousing of civilian workers": RGVA, 502-1-332, pp. 228-229.
"The recently increasing cases of typhus among the civilian workers make it necessary to carry out a renewed, most-thorough delousing, so that measures are not demanded on the part of the civilian authorities which could mean a cessation or complication of carrying out war-important tasks."
"The SS garrison physician Auschwitz holds the disinfectors SS-Oberscharführer Klehr, SS-Rottenführer Barsch and SS-Schütze Ritscher fully responsible for the conscientious and factually correct carrying out of the delousing."
The SS garrison physician proposes a radical delousing of all civilian workers, including their clothing and personal possessions. The plan is as follows:
"3/4. Communal camp, Block 1 and 2
4/4. " " " 3, 2 wooden barracks as well as all prisoner personnel assigned to care for the civilian workers
5/4 Haus Rekord including waiters."
In addition, the houses occupied by the civilian workers:
6.4: House 157; 7.4: House 162; 8.4: House 156 ; 9.4: House 163; 10.4: House 23; 11.4: House 183; 12.4: House 34; 13.4: House 178; 14.4: House 51; 15.4: House 46: 16.4: House 43; 17.4: House 103; 18.4: House 50.

Labor deployment: 3,128 inmates.

This date marks the beginning of the series of reports of laboratory examinations by the SS Hygiene Institute of the Waffen-SS and Police Auschwitz of samples of urine, blood, stool, sputum and throat swabs from Auschwitz CC inmates.
For the period from 8 April 1943 to 15 January 1945, 17,535 names and 8,666 prisoner numbers are recorded (many names are repeated).

ISD, folder 186-253.

Central Construction Office. "File note on a meeting with representatives of the Reichsbahn at the Central Construction Office of the Waffen-SS and Police Auschwitz on 9 April 43 concerning the relocation of the ramp for special transports."

RGVA, 502-1-186, pp. 205-206.

"At the meeting in Auschwitz on March 25, it was agreed that as a replacement for the construction track of the New-Construction Office in Kattowitz, which is soon to be demolished and where the ramp for the special transports is presently located, a construction track of about 400 m useful length along the access road to the PoW camp is to be laid immediately."
This is followed by general instructions for the project.

Letter from the Central Construction Office to the Board of the Reichsbahn New Construction Office Kattowitz, with the subject "Delousing": RGVA, 502-1-178, p. 40.

"In response to an inquiry there, the Central Construction Office of the Waffen-SS and Police Auschwitz U/S informs that delousing of your followership members can take place in the disinfestation barrack of the civilian workers' lodgings Birkenau. Since 1300 civilian workers pass through this barrack daily in the mornings as well as in the evenings, and since further extensive additions are to be expected shortly, this delousing can only take place temporarily – 1 time per month."

Central Construction Office, "List of all construction companies employed at the camp": RGVA, 502-1-96, p. 39. RGVA, 502-1-19, p. 88.

Letter from the J.A. Topf & Sons company, Erfurt, to the Central Construction Office with the subject "CCA, Crematorium IV, PoW camp 30 b, your letter of 3 April 43": — APMO, BW 30/34, p. 42.
"In reply to your above letter, we inform you that we have requested our foreman, Mr. Koch, to eliminate the cracks which have allegedly appeared recently on the 8-muffle furnace in Crematorium IV. At the same time, we took note of the agreement reached between your esteemed head of construction, Sturmbannführer Bischoff, and our Chief Engineer Prüfer, according to which we will rectify, at no cost to you, any defects in the cremation furnaces we have erected which occur within 2 months of the furnaces being put into operation. It is a self-evident condition that the defects occurred due to faulty workmanship and not due to overheating of the furnaces or due to the internal lining being pushed off by the stokers.
As already mentioned at the beginning, we have instructed our foreman Koch to repair the damage that has now occurred, which will probably have been done in the meantime."

Letter from Central Construction Office to SS garrison physician with subject "Total delousing of civilian workers." — RGVA, 502-1-332, p. 227.
"The total delousing of the civilian workers, as well as the thorough disinfection and cleaning of the quarters, has been carried out and was completed yesterday."

Letter from the Central Construction Office to SS-Obersturmführer Schwarz (Department IIIa) with the subject "Transfer of Inmates from Mauthausen CC and Buchenwald CC to Au CC": — RGVA, 502-1-296, pp. 360-360a.
"It is requested that inmates no. 382, 570, 1438, 2771 and 2823 from Buchenwald CC be transferred to Auschwitz CC. The 4 first-named are special heating fitters, the last-named an insulator. As a result of extremely urgent work in the camp here, which is vital to the war effort and must be completed without fail, it is necessary to summon inmates from other camps, since there are no more skilled workers available here and, despite repeated inquiries, civilian workers cannot be obtained."

Letter from Friedrich Boos to the Central Construction Office with the subject "Auschwitz CC, prov. district heating plant, my com. no. 2322". — RGVA, 502-1-138, pp. 251-251a. RGVA, 502-1-139, p. 7.
The company F. Boos, commissioned with the construction of a district heating plant, receives an order from the Central Construction Office for a static calculation "for the three-flue chimney* (its weight is approx. 550 tons)" as well as drawings for a coal bunker and an ash bunker.
* "Cost calculation for the new construction of a chimney (3 ducts) 22.2 m high and 0.70 (3 x) upper clear width for prov. district heating plant in CC Auschwitz U/S".

A special headquarters order decrees that all chicken-keeping SS members report when their chickens show symptoms of fowl plague, and he describes the symptoms. — Frei, p. 244

Garrison Order No. 10/43 deplores and prohibits under penalty of law the practice of SS members reporting borrowed books as "lost," then paying the replacement value with the aim of indirectly acquiring the book, which could not otherwise be obtained on the open market. — Frei, pp. 244f.

Garrison Order No. 11/43 [backdated to April 13] gives two SS members permission for their families to visit them in Auschwitz and to stay there temporarily. — Frei, p. 245

15. "Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in men's camp: 33,152, of whom unfit for labor and deployment: 6,521. — AGK, NTN, 134, p. 280; transcript by J. Sehn.

The head of the administration of the Stutthof Concentration Camp
SS-Obersturmführer."

Continentale Wasserwerks-Ges.m.b.H., "List of pumping hours performed during the week of 4 April – 10 April 43 by means of hand pumps". RGVA, 502-1-157, p. 52.

"On 5 April two pumps = 21 hours. 150 ø line. Crem. 2 groundwater
" 6 April " " = 21 " " " " "
" 7 April " " = 21 " 150 ø line. Crem. 2 & Constr. Sec. II
" 8 April " " = 21 " " line. Crem. 2. groundwater
" 9 April one pump = 10½ " 150 ø line. Crem. 2. groundwater
"10 April " " = 10½ " 150 ø line. Crem. 2. groundwater."

In addition, there are pumping hours at other structures. Total of 147 hours.

Garrison Order No. 12/43 grants permission to named relatives of 16 SS members to visit Auschwitz for a limited time. Frei, pp. 245f.

Garrison Order No. 13/43 permits all SS members to enter the House of the Waffen-SS under specified conditions. Frei, p. 247

16. "Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in men's camp: 33,130, of whom unfit for labor and deployment: 6,288. AGK, NTN, 134, p. 280; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in women's camp: 15,977, of whom unfit for labor and deployment: 5,365. APMO, D-Aul-3a/370/3, p. 227.

Directive No. 43 of SS Brigadier and Major General of the Waffen-SS Kammler to subordinate offices on "Camouflage of Construction Projects and Building Measures." RGVA, 502-1-1, pp. 359-359a; *ibid.*, pp. 360-360a.

"The main purpose of camouflage is to make the buildings and construction sites to be camouflaged blend in with their surroundings."

As the note of the "Central Office for Camouflage Colors," which refers to the Circular Decree of the Prussian Ministry of Finance (RdErl. d. Pr. Fin. Min.) of November 5, 1942, makes clear, camouflage essentially served air-raid protection.

Letter from the Topf company, Erfurt, to the Central Construction Office with the subject "Regulation of disinfestation plant PoW camp, solid building B.W. 32 order no. 43/204/1". RGVA, 502-1-323, p. 159.

"With polite reference to our order confirmation of 16 Feb. 43 for a disinfestation

plant with 4 chambers and the delivery of 2 disinfestation carts in the total amount of RM 39,192.--, we hereby kindly request the transfer of the down payment in the amount of half of the above amount, namely RM 19,596.--."

Letter from the J.A. Topf & Sons company, Erfurt, to the Central Construction Office with the subject "Regulation Crematorium II and III Order No. 43/145/3": *"With polite reference to our order confirmation of 22 Feb. 43, it is hereby respectfully requested that the advance payment which has become due in the amount of half of the order sum RM 18,742.00 for 2 electric elevators be made, meaning RM 9,371. At the same time, we request your payment instruction for our invoice no. 323 of 23 March 43 for the delivered Demag electric hoist in the amount of RM 908."* — RGVA, 502-1-327, p. 87.

Letter from the J.A. Topf & Sons company, Erfurt, to the Central Construction Office with the subject "Regulation of Crematorium III in the PoW camp (garbage incineration furnace) Order No. 43/150/1": *"We politely refer to our order confirmation of 5 Feb. 43 for the delivery and construction of a garbage incinerator in Crematorium III at a total price of RM 5,791.-- and respectful request the transfer of the down payment in the amount of half of the aforementioned amount with approx. RM 2,900.--."* — RGVA, 502-1-327, p. 85.

Letter from the J.A. Topf & Sons company, Erfurt, to the Central Construction Office with the subject "Your letter of 29 March 43, Corr.Reg. No. 25924/43/Jä/Lm, Crematorium II and III PoW camp, BW 30 and 30a, our order no. 41/2249/1 of 4 Nov. 41": *"With reference to your above letter and to the conversation with our Chief Eng. Mr. Schultze, we declare ourselves willing to take back the damaged 3 forced-draft fans in Crematorium I* [sic]. *We ask you to arrange that, after removal of the blowers, they be returned immediately to our address at the Erfurt station, postage prepaid."* — APMO, BW 30/34, p. 36.

Postcard from the J.A. Topf & Sons company, Erfurt, to the Central Construction Office: *"We have posted to your account as follows:" RM 3,705 as "Credit note for 3 damaged and still to be returned forced-draft blowers. See our letter of 16 April 1943."* — RGVA, 502-2-26, pp. 231-231a.

Central Construction Office. Order No. 322 Crematory III BW 30 a. Supplementary order Com. No. 1242: *"Przedmiot* [Subject]*: Fittings for 1 piece gas door as Con. No. 957 and as already supplied. Wykonawcy* [Executor]*: Mirek. Ukończono* [Finished]*: 20 April 43."* — APMO, Höss Trial, Vol. 11a, p. 92.

Central Construction Office. Order No. 323 PoW camp BW 30 b: *"Przedmiot* [Subject]*: WL locksmith shop to supply for 4 gas-tight doors: hardware as previously supplied. – The doors will be made in Hall II, and the hardware is to be delivered there. Wykonawcy* [Executor]*: Mirek. Ukończono* [Finished]*: 20 April 43."* — APMO, Höss Trial, Vol. 11a, p. 92.

17. "Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in men's camp: 31,139, of whom unfit for labor and deployment: 6,159. — AGK, NTN, 134, p. 280; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in women's camp: 15,984, of whom unfit for labor and deployment: 5,310. — APMO, D-Aul-3a/370/3, p. 227.

Continentale Wasserwerks-Ges.m.b.H., "List of pumping hours performed by means of hand pumps during the week of 11 April – 18 April 43". 10½ hours pumping work at Crematorium 3 for groundwater with one pump on 12, 13, 15, 14, and 16 April, and at other structures. Total of 139 hours. — RGVA, 502-1-157, p 51.

Letter from the Central Construction Office to the camp commandant, SS- — Bartosik, Doc. 32,

Obersturmbannführer Höss, with the subject "Lending of horse-stable barracks": *"The horse-stable barracks erected at Sonderkommando II and at Crematorium III are urgently needed for lodging troops at Birkenau and for the infirmary in Construction Section II. Now that the operation of Sonderkommando II has ceased, and the appropriate space is also available at Crematorium III, notification is requested as to when the barracks can be disassembled so that they can be placed in their designated locations for installation."* — p. 139.

Letter from the Auschwitz CC camp physician to the Auschwitz CC headquarters: *"The following prisoners destined for the 'Golleschau' unit were examined by the camp physician on April 17, 1943, and found fit for work.*
The prisoners were deloused, their clothes disinfested and checked to see that they were free of lice. They are provided with proper clothing.
The prisoners may be transferred from the Main Camp on the condition that they be housed and used there separately from other prisoners for the next 4 weeks."
A list of 21 inmates follows. — ISD. OCC 2/7/a folder 56 II C/1.

18. "Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in men's camp: 31,614, of whom unfit for labor and deployment: 6,060. — AGK, NTN, 134, p. 280; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in women's camp: 16,304, of whom unfit for labor and deployment: 5,324. — APMO, D-Aul-3a/370/3, p. 227.

19. "Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in men's camp: 32,489, of whom unfit for labor and deployment: 5,938. — AGK, NTN, 134, p. 280; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in women's camp: 16,701, of whom unfit for labor and deployment: 5,307. — APMO, D-Aul-3a/370/3, p. 227.

"Inmate Infirmary of Auschwitz CC *Auschwitz, 19 April 1943*
To the pharmacy of Auschwitz CC
The Inmate Infirmary needs:
<u>phenol</u> 1 Kg
Medical orderly
at the Inmate Infirmary
SS-Rottenführer
Hantl. " — APMO, D-Aul-5/1, *Arzneimittelbestellung*, p. 1179

Garrison Order No. 13a/43 deplores and threatens with punishment the unauthorized taking of construction material from the construction yard. — Frei, pp. 247f.

A circular announces a vaudeville event at the SS *Kameradschaftsheim*. — Frei, p. 248

20. "Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in men's camp: 32,546, of whom unfit for labor and deployment: 6,356. — AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in women's camp: 17,379, of whom unfit for labor and deployment: 5,285. — APMO, D-Aul-3a/370/3, p. 227.

Headquarters Order No. 8/43 announces 3 promotions, a long list of awards, the transfer of a Sturmbannführer to the WVHA, and the appointment of a new head of administration, and then:
"4. Commendation. — APMO, *Standortbefehle*, Vol. 3. D-Aul-1/72, pp. 179-183. Frei,

On 9 March 43, during the pursuit of 2 Jews who had escaped from the Sonderkommando, SS-Unterscharführer Jochum, 2nd Comp., with 10 members of the 2. Company, crossed the Vistula under the most difficult conditions and confronted the inmates in a forest near Jedlin. To SS-Unterscharführer Jochum and the 10 other members I [Höss] *express my appreciation."* pp. 249-254

The order mentions the result of a collection on "Wehrmacht Day"; again forbids travelling on the Vistula dikes; decrees that vehicles which transported inmates, their property or laundry must be disinfected after use; prescribes a specific route to the work site for certain prisoner units; requires official proof for vacationers on leave because of deaths or bomb damage that the reason for leave really affected the vacationer personally; stipulates that weekend vacationers be taken off rations only on Sundays; sets latest turn-in time for weekend leaves; prohibits wild gardening, and requires submission of sketch plans for approval; prescribes that SS members of field offices be instructed monthly on handling and conduct with prisoners; instructs on transfer of savings of foreign volunteers; points out that service bicycles may be used only with bicycle cards; announces a collective order for a book on the Eastern campaign; introduces permission slips for entering the House of the Waffen-SS; orders the storage of issued guard winter overcoats and felt shoes; stipulates that a print-out of Sturmbann orders be submitted to the headquarters; gives instructions on the wearing of cloth coats and drill jackets during the warm season; forbids lower ranks to wear peaked caps while on duty; declares the camp identity card of a female guard invalid; and reports the discovery of two wallets.

Garrison Order No. 14/43 doubles the Easter weekend furlough quota from 5% to 10% of the garrison's actual strength, and provides specific instructions. Frei, pp. 254f.

21. "Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in men's camp: 32,850, of whom unfit for labor and deployment: 7,001. AGK, NTN, 134, p. 280; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in women's camp: 17,496, of whom unfit for labor and deployment: 5,296. APMO, D-Aul-3a/370/3, p. 227.

22. "Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in men's camp: 32,442, of whom unfit for labor and deployment: 6,587. AGK, NTN, 134, p. 280; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in women's camp: 17,467, of whom unfit for labor and deployment: 5,548. APMO, D-Aul-3a/370/3, p. 227.

Engineering Office F. Badziura, individual invoice for RM 840 for work on BW 32 – disinfestation plant. RGVA, 502-1-323, p. 170.

Headquarters Order No. 9/43 announces the results of a "Stalingrad" collection and another for the Red Cross; orders the confiscation of three motorcycles and nine bicycles; sets end times for weekend furloughs, depending on rank; orders a shutdown for Easter weekend for all "field offices of departments working with prisoners"; and reports one lost property. Frei, pp. 255f.

23. "Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in men's camp: 33,579, of whom unfit for labor and deployment: 6,615. AGK, NTN, 134, p. 280; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in women's camp: 18,202, of whom unfit for labor and deployment: 5,443. — APMO, D-Aul-3a/370/3, p. 227.

Headquarters, Department IIIa, letter to the Central Construction Office with the subject "Transfer of inmates from Mauthausen and Buchenwald CC to Auschwitz." — RGVA, 502-1-256, p. 147.
"Regarding the above reference, Department IIIa informs us that, of the prisoners from Buchenwald CC named in the letter there [of April 14, 1943]*, one is ill, and the others are engaged in the construction of a gas pipeline. For these reasons, a transfer from Buchenwald CC to here cannot take place."*

Central Construction Office. Central Construction Office, PoW camp, Crematorium 4 & 5, BW 30 b and c: — APMO, Höss Trial, Vol. 11a, p. 92.
"Przedmiot [Subject]*: 12 pieces window grilles 50 x 70 cm,*
4 pieces of window grilles 50 x 100 cm,
6 pieces of skylights ca. 160 x 60 cm,
2 pieces skylight ca. 110 x 60 cm.
Delivery time: 4 May 43.
Construction Offices order no. 202 dated 27 April 43. Wykonawcy [executor]*: Rygusil. Ukończono* [Finished]*: 30 April 43."*

28. "Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in men's camp: 34,299, of whom unfit for labor and deployment: 6,465. — AGK, NTN, 134, p. 280; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in women's camp: 18,410, of whom unfit for labor and deployment: 5,830. — APMO, D-Aul-3a/370/3, p. 227.

Letter from the Central Construction Office to the head of the agriculture department, SS-Sturmbannführer Dr. Caesar, with the subject "Track connection to PoW camp, construction work": — RGVA, 502-1-186, p. 184.
"The substructure work for the track connection to the POW camp will be started in the near future. The line has already been marked out. It is therefore necessary that the fields to the left and right, each 20 meters from the axis of the new siding, not be tilled."

29. "Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in men's camp: 34,422, of whom unfit for labor and deployment: 6,332. — AGK, NTN, 134, p. 280; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in women's camp: 18,330, of whom unfit for labor and deployment: 5,910. — APMO, D-Aul-3a/370/3, p. 227.

Letter from the Central Construction Office to the SS-WVHA, Der Head of Office Group D, with the subject "Auschwitz CC – Report of completed structures, chimney Crematorium BW 11, pump house at the main guard house BW 29": — RGVA, 502-1-312, p. 9.
"I report completion of chimney Crematorium BW 11 and pump house at the main guard house BW 29. The structures have been transferred to the Auschwitz CC headquarters (Corr.Reg. No. 20744/43/Ki/Pa)."

Letter from the Central Construction Office to the Gau Commissioner for the Regulation of the Construction Industry in Kattowitz with the subject "Auschwitz CC – Construction of a Barracks for Dept. III a of the Headquarters of the CC" The request concerns an office barracks: — RGVA, 502-1-319, p. 10.
"Due to the continuous influx of new prisoners, Department III a of the headquarters

had to be significantly enlarged, so that the office space occupied up to now is no longer sufficient by far. The construction of the office barracks is therefore absolutely necessary. It is requested that the application be granted as soon as possible."

Garrison Order No. 16a/43 points out again that "prisoner columns, teams as well as individual prisoners are not allowed to use *Bahnhofstrasse* under any circumstances," and describes the route to be taken. — Frei, p. 260

30. "Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in men's camp: 34,777, of whom unfit for labor and deployment: 6,892. — AGK, NTN, 134, p. 280; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of April 1943." Occupancy. Total number in women's camp: 18,659, of whom unfit for labor and deployment: 5,619. — APMO, D-Aul-3a/370/3, p. 227.

Letter from the Central Construction Office to the Auschwitz CC Headquarters, Department IIIa, with the subject "Commandeering of the unit Crematorium III in the PoW camp for Saturday and Sunday, May 1 and 2, 1943." — RGVA, 502-1.256, p. 154.
"The Central Construction Office of the Waffen-SS and Police requests commandeering of the unit Crematorium III PoW camp for Saturday and Sunday, May 1 And 2, 1943 in the strength of 250 prisoners. The unit is needed for most-urgent work on the aforementioned construction."

Central Construction Office. "Explanatory report for the fixing of quotas for the siding of the Krupp factory halls and the siding for the Waffen-SS prisoner-of-war camp at Auschwitz." — RGVA, 502-1-186, pp. 180-181.
1. Siding Krupp factory hall.
"2. Siding prisoner-of-war camp as follow-on facility to Krupp factory halls.
The prisoner-of-war camp is set up as accommodation and to provide labor for the Krupp works at Auschwitz. The camp is located at a distance of approx. 2.5 km from the Krupp factory halls, and a rail connection for the PoW camp is absolutely necessary for the following reasons:
1. closed transport of prisoners from the camp to the workplaces (Krupp factory halls);
2. supply of the camp with the necessities of life, such as food, articles of lodging, and clothing;
3. transport of the necessary materials in order to be able to complete the construction of the prisoners' quarters on schedule with the commissioning of the Krupp factory halls."

Administration of the Auschwitz CC. Order No. 363. Shed next to Crematorium I: — APMO, Höss Trial, Vol. 11a, p. 92.
"Przedmiot [Subject]*: 4 pieces of bands with supporting clamps and 1 overthrow. 22 pieces of screws /fixing the bands and clamps. Wykonawcy* [Performer]*: Resl. Ukończono* [Finished]*: 27 April 43.*
Order of the administration no. 2888."

The accounting books of the Tesch & Stabenow Company in Hamburg show a delivery of 1,018 kg of Zyklon B to Auschwitz CC, corresponding to a value of RM 6,108. — TNA, WO 309-1603.

Headquarters Order No. 10/43 mentions two awards and a number of transfers and commandeerings; deplores misconduct at railroad crossings with barriers; regulates sending telegrams abroad; announces telephone numbers of Riga CC; calls for the collection of corks; gives instructions on the wearing of uniform jackets and SS armbands; forbids taking women into troop quarters; repeats the duty to have plan sketches approved for gardens; declares the 1st of May free of work; requires daily presentation and signing off of guard books; mentions a lost — Frei, pp. 260-263

passport; and appoints SS-Hstuf Schwarz to substitute for SS-Hstuf Aumeier, who is on leave.

"Waffen-SS
SS-Totenkopfsturmbann Auschwitz
Swearing In
SS Rifleman (res.) Andreas Lange, born 13 Nov. 22, of the 1st Staff Company / SS Totenkopfsturmbann Auschwitz was sworn in on 1 May 1943 by SS-Sturmbannführer Hartjenstein as follows:
'I swear to you, Adolf Hitler, as Führer and Chancellor of the German Reich, loyalty and bravery, I pledge obedience to you and to the superiors appointed by you until death! So help me God!'" — GARF, 7021-107-11, p. 30
Sgd.: Andreas Lange, SS rifleman.
"Commitment.
I am aware that the Führer alone decides on the life and death of an enemy of the state. I must not physically harm or put to death any enemy of the state (prisoner). Any killing of a prisoner in a concentration camp requires the personal approval of the Reichsführer-SS.
I am aware that, if I violate this commitment, I will be held inexorably accountable."
Sgd.: Andreas Lange, SS Rifleman.[16]

2. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 34,975, of whom unfit for labor and deployment: 6,809. — AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 18,804, of whom unfit for labor and deployment: 6,077. — APMO, D-Aul-3a/370/3, p. 237.

3. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 34,959, of whom unfit for labor and deployment: 6,735. — AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 18,808, of whom unfit for labor and deployment: 6,023. — APMO, D-Aul-3a/370/3, p. 237.

X-ray book No. 12 of the inmate infirmary of Auschwitz CC begins with this date. It extends from May 3 to 26, 1943, and contains entries numbered 4439 to 5638. — APMO, D-Aul-5/12. ISD, folder 67o.

[3.] "List of individual F.N. [?] for month of April 1943 for comparison."[17] Summary of total labor hours of skilled and unskilled workers (inmates), subdi- — Adler; unpaginated reproduction

[16] The document is dated "Auschwitz CC, den 11.43" [sic].
[17] The date is missing, but other monthly lists of the same type bear the date of the 3rd or 4th of the following month.

vided into:
a) private firms (25 firms),
b) SS offices,
c) armament factories,
d) central construction office (construction office and bricklaying school).
Total: 18,572 hours by skilled workers and 117,818 hours by unskilled workers.

4. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 35,133, of whom unfit for labor and deployment: 6,753. — AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 18,781, of whom unfit for labor and deployment: 6,051. — APMO, D-Aul-3a/370/3, p. 237.

Central Construction Office, "Report on the Relocation of the Ramp for Special Transports," excerpt: — RGVA, 502-1-186, pp. 160-161
"The camp commander of the Auschwitz concentration camp, SS-Obersturmbannführer Höss, has obtained from the Reichsbahn that the special transports be unloaded from this construction track, and for this purpose has had as a temporary access road built there by prisoners, as well as a ramp from old demolition wood. […]
After completion of the private siding to the prisoner-of-war camp, which, however, can only be started after the allotment of the quotas, the special transports can be unloaded directly in the prisoner-of-war camp, so that the temporary ramp will then become superfluous."

5. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 35,062, of whom unfit for labor and deployment: 6,767. — AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 19,070, of whom unfit for labor and deployment: 6,946. — APMO, D-Aul-3a/370/3, p. 237.

6. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 35,054, of whom unfit for labor and deployment: 6,837. — AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 19,291, of whom unfit for labor and deployment: 6,173. — APMO, D-Aul-3a/370/3, p. 237.

Headquarters Order No. 11/43: — Frei, pp. 263-265
"1. Commendation
I commend SS Rifleman Alexander [H]*orschütz, 6th Comp. for his prudent actions on the occasion of the escape attempt on 4 May 43.*
Through his attentiveness, it was possible to recapture 2 Gypsies who had strayed from their work unit. In connection with his annual leave, [H]*orschütz will receive from me an additional 3 days of special leave."*
The order also reserves to the headquarters the issuance of exit passes for the House of the Waffen-SS; orders the replacement of the cook at the Sola Hut, and organizes a hut-cleaning service; announces a collective order for a book on the Norwegian campaign; orders the SS garrison physician to attend a training course in Oranienburg; orders that telexes be kept short; sets the departure of prisoner units as of 10 May to 6:00 a.m.; announces performance of an operetta in the *Kameradschaftsheim*; appoints SS-Hauptsturmführer Schwarz as Höss's representa-

tive during a one-day absence; and reports two lost items found.

7. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 35,570, of whom unfit for labor and deployment: 7,077. AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 19,353, of whom unfit for labor and deployment: 6,214. APMO, D-Aul-3a/370/3, p. 237.

SS-WVHA, chief of Office D II, internal circular: RGVA, 502-1-8, p. 51.
"In agreement with the chief of Office Group C, SS Brigadier Dr. Kammler, effective June 1, 1943, the pay for prisoners directly employed for purposes of Office Group C is fixed as follows:
RM 6.- for skilled inmate laborers per day's work and
RM 4.- for unskilled inmate laborers per day's work.
RM 3.- for female inmates per day's work.
For Auschwitz and Lublin CC the following rates apply:
RM 4.- for skilled inmate laborers per day's work, and
RM 3.- for unskilled inmate laborers per day's work.
RM 2.- for female inmates per day's work."

Central Construction Office. "Report on the difficulties encountered in the expansion of the POW camp": RGVA, 502-1-83, pp. 136-137.
"The main deficiency is the lack of suitable labor; in particular, there is a lack of skilled workers, which is absolutely necessary for such a large construction project. […]
Since the camps was already getting occupied during its expansion, it is impossible to prevent the organization of materials to the necessary extent. Stacked bricks, cement and other materials are taken away overnight by inmates and used for their own purposes (installation of additional capo shacks in the barracks, placement of concrete paving in the barracks, etc.). […]
Furthermore, non-allocation of quotas creates the very greatest difficulties. The railway siding, which is the prerequisite for bringing the necessary materials, still could not be built."

Central Construction Office. "Final invoice for carpentry work for PoW camp Crematorium II from Industrie-Bau-A.G. Bielitz, Elisabethstr. 21." The company receives the due payment of RM 9,061.86 in accordance with the contract of October 24, 1942. RGVA, 502-2-26, pp. 195-196.

A circular announces the performance of a play at the *Kameradschaftsheim*. Frei, pp. 265f.

Headquarters Order No. 12/43 reminds that "entry into the town of Auschwitz for urgent official business is only allowed with a permit to that effect"; announces departure times of the bus service to the Sola Hut; orders the collection of spent batteries; and reminds that only those may leave the camp area after closing time who have an exit or leave permit to that effect. Frei, p. 266

8. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 35,967, of whom unfit for labor and deployment: 7,260. AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 19,561, of whom unfit for labor and deployment: 6,455. APMO, D-Aul-3a/370/3, p. 237.

Auschwitz CC, Radio Service, to the Central Construction Office, SS- RGVA, 502-1-83, p. 320.

Sturmbannführer Bischoff:[18]
"SS-Brigadefuehrer and Major General der Waffen SS Dr. Ing. Kammler has ordered that you be in Berlin early on Monday, 10 May 43 with all plans and calculation documents for irrigation and draining PoW Camp Auschwitz.
Sgd. pp. Schuermann, SS-Oberscharfuehrer."

Auschwitz CC, Radio Service:[18] RGVA, 502-1-83, p. 339.
"Gross-Rosen No. 960, 8 May 43 1800 – XY -.
To the headquarters of Auschwitz CC -
SS-Stubaf. Bischof [sic] *with clerk to report on Monday 10 May 43 – 11.00 a.m. with all documents, plans, allocations to SS-Brigadefuehrer and Major General of the Waffen SS Dr. Ing. Kammler, for irrigation and draining PoW camp 200000 men.*
Sgd. Gideon SS-H'Stuf and camp commander."

Special Headquarters Order No. 14/43 decrees that incoming mail for female inmates is to be delivered with immediate effect to the new mail-censorship office at women's camp Birkenau. Frei, p. 267

9. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 36,514, of whom unfit for labor and deployment: 7,078. AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 19,637, of whom unfit for labor and deployment: 6,535. APMO, D-Aul-3a/370/3, p. 237.

Central Construction Office. File memo with the subject "Meeting with the head of Office Group C, SS-Brigadeführer and Major General of the Waffen-SS Dr. Ing. Kammler". Report on Kammler's visit to Auschwitz on May 7. The following persons took part in the meeting: RGVA, 502-1-233, pp. 33-38; 502-2-117, pp. 4-7.
SS-Obersturmbannführer Höss
SS-Obersturmbannführer Möckel
SS-Sturmbannführer Bischoff
SS-Sturmbannführer (F) Dr. Caesar
SS-Hauptsturmführer Dr. Wirths
SS-Untersturmführer (F) Kirschnek.
Topics covered include:
1) agricultural buildings.
"Stable yard Birkenau:
Two horse-stable barracks from 'Special Action' 1 are erected in addition to one Swiss and one air-force-type barracks."
2) Buildings under the jurisdiction of the garrison physician.
"General description by the garrison physician that the maintenance of the inmates' health for the great tasks does not seem assured, due to the poor latrine conditions, an inadequate sewer system, lack of sick barracks, and the absence of washing, bathing, and disinfestation facilities."
The SS garrison physician suggests:
"He is opposed to the pit system because of the high ground-water level which is likely to contaminate the ground-water."
He considers the use of horse-stable barracks as an infirmary inadequate.
"In order to provide a definitive solution for delousing at PoW camp, it was suggested by the garrison physician that complete new disinfestation facilities, including bathing facilities, be provided for each subsection of the construction sections, which is 10. In contrast, it was pointed out by the head of the Central Construction Office that the

[18] Text in capital letters without umlauts.

large disinfestation plant of the PoW camp is under construction and must first be completed."

10. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 36,491, of whom unfit for labor and deployment: 7,246. — AGK, NTN, 134, p. 281; transcript by J. Sehn.

Continentale Wasserwerks-Ges.m.b.H., "List of pumping hours performed by means of hand pumps during the period 18 April – 8 May 43". On April 18, 7 hours, and on April 19, 10½ hours at PoW camp Crematorium 3 to pump out groundwater by means of a pump. Other work in Section 2. 311 hours in all. — RGVA, 502-1-157, p. 50.

11. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 36,427, of whom unfit for labor and deployment: 7,246. — AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 19,820, of whom unfit for labor and deployment: 6,841. — APMO, D-Aul-3a/370/3, p. 237.

"Urgent telegram" from the Central Construction Office to the J.A. Topf & Sons company, Erfurt:
"Chief Eng. Prüfer immediately to here, no postponement possible, bring all drawings and calculations for chimneys, also send assembly drawing for prov. Demag elevator III immediately". — APMO, BW 30/34, p. 44.

Headquarters Order No. 13/43 decrees that all headquarters members submit a curriculum vitae; sets deadlines for submission of leave and permission slips; prohibits the removal of belts at the barber shop; restricts SS members and family members to three days in the House of the Waffen-SS; exhorts punctual appearance in case of appointment to the SS court; mentions a commandeering; deplores the theft of a service bicycle; and makes keeping the well-protection area clean obligatory. — Frei, pp. 267f.

12. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 36,403, of whom unfit for labor and deployment: 7,346. — AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 19,817, of whom unfit for labor and deployment: 6,833. — APMO, D-Aul-3a/370/3, p. 237.

SS-WVHA, head of Office Group C (Kammler), "Meeting Report" with the subject "Irrigation and Draining CC und PoW camp Auschwitz": — RGVA, 502-1-233, pp. 69-72.
"Participants:
SS-Brigadeführer and Major General of the Waffen-SS Dr. Ing. Kammler
SS-Obersturmbannführer Ermler
SS-Sturmbannführer Bischoff
SS-Obersturmführer (F) Prinzl
SS-Obersturmführer Weber
SS-Obersturmführer Landau
SS-Untersturmführer Egeling [sic]
SS-Unterscharführer Haack."
Topics covered:

1) Irrigation CC
2) Sewage disposal
3) PoW camp irrigation
4) PoW camp sewage disposal
"The sewage treatment plant in Construction Section I was originally intended as [for] *a quarantine camp for 8000 men. In the meantime, the occupancy grew to 18000 men. Consequently, it follows that this plant is no longer adequate."*
5) Covering open wells
6) SS-Unterscharführer Haack is commandeered to the Central Construction Office for a period of 4 weeks.
7) *"To keep carrying out the aforementioned work, the following are needed:*
200 prisoner masons
60 prisoner carpenters
20 prisoner electricians
20 inmate installers
20 prisoner insulators
15 inmate heating engineers, disinfestation specialists,
in addition to the present construction-office units, 4,000 able-bodied auxiliaries will be needed."

Letter from SS-Obersturmführer Grosch to SS-WVHA, head of Office Group C: RGVA, 502-1-83, pp. 143-144.
"Report according to orders:
1. Labor input for sanitary needs PoW camp to 4000 men determined. Camp commandant is prepared to provide this additional labor; primarily from 3200 quarantine prisoners, remainder to be drawn from other non-construction assignments. […]
3. precondition for carrying out these measures is additional secondment of 100 guards and provision of
280 bricklayers
60 carpenters
30 electricians
45 plumbers
20 insulators
22 heating fitters."

13. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 36,472, of whom unfit for labor and deployment: 7,440. AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 19,794, of whom unfit for labor and deployment: 6,282. APMO, D-Aul-3a/370/3, p. 237.

Central Construction Office, "Report on the division of labor in the immediate program at PoW camp Auschwitz." Division of responsibilities: RGVA, 502-1-83, pp. 336-338.
1) SS-Sturmbannführer Bischoff: overall direction.
2) SS-Untersturmführer Dejaco: drawings
3) SS-Untersturmführer Janisch: drawings for the
toilet seats
4) SS-Obersturmführer Jothann: Construction Office of the water treatment station
5) Civilian employee Teichmann: Construction of the washing, toilet and utility barracks in Constr. Section II.
"9. Civilian employee Jährling is to install boilers and water heaters in the wash barracks, as well as the showers in the undressing room of Crematorium III. SS-Sturmbannführer Bischoff will consult with the camp commandant, SS-

Obersturmbannführer Höss, about the showers.
For the disinfestation furnaces, the SS-W.V.H.A. will moreover send an OT drawing."

Letter from the SS-WVHA to the Reichsführer-SS with the subject "Auschwitz CC": ISD, folder 459.
"Reichsführer!
The camp commandant of Auschwitz CC has conveyed that, during the night of May 4-5, the subcamp Buna was attacked by enemy planes. 8 bombs were dropped in the immediate vicinity of the prisoners' camp. No damage was done. One airplane attacked the watchtowers and fired machine guns at them. No casualties were incurred.
The camp commandant was instructed to request from the responsible air-district command an appropriate defense consisting of twelve 2 cm anti-aircraft guns."

14. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 36,814, of whom unfit for labor and deployment: 7,487. AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 19,718, of whom unfit for labor and deployment: 6,812. APMO, D-Aul-3a/370/3, p. 237.

Central Construction Office. File memo with the subject "Service trip of SS-Obersturmführer Grosch to Auschwitz and Krakow." RGVA, 502-1-83, pp. 328-334.
"The task of the service trip was to determine how the urgent sanitary work in PoW camp Auschwitz could be furthered by combining the available manpower and additional procurement of the necessary materials."
"Even with the work in progress at the PoW camp, a concentration of the manpower assigned there to future sanitary construction work presents certain difficulties. Because of the extraordinarily large number of sick and quarantined prisoners (about 8,000), Construction Section I is to be cleared exclusively for such prisoners, according to the instructions of the commandant; this will result in the reallocation of the Gypsy Camp, and additional completion of lodging blocks in Construction Section II."
Based on the strength report of 8 May 1943, it is decided to release 1,500 construction workers.
"Without endangering the overall operation, however, the total number of 4,000 prisoners to be made available for construction work on the new sanitary facilities PoW camp, as demanded by the head of the Central Construction Office, will not be possible.
Therefore, investigations had to be made where deductions could still be made from the total of 33,587 prisoners fit for work at other locations […].
Since the new sanitary work to be done in PoW camp represent completely isolated operations, it is possible that, from the large number of those unemployed (8,673 in total), the male prisoners in admission quarantine, approx. 3,200 in total, will be taken out."

Letter from the Central Construction Office to the Labor Deployment Department, headquarters Auschwitz CC: RGVA, 502-1-83, p. 335.
"Re: Additional labor input for the special measures in the prisoner-of-war camp as ordered by SS Brigadeführer and Major General of the Waffen-SS Dr. Ing. Kammler. Reference: meeting on May 13 at the Central Construction Office."
Six additional units with a total of 440 prisoners are put together.

Letter from the Central Construction Office to the SS-WVHA, head of Office Group C, with the subject "Implementation of the special action – procurement of materials": RGVA, 502-1-83, pp. 315-316.
Request to the Krakow Construction Inspectorate "to deliver to the Central Construction Office for the purpose of carrying out the ordered special action and for

the construction of the large greenhouse facility" a number of pipes of various dimensions.

Telex from Central Construction Office to SS-WVHA, head of Office Group C: RGVA, 502-1-83, p. 141.
"Subject: Boiler room for PoW camp Auschwitz.
Ref.: File memo on the meeting with the head of Office Group C on the occasion of his visit to Auschwitz on 7 May."
"In the course of the special measures in PoW camp Auschwitz, the 35 cooking kettles listed under 1.) agricultural structures of the new women's camp Buda [sic] *are urgently needed. Since all utility barracks of Construction Section II are to be completed, the local office takes the liberty of inquiring whether another 60 kettles can be diverted from existing stocks for these measures."*

"Urgent telegram" from the Central Construction Office to the J.A. Topf & Sons company, Erfurt: APMO, BW 30/34, p. 41.
"Bring along thermal and static calculations for chimneys of Crem. II and IV. Presence of Chief Eng. Prüfer absolutely necessary."
The telegram is followed by a note from civilian employee Jährling:
"Have already spoken to Topfwerke by phone this morning. Chief Eng. Prüfer is in the Rhineland on a business trip and has been informed by his company by telephone of his urgent appearance in Auschwitz. Arrives here Monday. Earlier would not be possible. For safety's sake, I asked for the same calculations for both Crem. (meaning II and IV)".

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 20,388, of whom unfit for labor and deployment: 6,739. APMO, D-Aul-3a/370/3, p. 237.

Central Construction Office, "Urgent telegram" to the J.A. Topf & Sons company, Erfurt: APMO, BW 30/34, p. 40.
"Bring along Monday rough project for hot-water heating for approx. 100 showerheads. Installation of heating coils or boilers in the Crem. III waste incinerator under construction or in flue for the purpose of exploiting the high exhaust-gas temperatures. It is possible to build a higher wall of the furnace to accommodate a large reserve tank. Please send the corresponding drawing to Mr. Prüfer on Monday, 17 May."

Headquarters Order No. 14/43 announces the establishment of the Bergen-Belsen Camp; forbids entering or riding on planted and seeded fields; deplores plundering of lilac bushes and exhorts gentle pruning; exhorts compliance with uniform regulations; and mentions the theft of a pair of rubber boots. Frei, pp. 270f.

16. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 37,424, of whom unfit for labor and deployment: 7,489. AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 20,451, of whom unfit for labor and deployment: 6,722. APMO, D-Aul-3a/370/3, p. 237.

Letter from the Central Construction Office to the SS-WVHA, head of Office Group C: RGVA, 502-1-83, pp. 309-311.

"Subject: special measure for the improvement of hygienic facilities at PoW camp – Auschwitz.
Reference: Order of SS-Brigadeführer and Major General of the Waffen-SS Dr. Ing. Kammler."
The following is sent as attachment:
"Report on the measures taken for the implementation of the special program ordered by SS-Brigadeführer and Major General of the Waffen-SS Dr. Ing. Kammler at Auschwitz CC. […]
6. Disinfestation Plant.
For the disinfestation of the prisoners' clothing, an OT disinfestation plant is planned in each of the subcamps of Constr. Section II. In order to be able to carry out proper body delousing for the prisoners, boilers will be installed in the two existing prisoner bathrooms in Constr. Section I, so that hot water will be available for the existing shower system. It is also planned to install heating coils in the waste incinerator in Crematorium III in order to obtain water for a shower system to be built in the basement of Crematorium III. Negotiations have been held with the Topf & Sons company of Erfurt concerning the construction of this system."

Central Construction Office. File memo with the subject "Large-scale laundry Auschwitz CC, BW 160 Delivery of laundry machines ordered from Poensgen, Düsseldorf":
"In the temporary laundry of the protective-custody camp, 3 washing machines with a total capacity of 213,- kg per wash cycle are installed. With 6 washing cycles per day and 6 working days, this results in 213 x 6 x 6 = 7668.- kg of laundry per week. The total output of the provisional laundry with the 6 pieces of machines and 6 centrifuges to be ordered would then be 7668,- kg + 18144,- = 25812,-. If, as before, the provisional laundry is operated in 2 shifts, an output of 25812.- x 2 = 51624.- kg would have to be expected. The projected large laundry plant should perform 66000 kg after complete expansion, calculated for 30000 men."

RGVA, 502-1-347, pp. 23-24.

17. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 37,862, of whom unfit for labor and deployment: 7,277.

Letter from Robert Koehler, civil engineer, to Central Construction Office, subject "Repair of lining in chimney Crem. II": RGVA, 502-1-313, p. 37.
"With reference to yesterday's phone conversation with Mr. Ustf. Kirschnek, I would like to inform you that Mr. Chief Eng. Prüfer of the Topf & Sons company in Erfurt will be able to send you a proposal for the installation of the newly projected lining only middle of next week, after he has inspected the plan he was given yesterday. However, in order not to disturb the progress of the repair work intended by you by this delay, I recommend having the rest of the operationally worn-out and partly still standing lining cleared out of the chimney by your unskilled workers as soon as possible, in order to start with the new lining by my 2 specialists immediately after the arrival of the Topf Company's proposal, and after their approval by the current building owner. The corresponding construction materials would have to be immediately brought to the construction site by you, as well as the necessary equipment and scaffolding."

Headquarters Order No. 17/43 reminds that unauthorized persons are forbidden to enter the accommodation and clothing chambers; insists that SS members being transferred away from Auschwitz turn in all Reich-owned furnishings; reminds that radio sets must be registered; forbids passage through the grounds of the *Deutsche Ausrüstungswerke* at Auschwitz; thanks all helpers during an accident; and reports a private bicycle found. Frei, pp. 275f.

Obersturmführer Grosch
Untersturmführer (F) Kirschnek
from the Reich Ministry of Armament and Ammunition
Mr. Desch
Sander
from the GB-Bau Breslau
Mr. Schulz
" Jason
Meeting Report:
After welcoming remarks by the Brigadeführer, Ostubaf. Höss gave a brief report on the origin and purpose of the overall CC plant here.
In 1940, after the evacuation of 7 Polish villages, the Auschwitz Camp was built in the estuary triangle between Vistula and Sola by developing the grounds of an artillery barracks and many additions, conversions and new buildings, using large quantities of demolition materials. Originally intended as a quarantine camp, it later became a Reich camp and was thus given a new purpose. The border location between the Reich and the G.G. proved to be particularly favorable because of the ever-worsening situation, since the filling of the camp with manpower was guaranteed. In addition, the solution of the Jewish question was added in recent times, for which the prerequisite for the accommodation of initially 60,000 prisoners had to be created, which grew to 100,000 within a short time. The inmates of the camps were mainly intended for the large-scale industry growing in the neighborhood. The camp contains in its area of interest various armament factories, for which the labor force is to be provided on a regular basis."
"2.) Large-scale PoW camp
[…] *Due to various epidemic dangers, however, it is currently essential to take special measures to improve the existing facilities.* […]
The garrison physician Hstuf. Dr. Wirths explained in addition that the great danger of epidemics could not be fought properly due to arrivals from the east and the low possibilities of control due to lack of water and lack of allotments for the necessary drainage facilities.
In addition, there is the danger of the spread of the epidemics for the large industrial area through the contact of prisoners with civilian workers. The need for material for the new construction as well as for the maintenance is very great. The daily births of about 50 children in the gypsy camp, the treatment of 10,000 prisoners without the most primitive hygienic facilities, especially water, do not allow any alternative possibilities. For the most-necessary delousing facilities, the allotments are missing in order to be able to carry out a systematic and promising epidemic control. For the former small number of prisoners, the condition of the hygienic conditions was already bad; with the many new arrivals and the imminent increase to over 100,000, without the provision of contingents, the danger of such outbreaks has grown in an unforeseeable way, and responsibility can hardly be borne."

23. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 38,064, of whom unfit for labor and deployment: 7,670. AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 20,786, of whom unfit for labor and deployment: 6,806. APMO, D-Aul-3a/370/3, p. 237.

Headquarters Order No. 18/43 again prohibits the removal of belts at the barber's; because of the loss of a warehouse, no clothing requests are forwarded to the SS clothing agency in Berlin for the time being; mentions a change of address of the Frei, pp. 276-278

SS clothing agency, Munich; announces new mail-collection times; prohibits alterations to Reich-owned uniforms; insists on military haircuts; prohibits circumvention of official channels for field mail by use of civilian mailboxes; mentions change in phone number of SS headquarters; grants permission to named relatives of four SS members to visit Auschwitz for a limited time; decrees that non-barracked married SS members receive a different type of camp ID card; and mentions finding of a large sum of money.

24. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 38,023, of whom unfit for labor and deployment: 7,566. AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 20,750, of whom unfit for labor and deployment: 6,710. APMO, D-Aul-3a/370/3, p. 237.

Letter from the SS Leadership Main Office, Office Group D, to the SS Infantry Replacement Battalion "Ost", with the subject "Transfers": APMO, microfilm no. 1613/98.
"[…] *2. SS-Hauptsturmführer of the Reserves Josef Mengele, born 16 March 1911, SS Infantry Replacement Battalion 'Ost', is transferred to the WVHA, Office Group D, effective 30 May 1943. To be marched off after transfer of official duties to SS-Sturmbannführer Sack.*
To be marched off to Auschwitz CC near Kattowitz, reporting to camp commandant."

Letter from Friedrich Boos to the Central Construction Office with the subject "Auschwitz CC, prov. boiler house, my com. no. 2322": RGVA, 502-1-138, pp. 218-218a.
"Enclosed you will find a representation of the forced-draft system with flue gas and dust separation for the prov. district heating plant there. […]
The performance and warranty data are:
(a) <u>For a forced-draft unit type H 12 for a boiler of 100 sq.m. heating surface:</u>

flue-gas volume	*9000 cbm/std*
this is	*2.5 "/sec*
at a flue-gas temperature	*310°C*
specific weight	*0.62 kg/cbm*
static pressure measured at the fan outlet	*40 mm wc*
allowance for resistances in the flue-gas separator and ducts	*55 mm wc*
required allowance 10%	*4 mm wc*
pressure difference of	*99 mm wc*
power requirement on the fan shaft measured approx.	*6.4 PS*
speed	*1420 rpm*

<u>Drive motor:</u> A three-phase motor of 7 1/2 hp output at 1420 rpm is required for this draft system. With variable speed starter required for 50% speed reduction as torque decreases.
b) <u>For a forced-draft unit type H 13 for a boiler of 150 sq.m. h.sf.:</u>

flue-gas volume	*13,500 cbm/std*
this is	*3.75 "/sec*
at a flue-gas temperature	*310°C*
specific weight	*0.62 kg/cbm*
static pressure measured at the fan outlet	*40 mm wc*
required allowance 10%	*4 mm wc*
allowance for resistances in the flue-gas separator and ducts	*55 mm wc*
so that we calculated with a purely static pressure difference of	*99 mm wc*
power requirement (on the fan shaft measured approx.)	*10 PS*
speed	*1435 rpm.*

<u>Drive motor:</u> A three-phase motor of 12 1/2 hp output at 1435 rpm is required for this draft system. With variable speed starter required for 50% speed reduction as torque decreases."

Letter from Friedrich Boos to Vereinigte Kesselwerke Aktiengesellschaft, Düsseldorf, with the subject "K1a – fuel experiment at invalids' home in Beuthen on 5 and 6 May 43 Com.No. 2322", concerning district heating plant. F. Boos informs about the combustion tests of fine coal of the mine Andreas 3: RGVA, 502-1-138, pp. 218-218a. RGVA, 502-1-138, pp. 119-121.

"approx. 10 to 11% ash content.
the ash was loose, it did not form cakes
the dust content of the fine coal was too high.
Only I heard later that the ash melting point of the Andreas 3 mine in Brzeszcze is 1400 to 1500 °C, and therefore it is out of question for boilers with a higher temperature in the furnace.
For this reason, I would be pleased to hear from you what the furnace temperature is in the Holland boilers of 150 and 100 sq.m. supplied by you, namely*
a) during normal operation [with natural draft].
b) during forced operation [thanks to forced-draft system].
If a furnace temperature above 1400 to 1500°C is to be expected during forced operation, neither fine coal nor nut coal grain size I to IV will be considered."
* A detailed technical description of these plants can be found in the undated document "Scope of supply. 4 Holland boilers with 150 sqm heating surface struck by fire, 7 atm" ("*Lieferungsumfang. 4 Hollandkessel a 150 qm feuerberührte Heizfläche, 6 atü*").

25. "Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in men's camp: 38,145, of whom unfit for labor and deployment: 7,554. AGK, NTN, 134, p. 281; transcript by J. Sehn.

"Overview of inmate deployment at CC Auschwitz U/S. Month of May 1943." Occupancy. Total number in women's camp: 20,699, of whom unfit for labor and deployment: 6,755. APMO, D-Aul-3a/370/3, p. 237.

Letter from SS garrison physician (Wirths) to Central Construction Office: RGVA, 502-1-351, pp. 486-487.
"Subject: SS camp infirmary Auschwitz CC
Reference: Meeting with SS Brigadeführer Kammler of 21 May 43".
The letter concerns changes to projects of the SS hospital (departments for infectious diseases, internal medicine, surgery, families and connecting hallway).

Letter from the J.A. Topf & Sons company, Erfurt, to the Central Construction Office with the subject "Crematorium II". The Topf Company clarifies its position regarding the chimney matter: RGVA, 502-1-313, pp. 36-36a.
"It is not true that we were commissioned to manage or supervise the entire crematory construction. You have not placed an order for this, nor have we confirmed it. We have only received an order from you for the supply of 5 three-muffle cremation furnaces, a waste-incineration furnace, the smoke-duct system up to the chimney, and the aeration and deaeration system. This order was placed by you directly with Köhler, Myslowitz. Consequently, apart from the specification of the clear dimensions of the chimney cross-sections, we had no influence whatsoever on its execution, static calculation, etc., for which only the Köhler construction company is responsible."

Letter from the Topf company, Erfurt, to the Central Construction Office with the subject "Regulation". List of payments the company still expects: RGVA, 502- 1-327, p. 83.

"Crematorium II/III

The Central Construction Office draws plan no. 2683 "PoW camp Auschwitz, Constr. Section III, Structure: wooden lodging barracks (type air-force barracks) infirmary barracks", with dimensions 12.64 m × 42.64 m. RGVA, 502-2-110, p. 5; 502-1-238, p. 34.

Letter from the Central Construction Office to the SS-WVHA, head of Office Group C (Kammler) with the subject "Immediate Measures in the POW Camp for the Improvement of Sanitary Facilities": RGVA, 502-1-83, pp. 133-134.
"With reference to the immediate measures in PoW camp, the following plans are enclosed for submission with the request for approval:
1. Disinfestation barracks for each subcamp in Construction Section II;
2. Expansion of the horse stable lodging barracks in Construction Section II by installing toilet and wash facilities;
3. Planning of Construction Section III as a hospital section for 8-10000 prisoners, including isolation dept. and quarantine, separately for men and women. […]
4. Air-force barracks as infirmary barracks.
5. A new military hospital for the troops."

"Urgent telegram from the Central Construction Office to J.A. Topf & Sons, Erfurt: APMO, BW 30/34, p. 30.
"Telegraphically reminding drawing for Köhler Company concerning chimney Crem. II immediately. Chief Eng. Prüfer is precisely informed about the purpose of the matter, the delay is therefore inexcusable. Return wire whether drawing sent. Chimney builders had to stop work today due to lack of drawing."

Letter from the SS garrison physician Auschwitz CC to the Central Construction Office with the subject "Water examination and well protection area CC": RGVA, 502-1-332, p. 212.
"A recent water examination from the CC entrance area again showed a very high bacterial count, so that the water cannot be pronounced flawless. In particular, in contrast to previous tests, bacterium coli was positive in 10 ccm. The SS garrison physician asks that the cause of this be investigated and promptly amended."

Garrison Order No. 21/43 has a long list of camp departments that may not use unboiled tap water contaminated with germs. Frei, pp. 283f.

2. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 20,452, of whom unfit for labor and deployment: 6,967. AGK, NTN, 134, p. 285; transcript by J. Sehn.

"Overview of terrain surveys in the area of interest of Auschwitz CC". One area is designated as "Prohibited area Birkenau PoW camp". RGVA, 502-1-88, p. 8.

Letter from J.A. Topf & Sons, Erfurt, with the subject "Crematorium III, chimney": RGVA, 502-2-54, pp. 87-87a.
"We acknowledge receipt of your telegrams:
of 29 May 43:
'Executive drawings promised by Mr. Prüfer for the chimney of Crematorium II for Köhler have not yet arrived – request immediate dispatch as work would have to be

stopped'.
of 1 June 43.
'Telegraphically reminding drawing ...' [see entry of June 1, 1943].
To this we replied today:
'Köhler telegraphically requested delivery of the original chimney drawing on Saturday, on the basis of which we will first prepare a construction drawing, since we do not know the dimensions of the chimney.'"
Topf states that it had received the original chimney drawing from Robert Köhler 10 days earlier. On May 29, Köhler sent the "copy of a construction drawing for the chimney and the static calculation" to the Topf Company, but the original drawing was needed for this.
"Only after receiving these documents can we make a drawing and send it to Mr. Köhler. We opine that named gentleman could start again with adding the chimney lining."

Letter from the Higher SS and Police Leader Russia Center to the Construction Inspection of the Waffen-SS and Police Reich-East with the subject "Invoice of the company Topf & Sons, Erfurt, dated 19 Dec. 41": RGVA, 502-1-314, pp. 36-36a.
"By order of the then chief of Office C V, SS-Stubaf. Lenzer, the 4 Topf large-capacity cremation furnaces, which were originally intended for the Construction Inspectorate of Central Russia, were sent to the Central Construction Office in Auschwitz. To the company Topf & Sons, Erfurt, were paid on account so far by the construction group:

	RM 27,600,-- and
	RM 15,000,--
Total	*RM 42,600.--*

It is requested that this amount be reimbursed to the assembly group by balancing the books."
In two handwritten notes dated January 31 and February 21, 1944, civilian employee Rudolf Jährling states that the SS had ordered four 8-muffle furnaces from Topf, costing a total of RM 55,200; the Construction Inspectorate Russia Central had already paid Topf an advance of RM 42,600, to which the SS garrison administration of Auschwitz had added another advance of RM 10,000 on January 30, 1944, so that Topf was still owed RM 2,600.

A circular announces the performance of a comedy play and a lecture event at the *Kameradschaftsheim*. Frei, pp. 284f.

3. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 20,366, of whom unfit for labor and deployment: 7,002. AGK, NTN, 134, p. 285; transcript by J. Sehn.

Headquarters Order No. 21/43 moves the latest possible filing date for weekend leave requests and directs that leave slips be properly filled out on the back; declares trips to doctors, orthopedic centers, military hospitals, etc., to be official travel; grants permission to named relatives of twelve SS members for a temporary visit to Auschwitz; gives a date for inoculations against scarlet fever; and reports the loss of two objects. Frei, pp. 285f.

Garrison Order No. 22/43 regulates the use of female inmates as household helpers and payment for them, and announces sales times for meat and sausage in House 7. Frei, p. 287

4. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 20,414, of whom unfit for labor and deployment: 7,085. AGK, NTN, 134, p. 285; transcript by J. Sehn.

SS Main Department CII/3 of the WVHA – "Sickbays and Infirmaries" – draws RGVA, 502-2-110,

plan no. 2521 "Inmate infirmary and quarantine Dept.", which provides for the establishment of a "quarantine for men" for 4,088 inmates, a "hospital section for men" for 3,188 inmates, a "hospital section for women" for 3,188 inmates and a "quarantine for women" for 4,088 inmates in Construction Section III.
(See the corresponding entry for June 8, 1943).

p. 36;
502-1-88, p. 8.

SS-WVHA, Office C II – Special Tasks (SS Untersturmführer Birkigt). Note with the subject "Special measures in PoW camp – Auschwitz."
A. Extended Troop Infirmary
"B. Inmate Camp Hospital.
1) The expansion of Construction Section 3 was discussed together, and I drew sketches of it on paper.
2) The site inspection revealed that the front three rows of barracks and part of the four rows of barracks have already been erected.
3) According to the Central Construction Office, only 89 barracks are available for the hospital section. The Central Construction Office therefore desires that at least the 16 special barracks be taken from the 1000-bed sickbays east. These must then be brought to 42 x 50 lengthwise dimensions."
Transportation of these barracks will require 120-140 freight cars.

RGVA, 502-1-83,
pp. 267-268.

Letter from the Central Construction Office to the SS-WVHA, chief of Office C I, with the subject "Disinfestation and disinfection plant in PoW camp":
"After the outbreak of typhus in the Gypsy Camp, the construction of a disinfection plant became so urgently necessary that construction work had to be started immediately within the framework of the special construction measures ordered by SS-Brigadeführer and Major General of the Waffen-SS Dr. Ing. Kammler to improve the hygienic conditions […]. *The large dressing and undressing rooms are absolutely necessary, since the prisoners from a whole transport (approx. 2000), who usually arrive at night, have to be locked in one room until the next morning.*
[…] *The shower system for the prisoners contains 54 showers and is fed by 2 boilers, each with a capacity of 3000 liters. The plant is calculated for continuous operation."*

RGVA, 502-1-336,
pp. 106-107.

Letter from the Central Construction Office to 31 civilian companies employed at Auschwitz (list identical with that in the Central Construction Office letter of March 20, 1943) with the subject "Performance bonuses for prisoners":
"As can be seen from the enclosed copy, at the request of the Reichsführer-SS and Chief of the German Police, an increase in work performance to the maximum level is to be achieved by granting performance bonuses to the prisoners. The vouchers issued for this purpose by the administration of the CCs will be purchased by the Central Construction Office there in bulk and can be acquired by the individual companies by reimbursement of the equivalent value. The inmates receiving bonuses are to be reported in writing to the responsible head of construction in each case, stating the inmate number.
In order to obtain an increased work output from the prisoners, it is requested that a brief report of the introduction of the premium system be given to the Central Construction Office by June 26, 1943."

RGVA, 502-1-60,
pp. 18-18a.

Headquarters Order No. 22/43 deplores increasing bicycle thefts, and promises rewards if perpetrators are caught; announces a collective order for a book by General Guderian; calls on the bearer of a certain pistol to report; and grants permission to named relatives of five SS members to visit Auschwitz for a limited time.

Frei, pp. 287f.

5. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 20,366, of whom unfit for labor and deployment: 7,077.

AGK, NTN, 134,
p. 285; transcript
by J. Sehn.

The SS-WVHA, Office Group C/Construction, draws the floor plan of a model barracks for the Auschwitz troop hospital and a hospital barracks for prisoners. The latter measures 12.50 m × 31 m and has space for 144 hospital beds. NO-4471, 4470.

Letter from J.A. Topf & Sons, Erfurt, to the Central Construction Office, with the subject "Crema. II and III, Waste Incineration Furnace": RGVA, 502-1-336, p. 104.
"Enclosed we are sending you a drawing D 60446, concerning the installation of the boilers in the waste incineration furnace. We have sent the same drawing to our foreman Wilh. Koch If you agree with the execution of the plant according to this drawing, we ask you to inform Mr. Koch of this."

6. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 20,409, of whom unfit for labor and deployment: 7,130. AGK, NTN, 134, p. 285; transcript by J. Sehn.

7. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 20,431, of whom unfit for labor and deployment: 7,022. AGK, NTN, 134, p. 285; transcript by J. Sehn.

Letter from SS garrison physician to Central Construction Office with subject "Hot-Air Chamber in Women's Camp": RGVA, 502-1-170, p. 150.
"On 1 May 43, the hot-air chamber in the women's camp burned down. The cause of the fire was due to the lack of a fireproof ceiling.
The SS garrison physician Auschwitz requests that, in the course of the immediate measures to improve the hygienic conditions at Auschwitz CC, the hot-air disinfestation chamber be rebuilt (solid masonry) in such a way that fires cannot occur in the future, since these interruptions of operations and the loss of the ongoing delousing work for days immediately cause a strong increase in the number of lice and thus an increase in the incidence of typhus."

Headquarters Order No. 23/43 calls for the reporting of all typewriters for the purpose of allocating office supplies; announces the formation of a new administrative department at the WVHA; appoints a CC counter-intelligence officer; explains rules for Whitsun leave; and grants permission for a temporary visit to Auschwitz to named relatives of five SS members. Frei, pp. 289f.

8. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 19,994, of whom unfit for labor and deployment: 6,994. AGK, NTN, 134, p. 285; transcript by J. Sehn.

9. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 20,018, of whom unfit for labor and deployment: 6,937. — AGK, NTN, 134, p. 285; transcript by J. Sehn.

Letter from J.A. Topf & Sons, Erfurt, to the Central Construction Office with the subject "Crematorium IV and V deaeration system": — RGVA, 502-2-26, p. 221-221a.
"We refer to the discussion between your Herr Sturmbannführer Bischoff and our Herr Chief Engineer Prüfer on May 18 of this year and thank you for the order placed with us for 2 deaeration systems for Crematorium IV and V. We have accepted the order at a total price of RM 2510 on the basis of our General Terms of Delivery A, of which you are aware. Please refer to our enclosed cost estimate for the scope of supply.
Furthermore, we enclose a drawing D 59620 in duplicate, from which you can see the design of the masonry deaeration ducts and the arrangement of the air-extraction pipe to be supplied by us, as well as the blower and the pressure piping.
We ask for a brief confirmation that you agree with our designs. Immediately upon receipt of your feedback, we will complete the remaining necessary parts in our workshop."

J.A. Topf & Sons, Erfurt, to the Central Construction Office. Subject: "Crematorium IV and V". — RGVA, 502-2-26, pp. 222-223.
"Cost Estimate for Deaeration Plant."
This lists the components of the two plants, including: 2 blowers no. 450, 2 three-phase motors, 2 extraction pipelines and 2 pressure pipelines. Total price: RM 2510.

Headquarters Order No. 24/43 deplores unauthorized removal of bulletin-board notices and theft of canteen dishes; decrees that SS members must sign out at the armory upon transfer or discharge from the garrison; grants permission to named relatives of 14 SS members for a temporary visit to Auschwitz; announces bus departure time to Sola Hut; and regulates the wearing of a whistle cord. — Frei, pp. 290-292

10. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 19,936, of whom unfit for labor and deployment: 7,007. — AGK, NTN, 134, p. 285; transcript by J. Sehn.

SS-WVHA, Main Department C III/3, file memo. The Reich Minister for Armament and Ammunition decides on the urgent construction of a "stationary shortwave delousing facility" (microwave delousing) at Auschwitz. — RGVA, 502-1-336, p. 93.

Letter from Baugeschäft Anhalt to the Central Construction Office with the subject "Per Diem Invoice, Construction Site 'Special Action'": — Bartosik, Doc. 74, p. 255.
"Enclosed we submit to you an invoice in duplicate in the above matter amounting to RM 146.28."

Letter from Baugeschäft Anhalt, Hoch-, Tief-, Eisenbetonbau to the Central Construction Office with the subject "Day Wage Invoice, Construction Site 'Special Action'": — RGVA, 502-1-83, p. 258.
"Enclosed we submit to you an invoice in duplicate in the above matter in the amount of RM 146.28. We request that you check the invoice and transfer the amount to our account at Berliner Handelsgesellschaft."

11. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 19,908, of whom unfit for labor and deployment: 7,035. AGK, NTN, 134, p. 285; transcript by J. Sehn.

"List of the barracks necessary for the implementation of the special measure in PoW camp". The following are planned for Construction Section III: 9 nurses' barracks, 6 disinfestation barracks, 4 special barracks (freshly operated patients), 4 special barracks (sever internal patients), 2 special barracks (X-ray and treatment), 111 barracks for normal patients. RGVA, 502-1-79, p. 100.

Headquarters Order No. 25/43 appoints a person in charge of the use of horse-drawn vehicles; informs that the lodging chamber is temporarily closed for inventory; and appoints inmate units at civilian companies to "work camps." Then: Frei, pp. 292-294
"4. Taking women on a stroll within the post chain.
I would like to point out once again that it is forbidden in principle to take the wives of SS members who are visiting here for a walk within the line of posts. Women of SS members living here in the camp area are to take the shortest route from their homes to House 7, and likewise on the occasion of troop support events the shortest route to the Kameradschaftsheim."
The order offers membership in the Beskid Association; prohibits fishing in the Sola; confiscates new motorcycles; threatens confiscation of service cars in case of repeated use for private purposes; decrees that inmates are to be medically examined before employment in food establishments; grants permission to named relatives of 18 SS members for a temporary visit to Auschwitz; and names a found object.

A circular announces a "big colorful evening" at the *Kameradschaftsheim*. Frei, p. 295

Letter from the Chief of the Construction Inspectorate Reich East to the Central Construction Office with the subject "Special Barracks 'B' – at Auschwitz CC": RGVA, 502-1-108, p. 2.
"With the above letter [dated 31 May 1943], *the chief of Office Group D has requested the accelerated construction of a prisoner special barrack 'B'.*
I request that you come to an agreement with the Commandant of the CC and submit a corresponding building application here without delay.
A schematic sketch of the special barracks is enclosed.
However, I consider it necessary, just as in other CCs, to carry out additional measures (reinforcement of the partition walls) for a normal barrack. The work is to be carried out with particular urgency, since on the one hand, according to C V, the RF-SS has demanded special acceleration, and on the other hand, the application of the head of Office Group D dated 20 April 1943 only reached the hands of the Building Inspectorate today."
The special barrack "B" is the prisoners' brothel in the Main Camp, BW 93.

13. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 19,829, of whom unfit for labor and deployment: 6,974. AGK, NTN, 134, p. 285; transcript by J. Sehn.

Letter from the Central Construction Office to J.A. Topf & Sons, Erfurt, with the subject "Crematorium 2 – BW 30 – Chimney repair": APMO, BW 30/34, pp. 22-23.
"In response to the above letter [of June 2, 1943], *we are informed that the local office must demand final clarification of the chimney question and reconstruction of the damaged chimney as soon as possible.*
On the basis of the correspondence and telegrams so far, the suspicion arises that the whole matter is being dragged out.
Already during the last visit of your Mr. Prüfer in April, since the old design proved to be bad in practice, a new proposal concerning the chimney shell was demanded. The negotiations between Mr. Koehler Myslowitz, the builder of this chimney, and Mr. Prüfer were concluded with the promise to send a new chimney drawing as soon as possible. Mr. Prüfer was aware that the chimney was built by Koehler exactly according to the dimensions of the plan executed by you (for the processing of the project your company invoiced an amount of 1,769.39 RM at that time) and your fire-clay lining provided for in the cost estimate of 12 Feb. 42 under item II. Nevertheless, your company demanded a drawing and a static calculation of the chimney from Mr. Koehler Myslowitz. You then also received these.
Instead of finally proceeding with the processing of the new proposal, for some reason unknown here, there was renewed hesitation until Mr. Koehler demanded his plans back again, and you sent them to him again after some time.
Since the plant cannot be put into operation without the completion of the chimney shell, but on the other hand is urgently needed, it is absolutely necessary to insist on the keeping of the given promise for the preparation of the chimney drawing and to send it as soon as possible to Koehler for the purpose of erecting the chimney liner".

20. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 19,743, of whom unfit for labor and deployment: 7,082. AGK, NTN, 134, p. 285; transcript by J. Sehn.

Attic: living quarters for prisoners in Heraklith construction, 1 attic room with ventilation pipes of the furnace room, 1 attic room with motors and forced-draft systems of the aeration and deaeration of the entire crematorium, 1 elevator device. […]
1 chimney system 15.46 m high."

Letter from the Construction Inspectorate of the Waffen-SS and Police Reich-Ost, administration, Posen, to the Central Construction Office with the subject "Invoice from Topf & Sons, Erfurt, dated 19 Dec. 42". The Construction Inspectorate informs the Central Construction Office that the SS economist Russia Center has already paid 42,600 RM to the Topf Company for the 8-muffle cremation furnaces from the Mogilev contract. RGVA, 502-1-314, p. 35.

Headquarters Order No. 26/43 directs that SS-T-Sturmbann be notified of time and place when on-call duty is deployed; reminds that only SS members with permits may drive vehicles outside area of interest; prohibits SS members from doing private laundry outside camp for disease prevention; restricts wearing of spurs to members of mounted or horse-drawn units, on the way to and from riding duty, and during it; mentions an abandoned private bicycle soon to be confiscated; deplores the unauthorized removal of the lectern of Department VI; assigns a hunting permit to one SS member; grants permission for a temporary visit to Auschwitz to named relatives of five SS members; and mentions three lost and two found objects. Frei, pp. 296f.

25. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 19,585, of whom unfit for labor and deployment: 7,409. AGK, NTN, 134, p. 285; transcript by J. Sehn.

Letter from the SS-WVHA, Office Group C, to various departments, the headquarters, and the Central Construction Office of Auschwitz, with the subject "Establishment of a Waffen-SS Construction Service Office at the Administration of Auschwitz CC": RGVA, 502-1-1, p. 280.
"In order to ensure construction maintenance and construction needs in the area of the administration of Auschwitz CC in a technically and economically expedient manner, a Construction Service Office of the Waffen-SS will be set up at the administration of Auschwitz CC, effective March 1, 1943. SS-Oberscharführer Hatzinger (civil engineer), who is provided by the CC administration, will be in charge of the Construction Service Office."
The date (25 June 43) is that of the transcript. The actual date is not given.

26. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 19,651, of whom unfit for labor and deployment: 7,409. AGK, NTN, 134, p. 285; transcript by J. Sehn.

The Polish prisoner Anton Szuszawalak, registration number 123896, is admitted to the prisoner infirmary of Auschwitz CC with the diagnosis "pulmonary TBC fibro-caseosa bilateralis". The prisoner dies more than seven months later on February 3, 1944. The course of the disease is described day by day in 10 "fever curves" and other reports. On February 4, 1944, the 1st camp physician of Auschwitz CC conducts the "dissection of the corpses of Polish Prisoner No. 123896 Szuszawalak Anton, born 11 April 1912 in Lipisze": Hoerlein Document No. 215.
"Cause of death: destructive tuberculosis of both lungs, larynx and intestines in a cachectic individual."

27. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 20,550, of whom unfit for labor and deployment: 7,413. AGK, NTN, 134, p. 285; transcript by J. Sehn.

28. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 20,514, of whom unfit for labor and deployment: 7,399. AGK, NTN, 134, p. 285; transcript by J. Sehn.

Letter from the Central Construction Office to the SS-WVHA, head of Office Group C, with the subject "Completion of Crematorium III": RGVA, 502-1-314, p. 14a.
"Reporting completion of Crematorium III as of 26 June 43. Consequently, all ordered crematoria are completed.
Output of the crematoria now available with a 24-hour working time:

1.) old Crematorium I	
3 x 2-muffle furnaces	*340 persons*
2.) new Crematorium in PoW Camp II	
5 x 3-muffle furnaces	*1440 persons*
3.) new Crematorium III	
5 x 3-muffle furnaces	*1440 persons*
4.) new Crematorium IV.	
8-muffle furnace	*768 persons*
5.) new Crematorium V.	
8-muffle furnace	*768 persons*
Total for 24-hours working time	*4756 persons "*

29. "Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 20,464, of whom unfit for labor and AGK, NTN, 134, p. 285; transcript

deployment: 7,386. — by J. Sehn.

Central Construction Office, House Decree No. 120: *"According to the decree of the head of Office Groups C, SS-Brigadeführer and Major General of the Waffen-SS, Dr. Ing. Kammler, dated 9 June 43 – Dz-: C VI/3 – Allg.-1/Dr. v. Gl./Ka. – as of July 1, 1943, all protective-custody prisoners are placed by the concentration camp management at the disposal of the SS construction services and no longer of the companies. Settlement between CC and SS Construction Service Office will be based on the rates already announced."* (As ordered by the SS-WVHA on May 7, 1943.) — RGVA, 502-1-25, p. 157.

Central Construction Office, "Construction Application for the Construction of a Prisoner Special Barracks 'B' BW 93 at Auschwitz CC." This includes an "Explanatory Report. For the erection and installation of a prisoner special barrack 'B' at Auschwitz CC," a "Cost Estimate. For the construction of a prisoners' special barrack 'B' BW 93 at Auschwitz CC" and a "Site sketch 1:2000." Total amount: RM 30,000. — RGVA, 502-2-108, pp. 1, 3-7.

The Polish prisoner Josef Pietrzak, registration number 111661, is admitted to the prisoner infirmary of Auschwitz CC with the diagnosis "pulmonary TBC fibrocaseosa-spondylitis TBC". The prisoner dies almost eight months later on February 24, 1944. 10 fever curves and other reports describe the course of the disease day by day. On February 24, 1944, the 1st camp physician of Auschwitz CC performs the "dissection of the body of B.V.R.D.[19] prisoner Ne. 111661, Pietszak Josef, born 17 Feb. 1913 in Welungen": *"Cause of death: destructive pulmonary and intestinal tuberculosis in a cachectic individual."* — Hoerlein Document No. 215.

Headquarters Order No. 27/43 orders that the weapons of injured SS members may not be taken into the hospital; forbids spraying private bicycles with Wehrmacht camouflage paint; instructs that the private bicycles of SS members living in the camp area and service bicycles of certain departments be listed; orders that plant decorations must be requested through the administration; sets times for applying for camp passes; gives instructions for weekend vacationers at Sola Hut; allows entry into Krupp Halls only to SS members on duty there; grants permission to the wife of an SS member for a temporary visit to Auschwitz; mentions a lost briefcase; and cites a notice from the regional shoemakers' guild on the organization of business operations. — Frei, pp. 298f.

30. The SS garrison physician writes a letter to the first leader of the protective-custody camp of Auschwitz with the subject "Mistreatment of Prisoner Z 4684 Jaroslaus Murka", who had been beaten up by the block eldest of Block 5a: *"The garrison physician Auschwitz asks for investigation and punishment of the culprit".* — RGVA, 502-1-68, p. 70.

"Overview of inmate deployment at CC Auschwitz U/S. Month of June 1943." Occupancy. Total number in women's camp: 20,538, of whom unfit for labor and deployment: 7,367. — AGK, NTN, 134, p. 285; transcript by J. Sehn.

The third operation book of the surgical department (Block 21) of the prisoner infirmary of Auschwitz CC begins with this date. It refers to the period from June 30, 1943 to November 11, 1943. The page numbering is a continuation of the previous book and ranges from 160 to 319. The entries cover the numbers 16924-19543. — ISD, KL Auschwitz, folder 160.

[19] Probably *Berufsverbrecher, Reichsdeutscher* = professional criminal, Reich German.

Headquarters Order No. 28/43 decrees the establishment of an SS garrison administration and explains organization and responsibilities, and it grants permission to named relatives of three SS members to visit Auschwitz, mostly for a limited period of time. Frei, p. 300

[?] Central Construction Office, questionnaire regarding the crematoria at Birkenau, filled out by hand: RGVA, 502-1-312, p. 8.
"PoW camp – Auschwitz
In Crematorium No. II, III, IV, V there are:
5, 5, 4, 4, = 18
1. Number of currently existing furnaces
a) How many incineration chambers?
Muff: 15, 15, 8, 8 = 46
b) Built by which company and when?
Topf and Sons, Erfurt, 1942-43
2. Type of firing
a) with oil
b) with coke Nos. II, III, IV, V
3. Are the furnaces stationary? How many? 18
" " " mobile? How many?
4. Height of chimneys in meters
16.00 16.00 2x16.00 2x16.00
5) Are exhaust gases utilized?
Planned but not implemented
If so, for which purpose?
for bathing facilities in Crema. II & III."

July 1943

1. Central Construction Office. File memo with the subject "Discussion on ultra-shortwave delousing [microwaves] with SS-Hstuf. Prof. Dr. Willing, SS-WVHA." RGVA, 502-1-26, pp. 95-96; 502-1-333, pp. 43f.
"Reference: visit to Auschwitz on 30 June 43.
Place and time: Auschwitz, Central Construction Office 1000 hrs.
Participants:
SS-Sturmbannführer Bischoff, head of the Central Construction Office
SS-Hauptsturmführer Dr. Ing. Willing, SS-WVHA
SS-Hauptsturmführer Dr. Wirths, garrison physician
SS-Untersturmführer Pambor, SS-WVHA
SS-Untersturmführer (F) Kirschnek Central Construction Office
SS-Rottenführer Jähne, Central Construction Office
Dipl. Ing. Franke, Siemens Company
Z.A. Jährling, Central Construction Office"
"Since the current epidemic period in the area of interest of the Auschwitz CC entails tremendous dangers for the entire Upper Silesian industrial area and thus for the armament tasks, it is urgently necessary to set up within the shortest possible time the ultra-shortwave delousing plant already put under supervision for 15 May 43 in the area of the Auschwitz CC."

2. Letter from the Central Construction Office to J.A. Topf & Sons, Erfurt, with the subject "Auschwitz CC, PoW camp, Crem. IV + V, BW. 30 b + 30c." APMO, D-Z/Bau, Inv. No. 1967, p. 170.
The Central Construction Office notes that according to the cost offer of November 16, 1942, Topf offered 1 piece of eight-muffle cremation furnace at a price of RM 12,972. The invoice of April 5, 1943 states a price of RM 27,600 + 32.30 for two furnaces with reference to the RFSS order letter of December 4, 1942. In the letter of January 23, 1943, the Topf Company reported that it had already received payment of RM 26,600 + RM 15,000 for the delivery of 2 furnaces, a total of RM

42,000, so that according to the Central Construction Office it had received RM 14,967.70 more than it should have.

"Operating Instructions for the operation of the Circulating-Air Disinfestation Plant II/SO, connection value 18 KW." — RGVA, 502-1-336, p. 70.

Central Construction Office, listing with subject "official bicycles." The list includes 64 persons from the Central Construction Office (but also Mrs. Bischoff is included) who were assigned a service bicycle, mentioning last name, first name, rank, brand and frame no. of the service bicycle. — RGVA, 502-1-201, pp. 596-597.

The Jewish prisoner with the registration number 123896 is admitted to the prisoner infirmary of Auschwitz CC with the diagnosis "Pulmonary TBC fibrocaseosa bilateralis". The prisoner dies after seven months on February 3, 1944. The course of the disease is described day by day in 10 "fever curves" and other reports. — Hoerlein Document No. 215.

A special headquarters order forbids riding bicycles on sidewalks. — Frei, p. 301

4. With this date begins the register "Block 20 – 8 – Occupancy of 8 – Pulmonary TBC Station", which extends from July 4, 1943 to July 4, 1944. It contains approximately 1090 names of prisoners who passed through Block 20, Room No. 8. — ISD, folder 61d.

5. File memo from the Central Construction Office with the subject "Construction Managers Meeting on 16 June 43 in Posen." It contains bureaucratic directives, including those on accounting and administration, construction-office expenses ("Amounts are to be posted to chapters 21/7a and b in the administration of the Construction Inspectorate."), and maintenance of construction-expenditure books. — RGVA, 502-1-26, pp. 99-101.

Central Construction Office. Plan "Installation of a hot-air delousing system in the disinfestation barracks in the women's camp," drawn by inmate no. 127 Josef Sikora. This is BW 5a; instead of the "gas chamber" there are two chambers connected by a hot air device. — APMO, Neg. No. 20932/5.

Garrison Order No. 23/43 mentions two SS members killed in gang fighting. — Frei, p. 301

6. The SS garrison physician writes a letter to the first leader of the protective-custody camp of Auschwitz with the subject "Mistreatment of prisoner 115385 Richard Jedrzejkiewicz". According to the communication from the camp physician of the Buna (Monowitz) Camp, the prisoner in question was beaten by the block eldest of Block 28, Otto Osterloh, 113932:
"The garrison physician Auschwitz asks for investigation and punishment of the culprit". — RGVA, 502-1-68, p. 63.

7. Reply of J.A. Topf & Sons, Erfurt, to the letter of the Central Construction Office dated July 2, 1943. — APMO. BW 30/27, pp. 24-26.
The Topf company explained that the RFSS order of December 9, 1941, provided for the delivery of "4 pieces of double four-muffle cremation furnaces" at a total price of RM 55,200, so that each furnace cost RM 13,800. Topf had had to rebuild the two furnaces, which were intended for Auschwitz at the time, and had increased the price accordingly by 6% (= RM 828).
In a telegram dated October 26, 1942, the Central Construction Office inquired about the price of an eight-muffle furnace, which Topf put at RM 13,800, an amount that included the 6% price increase mentioned above, and the deduction of the cost of the anchoring irons (which were manufactured by the Central Construction Office itself).
In this letter, Topf does not address Central Construction Office's accusation that

it had received RM 14,967.70 illegally, but it can be inferred from its statements that it still owes the company (RM 55,200 – 42,600) RM 12,600.
Instead, other important clarifications are made:[20]
"Since, however, not 2 furnaces, as estimated by us for there, were ordered for Auschwitz,[21] *but, as already mentioned at the beginning, 2 furnaces from the Mogilev order came to Auschwitz for installation, we have also invoiced you for the cost-estimate price from Mogilev in the amount of RM 13800.-- per furnace according to the letter from the Main Office, Berlin. We would like to mention that half a furnace – i.e. 4 muffles – was delivered to Mogilev on December 30, 1941. The remaining 1½ furnaces are at the disposal of the Reichsführer SS, Berlin; we have already requested several times that the materials be taken away so that our warehouse can be relieved."*

Central Construction Office, "Compilation of inmate employment as of June 30, 1943". RGVA, 502-1-60, pp. 14-15.
Skilled workers: 1,264; unskilled workers: 9,732: Total: 10,996.
Among others, the following units are on duty at the PoW camp:

BW 17	– demolition Birkenau	380	inmates
BW 30a	– Crematorium III	25	″
BW 31	– prov. bakery	5	″
BW 32	– disinfestation facility	180	″

Letter from the Central Construction Office to the camp commander with the subject "Security of the camp". Instructions in 7 points on monitoring Polish civilian workers (movement in the area of interest, access to the CC, lodging in the communal camp, etc.). The Central Construction Office asks that the Reich Germans be left in their quarters, House No. 163: RGVA, 502-1-332, pp. 199-200.
"At present, 959 skilled workers are employed by the construction companies deployed here."

Letter from Umluft-Apparatebau-Gesellschaft MBH to the Central Construction Office with the subject "PoW camp Auschwitz, disinfestation device, Construction Section II". The Central Construction Office protests because of the inadequate packing of the first two devices. Two more devices were shipped to Auschwitz on June 25. The company has yet to deliver the last two devices. RGVA, 502-1-170, pp. 129-129a.

Headquarters Auschwitz CC. Special Order No. 15/43. AGK, NTN, 94, p. 216. Odpis (transcript). Frei, p. 302
"In the last few days, two SS members who were on duty in the Gypsy Camp and in Camp B Ib have fallen ill with typhus. In order to prevent further cases of typhus from occurring among SS members, and so that the relaxation of the camp lockdown now introduced does not have to be reverted again into an absolute camp lockdown, I order that SS members serving in the Gypsy Camp, Camp B Ia and B Ib be housed separately from other SS members, bathed daily after the end of duty, and examined to ensure that they are free of lice.
sgd. Höss, SS-Obersturmbannführer and Commandant."

This date marks the beginning of a very long section (476 sheets) of the inmate infirmary directory of the Monowitz CC. Each sheet contains 33 lines and 6 columns: "Serial No.", "Inmate No.", "Name", "Admission", "Departure" and "Notes", which contain the stamp "DISCHARGED" (12,341 prisoners), "to NI-10186.

[20] On 16 August, the SS Administrator at the Higher SS and Police Leader of the Government General sends a note to all Central Construction Offices of the Waffen SS and Police of Heidelager, Krakow, Lemberg, Lublin, and Warsaw, as well as to the New Construction Office of Radom, stating: "The Office CIII has at present 1½ cremation furnaces = 12 muffles at its disposal." It is requested to advise by September 1 if any of the above construction offices have a need for such furnaces. WAPL, Zentralbauleitung, 268, p. 132.
[21] See the "file memo" of SS-Untersturmführer Fritz Ertl, dated August 21, 1942.

Auschwitz" and "to Birkenau" (written in pen; 2,599 prisoners) and the stamp ✚ (766 prisoners). These data are noted on a summary sheet of the document, which takes into account 15,706 registrations.
The list begins with serial number 9794, 107165, Abraham, Heinz Jrs, admitted 7 July 43, departed 15 July 43, "to Auschwitz", and ends with number 25500, 145500, Udovichenko, Stefan, Admitted 19 June 44, departed 27 June 44, "discharged."
Under no. 21669 is noted: 174517, Levi, Primo Jrs. admitted 30 March 44, departed 20 June 44, "discharged."

8. With this date begins the index "Diathermy Treatment I – 16th X-ray Station, Inmate Infirmary Auschwitz", which runs from July 8 to September 3, 1943. It consists of 21 pages divided into 5 columns: "Serial No.", "Inmate No.", "Name, First Name", "Min." [minutes of irradiation], "Object". A total of 444 prisoners are registered there. APMO, D-Aul-5/16. ISD, folder 67r.

Labor deployment: civilian workers: 311; PoWs: 129; inmates: 3,943

"Final Report on the Activity of the Motor Pool of the Central Construction Office of the Waffen-SS and Police Auschwitz for the II Quarter 1943". In April, May and June 1943, 57421 km were covered in 7883 trips. The 19 construction companies that provided their construction machines to the Central Construction Office were allocated 6687 liters of diesel, 3240 liters of gasoline, 5775 liters of petroleum, 939 liters of engine oil, 260 liters of ram grease and 25 liters of generator gas. The companies are: Berthold, Boos, Brandt, Conti, Deutsche Bau, Falck, Hirt, Huta, Industrie Bau, Kluge, Lenz, Ostdeutsche Baustoff-Werke, Petersen, Richter, Riedel & Sohn, Spirra, Wagner, Werkhallen Krupp, Wodak. A detailed report follows.

RGVA, 502-1-188, pp. 26-32.

Garrison Order No. 24/43 complains of unauthorized fishing in various waters; announces new phone numbers and addresses for the CCs Herzogenbusch and Bergen-Belsen; reports increase in subsistence rates for Hungarian Waffen-SS members; deplores rapid wear and tear of bicycle tires, which can hardly be replaced; prohibits bad habit of using inmates for private moonlighting; commends and rewards a guard "for his prudent conduct in the escape" of a Gypsy inmate; orders the reporting of all private pistols for the purpose of procuring ammunition; exhorts the delivery of chicken eggs; and grants permission for a temporary visit to Auschwitz to named relatives of 16 SS members.

Frei, pp. 302-305

9. Construction Office of the Waffen-SS and Police Auschwitz. Work card, order no. 636/394 to the electricians' unit:
"For installation Sonderkommando – Birkenau. BW 20 PoW camp [high-voltage plant] *the following work is to be carried out: Lay supply cable to Sonderkommando /because of installation of prov. ground sewage treatment plant in Constr. Section II/. Started: 2 August 1943; finished: 4 August 1943.*
50 skilled worker hours
120 unskilled labor hours."
The order in question is dated July 7, 1943.

RGVA, 502-1-316, pp. 67f.

10. Letter from the Commandant of Auschwitz CC to the Central Construction Office with the subject "Fencing in Civilian Labor Camp":
"For the purpose of housing the civilian labor force, the commandant has ordered that the fencing by a double wire obstacle of the civilian labor camp is to be started immediately. The 1st wire obstacle is to be kept at an appropriate distance from the 2nd, so that free-roaming dogs can be used there. The male and female prisoners assigned to various jobs in the civilian labor camp are to be pulled out immediately."

RGVA, 502-1 60, p. 81.

Construction Office of the Waffen-SS and Police Auschwitz U/S.-Oswiecim. Work card. Order No. 539/375 for the electricians' unit:

RGVA, 502-1-316, p. 139; *ibid.*, pp. 138, 141.

"For techn. dept. BW. 24 fencing, the following work is to be carried out:
Construction of an electric fence around Crema. II in PoW camp
Started: 19 May [sic] *1943. Finished: 10 Sept. 1943.*
180 skilled worker hours
4015 unskilled laborer hours."
The corresponding order no. 539/375 is dated 9 June 1943, but there is a Central Construction Office requisition for the same order dated 21 May 1943.

12. Continentale Wasserwerks-Ges.m.b.H., "Statement of pumping hours performed at PoW camp B.W. 19 by means of hand pumps during the period June 28 – July 10. Section 2. Part 1 & 2". A total of 228 hours, of which 168 in the Gypsy Camp because of rain and groundwater, and 60 hours at Crematorium 3 because of groundwater. RGVA, 502-1-157, p. 44.

Central Construction Office. File memo with the subject "Replacement route for the rail-level crossing at km 346.9 to be cancelled, and rail connection for the PoW camp": RGVA, 502-1-26, pp. 107-108.
"The following agreement was reached on the delivery of car-loads arriving for the CC or the Central Construction Office:
The goods coming to CC for unloading have so far been delivered to the CC track, tracks 1 and 2. The barracks and building materials arriving for the Troop Hospital will be delivered on the private siding of the Koschnitzki roofing-felt factory. The remaining construction material, barracks required for the PoW camp and track material for the private siding will be delivered to the currently existing track for special transports. The Central Construction Office will see to it that the cars to be delivered to these tracks will in future be sent with the address 'Central Construction Office of Waffen-SS Auschwitz, Track 21 west'."

Auschwitz CC Administration. Order no. 600. Crematorium administration: APMO, Höss Trial, Vol. 11a, p. 94.
"Przedmiot [Subject]*: 1 key for gas chamber /report to H.stuf. of pharmacy in 44-Infirmary/. Order form of the administration BBD* [?] *No. 87 block dated 9 July 43. Wykończono* [executor]*: Goderski. Ukończono* [Finished]*: 13 July 43."*

The Jewish prisoner Lejzor Weinblum, registration number 124262, is admitted to the prisoner infirmary of Auschwitz CC with the diagnosis "pulmonary TBC fibro-caseosa bilateralis". The prisoner dies six months later on January 12, 1944. 9 fever curves and other reports describe the course of the disease day by day. Hoerlein Document No. 215.

Garrison Order No. 25/43 complains of absence of administrative personnel on Saturdays after 12 noon; informs that the camp fence around Construction Section II is now electrified; reports that the motor-vehicle repair shop has been recognized as a troop-owned shop; orders and gives instructions for the establishment of a round-the-clock duty cycle for the guards and the garrison physician. Then: Frei, pp. 305-307
"5. Children in the camp area.
I have noticed that children hang around here in the camp during the day and even hang around the individual work areas. I have also observed that these children walk along with the closed columns of inmates when they move in and out of the camp. I hereby forbid this and point out the danger to the children in the event of a possible escape attempt due to the necessary handling of a firearm by the escorting guard. In addition, such handling of the children by the prisoners entails such a moral disadvantage, which is irresponsible for the parents. The SS members are to give instructions to their wives and children in this regard, and are themselves to see to it that their children stay away from the inmates, and do not remain constantly in the camp itself or in the workplaces."
The order also gives permission to the above-mentioned relatives of two SS members to visit Auschwitz for a limited period of time.

13. Letter from the Central Construction Office to the SS-WVHA, head of Office Group C, with the subject "Construction report on the special measures in the PoW camp. and in the Main Camp": RGVA, 502-1-83, pp. 117-120.

"Report on the progress of work for the special measures in the PoW camp. and in the Main Camp. […]
A. PoW camp. […]
4. Construction work.
Construction Section I.
The hot-water installations in the two delousing barracks (prisoner baths) of Construction Section I have been put into operation. In Construction Section I (women's camp) another 5 horse-stable barracks (Aktion Schmelt) were set up. The expansion and installation of the heating stoves in these barracks has begun.
Construction Section II.
Work continues in the wash- and toilet barracks and in the prisoner-lodging barracks.
Disinfestation plant.
Construction work at the large disinfestation plant continued. Most of the iron parts for the disinfestation furnaces are still missing from the Topf Company, so that construction cannot be continued.
In the Gypsy Camp, work has begun on converting a horse-stable barracks (formerly toilet barracks) into a delousing barracks. For this purpose, 2 electric hot-air disinfestation devices have arrived. […]
Construction Section III (Prisoners' Hospital)
Continuation of the excavation of the ring trenches. […] *18 air-force barracks, 5 horse-stable barracks, 3 utility barracks have been erected. 1 temporary presedimentation basin is excavated.* […]
It is further noted that all work units at the PoW camp moved in at 12 noon on Thursday, July 8, because of rainy weather, and did not move out at all on Friday, July 9."
"B. Main Camp.
[…] *A discussion and clarification took place with Professor Willing and representatives of Siemens Company concerning the stationary shortwave and delousing system for the laundry and reception building. The project of the Siemens Company was submitted as a proposal, which was approved by the Central Construction Office from the construction point of view and reported as feasible.*

Letter from the Central Construction Office to the SS-WVHA, head of Office Group C, with the subject "Security of the Camp": RGVA, 502-1-332, pp. 198-198a.

"At a meeting held on 28 Feb. 43 between the camp commandant, SS-Obersturmbannführer Höss, and the head of the local office, SS-Sturmbannführer Bischoff, the former spoke of the secondment of 160 guards daily for the Central Construction Office. However, in the month of July only an average of 41 guards were assigned daily, and on four days none at all, so that the prisoner units could not move out on these days.
Due to insufficient post assignment, the construction work is considerably impaired and cannot be completed on schedule, especially the immediate measures in the PoW camp. The Central Construction Office must decline any responsibility for this. Furthermore, if the number of guards is assigned in the quantity as discussed with the camp commandant, it will be much safer to eliminate espionage by Polish civilian workers. The Central Construction Office requests to approach Office Group D and request the assignment of at least the number of guards requested by the local office, i.e. 160 men per day.

15. Letter from the Central Construction Office to the SS garrison physician with the subject "Premature occupancy of Construction Section III": RGVA, 502-1-83, p. 115.

"On 17 May, the expansion of Construction Section III in the PoW camp as a prisoners' hospital was ordered by SS Brigadeführer and Major General of the Waffen-SS Dr. Ing. Kammler. Recently, the barracks already erected have been occupied without

regard to the existing hygienic conditions and without the knowledge of the Central Construction Office. (Weaving Mill, etc.).”
This represents an increase in the danger of epidemics.

16. Letter from the Central Construction Office to the head of the SS Site Administration, SS-Obersturmbannführer Möckel, with the subject “Barracks for the Political Department – BW 92 -”: RGVA, 502-1-324, p. 1.
“The local office informs that the location of the two barracks for the Political Department, in particular the Swiss barrack, was determined on the assumption that Crematorium I will cease its operations completely, as was also assured during the above-mentioned consultation by SS-Ustuf. Grabner.
After work on the barracks was almost completed, it was found that the crematorium had nevertheless recently been put into operation.
The easy flammability of these buildings requires the shutdown of Crematorium I, otherwise any responsibility for resulting fire damage must be rejected.

Garrison Order No. 26/43 reports a medal award to Oswald Pohl; complains of guards’ lack of sense of duty, finds fault with “conversations with inmates” and “insufficient distance from inmate,” and decrees instruction; tightens reports to the chief of the Main Office on his visits; reports a change in the official title of the chief of the Main Office; complains of incomplete vaccinations and threatens camp lockdown until all are vaccinated; orders vehicles to be turned in in case of transfers/dismissals/vacations; reminds that motorcycle coats are to be worn only by authorized personnel and in accordance with regulations; renames welfare officer to welfare SS leader; reports establishment of CC Warsaw; mentions loss of camp ID card; and grants permission to named relatives of seven SS members to visit Auschwitz, mostly for a limited period of time. Frei, pp. 307-310

17. Letter from the J.A. Topf & Sons company, Erfurt, with the subject “Disinfestation device, our order no. 43/204/1 – Waste incinerator, our order no. 43/1501 – Your telegram of 10 July”: RGVA, 502-1-336, p. 87.
“We acknowledge receipt of your above telegram and hereby inform you that the major part for the above orders was dispatched by express delivery on the 9th of this month. The remaining deliveries will be made immediately upon receipt of the required electric motors at our plant.”

Letter from the Central Construction Office to the J.A. Topf & Sons company, Erfurt, with the subject “Auschwitz CC, Crematorium II”: APMO, BW 30/34, p. 17.
“In the above-mentioned matter, the local office informs us that the fireclay lining for the damaged or collapsed interior of the chimney in Crema II has also been rebuilt according to the plans supplied by you, and that the work in this regard is nearing completion.
On the basis of the drawings now newly supplied by you, it can be stated that your first design, concerning the chimney, did not take into account the different thermal expansion and the anticipated high temperatures, but now only the second design.
The clarification of the question of guilt therefore remains open until we receive the relevant documents from our superior office in Berlin.
It is also brought to your attention that, within the framework of your warranty obligations, the very defective smoke ducts (entire vault sections of which have collapsed in several cases) are to be repaired or rebuilt within the shortest possible time.”

Polish prisoner Nikolaus Dunda, registration number 60765, is admitted to the prisoner infirmary of Auschwitz CC with the diagnosis “pulmonary ulcerative fibrosis TB. Laryngitis TBC.” The prisoner dies over seven months later on February 22, 1944. 11 fever curves and other reports describe the course of the disease day by day. Hoerlein Document No. 215.

19. X-ray book No. 12 of the prisoner infirmary of Auschwitz CC begins with this date. It extends from July 19 to August 7, 1943, and contains entries numbered 8243 to 9082. APMO, D-Aul-5/15. ISD, folder 67q.

Letter from the Central Construction Office to the Deutsche Ausrüstungswerke with the subject "Latrines in Construction Section III – Weaving, Braiding Shop of DAW, Auschwitz Plant." DAW moves into unfinished barracks in Construction Section III without permission: RGVA, 502-1-83, pp. 111-112.
"In order to be able to carry out the development of Construction Section III as a prisoners' quarter ordered by SS Brigade Leader and Major General of the Waffen-SS Dr. Ing. Kammler on May 15, occupancy during the development is not possible. The finishing of the infirmary has already begun, and as is known, sanitary facilities (washing and toilet facilities) are to be installed in each barracks."
However, the occupancy of these barracks prevents carrying out this work and poses health risks.
"It can also be assumed with 99% certainty that the water will not be filtered due to the poor subsoil, and since Construction Section III is located between Vistula and Sola, it is quite likely that the groundwater flow from this construction section (totally marshy area) will also flood the CC and endanger the water supply there by contaminating the groundwater."

Letter from the SS garrison physician Auschwitz CC to the Central Construction Office with the subject "Prisoners' Infirmary and Quarantine Department in Construction Section III": RGVA, 502-1-332, p. 196.
"In addition to the overall plan concerning the inmate infirmary and quarantine department in Construction Section III, the individual plans concerning the following barracks are still missing:
Barrack 2 – X-ray and treatment
" 8 – Disinfestation
" 9 – laundry
" 10 – storage barracks
" 11 – supply barracks
" 12 – kitchen barracks
" 14 – block-leader barracks.
The SS garrison physician Auschwitz requests that the same be submitted in triplicate and as promptly as possible."

Letter from the Central Construction Office to the SS garrison physician with the subject "Plans of inmate camp, quarantine camp": RGVA, 502-1-83, p. 109.
"The Central Construction Office of the Waffen-SS and Police Auschwitz submits enclosed in triplicate the plan of the normal hospital barracks for the inmate infirmary as requested in the above letter [of 7 July 1943]*."*

The SS garrison physician informs the Central Construction Office regarding "Inmate Infirmary and Quarantine Department in Construction Section III" that seven barracks are still missing, including "X-Ray and Treatment" and "Disinfestation." RGVA, 502-1-332, p. 196.

Garrison Order No. 28/43 organizes as well as explains in detail the issues of hunting permits and hunting protection; and deplores tool theft at agricultural field units. Frei, pp. 310f.

20. The SS garrison physician applies to the Central Construction Office for the urgent construction of "concreted, or rather masonry, mortuaries" because the existing wooden sheds are infested with rats that gnaw on the corpses. RGVA, 502-1-170, p. 263.

Construction Office of the Waffen-SS and Police Auschwitz. Work card, order no. RGVA, 502-1-314,

654/72 for the paint shop: p. 22.
"For Crematorium II, PoW camp, BW. 30, the following work is to be carried out: Derust and paint the deaeration pipes with rust-proofing paint; report completion to the Mechanical Engineering Department.
Started: 14 Sept. Finished: 24 Sept. 43."

21. Letter from the Central Construction Office to the Construction Inspectorate Reich-Ost with the subject "Special Barracks 'B' at Auschwitz CC." The Central Construction Office requests the "provision of the necessary construction funds in the amount of RM 30000." RGVA, 502-1-159, p. 105.

22. Letter from the SS garrison physician to the Central Construction Office with the subject "Installation of windows in the ambulance B II C (Gypsy Camp) and B II b (Birkenau men's camp)": RGVA, 502-1-83, p. 95.
"After the establishment of the inmate infirmary B III, one barracks for outpatient treatment (ambulance barracks) remains in each of the camps. In order to have sufficient light available for carrying out outpatient treatment in these barracks, I request that some glass windows be installed, similar to what is done in the delousing barracks."

Letter from the first leader of the protective-custody camp to the CC headquarters with the subject "Installation of a delousing system in Camp BII d": RGVA, 502-1-336, pp. 100-101.
"In mid-May 1943, the old men's camp in Birkenau, B I b, was almost free of lice and, except for a few cases, also free of typhus. This was achieved only by the daily passing of the blocks through the delousing plant located there.
From mid-May on, the entire Gypsy Camp as well as straw sacks, woolen blankets, underwear and clothing from the women's camp were deloused in this facility. As a result of these delousings, which had to be carried out in addition to the camp's own delousings, lice were again introduced into Camp B I b, despite all precautionary measures, and the number of typhus patients increased.
At present, there are 47 positive cases and 22 suspected cases in the inmate infirmary of Camp B I b.
During the move from Camp B I b to Camp B II d, it was impossible to delouse the prisoners thoroughly, since only two days were available for the move and, moreover, 794 new admissions from Lublin arrived on the first day of the move, who had to be deloused and admitted immediately.
It was therefore inevitable that the prisoners would introduce lice into the new Camp B II d. In this camp, however, there are no delousing facilities of any kind, and, as I was informed by the head of construction SS-Ustuf. Janisch, no delousing system was to be installed.
With 11,000 prisoners, two blocks must be deloused every weekday evening, and the remaining twelve blocks on Sunday. Not only the inmates, but also the woolen blankets and the clothes must be deloused, since it was found that there were no lice in the fresh linen, but at least a large quantity of nits.
In the two weeks since Camp B II d was occupied, the lice population has increased and cannot be stopped even with the primitive means available (hosing down the beds, blankets and clothing, bathing the prisoners with cold water).
This is an untenable situation for several weeks to come, and there is a danger that by September Camp B II d will be completely infested with lice, and that typhus will increase rapidly. The adjacent Gypsy Camp is also a great danger of infection.
The steam-delousing devices are only aids, but cannot cope with the masses that accumulate. Even a centrally located delousing plant cannot cope, since the entire Section II will later be occupied by 50,000 prisoners, and delousing of the prisoners can only take place on Sundays.
The administration of the CC Au. has set up a clothing chamber in each camp; thus, if there is a delousing facility in the camp, each block can be deloused and provided with fresh laundry at least every ten days. In the old men's camp B I b, this delousing of the

blocks was carried out by me in this way, and the camp would also have been free of lice if the circumstances mentioned at the beginning had not occurred. As a result, the number of sick prisoners decreased considerably, and the number of prisoners assigned to work increased, as SS-Hstuf. Schwarz can confirm. (Out of a total of 9000 prisoners, 8300 were assigned to work).
For the above reasons, I request the headquarters to arrange that the New Construction Office of the Waffen-SS and Police Au. Installs the same delousing facilities in Camp B II d as they are in Camp B II e (Gypsy Camp)."

Letter from the SS-WVHA to the Central Construction Office with the subject "Auschwitz CC – Installation of a stationary short-wave delousing system": RGVA, 502-1-337, p. 24; 502-1-333, p. 82.
"By order of the head of Office Groups C, a stationary short-wave delousing system is to be installed in Auschwitz CC."

Garrison Order No. 29/43 mentions the result of a fundraiser for the Red Cross; reports that the armory is available by telephone 24 hours a day; declares that SS members may appear in court as expert witnesses only with permission; prohibits bicycle parking in front of the infirmary and in front of official buildings; introduces fuel ID cards for the purpose of fuel conservation; exhorts people to combine trips to save fuel; forbids collecting meals by motor vehicles; reports the establishment of a shoe exchange for children; regulates the housing of bombed-out persons; introduces secret slogans; grants permission to named relatives of nine SS members to visit Auschwitz, mostly for a limited time, and mentions two lost objects. Frei, pp. 311-314

23. Letter from the J.A. Topf & Sons company, Erfurt, to the Central Construction Office with the subject "Your letter dated 17 July 43, Auschwitz CC, Crematorium II": RGVA, 502-1-313, pp. 28-29.
"In reply to your above letter, we politely refer to our letter of 25 May 1943, in which we already informed you that we have nothing whatsoever to do with the chimney matter."
The Topf Company had only calculated the chimney height and the exhaust-duct cross sections, but the design of the chimney had been made by the Robert Koehler Company, which built the unit without following Topf's instructions.
"It can be confirmed to you by any professional firm that one does not make a chimney lining for hot furnaces with second-rate bricks and lime mortar. This requires clinker bricks laid in fireclay mortar. With this design, the lining would still stand undamaged today.
We had recently received an order from the Köhler Company, Myslowitz, to produce the chimney drawing and static calculation for a fee. This order we have done only courteously, <u>also in order to help you</u>. […]
In your letter you further inform us that within the scope of our warranty the very defective heating ducts are to be repaired. This case of damage is new to us. Our foreman Koch, who came from the construction site 3 weeks ago, did not inform us about this damage, although the foreman had checked everything again before his departure. Since the crematorium has been out of operation for 6 weeks, we cannot explain who caused the alleged collapse of the ducts. On the basis of your message, we have informed our foreman Holick, who is to convince himself on the spot.
During the recent phone conversation with your head of construction, Sturmbannführer Bischoff, he explained that the elevator in Crematorium II was also a constant source of complaint. However, we did not build this elevator; it was assembled and installed by your own people. Therefore, we cannot understand why you want to hold us liable for a system that was <u>not built by us</u>."

Headquarters Auschwitz CC. Special Order No. 16/43: RGVA, 502-1-32, p. 299. Frei, pp. 314f.
"For the purpose of carrying out the delousing of Camp B I a on Saturday, 24 July, and Sunday, 25 July 43, I order the following:

1. From Saturday afternoon, 24 July 43 from 1:00 p.m., until Sunday evening after completion of the work, Camp B I a will be completely closed off for the purpose of carrying out a general delousing according to the new procedure developed by the SS garrison physician Auschwitz, SS-Hauptsturmführer Dr. Wirths. […]
7. Because of the danger of health hazards from the toxic gas vapors, I forbid all SS members and guards who are not directly involved in guarding Camp B IA or in delousing to remain in the immediate vicinity of Camp B IA until it has been cleared.
8. Delousing of Camp B I a on 24 and 25 July 43 will take place only if the weather is favorable.
The SS Garrison Eldest: sgd. Höss, SS-Obersturmbannführer and Commandant."

25. Letter from the camp physician of Section BIa to the CC headquarters with the subject "Delousing of the camp": RGVA, 502-1-55, pp. 62-62a.
"Monday, 26 July 1943, Blocks 1, 2, 3, 8, 9 are closed for delousing. Prisoners in these blocks may not be put to work; all other blocks, whether deloused or not, may go out to work. However, great care must be taken to ensure that the deloused prisoners are assigned to work in strict segregation from the rest."

26. Continentale Wasserwerks-Ges.m.b.H., "List of pumping hours performed by means of hand pumps during the period 12 July – 24 July 43. B.W. 19. Section 2. Part 1 & 2". A total of 260 hours, of which 60 in the Gypsy Camp because of rain and groundwater, 60 hours in the "Greek Camp" (July 19-24) and 110 hours at Crematorium 3 (July 12-17, 19-24) because of rain and groundwater. RGVA, 502-1-157, p. 43.

27. Garrison Order No. 30/43: Frei, pp. 315-319
"1. Epidemic Control
In the last few days, no fewer than 5 children of SS family members have come under medical treatment with very severe infectious diarrhea, some with suspected dysentery. After careful examination, it was found that all these diarrhea patients had not been vaccinated against dysentery, typhoid fever, paratyphoid fever and cholera by the SS members. This behavior on the part of the parents is incomprehensible to me, and I see myself compelled to order that in the future I will give permission for family members to stay in the garrison area only, and will make it dependent on the fact that the family members have presented themselves to the garrison physician for the necessary protective inoculations within the first 24 hours of their stay."
The order also mandates X-ray pulmonary examination of all civilian employees in food establishments; denies repair of private bicycles effective immediately; promulgates replacement of exit passes with leave cards; insists on 24-hour advance notice to the garrison administration of planned moves to officers', troops', and inmate lodgings; prohibits exchange of motorcycles; complains of incomplete keeping of leave books and gives instructions on this; corrects last order on slogans; confiscates 12 motorcycles for lack of drivers' licenses; mentions three books available for purchase at the headquarters; grants permission to named relatives of 15 SS members to visit Auschwitz, mostly for a limited time; and mentions two each of found and lost property and one stolen private bicycle.

29. With this date begins the register "Block 20 – Positive pulmonary TBC Patients. Booklet 3", which extends from July 29, 1943 to November 20, 1944. It is divided into 8 columns indicating: "Occupancy", "Inmate No.", "Name & First Name", "Age", "Reg. No.", "Reg. Date"; the last column contains remarks (e.g. "died", "transferred", etc.). It contains information on about 300 prisoners. ISD, folder 61d.

30. Central Construction Office, "List of Disinfestation Facilities, Baths, and Disinfection Devices Installed in Auschwitz CC and PoW Camp." Daily output for 24-hour operation: RGVA, 502-1-332, pp. 9-10. RGVA, 502-1-332, pp. 3-3a.
"a) <u>in CC (protective-custody camp).</u>
<u>Block 1:</u> 1 hot-air disinfestation plant, brand Klein Comp., with a daily output for

1800 men and approx. 3600 blankets.
Block 1: large shower-bath facility and laundry room, between Blocks 1 and 2
Block 3: on the upper floor 1 blue-gas [HCN] *disinfestation plant for 1400 men and approx. 20000 laundry items*
Block 26: effects chamber building, 1 hot air plant [for] *2000 men.*
Disinfestation plant at D.A.W. behind construction yard:
Blue gas [HCN] *disinfestation plant for approx. 30000 pieces of laundry, blankets, etc.*
Civilian worker disinfestation barracks:
*1 hot air disinfestation plant, brand Hochheim Comp., for a daily capacity of 2000 men with large shower bath and disinfection device, permanently installed.**
b) in PoW camp
B.W. 5a and 5b:
2 hot-air disinfection devices, brand Hochheim Comp., for a total daily capacity of 4000 men with 2 large shower baths, sauna and stationary disinfection device as well as 1 blue gas [HCN] *chamber, daily capacity 8000 blankets. In addition, 4 mobile steam disinfection units are available with an average daily output for 500 men each = 2000 men.*
Under construction are PoW camp
1 large massive disinfestation building with 4 disinfestation chambers (hot air), brand Topf & Sons, with a large shower bath [for] *7000 men and 3 stationary steam disinfection devices (completion approx. beginning of September 1943).*
Gypsy Camp: PoW camp:
1 disinfestation barracks with 4 pieces of electrically operated hot-air equipment, brand: Umluftapparatebau G.m.b.H., Berlin-Charlottenburg, with shower-bath equipment [for] *3800 men (completion of equipment: 15 Aug. 1943).*
Also commissioned are:
1 mobile electrically operated short-wave disinfestation device for an hourly output of = 625 = 15000 men.
1 stationary electrically operated short-wave disinfestation device (intended for installation in the CC reception building) for an hourly output of = 625 men = 15000 men. Delivery is to be made about the beginning of October."

Additional equipment was provided for the troops.

* "Stationary steam-disinfection device" from the Eugen Werner Company. Construction drawings and descriptions follow.

"To the camp commandant of Auschwitz CC
Permission to drive a truck from Auschwitz to Dessau and back for the purpose of picking up Zyklon is hereby granted for July 10, 43. The driver is to be provided with the SS special ID card – K."

Attn: Chief of Office Group D. SS-Brigadeführer and Major General of the Waffen-SS Glücks.

Special Headquarters Order No. 17/43:

Frei, pp. 319f.

"For the purpose of carrying out the delousing of Camp B IId on Saturday, July 31, and Sunday, August 1, 1943, I order the following:
1. From Saturday afternoon, July 31, 1943, from 1:00 p.m., until Sunday evening after completion of the work, Camp B 11 d will be completely closed for the purpose of carrying out a general delousing according to the new procedure developed by SS garrison physician Auschwitz, SS-Hauptsturmführer Dr. Wirths.
2. Camp BIId may not be entered on these days from 1 p.m. on Saturday by any SS member or supervisor, except by the persons designated by the SS garrison physician Auschwitz to carry out the delousing.
3. A block lockdown will be imposed on the entire camp as of 1:00 p.m. on Saturday afternoon, i.e., no prisoner may leave his block until delousing of the entire camp has

been carried out.
4. The SS garrison administration will provide sufficient wooden or tin containers and vats for the delousing.
5. The kitchen unit and other units of Camp B II d will also not move out on these days until the general camp delousing has been completed. After consultation with the head of the SS garrison administration, SS-Obersturmbannführer Möckel, cold evening rations are issued instead of lunch on Sunday, August 1, 43, before delousing begins in the morning. Hot lunch rations will be distributed in the evening after delousing has been completed.
6. The camp may be re-entered by SS members and guards only after release by the SS garrison physician Auschwitz.
7. Because of health hazards from the toxic gas fumes, I forbid all SS members and guards who are not directly involved in guarding Camp B II d or in delousing to remain in the immediate vicinity of Camp B II d until the camp has been cleared.
8. Delousing of Camp B II d on 31 Jul and 1 Aug. 43 will take place only if the weather is favorable."

31. Letter from Central Construction Office to SS-WVHA, head of Office Group C (Kammler) with subject "Construction report on special measures in PoW camp. and Main Camp": RGVA, 502-1-83, pp. 98-100.
"Report on the progress of work for the special measures in PoW camp. and Main Camp. […]
4. Construction work.
Construction Section I.
Due to a scheduled delousing operation, no more work can be done in BA I since July 26. It is therefore not possible to continue the work until the delousing operation is completed.
Construction Section II.
[…] *Disinfestation plant.*
Construction work on the large disinfestation plant continued. Disinfestation furnaces 1/3 completed. […]
In the Gypsy Camp, the conversion of a horse-stable barracks (formerly toilet barracks) into a delousing barracks is structurally complete. The fitter necessary for the installation of the 4 hot-air delousing units has been requested.
Construction Section III:
Inmate Infirmary.
[…] *Another 6 air-force barracks erected, namely those which are to be converted into special barracks. Fence construction has begun."*

Letter from the Central Construction Office to the SS garrison physician Auschwitz CC with the subject "Inmate Infirmary with Quarantine Section Constr. Section III PoW camp" The Central Construction Office transmits the plans of barracks nos. 9 and 14. RGVA, 502-1-332, p. 194.

The accounting books of the Tesch & Stabenow company in Hamburg show a delivery of 216 kg of Zyklon B to Auschwitz CC, corresponding to a value of RM 1,231. TNA, WO 309-1603.

August 1943

1. With this date begins the register "Block 20 – 8 – Occupancy of 8 – Pulmonary TBC Station", which extends from August 1, 1943 to January 4, 1944. It contains about 1090 names of prisoners who passed through Block 20, Room No. 8. ISD, folder 61d.

2. The Friedrich Boos Company sends the Central Construction Office a "Compilation of Outstanding Invoices Auschwitz CC," which lists 12 invoices for 1942 (totaling RM 8,180.59) and 43 for 1943 (totaling RM 51,072.70). The work includes RGVA, 502-1-345, pp. 29-30.

more than twenty different construction sites.

4. Letter from J.A. Topf & Sons, Erfurt, to the Central Construction Office with the subject "Your order no. 155 PoW camp. – Crematorium II and III Bw 30, our order no. 43/145 Electric Elevators": APMO, BW 30/34, p. 19.
"We learn today from our subcontractor that the Plenipotentiary for Machine Production has not yet granted permission to execute the elevators. The application has been forwarded to the Reich Minister for Armament and Ammunition with a request for a decision.
Despite the fact that the elevators are not subject to approval in the sense of the ordinance, our subcontractor must report all orders he takes in to his specialist group. The latter has now given the report to the authorized representative for machine production, who has objected to it.
We ask you to inform your headquarters in Berlin of this so that they can contact the Reich Minister for Armament and Ammunition or the authorized representative for machine production to obtain permission to manufacture the elevators.
For your guidance, we also inform you that our subcontractor has already completed most of the elevators. However, there is a danger that, if the Reich Minister for Armament and Ammunition does not grant approval, the order will have to be stopped immediately.
Please consider the matter very urgent. We look forward to further news."

Letter from the head of the Central Construction Office to the SS garrison physician in response to his request of July 20. In the meeting between SS-Standartenführer Dr. Mrugowski, SS garrison physician (Dr. Wirths) and the head of the Central Construction Office (SS-Sturmbannführer Bischoff) it was decided to reject the request: RGVA, 502-1-170, p. 262.
"SS-Standartenführer Mrugowski stated at the meeting on 31 July that the corpses should be transferred twice a day, in the morning and in the evening, to the morgues of the crematoria, which makes the separate construction of mortuary chambers in the individual subsections unnecessary."

Letter from the Central Construction Office to the camp commandant with the subject "Installation of a delousing plant in Camp B II d in the PoW camp." RGVA, 502-1-336, p. 100.
"Regarding the above letter [of 22 July 1943], *it is reported that a mobile disinfestation plant is planned by Berlin for Construction Section II.* […]
Furthermore, the completion of the large disinfestation plant is being pushed forward with all available means. The SS garrison physician has agreed to provide the mobile army disinfestation equipment from the Gypsy Camp for Camp B II d until the completion of the large disinfestation plant."

5. Letter from the Central Construction Office to the SS garrison physician Auschwitz CC with the subject "Vaccination of the civilian employees of the Central Construction Office": RGVA, 502-1-332, p. 193.
"At the request of the head of the Central Construction Office, SS-Sturmbannführer Bischoff, all civilian employees who have not yet been vaccinated at all, or who were vaccinated 6 months ago, are to be vaccinated against typhus, etc.". The Central Construction Office therefore asks to be informed at what time the vaccination could take place."

6. Garrison Order No. 31/43 deplores and prohibits trampling of pasture fences by SS members; confiscates in a motorcycle. Then: Frei, pp. 320-323
"3. Service operations.
In recognition of the work performed in the last few days by all SS members on the occasion of the special action, the commandant has ordered that from Saturday, 7 Aug. 43, 1 p.m., up to and including Sunday, 8 Aug. 43, all service operations will be suspended. Only the absolutely necessary units, such as animal caretakers, etc., will move

out on these days. Insofar as work is to be performed within the camps concerned, for which posting is not necessary, it is to be carried out."
The order mentions the hiring of four telephone switchboard operators; announces the reorganization of the Auschwitz gendarmerie and regular police; orders the medical examination of prisoners punishable by arrest; prohibits SS members not on duty from being at the ramp during prisoner arrivals; mentions the relocation of bicycle racks to the courtyard of the decommissioned Crema I; grants permission to named relatives of 20 SS members to visit Auschwitz, mostly for a limited period of time; declares Thursday 2 p.m. as the deadline for submitting weekend vacation applications; calls on motor-vehicle driver candidates to register for a driver's license examination; mentions the office of the Birkenau-Auschwitz NSDAP local group; and mentions two lost items.

7. Letter from the Central Construction Office to the SS-WVHA, head of Office Group C, with the subject "Construction report on the special measures in the PoW camp and in the Main Camp": RGVA, 502-1-83, p. 237.
"Due to carrying out a delousing operation, the units could not move out during the week of August 2-7, 1943, especially the skilled-worker units. In the occupied construction sections, only earthwork and leveling work could be partially carried out. Due to a special measure carried out during this period, the civilian workers could also not be deployed in the area of the PoW camp as well as in the construction of the potato storage, water treatment plant, troop hospital, etc.
For the aforementioned reasons, the construction work in the PoW camp could not be continued during the last week. According to the camp management, the units are to be fully deployed again next Monday after delousing has been completed. It should be noted, however, that delousing could not be carried out as planned due to a lack of gas, so that a full deployment at the beginning of next week cannot yet be definitively predicted."

8. With this date begins the register "IX – 17 x-ray station inmate infirmary", which covers the period from August 8 to 31, 1943. It consists of 69 pages (the 4 names on the last page, however, are crossed out); 952 prisoners are entered in it (the consecutive numbers range from 9083 to 10034). APMO, D-Aul-5/17; ISD, folder 67r.

9. Handwritten note by SS-Unterscharführer Franz Sihorsch (from the Construction Office of PoW camp Auschwitz): RGVA, 502-1-323, p. 102.
"Delivery bill No. 1563 for PoW camp BW 5b delousing barracks, from DAW. Remaining delivery: 4 pcs. gas doors 90 x 200 cm. Order of Central Construction Office no. 112 dated 9 July 43."

Continentale Wasserwerks-Ges.m.b.H., "List of pumping hours performed in PoW camp B.W. 19 by means of hand pumps during the period 26 July – 7 Aug. 43. Section 2, parts 1 and 2." RGVA, 502-1-157, p. 42.
A total of 155 hours, of which 80 for the "Greeks Camp" (July 26-31), 5 at Crematorium 3 (August 6) due to ground water.

10. Central Construction Office, "Travel Report on Service Trip on August 3, 1943 to Berlin to SS-WVHA." Various topics are covered (allocation of machine iron, quotas, iron, refrigerators, fire extinguishers, examination of the documents for the entire irrigation of the PoW camp). RGVA, 502-1-43, pp. 30-32.

11. Letter from the Central Construction Office to the SS-WVHA, chief of Office C V, with the subject "Speical barracks 'B' in Auschwitz CC." The Central Construction Office states RGVA, 502-1-159, p. 104.
"that the required building application for the erection of Special Barracks 'B' in Auschwitz CC has been submitted to the Building Inspectorate Reich-Ost Posen by let-

ter dated 29 June 43 – Corr.Reg. No./ 31642/43/Wak/R."

12. Building Inspectorate of the Waffen-SS and Police Reich-East, Circular Order No. 22 with the subject "Fly and Mosquito Control": RGVA, 502-1-1, p. 369.
"The Commissioner of the RF-SS for Pest Control has again particularly pointed out that all measures to combat the danger of flies and mosquitoes and the possibility of infection connected therewith are to be initiated by the responsible offices. It is therefore necessary that not only the infirmaries but also kitchens, dining halls, supply rooms and the like be equipped with fly [screen] *windows."*

Letter from SS-Standartenführer Dr. Joachim Mrugowski, SS Hygienic Institute of the Waffen-SS in Berlin, to SS-WVHA, head of Office Group C, SS-Brigadeführer Kammler, with the subject "Construction Office Auschwitz": RGVA, 502-1-26, p. 117.
"Brigadeführer!
On 31 July 1943 I visited the CC together with the garrison physician, the head of construction and the head of the hygiene institute there. Compared to the previous year, quite considerable progress has been made. Above all, I was very impressed by the successful work done by your head of construction, SS-Sturmbannführer Bischoff. The cooperation between the medical services and the construction office seems to be exemplary, so that at the moment probably no new construction measures for the remediation of the CC are to be ordered. By the time the facilities under construction are completed, the camp must be remediated in human judgment."

The Polish prisoner Ceslaus Łacny, registration number 122772, is admitted to the prisoner infirmary of Auschwitz CC with the diagnosis "pulmonary TBC fibrocaseosa right". The inmate dies almost nine months later on May 8, 1944. The course of his illness is described day by day in 12 "fever curve" forms and other documents. The first two pages of the autopsy report are missing; the third page contains the "Cause of death: destructive pulmonary and intestinal tuberculosis in a cachectic individual." Hoerlein Document No. 215.

13. Garrison Order No. 32/43 mentions the address of Riga CC; mentions that SS members traveling to Croatia must report there to the Reichsführer-SS's representative; deplores and threatens punishment for SS members jumping on or off a bus; recalls ban on entering Neuberun; cancels weekend vacations at Sola Hut; informs of times of shooting practice of the Auschwitz flak unit; and grants permission to named relatives of ten SS members for a temporary visit to Auschwitz. Frei, pp. 324f.

14. Letter from the Central Construction Office to the SS-WVHA, head of Office Group C, with the subject "Construction report on the special measures in the PoW camp and in the Main Camp": RGVA, 502-1-83, pp. 87-89.
"<u>Report on the progress of work for the special measures in the PoW camp and in the Main Camp.</u> […]
<u>4. Construction work.</u>
<u>Construction Section I.</u>
The expansion of the two disinfestation facilities (prisoners' baths) through the installation of central heating and hot-water preparation systems completed and put into use.
<u>Construction Section II.</u>
<u>Disinfestation plant.</u>
Construction work on the large disinfestation plant continued. Installation of the heating and hot-water systems for the prisoners' baths began. The hot-air chambers and the associated brick furnaces are 70% complete.
In the Gypsy Camp in the delousing barracks (formerly toilet barracks), installation of the heating and hot-water preparation system and the shower bath began. The fitter requested for the installation of the electrical disinfestation devices is to arrive here on Monday, August 16.

Inmate Infirmary.
The inmate infirmary (11 Swiss barracks and 4 horse-stable barracks) planned for Construction Phase II has been occupied. Work is in progress on the construction of an ambulance barrack (Swiss barracks) and a wash and toilet barrack with laundry. In the horse-stable barracks heating stoves and in the Swiss [sic] *barracks OT stoves have been installed.*
Construction Section III (Inmate Hospital?)
Another column of inmate carpenters of 50 inmates was used for setting up barracks. 4 barracks were newly erected. Civilian bricklayers were assigned to the interior work. Masonry work was begun on the middle special barracks."

16. Central Construction Office, "Cost Estimate (Addendum) for the Construction of a Shortwave Delousing System in the Inmate Laundry and Reception Building BW 160". Total sum: RM 98,000. RGVA, 502-1-333, pp. 83-85.

Central Construction Office. House Decree No. 125: RGVA, 502-1-233, p. 1.
"On today's date the chief of the Main Office, SS-Obergruppenführer and Major General of the Waffen-SS Pohl, arrives in Auschwitz and will inspect all construction sites on 17 Aug. 43."

17. Central Construction Office. File note with subject "Visit of chief of Main Office, SS-Obergruppenführer and Major General of the Waffen-SS Pohl to Auschwitz." RGVA, 502-1-233, pp. 4-7.
"Time: August 17, 1943.
Participant:
SS-Obergruppenführer and Major General of the Waffen-SS Pohl.
SS-Staf. Bayer of the SS-WVHA
SS-Ostubaf. Höss, camp commandant
SS-Ostubaf. Möckel, head of the administration of the Auschwitz CC
SS-Stubaf. Bischoff, head of the Central Construction Office
SS-Hstuf. Bär of the SS-WVHA
SS-Ustuf. Kirschnek, head of construction CC and agriculture
SS-Ustuf. Eggeling, head of construction meliorations."
Pohl visits the area of interest, especially the following sites: slaughterhouse, kitchen extension, bakery, Monopol building, laundry and reception building, stationary ultra-shortwave delousing plant, D.A.W. works, potato cellar, civilian worker's camp, Krupp office building, new road to PoW camp.
"Construction Sections I and II of the PoW camp as well as the crematoria and troop quarters were then inspected in detail. Special appreciation was given to the neat interior work of the inmate lodgings in the newly occupied Construction Section II."
He then visits the water-treatment plant, the two potato storage buildings under construction, Harmense, the Budy women's camp, the mill building, and the sewage treatment plant. In the afternoon he travels to Golleschau.
Pohl ordered "in terms of construction":
"The construction of a children's home
Extension of an existing dwelling for the chief supervisor of the women's camp
Extension of an apartment for Dr. Clauberg
Construction of a maternity home in the course of the construction of the troop hospital."

The accounting books of the Tesch & Stabenow Company in Hamburg show a delivery of 810 kg of Zyklon B to Auschwitz CC, which corresponds to a value of RM 4,617. TNA, WO 309-1603.

ISD, folder 166.

September 1943

1. With this date begins the directory "VI – 18 X-ray", which covers the period from September 1 to September 9, 1943. It comprises 34 pages and contains the consecutive numbers from 10083 to 10490, i.e. a total of 408 prisoners. APMO, D-Aul-5/18. ISD, folder 67r.

Garrison Order No. 36/43 reports the closure of a road due to construction; informs of changed doctor's consultation hours for family members of SS members; mentions that anti-mosquito medication is again available; announces anti-aircraft practice shooting; gives instructions for updating transit passes to pass through the town of Auschwitz; mentions one lost and one found object; and grants permission to named relatives of ten SS members to visit Auschwitz, mostly for a limited time. Frei, pp. 332-334

2. Letter from the SS-WVHA, chief of Office C V, to the Central Construction Office with the subject "Auschwitz CC – Construction of an Inmate Hospital". RGVA, 502-1-83, p. 399.
"By the above letter [dated 11 Aug. 1943] *the chief of Office D III informs that the planning documents for the construction of the inmate hospital in Auschwitz CC as ordered by the head of Office Group C as an immediate measure have now been clarified."*

3. Construction Office Birkenau. Work card. Order No. 808. RGVA, 502-1-328, p. 157.
"For PoW camp delousing barracks B.W. 5b. Glazing of 4 gas doors.
Started: 16 Sept. 1943. Finished: 16 Sept. 1943."

Central Construction Office, "List of total inmate labor as of 31 Aug. 1943 according to order of SS WVHA dated 12 Aug. 43." Total inmate-labor hours: men: 116,303; Frauen: 8,393; total: 124,696. RGVA, 502-1-256, p. 142.
"7.) Premium coupons issued to prisoners during the period under review (figures in Reichsmarks).
From 16 July 43 to 31 July 43 = RM. 7,114
From 1 Aug. 43 to 31 Aug. 43 = RM. 19,602 "

SS-WVHA, chief of Office Group C, letter to the district commissioner of the Plenipotentiary General for the Regulation of the Construction Industry in the Area of Upper Silesia, with the subject "Auschwitz CC – air-raid protection measures in U/S.": RGVA, 502-1-401, p. 50.
"By report dated 27 Aug., the Central Construction Office of the Waffen-SS and Police Auschwitz informed me that production of concrete parts for the program 'air-raid trenches' was to begin on 30 Aug. 1943."

Letter from J.A. Topf & Sons, Erfurt, to the Central Construction Office with the subject "Crematorium II-V, outstanding payments". The Topf Company states that it has received the following payments: RGVA, 502-1-313, pp. 22-22a.

RM 9,400 for order no. 155 of 28 Feb. 1943
RM 2,900 for order no. 149 of 11 Jan. 1943
RM 19,600 for order no. 149 of 11 Feb. 1943

The total amount of the orders is RM 88,635.72, therefore the amount still due is RM 56,735.72. Topf demands an installment of RM 50,000.

4. Letter from Central Construction Office to SS-WVHA, head of Office Group C, with subject "Construction report on special measures in PoW camp and Main Camp." RGVA, 502-1-83, pp. 227-229.
"Report on the progress of work for the special measures in the PoW camp and in the Main Camp. […]
4. Construction work. […]

Construction Section II:
Disinfestation plant.
The construction works for the large-scale disinfestation plant continue. The installation of the boilers has been started. 3 pieces of steam-disinfection devices have been installed and will be connected in the course of steam-boiler assembly. All 4 pieces of hot-air chambers together with the corresponding furnaces have been finished. The finishing work has been started.
The disinfestation plant in the Gypsy Camp has been completed to the extent that it can be put into use next Monday, September 6. However, all the doors ordered from DAW are still missing and, after repeated inquiries, are to be delivered by 8 June [sic] at the latest.
Wash and toilet barracks in Construction Section II.
The wash and toilet barracks in Construction Section II have all been converted in line with the immediate measures. […]
Inmate Hospital.
The work in the prisoners' quarter in Construction Section II has been completed. […]
Construction Section III.
Of the actual infirmary field, 12 barracks have been erected to date, and 6 of the others. For 6 more barracks the piles are being driven in."

Letter from the SS Economic and Administrative Main Office, Office Group D – Concentration Camps, to Commandant SS-Obersturmbannführer Höss, Auschwitz CC, with the subject "Transfer of Jewish Prisoners":
"At present there are about 25,000 Jewish prisoners in Auschwitz CC.
On 25 Aug. 43, I told SS-Hauptsturmführer Schwarz that I must know the number of Jews who are fully fit for work and deployment, since I intend to withdraw Jews from Auschwitz CC in order to use them in armament production in the Reich. On 26 Aug. 43, I communicated this again through telex. According to your telex of 29 Aug. 43, only 3,581 of the 25,000 Jews incarcerated are fit for work. However, these are completely used in armament projects and cannot be handed over.
What are the remaining 21,500 Jews doing? Something is not right here!
I ask you to check the issue again and report back to me."

Eisenbach, reproduction in appendix after p. 620. ISD, information folder 427/ Auschwitz 11.

6. Central Construction Office. "Large wire obstacle around the camp". Plan No. 2828 drawn by prisoner No. 48856, showing Auschwitz CC, the train station, and many numbered houses south of it.

RGVA, 502-2-94, p. 2.

Letter from the State Health Office of Cosel (medical officer Beyer) to the district president in Oppeln:
"On 22 Aug. 43, I was informed by telephone by the camp leader of the forced-labor camp of the Jews near Blechhammer – train-station camp – that quite a number of Jews were undergoing treatment for feverish illnesses. The investigations on 23 Aug. 43 revealed that about 70 Jews were lying in the isolation ward of the infirmary and in an isolation barracks."
A description of the symptoms follows. 10 Jews died. One of the first to be affected was the Jew Charles Grünberg, who fell ill on July 27, then recovered and on August 25 underwent the Weil-Felix test with positive results (proof of typhus antibodies). The blood samples of the Jews Jakob von Crefeld, Moses von Stamm, Hermann Kokarnot, and Roffessa Elkam, tested between August 3 and August 16, yielded a negative Weil-Felix test, but some were positive for typhus. Twenty-one blood samples were sent to the Institute of Hygiene in Kattowitz, and 8 cases test-

APK, OPK, 2176, pp. 202-203.

ed positive for Proteus X 19.[22]
"It can be assumed, since no typhus cases occurred in the other camps, that typhus was introduced through the transit station in the Jewish camp."
The spread of the disease, he said, was due to the lack of water in the camp and poor personal hygiene.
"Incidentally, the Jews were constantly deloused. During this delousing, clothes lice were also detected."

Garrison Order no. 37/43 mentions Höss's return; closes gardening compound in Raisko because of thefts; complains of unauthorized alterations and damage to rented apartments; refuses to give blackout materials for private buildings; states that bombed-out persons will be housed only with homeless certificate; mentions one lost and one found object each; confiscates 12 service bicycles because of assignment of motorcycles; modifies the last garrison order regarding transit passes; and grants permission to named relatives of five SS members to visit Auschwitz, mostly for a limited time. — Frei, pp. 334-336

8. Construction Office of the Waffen-SS and Police Auschwitz U/S.-Oswiecim. Work card. Order No. 805/94 for the pain shop: — RGVA, 502-1-316, p. 158.
"For PoW camp enclosure B.W. 24, Constr. Section II, the following work is to be carried out:
Painting and lettering of: 100 pcs. signs, [']*Caution. High voltage! Danger to life!*[']
100 pcs. signs with painted skull and crossbones.
Started: 25 Sept. Finished: 5 Oct. 43.
670 skilled worker hours."

9. The district president in Oppeln sends a copy of a letter dated September 6, 1943 to the Reich Minister of the Interior in Berlin. The accompanying letter with the subject "Typhus illnesses in the forced-labor camp of Jews near Blechhammer, district of Cosel U/S." states that the Blechhammer Camp has a strength of 2,500 prisoners. — APK, OPK, 2176, pp. 200f.

Letter from the Central Construction Office to the SS-WVHA, Office C V/IV, with the subject "Auschwitz CC – electr. corpse elevators for BW 30 and 30a". Enclosed is a "copy of a letter from the Topf and Sons Company, Erfurt, dated 4 Aug. 43." — APMO, BW 30/34, p. 18.
"As can be seen from this, the company Topf & Sons, Erfurt, has received an order from the Central Construction Office for the delivery of 2 electric corpse elevators. Topf & Sons now asks the Reich Minister for Armament and Ammunition to obtain the urgently needed elevators. It is requested to report on the result to the Topf and Sons Company from there, so that the long-needed elevators can be completed and delivered as quickly as possible."

Garrison Order No. 38/43 mandates further fly and mosquito control measures. — Frei, pp. 336f.

11. Letter from the Central Construction Office to the SS Garrison Administration with the subject "Handover of the POW Camp Buildings in Construction Section II": — RGVA, 502-1-83, p. 85.
"In accordance with requirements, Construction Section II has been occupied ahead of schedule in almost all camps. Occupied are the following subcamps: a, b, d, e, and f."
These are now under the SS Garrison Administration.
"On 8 Sept. 43, the disinfestation plant in the Gypsy Camp was handed over to SS-Unterscharführer Boehm, and has since been put into operation."

[22] Determination of antibodies in connection with rickettsial infections (typhus).

SS-Unterscharführer Walter Dejaco confirms receipt of various plans, ten of which relate to the crematoria at Birkenau: RGVA, 502-1-26, p. 137.

Letter from the Central Construction Office to the district president Kattowitz with the subject "New construction of a private siding for the Waffen-SS prisoner-of-war camp in Auschwitz with connection to Auschwitz railroad station": RGVA, 502-1-186, p. 129.
"Enclosed are the documents with the request for state-police approval of the siding in submission. […]
For supplying the camp as well as for the transport of construction materials for the development, the construction of a railway siding is absolutely necessary […].
The execution of the special tasks ordered by the Reichsführer-SS urgently requires the expansion of the siding."

14. Letter from the State Health Office Cosel to the district president in Oppeln with the subject "Typhus in the forced-labor camp Blechhammer, county of Cosel U/S". Bacteriological and serological examination of blood samples from 31 Jewish prisoners (16 of them are listed by name, for 10 the examination results are also given) revealed that it was "a mixed typhoid and typhus epidemic with one case of paratyphus B." APK, OPK 2176, pp. 198-199.
"All camp inmates have been deloused, and their barracks subjected to thorough scouring disinfection. The utensils of the suspected sick and diseased inmates were disinfected or burned. Individual Jews who have not yet been vaccinated against typhoid fever will be inoculated. […]
The epidemic most likely originated in the camp's transit station, which is located within the camp but is especially fenced off. In this camp, in fact, Jews who were no longer fit for work and sick were collected from other camps and prepared for removal."

Central Construction Office. "Activity Report of the Construction Office CC and agriculture (SS-Untersturmführer F. Kirschnek) for the period 1 July to 30 Sept. 1943." List of structures with active construction work: RGVA, 502-1-27, pp. 1-8.

Central Construction Office. "File memo" with the subject "Discussion about covering costs incurred due to rebuilding the damaged chimney lining in Crematorium II PoW camp BW 30": RGVA, 502-1-26, pp. 144-146.
"On Friday, September 10, 1943, Mr. Prüfer, chief engineer, came to the local office

as a representative of the company Topf & Sons, Erfurt, for the purpose of clarifying the facts stated under subject.
The Central Construction Office was of the opinion that the damage to the chimney lining was primarily due to the incorrect design and execution advice provided by Topf & Sons. Mr. Chief Engineer Prüfer was the consultant for the entire plant in 1942 and explained back then to SS-Untersturmführer (F) Ertl, SS-Untersturmführer (F) Dejaco and SS-Untersturmführer (F) Janisch that the crematoria should be built according to the drawings supplied by Topf. With regard to the chimneys, on the one hand the draft of the chimney plan for Crematorium I in the Main Camp, and on the other hand the dimensions and designs of the individual chimney components were to be executed according to the above-mentioned plans of the Topf & Sons Company. The plan taken as a basis shows a lining thickness of 12 cm, and is marked orange up to a height of 6 m, like all other fireclay masonry. The lining masonry above this height is drawn in red, meaning brick masonry.
During a subsequent inspection and consultation with the head capo of the crematoria, it was determined that the collapse of parts of the smoke ducts was not a mistake or a mix-up, as [claimed] *in the letter of 6 Aug. 1943/-AZ.h.e.s/D IV/Prf.- but that in fact, as mentioned in the letter of the Construction Office of 17 July 1943, entire vault parts collapsed, and also the connections of the heating ducts to the chimney were very defective.*
On this occasion it was also found that all the dampers for regulating the draft had partly melted due to incorrect installation, and these defects have now been rectified on the basis of our own experience, and are currently ensuring perfect functioning.
This time, Mr. Prüfer, the chief engineer, stated that the reason for the damage to the lining was the execution of the lining masonry above the height of 6 m by means of lime mortar instead of fireclay mortar, as well as errors in the static calculation.
On the other hand, in the following day's consultation with Mr. Koehler, the engineer who built the chimney according to the drawings of Topf & Sons, it was stated that the lining was perfectly built with fireclay mortar from the bottom to the top.
Mr. Chief Engineer Prüfer's attention is drawn to the fact that on each of his visits he brings a different reason for the causes of the collapse of the chimney lining. On his penultimate visit, in the presence of the commandant, he explained as the cause the great stresses caused by heating only individual furnaces, which had not been taken into account in the design.
In the opinion of the Central Construction Office, this was indeed the main cause, and it has now been taken care of in the new design by Topf & Soehne, in that the lining has various openings, and the individual lining sections are held so that they can be moved within each other, so that any stresses that may occur when heating individual furnaces are taken into account by the elasticity of the lining masonry.
In the above-mentioned consultation, Mr. Koehler explained that the overloading of the chimney system was the main cause of the damage.
After the question of guilt could not be completely clarified, in the interest of a further good understanding Mr. Ing. Koehler, from the company Robert Koehler, Myslowitz, and Mr. Chief Engineer Prüfer for the company Topf & Soehne (reserved for consultation with his boss) agreed to take over 1/3 each of the new total costs, if also the Construction Office takes over such an amount. The total costs were roughly estimated at RM 5000. With this arrangement, the new construction of the chimney lining in Crematorium II PoW camp BW 30 finally should be clarified."

The invoice books of the Tesch & Stabenow company in Hamburg show a delivery of 999 kg of Zyklon B to Auschwitz CC, corresponding to a value of RM 5,694. TNA, WO 309-1603.

15. X-ray book No. 19 of the prisoner infirmary of Auschwitz CC begins with this date. It extends from September 15 to October 7, 1943, and contains entries numbered 10707 to 11843. APMO, D-Aul-5/19. ISD, folder 67s.

Garrison Order No. 39/43 announces awards to a long list of SS members; notes that changes in marital status are to be reported to the Personnel Department; calls for nominations of SS members of various departments for authorization to receive lodging equipment, consumables and office supplies; announces the issuance of new camp phone directories; decrees that leave passes for SS members in field units must be issued by the headquarters; notes the distribution of blackout orders; lists results of a sports competition; prohibits free-roaming poultry because of the chicken plague; mentions a stolen service bicycle and one lost and found object each; and grants permission to named relatives of eight SS members to visit Auschwitz, mostly for a limited period of time. Frei, pp. 337-340

16. Letter from J.A. Topf & Sons, Erfurt, to the Central Construction Office with the subject "Crem. II, Chimney Lining": RGVA, 502-1-313, p. 16.
"We politely refer to the discussion between your very honored gentlemen Sturmbannführer Bauleiter Bischoff, Untersturmführer Kirschnek and our Herr Chief Engineer Prüfer, which took place on the 10th of this month, and are prepared to pay about RM 1400.-- to RM 1500.--, i.e. about 1/3 of the expenses for the renewal of the fireclay chimney lining."

17. Letter from the district president Oppeln to the Reich Minister of the Interior, Berlin, and the Chief President of the Province of Upper Silesia, with the subject "Typhus cases in the forced labor camp of the Jews near Blechhammer, district Cosel U/S". From September 3 to 9, 19 cases of typhus and 10 deaths were recorded. The actual number of infections cannot be determined because "most of the sick Jews had already been transferred." APK, OPK 2176, p. 107.

18. Garrison Order No. 40/43 sets the beginning of work for prisoners at 6:30 a.m.; announces a power cut due to switching of a line; commends an honest finder and three sportsmen; mentions a lost property; and grants permission to named relatives of five SS members to visit Auschwitz, mostly for a limited time. Frei, pp. 341f.

21. Huta – Above- and Below-Ground Construction Inc., Kattowitz. Plan No. 7015, 109/13a. "Waffen-SS and Auschwitz Police. Crematorium 2". APMO, BW 30/19a, Neg. No. 20946/2.

Letter from the Central Construction Office to the plenipotentiary for construction of the Reich Ministry Speer in the district of Armaments Inspectorate VIIIb, with the subject "Air-Raid Protection Trenches for the Construction Representative in the District of Armaments Inspectorate VIII". RGVA, 502-1-402, pp. 91-91a.
"The local office informs that the large-scale production of the concrete parts for air-raid protection trenches could not yet be started due to lack of raw material and the fact that so far only 3 forms for the vault walls have been delivered by the contractor."

22. Central Construction Office. File memo by SS-Untersturmführer Hans Kirschnek with the subject "PoW camp BA III – Prisoner requisition." RGVA, 502-1-26, p. 153; *ibid.*, p. 159.
"For the construction projects to be carried out in PoW camp BA III, namely grading work, access roads, sewage-treatment plant, barrack construction as well as unloading of barracks parts, the requested prisoner units have not been fully created in terms of strength since 23 Aug. 43."
30,600 prisoners were requested, and 12,100 assigned.
"Accordingly, for the period from 1 July 43 to 17 Sept. 43, a shortfall of 28,937 days of work is calculated."
Without the required number of prisoners, the work could not be completed in the prescribed time. In another memo dated September 24, 1943, Kirschnek complains that, of the 10 carts needed daily for Construction Section III, a maximum of four are assigned.

The Central Construction Office draws Plan No. 2885, "Fire Ponds in B.A. II." The facility is in the form of an inverted rectangular truncated pyramid with a small base (bottom) of 5.5 m × 15 m and a large base (surface) of 21.72 m × 11.72 m; the depth is 2 m.
A "mass calculation for the dredging of 5. pcs. fire ponds in Construction Section III of the PoW camp in Auschwitz" shows the ground plan of a pond with the dimensions: 21 x 12 meters on the outside, 12 x 3 meters at the bottom, 3 meters deep.

RGVA, 502-1-238, p. 38; *ibid.*, 502-2-26, p. 78.

23. Huta – Above- and Below-Ground Construction Inc., Kattowitz. Plan No. 7015, 109/14a. "Waffen-SS and Auschwitz Police. Crematorium 2. Soil excavation."

APMO, BW 30a/19, Neg. No. 20922/11.

24. Answer of the chief president of the province of Upper Silesia to the letter of the district president Oppeln dated September 17, 1943, with the subject "Typhus illnesses in the forced-labor camp of the Jews near Blechhammer, district Cosel U/S":
"I ask for a statement and report as to which office ordered the transfer, and where the sick Jews were transferred to, especially since there the Public Health Officer – as I gather from his report of 6 Sept. 1943 – had imposed a quarantine of 3 weeks until 26 Sept. 1943."

APK, OPK 2176, p. 204.

Huta – Above- and Below-Ground Construction Inc., Kattowitz. Plan No. 7015, 109/15. "Waffen-SS and police Auschwitz. Crematorium 2, basement & foundations."

APMO, BW 30a/17. Neg. No. 20922/9.

Garrison Order No. 41/43 mentions the result of a collection for the Winter Relief Charity; commends two SS members for their sports competition successes; explains details of chicken keeping; explains details of uniform regulations; mentions the distribution of an Army ordinance sheet; declares a camp ID card invalid; makes a comment on the validity of civilian ID cards; and grants permission for a temporary visit to Auschwitz to named relatives of seven SS members.

Frei, pp. 342-344

25. Letter from SS garrison physician to Central Construction Office with subject "Inmate Infirmary PoW camp, Constr. Section III – Kitchen in Infection Department."
"Enclosed returned after review and signature is a plan concerning the kitchen in the infection department of the inmate infirmary in PoW camp – Constr. Section III."

RGVA, 502-1-83, p. 398.

Letter from Central Construction Office to SS-WVHA, head of Office Group C, with subject "Construction report on special measures in PoW camp and Main Camp":
"Report on the progress of work for the special measures in the PoW camp and in the Main Camp. […]
4. Construction work. […]
Construction Section II.
Disinfestation plant.
Drainage pipes completely laid. Water pipe partially laid. Installation of sanitary items started. […]
Construction Section III:
Inmate infirmary barracks: masonry work."
Work took place in barracks nos. 68, 70, 71, 89, 91-93, 74, and carpentry work in barracks nos. 67-77, 94, 106, 128, 146.

RGVA, 502-1-83, pp. 214-218.

Garrison Order No. 42/43:
"1. Rat Control.
As of Tuesday, September 28, 1943, rat control will be carried out in the entire area –

Frei, pp. 344f.

camp area and area of interest – of Auschwitz CC. Since this is an extraordinarily dangerous poison, in order to prevent deaths, it is pointed out and ordered that all children are to be kept away from the poisoned food laid out. All pets are to be confined. The inmates are to be instructed that no leftover food is to be taken from the garbage (potato peels, etc.) and that they are not to tamper with it.
2. Visit to the Auschwitz Concentration Camp
Lately it has come to my attention that visits have been made to the CC, and that they have been given tours without my being informed. I would like to point out that visits to the CC and to the entire area of interest of Au. CC can only be authorized by the chief of Office Group D. If there are guests visiting the individual department heads, and the intention is to show them the CC operation, the application for this must be made in good time at the headquarters, so that in any such case permission can be obtained from the chief of Office Group D."
The order also clarifies the validity and period of validity of residence permits of SS members; announces that SS members in detention must work 10 hours a day and gives details; and grants permission to named relatives of four SS members to visit Auschwitz, mostly for a limited period of time.

27. Letter from SS-WVHA, the Chief of Office CVI, to the Central Construction Office with the subject "Deadline for submission of the structures listed below." Some structures are listed, including "BW 30a Crematorium III."
"Accounts of these structures are to be submitted to the Office CVI by 1 Dec. 43. At the same time, the construction no. of the structure Crematorium III is to be indicated."
RGVA, 502-1-26, p. 195.

28. Letter from the Central Construction Office to Robert Koehler, Myslowitz, with the subject "PoW camp BW 30 – chimney lining renewal".
"For the purpose of final clarification of the costs issue for rebuilding the chimney lining, reference is made to the above-mentioned meeting [of September 11, 1943], *according to which you agreed to bear 1/3 of the total costs for this rebuilding. The total costs may amount to approximately RM 4,500.00, and the Topf and Sons Company, Erfurt, has also agreed to bear RM 1,500.00 of the costs. The exact settlement will be made in the next few days."*
APMO, BW 30/34, p. 16.

29. Letter from the Central Construction Office to the J.A. Topf & Sons company, Erfurt, with the subject "Invoicing":
"Enclosed, the Central Construction Office of the Waffen-SS and Police Auschwitz submits an invoice for pro rata costs of chimney-lining repair for Crema II in the amount of RM 1,621.30."
APMO.D-Z/Bau, Inv. No. 1967, p. 183.

30. Letter from SS-Obergruppenführer Oswald Pohl to the Reichsführer-SS with the subject "Deaths in the Conc. camps".
"Reichsführer!
After the mortality rate was still around 10% in the month of December 1942, it went down to 8% already in the month of January 1943, and then dropped steadily. This drop in mortality is mainly attributed to the fact that hygienic measures, which had been demanded for a long time, have now been implemented, at least to a large extent. Furthermore, in the area of nutrition, it was ordered that one-third of the food be added raw but reduced in size to the cooked food shortly before serving. Overcooking was avoided. In addition, sauerkraut and similar foods were issued.
With regard to clothing, it was ordered that prisoners be allowed to keep their coats on during the winter, provided this does not impede them during their work.
Likewise, an unnecessary dragging out of roll calls was avoided.
The permission for prisoners to receive food themselves had an extremely favorable effect.
The experiments with the distribution of yeast preparations were also favorable.
The above measures were supported by the fact that selected prisoners were brought
PS-1469.

together for a special cooking course in the Dachau camp kitchen. It is intended to hold a new cooking course in the near future."

Central Construction Office. File memo with the subject "Road construction and sewage system in PoW camp, BA I (women's camp)": RGVA, 502-1-83, pp. 77-79.
"The execution of additional sanitary construction measures in PoW camp Auschwitz has been ordered in May 1943 by the head of Office Group C, SS-Brigadeführer and Major General of the Waffen-SS Dr. Ing. Kammler, who in a letter of 14 May 1943 to the camp commandant announced the labor requirements for the execution of these special measures. In carrying out the required special measures, a distinction was to be made between 2 construction phases, namely:
1) The measures for the immediate improvement of the hygienic conditions by extending the washing facilities, covering the toilets (because of the danger of flies), erecting temporary earthen sewage tanks, cutting through the main ditch to eliminate the danger of epidemics at the large meander where the main ditch flows into the Vistula.
2) The final measure, namely the installation of toilet and washing facilities in the individual blocks of the camp, together with the construction of the new sewer network required to carry out these works."

Letter from SS-Unterscharführer Dejaco to the heads of the Central Construction Office (Jothann), in house, with the subject "Report on the status of construction work in the prisoners' hospital PoW camp, Construction Section III, cut-off date 1 October 1943." RGVA, 502-1-83, p. 396.
"<u>Barracks construction.</u>
As a matter of priority, barrack types No. 1 – 2 – 6a and 6b have been erected so far. There are a total of 12 for the seriously ill ward as well as operating and X-ray barracks. These barracks are completed in shell except for one. In 9 barracks, the entire interior walls and chimneys, insofar as they had to be additionally constructed, have been bricked up. In 4 of these barracks, plastering of these walls has already begun. The erection of the connecting corridors between these barracks is 3/4 completed. The shells of 8 barracks of type No. 7 have been completed, and work has begun on the walls and chimneys. Furthermore, 4 laundry barracks of type no. 9, 3 kitchen barracks of type no. 12, and 20 infirmary barracks of type no. 7 have been erected since March 43, making a total of 47 barracks in shell. […]
<u>Sewage treatment plant</u>
The sewage treatment plant for BA III, consisting of 4 earthen sewage tanks, is completed except for moving the railings of the gangways and laying the outlet pipes."

A detailed report follows.

Garrison Order No. 45/43: Frei, pp. 349-352

“l. Commendation
SS-Rottenführer Wilhelm Reichel, 5th /SS-T-Stuba. Au. CC, succeeded in shooting 2 prisoners on the run out of 3 who were escaping together. This escape attempt took place under the most-favorable escape conditions on 21 Sept. 43, 10 p.m., at the Neu-Dachs external unit, and Reichel showed himself to be prudent and quick-witted. I express my appreciation to him.”

The order gives instructions on restructuring patrol duty; decrees that convicted SS members must bring certain items to the detention center; announces a practice shooting by the local anti-aircraft unit; reminds of the off-duty ban on carrying weapons for nonofficers; announces the change of address of a Berlin office; announces new office hours for submitting applications for ID cards etc.; grants permission to named relatives of ten SS members for a temporary visitor to Auschwitz; and mentions a lost property item.

9. “Overview of inmate deployment at CC Auschwitz U/S. Month of October 1943.” Occupancy. Total number in women’s camp: 32,915, of whom unfit for labor and deployment: 6,261. APMO, D-Aul-3a/370/6, p. 377.

X-ray book no. 20 of the prisoner infirmary of Auschwitz CC begins with this date. It extends from October 9 to November 12, 1943, and contains entries numbered 11844 to 12983. APMO, D-Aul-5/20. ISD, folder 67s.

Huta – Above- and Below-Ground Construction Inc., Kattowitz. Plan no. 7015, 109/16a. “Waffen-SS and Auschwitz Police. Crematorium 2 (3). Ground floor & sections”. APMO, BW 30/16, Neg. No. 20922/8.

Letter from Energy Supply Upper Silesia to Auschwitz U/S Concentration Camp, Department IIIa. “Report on the labor situation” (Neu-Dachs subcamp), month of September 1943. Prisoner labor: 504 men. Total daily work of prisoner deployment: 14,118. Total hours worked by prisoners: 123,532 hrs. HvA, 12, 1970, pp. 87-88.

“Bonus coupons:
We distributed bonus coupons only to those people who did real work, i.e., who put in 100% effort.
Since the construction of the camp up to and including September of this year, 194 prisoners received RM 536 in bonus coupons.
Of these, each received four premium coupons of RM 1.00 each and, in addition, 10 cigarettes.
In order to ensure an increase in performance, it might be advisable to make the prisoners aware through the camp management that each individual can enjoy a bonus, both in the form of a voucher and cigarettes. The prerequisite for this is that the prisoner shows the best will and puts all his strength at his disposal.”

10. “Overview of inmate deployment at CC Auschwitz U/S. Month of October 1943.” Occupancy. Total number in women’s camp: 32,950, of whom unfit for labor and deployment: 6,247. APMO, D-Aul-3a/370/6, p. 377.

11. “Overview of inmate deployment at CC Auschwitz U/S. Month of October 1943.” Occupancy. Total number in women’s camp: 33,091, of whom unfit for labor and APMO, D-Aul-3a/370/6, p. 377.

deployment: 6,210.

Answer of the district president Oppeln to the letter of September 24, 1943 from the chief president of the province of Upper Silesia with the subject "Typhus cases in the forced-labor camp of the Jews near Blechhammer, district Cosel U/S": *"The public medical officer in Cosel reports that at the instigation of the special representative of the Reichsführer SS with the seat Annaberg U/S, all sick Jews were transferred to an external concentration camp on 30 Aug. 43."* APK, OPK 2176, p. 205.

Central Construction Office. File memo with the subject "Submission of bids for internal sanitary installations for PoW camp Auschwitz, Construction Section 3 (inmate infirmary)". Visit to Auschwitz by K. Knauth, co-owner of the firm of the same name from which the barracks were ordered:
"Mr. Knauth, Dresden, was introduced to the head of the office, Mr. Obersturmführer (F) Jothann, and the above construction inspection was ordered. On the construction site, it was found that the special barracks for the operated etc. had been completed and could be occupied immediately."
As for the company's bid, it was decided:
"1.) In the case of the lodging barracks, which occur 111 times, the prices were significantly reduced, since it was a very large, closed order, so that a new offer was necessary." RGVA, 502-1-83, pp. 395-395a.

12. "Overview of inmate deployment at CC Auschwitz U/S. Month of October 1943." Occupancy. Total number in women's camp: 33,077, of whom unfit for labor and deployment: 6,308. APMO, D-Aul-3a/370/6, p. 377.

Letter from the J.A. Topf & Sons company, Erfurt, to the Central Construction Office with the subject "Disinfestation Plant": RGVA, 502-1-88, p. 14.
"We acknowledge receipt of your wire message: 'Commissioning of disinfestation plant not Monday Date to follow'.
Central Construction Office of the Waffen-SS Auschwitz Jothann SS-Obersturmführer. Accordingly, we had the opportunity to detain our gentleman who was to travel there in the evening."

The head of the SS Economic and Administrative Main Office. "Secret!". Letter to all camp commandants (followed by a list of 19 CCs with their respective commandants, including "Auschwitz – Ostubaf. Höss"): AMS, I-IB 8, pp. 53-57.
"Within the framework of German armament production, the CCs represent a factor of war-decisive importance, thanks to the construction work that has been done in the past 2 years. From nothing we have created armaments plants that are second to none. We must now do everything in our power to ensure that the achievements already made are not only maintained, but also continuously increased.
Now that the plants and factories are essentially up and running, this is only possible

[24] *Heersesdienstvorschrift* = army regulation.

if we maintain and further increase the labor force of the prisoners.
In earlier years, within the framework of the educational tasks of the time, it did not matter whether a prisoner could perform useful work or not. Now, however, the labor force of the prisoners is of importance, and all measures of the commandants, leaders of the V-service and physicians have to extend primarily to the maintenance of the health and efficiency of the prisoners.
Not out of false sentimentality, but because we need them with their arms and legs, because they must contribute to the German people achieving a great victory, therefore we must concern ourselves with the welfare of the prisoners.
My first goal is that no more than 10% of all prisoners should be unable to work due to illness. This goal must be achieved in a joint effort by all those responsible.
Necessary for this is:
1.) A correct and appropriate diet,
2.) Proper and appropriate clothing,
3.) The utilization of all natural health remedies,
4.) Avoidance of all unnecessary efforts not directly required for work performance,
5) Performance bonuses.
<u>1) Nutrition.</u>
I have already referred several times to the necessity of proper and appropriate prisoner rations. I recall the following principles:
a) Store vegetables and potatoes in such a way as to avoid storage losses as far as possible. Proper storage-clamp installations.
b) When cleaning potatoes and vegetables, minimize waste. Supervise peeling operations at all times.
c) Wash potatoes as briefly as possible, do not leave them lying around in running water for hours. If soaking cannot be avoided, keep them whole and unbroken just covered by water. Serve jacket potatoes as long as possible.
d) Mix 10-50% of all vegetables raw into the ready-to-cook food just before serving.
e) Mix about 10% of potatoes raw and grated into the food.
f) Pour away cooking waters from vegetables only if they have a bad odor or taste.
g) Serve vegetables raw as salads or unprocessed (carrots, sauerkraut) in addition to meals. (Market gardening!). Gathering wild vegetables and spices should still be done with the utmost care.
h) Do not boil hot food to death!
i) The quantity of midday rations must be 1 1/4 – 1 1/2 ltrs, however, not thin soups, but rather thick dishes rich in content.
j) Good seasoning is to be the main focus of the cooks. Do not give too large quantities of salt, 20-30 g per day should not be given in any case. The procurement of spices, if not managed, is to be pursued with vigor.
k) The prisoner cooks are to be constantly supervised and immediately relieved in the event of negligence on duty.
l) In contrast to the soldiers' kitchen, in the prisoners' kitchen the food is to be chopped and cooked as well. Only the heavy laborers shall receive their sausage allowance in hand.
m) Full use is to be made of the possibilities for procuring additional foodstuffs (e.g. yeast, curd).
n) There must be no food waste in the CCs.
o) Hot meals and drinks must be served and consumed hot.
p) Bread must be seasoned. Give out whole-grain bread where possible.
q) The greatest attention must be paid to an even distribution of rations. The inmate who receives food late through no fault of his own shall be entitled to the same quantities as those who came before him.
Surplus portions of food shall be distributed equally or in equitable rotation.
r) Inmates shall be encouraged to peel jacket potatoes carefully.
s) The receipt of additional packages shall be encouraged.
t) Rest is necessary for eating and proper digestion. Therefore, sufficient breaks when

receiving food. No unnecessary marches: send the food to the people, not the people to the food. Do not burden the meal breaks with other duties.
u) The kitchens, staff rooms and eating utensils must be kept clean.
v) If a special diet can speed up the recovery of a sick person, it should be given only in the infirmaries.
2) Clothing.
In addition to warm rations, the clothing has the task of keeping the body warm and protecting it from colds. This is especially important for prisoners who work outdoors. I order that in winter, if available, head coverings, coats, pulse warmers, socks be worn.
Several thin garments keep warmer than one thick one, therefore, in the absence of a coat in winter, the wearing of 2 shirts or the like is permitted.
Effective as (heat retainer) cold protection are newspapers. Therefore, if necessary, have several layers of newspapers worn on the chest, abdomen and kidney area. Care must be taken to obtain sufficient quantities of paper.
Paper vests may be made by the prisoners themselves if necessary. Small shredded paper in the stockings also provides good protection against the cold. If headgear is not available, then also have tight-fitting paper caps made. In this case, also leave the head hair long as a heat protector.
I will award prizes to practical designs for heat-protective clothing of all kinds.
3) Natural health remedies.
In winter, care must be taken that the inmates don't chill out. Therefore, when working outdoors, take repeated short breaks for vigorous physical movements. Also take advantage of roll calls for warmth exercises.
Hot drinks and food promote blood circulation and warm the body from within. Always distribute cold rations along with hot drinks.
The camp must not be cooled down; therefore, in unheated barracks, leave blankets spread out over straw sacks during the day. Straw sacks must be constantly monitored for stuffing.
Care must be taken to ensure an undisturbed night's rest of at least 7-8 hours.
Prisoners who work in dark rooms during the day shall, if possible, be exposed to daylight during the lunch break with their upper bodies naked.
4) Avoidance of unnecessary exertion:
Roll calls shall be kept as short as possible, and long periods of standing around shall be avoided. In cold weather, short stomping exercises; in favorable weather, keep seated.
Design workstations in terms of layout, lighting, if possible, so that all available power is devoted to the work process.
Expedient and easily practicable suggestions made in this respect by the inmates will be rewarded by me in the future (reliefs, cigarettes).
5) Performance bonuses.
Another essential means of increasing the performance of prisoners is the granting of bonuses. The procedure is laid down in the draft of 15 May 1943 'Service Regulations for the Granting of Benefits to Prisoners.' This draft is attached once again to this letter. Its contents must be precisely known to all those in charge of the prisoner assignment. The camp commanders themselves must constantly and conscientiously see to it that this possibility, too, is completely exhausted.
Detailed reports on the granting of bonuses, especially on their effect on performance improvement, are to be submitted by January 15, 1944. These reports are to be accompanied by any suggestions for improvement.
I expect that these suggestions will shortly have a positive effect on performance improvement at the CCs.
If work (e.g., production of paper vests, etc.) becomes necessary on a large scale, it is to be performed in the infirmaries by prisoners who are only in need of rest. They are to be assembled for this.
The necessary rooms are to be made available.

Each camp commandant who receives this letter must immediately forward it to the first leader of the administrative service and to the camp physician for their attention. These two leaders must confirm by signature on the letter that they have read it carefully.
I will personally see to the supervision of the measures outlined again in this letter.
sgd. Pohl
SS-Obergruppenführer and General of the Waffen-SS."

Letter from the Chief of Office D III of the SS-WVHA (SS-Sturmbannführer Lolling) to the Chief of Office Group C (SS-Brigadeführer Kammler) with the subject "Hygienic Facilities in Branch Camp 'Buna' near Auschwitz": — RGVA, 502-1-332, pp. 269-269a. RGVA, 502-1-332, p. 262.
"For infirmary purposes, 6 barracks are provided in camp 'Buna' (2 surgical, 2 medical, and 2 for infectious patients). […] *For the surgical barracks, the installation of a room for aseptic operations is still missing. The construction of such a room is absolutely necessary in view of the planned occupancy rate and in order to prevent a large accumulation of prisoners unable to work. The furnishing of the operating room is the responsibility of I.G. Farben. toilet, washing and bathing facilities are also required for the infection barracks. In order to prevent the inmates from becoming infested with lice, the installation of a disinfestation and delousing plant is urgently needed.*
In connection with this facility, an incinerator and a mortuary could be installed in the basement. Likewise, a laundry for the patients' clothes is also expedient."
This was followed by instructions for the construction of an SS infirmary and an SS dental station. Part of this project is an undated "Proposal for a provisional disinfestation chamber. (Infirmary, Branch Camp 'Buna')." The facility is located next to the "diet kitchen" and consists of the following rooms: toilet, washroom, laundry. Undressing room – handing in clothes – disinfestation – dressing room. The plant is operated with superheated steam.

Letter from the head of the Central Construction Office to the head of the agricultural operations, SS-Sturmbannführer Caesar, with the subject "Delivery of plant material for the creation of a green belt for Crematoria I and II in the PoW camp": — RGVA, 502-1-313, p. 20. NO-4463.

"On the basis of an order from the camp commandant, SS-Obersturmbannführer Höss, Crematoria I and II in the PoW camp are to be provided with a green belt as a natural screen to the camp. To carry out these measures, the following plant material from forest stands is needed:
200 pieces of hardwood trees 3 – 5 m high.
100 " hardwood trees 1 1/2 – 4 m high
300 " spruce and pine trees 1 1/2 – 4 m high as well as
1000 " various cover shrubs 1-2 1/2 m high
from nursery stock.
Provision of this plant material is requested."

2nd Staff Company/SS-T-Sturmbann. Company List. Listing of 269 SS members (1 Untersturmführer, 2 Oberscharführer, 4 Scharführer, 23 Unterscharführer, and the rest Rottenführer, Sturmmänner, and Riflemen), giving last name, first name and date of birth. GARF, 7021-108-54, pp. 114-118.

7. "Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in men's camp: 56,287, of whom unfit for labor and deployment: 8,292. APMO, D-Aul-3a/370/, p. 424.

"Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in women's camp: 33,312, of whom unfit for labor and deployment: 6,752. APMO, D-Aul-3a/370/7, p. 435.

8. "Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in men's camp: 56,257, of whom unfit for labor and deployment: 8,253. APMO, D-Aul-3a/370/, p. 424.

"Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in women's camp: 33,303, of whom unfit for labor and deployment: 6,736. APMO, D-Aul-3a/370/7, p. 435.

Letter from Central Construction Office to SS-WVHA, head of Office Group C, with subject "Report on special measures in PoW camp." RGVA, 502-1-83, pp. 194-196.
"Report on progress of construction work for special measures at PoW camp.
4. Construction work. […]
Construction Section II.
Disinfestation plant.
Completely finished, will be handed over during the next week. […]
Construction Section III.
Inmate Hospital."
Masonry work was done in barracks 91, 106, 94, 71, 93, 48; carpentry work in barracks 106, 73, 94.

9. "Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in men's camp: 54,755, of whom unfit for labor and deployment: 8,106. APMO, D-Aul-3a/370/, p. 424.

"Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in women's camp: 33,243, of whom unfit for labor and deployment: 6,933. APMO, D-Aul-3a/370/7, p. 435.

Central Construction Office. File memo with the subject "BW 29 PoW camp, BA III – fire ponds": RGVA, 502-1-26, p. 187.
"For fire-police reasons and in view of the fact that, for the barracks erected in the meantime in BA III of the PoW camp, the irrigation pipe network and in connection with this the water-supply plant do not yet exist, 5 fire-fighting ponds had to be provided for water storage and withdrawal for fire-extinguishing purposes as a matter of

priority for implementation."

Letter from the camp doctor of the Gypsy Camp Auschwitz-Birkenau, BIIe, SS-Hauptsturmführer Josef Mengele, to the Central Construction Office with the subject "Requisition for the Inmate Infirmary": RGVA, 502-1-342, p. 21.
"The following is urgently requested for the establishment of the inmate infirmary:
~~11~~ 8 O.T.[25] *iron stoves for the blocks of the inmate infirmary furnished so far, one each for the new block 20 to be furnished for the sauna, etc.*
12 fixed window panels for the side walls of the operating and delivery rooms, the outpatient room, the typing pool."

10. "Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in men's camp: 54,719, of whom unfit for labor and deployment: 8,243. APMO, D-Aul-3a/370/, p. 424.

"Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in women's camp: 33,212, of whom unfit for labor and deployment: 6,956. APMO, D-Aul-3a/370/7, p. 435.

Letter from the Central Construction Office to the Commandant's Office of the CC with the subject "Additional rations for the construction office's concrete unit": RGVA, 502-1-256, p. 129.
"The Construction Offices unit 'concrete column' has urgent and heavy work to do at present for the laying of air-raid trenches. In order that the full working capacity of the prisoners be maintained, the local office requests supplementary rations for the above unit."

11. "Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in men's camp: 54,673, of whom unfit for labor and deployment: 8,373. APMO, D-Aul-3a/370/, p. 424.

"Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in women's camp: 32,179, of whom unfit for labor and deployment: 6,967. APMO, D-Aul-3a/370/7, p. 435.

Headquarters Auschwitz CC. Garrison Order No. 50/43. GARF, 7021-108-54, p. 125; Frei, p. 358
"1. By order of the RF-SS and Chief of the German Police, as of today I have taken over the Auschwitz Concentration Camp from the previous camp commandant, SS-Obersturmbannführer Höss.
The division of Auschwitz Concentration Camp ordered by the chief of the SS Economic and Administrative Main Office, SS-Obergruppenführer and General of the Waffen-SS Pohl, into
Camp I (Main Camp)
Camp II (women's camp)
Camp III (subcamp)
will be carried out in the next few days.
2. With immediate effect I have also taken over the official duties of the SS garrison eldest for the SS garrison area Auschwitz.
The SS Garrison Eldest, sgd. Liebehenschel."

Central Construction Office. File memo with the subject "Heat insulation of the electrical delousing devices in the Gypsy Camp, PoW camp": It turned out that the electric delousing devices consume too much electricity due to excessive heat loss. It is requested that the devices be coated with 10-12 cm thick glass wool insulation. RGVA, 502-1-21, p. 56.

Total amount: 53,702 RM; of which already paid: 27,000 RM on 4 Dec. 1942 and 5,500 RM on 8 Dec. 1942. RGVA, 502-2-26, pp. 211-213.

Construction Office of the Waffen-SS and Police Auschwitz U/S.-Oswiecim. Work card. Order no. 985/481, for the electrician unit:
"For B.W. 160 the following work is to be carried out: Installation of a prov. light line for the construction office of the company Industriebau Inc. (2 lighting points). Started: 12 Nov. 43. Finished: 18 Nov. 43." RGVA, 502-2-16, pp. 88-88a.

12. "Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in men's camp: 55,103, of whom unfit for labor and deployment: 8,327. APMO, D-Aul-3a/370/, p. 424.

"Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in women's camp: 33,172, of whom unfit for labor and deployment: 7,047. APMO, D-Aul-3a/370/7, p. 435.

The fourth operation book of the surgical department (Block 21) of the prisoner infirmary of Auschwitz CC begins with this date. It covers the period from November 12, 1943 to February 23, 1944. The page numbering is a continuation of the previous book and ranges from 320 to 483. The entries contain the numbers 19544-22297.
The first list (received from the Polish Red Cross) covers the period from October 1, 1941, to September 4, 1942, and the last (received from the Museum of Military Medicine in Saint Petersburg) covers the period from February 23, 1944, to January 15, 1945. In summary, the dates of the 22,297 surgical operations performed at Auschwitz CC are as follows: ISD, KL Auschwitz, folder 161.

	Time span	Registered inmates
[1	1/10-26/10/1941	1-3337]
2	27/10-18/11/1941	3338-4683
[3	19/11/1941-9/9/1942	4684-11050]
4	10/9/1942-22/2/1943	11051-14172
5	22/2/1943-30/6/1943	14173-16923
6	30/6/1943-11/11/1944	16924-19543
7	12/11/1943-23/2/1944	19544-22297
[8	23/2/1944-15/1/1945	?]

X-ray book No. 12 of the prisoner infirmary of Auschwitz CC begins with this date. It extends from November 12 to December 23, 1943, and contains entries numbered 12994 to 14603. APMO, D-Aul-5/21. ISD, folder 67t.

13. "Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in men's camp: 55,169, of whom unfit for labor and deployment: 8,267. APMO, D-Aul-3a/370/, p. 424.

"Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in women's camp: 33,252, of whom unfit for labor and deployment: 7,162. APMO, D-Aul-3a/370/7, p. 435.

with subject "Report on special measures in PoW camp." pp. 67-69.
"Report on progress of construction of special measures at PoW camp. […]
6. Construction Section III.
Inmate Hospital."
Masonry work was carried out in barracks 92, 93, 67, 88, 87, 94, 106, 48, 47, 109, 110, 94.

14. "Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in men's camp: 55,030, of whom unfit for labor and deployment: 8,396. APMO, D-Aul-3a/370/, p. 424.

"Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in women's camp: 33,563, of whom unfit for labor and deployment: 7,194. APMO, D-Aul-3a/370/7, p. 435.

15. "Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in men's camp: 54,988, of whom unfit for labor and deployment: 8,551. APMO, D-Aul-3a/370/, p. 424.

"Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in women's camp: 33,665, of whom unfit for labor and deployment: 7,197. APMO, D-Aul-3a/370/7, p. 435.

16. "Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in men's camp: 54,931, of whom unfit for labor and deployment: 8,738. APMO, D-Aul-3a/370/, p. 424.

"Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in women's camp: 33,665, of whom unfit for labor and deployment: 7,235. APMO, D-Aul-3a/370/7, p. 435.

Headquarters Auschwitz CC. Garrison Order No. 51/43 mentions the result of a collection for the Winter Relief Charity, and then: RGVA, 7021-108-32, pp. 71-74; Frei, pp. 359-362
"2. Inmate Property.
I have cause to point out for the last time that the property of the prisoners remains untouched, no matter what it is (articles of clothing, gold and valuables, eatables and other personal belongings), also no matter where it is or is sighted. The state decides on the use of the property of the prisoners. In special cases, this property thus becomes state property. Whoever tampers with state property marks himself down as a criminal and excludes himself from the ranks of the SS. I will ruthlessly hand over SS members who defile themselves with such a dirty deed to the SS court for sentencing."
The order mentions that the officers' mess is reserved exclusively for SS leaders (officers) and mentions a new Casino Order. Then:
"4. Civilians in the camp area.
In the next few days, boards will be erected at all entrances to the camp area with the following text in German and Polish.

Camp Area.

Civilians may enter only if they have a stamped armband and appropriate ID from the camp eldest. Civilians found without ID will be arrested.

Every SS member is ordered to supervise the impementation of this order."
The order then decrees that outgoing telexes must be signed off by one of the eight senior SS leaders listed before being sent; announces the issuance of new field caps and prohibits the self-manufacture of such caps; directs that motor vehicles, motorcycles, and bicycles must be unplugged or must be connected; authorizes the head of the SS Auschwitz garrison administration and his representative to sign driving orders for daily utility trips; mentions that Liebehenschel does not want to be addressed as commandant but only by rank; lists corrections for the

camp phone directory; and then:
"11. Air-raid protection measures at the Auschwitz garrison.
According to information from the responsible superior authorities, the necessary air-raid precautions are now to be taken immediately in the Auschwitz garrison area as well. In my capacity as local air-raid warden, I am entrusting SS-Untersturmführer Josten as my permanent representative with the implementation of these measures. I request all departments to assist SS-Untersturmführer Josten in every way possible."
The order then announces the distribution of an ordinance sheet; mentions two lost objects, one found object and three stolen objects; and grants permission to named relatives of three SS members to visit Auschwitz.

17. "Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in men's camp: 54,982, of whom unfit for labor and deployment: 8,479. APMO, D-Aul-3a/370/, p. 424.

"Overview of inmate deployment at CC Auschwitz U/S. Month of November 1943." Occupancy. Total number in women's camp: 33,471, of whom unfit for labor and deployment: 7,309. APMO, D-Aul-3a/370/7, p. 435.

Central Construction Office. File memo with the subject "PoW camp BA III": RGVA, 502-1-26, p. 190.
"Reference: Construction-site visit on 16 Nov. 43 SS-Stubaf. Hartjenstein, SS-Ostuf. (F) Jothann, SS-Ustuf. (F) Schwarzhuber, SS-Ustuf. (F) Kirschnek and SS-Ustuf. (F) Dejaco.
During the above-mentioned inspection of the construction site with the commandant of the Birkenau Camp SS-Stubaf. Hartjenstein, the Central Construction Office again pointed out the following.
The work units requested so far have never been deployed in the requested strength, and therefore a smooth progress of the work is not guaranteed. SS-Stubaf. Hartjenstein, as commandant of the entire Birkenau Camp, now has the greatest interest in the rapid completion of BA III."

Central Construction Office. Letter to the Construction Inspectorate of the Waffen-SS and Police Reich-East, Administration, with the subject "*Einnahmeanweisungen*." The following companies are listed: RGVA, 502-1-132, p. 1.

December 1943

1. "Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in men's camp: 54,446, of whom unfit for labor and deployment: 9,532. APMO, D-Aul-3a/370/7, p. 448.

"Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in women's camp: 33,884, of whom unfit for labor and deployment: 9,149. APMO, D-Aul-3a/370/7, p. 438.

Garrison Order No. 54/43: Frei, pp. 370-374
"1. Commendation
I express my appreciation to SS-Strm. Basil Malaiko, 2nd Comp., my commendation for preventing the escape of several prisoners by his prudent conduct. M. will receive 5 days of special leave as a reward."
The order mentions the result of a collection for the Winter Relief Charity; reports the renaming of the Buna Camp as "Labor Camp Monowitz"; explains bureau-

cratic details of various issues: weapons and equipment requirements; court and welfare matters; a new head of the Political Department; office hours of the garrison eldest. The order prohibits "slush funds"; mentions closing of the garrison officers' mess for a day; decrees that inmate housekeepers will be treated in the headquarters' dental station; announces an officers training evening; requests naming of SS members' children for planned Yule celebration; reports the reopening of the Sola Hut; searches for owner of a motorcycle; prohibits hanging belts with pistols at checkrooms; deals with potato allocations; reports cancellation of laundry due to lack of water; decrees electricity conservation measures to reduce consumption to 70%; exhorts patrolmen to be punctual; enquires about need for Christmas trees; reports a bicycle theft and a lost property; and mentions that issuance of residence permits for family members will no longer be published in orders.

2. "Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in men's camp: 54,355, of whom unfit for labor and deployment: 9,640. — APMO, D-Aul-3a/370/7, p. 448.

"Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in women's camp: 33,689, of whom unfit for labor and deployment: 9,061. — APMO, D-Aul-3a/370/7, p. 438.

Headquarters Order No. 1/43, Monowitz, reports the takeover of Auschwitz III by SS Hauptsturmführer Schwarz, and mentions various organizational decisions; forbids private conversations by guards; reiterates that camp leaders of subcamps are to see that prisoners are properly clothed; that prisoners' hair is short; reminds of proper cap wearing; refers to Garrison Order of previous day; and then: — Frei, pp. 374f.
"10. Commendation.
I express to the block leaders of the subcamp Jawischowitz.
SS Rottf. Erich Ligen and
SS-Strm. Aristar[on] *Dobrowoiski*
my special appreciation. Thanks to their prudence and diligence they succeeded in apprehending the inmates who escaped from the Birkenau camp on November 19, 43."

3. "Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in men's camp: 54,274, of whom unfit for labor and deployment: 9,628. — APMO, D-Aul-3a/370/7, p. 448.

and deployment: 9,718.

"Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in women's camp: 33,399, of whom unfit for labor and deployment: 9,265. — APMO, D-Aul-3a/370/7, p. 438.

The plenipotentiary for construction of the Reich Ministry Speer in the district of the Armament Inspectorate VIIIb writes to the New Construction Office of the Waffen-SS Auschwitz concerning the extension works of the camp:
"The expansion can only be carried out in the most primitive form, corresponding to the current war conditions." — RGVA, 502-1-1, p. 375.

Central Construction Office. File memo with the subject "Watchtowers BW 8":
"Gottschling Company, Liegnitz, is contracted to manufacture and deliver 42 small watchtowers. […]
Hersel Company, Ullersdorf on Queis, announces that the 8 large watchtowers ordered from them have not yet been completely finished, and that loading can only take place starting on 15 Dec. 43. […]
Lepski Company, Bunzlau, is contracted to manufacture 8 large watchtowers." — RGVA, 502-1-26, p. 197.

5. "Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in men's camp: 54,325, of whom unfit for labor and deployment: 9,861. — APMO, D-Aul-3a/370/7, p. 448.

"Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in women's camp: 33,414, of whom unfit for labor and deployment: 9,407. — APMO, D-Aul-3a/370/7, p. 438.

6. "Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in men's camp: 55,759, of whom unfit for labor and deployment: 9,885. — APMO, D-Aul-3a/370/7, p. 448.

"Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in women's camp: 33,322, of whom unfit for labor and deployment: 9,176. — APMO, D-Aul-3a/370/7, p. 438.

Letter from the Central Construction Office to the Auschwitz CC Commandant's Office, Department IIIa, with the subject "Report of prisoners with good conduct."
"The prisoners listed below are employed by the local office. On the basis of good conduct and impeccable technical service, they are hereby reported for preferential treatment (wearing long hair)."
A list of 11 prisoners follows, indicating the department to which they belong, their last name and their registration number. — RGVA, 502-1-256, p. 121.

A circular announces a lecture on German culture at the *Kameradschaftsheim*. — Frei, p. 376

7. "Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in men's camp: 56,082, of whom unfit for labor and deployment: 10,085. — APMO, D-Aul-3a/370/7, p. 448.

"Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in women's camp: 33,273, of whom unfit for labor and deployment: 9,238. — APMO, D-Aul-3a/370/7, p. 438.

Letter from J.A. Topf & Sons, Erfurt, to the Central Construction Office with the subject "Your invoice no. 0393":
"You have invoiced approx. 4100 pieces of fireclay standard and wedge bricks and approx. 1500 kg of fireclay mortar too much. Since this figure is fairly consistent with — RGVA, 502-1-327, pp. 38-38a.

the last shipment of fireclay bricks, we assume that we were not credited for the last rail car with the designation: Frankfurt 93754, which arrived for shipment on August 20, 1943 from our fireclay plant, the Plütsch Company, Fichtenhainichen. This rail car contained 3750 pieces of fireclay standard bricks Axx and 400 pieces of wedge bricks Axx, as well as 1500 kg of fireclay mortar M1."
These materials correspond to a total price of RM 887.05, which would have to be deducted from the invoice.

A circular explains that this year's Yule is divided into two parts and provides details. — Frei, pp. 376f.

8. "Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in men's camp: 56,023, of whom unfit for labor and deployment: 10,185. — APMO, D-Aul-3a/370/7, p. 448.

"Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in women's camp: 33,024, of whom unfit for labor and deployment: 9,323. — APMO, D-Aul-3a/370/7, p. 438.

Headquarters. Political Department. "Report on the Fire of Barracka II of the Polit. Department." Report by SS-Untersturmführer Grabner on the fire in the morning of 8 December 1943. — RGVA, 502-1-28, pp. 66-67.

Printed form: — RGVA, 502-1-50, p. 3.
"Negotiation on the commitment of SS rifleman Anton Wessenhöfner. […]
Further, I am aware that the Führer alone decides on the life and death of an enemy of the state. No SS member and no person obligated to serve in the Waffen-SS is therefore authorized to lay hands on an enemy of the state or to physically abuse him. The prisoner is punished only by the commandant. Likewise, executions to be carried out in the CCs will be carried out only by order of the Reichsführer-SS and the SS officers appointed by him to do so."
Signed by Anton Wessenhöfner, SS rifleman.

9. "Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in men's camp: 55,931, of whom unfit for labor and deployment: 10,346. — APMO, D-Aul-3a/370/7, p. 448.

"Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in women's camp: 32,746, of whom unfit for labor and deployment: 9,335. — APMO, D-Aul-3a/370/7, p. 438.

Letter from the SS garrison physician to the Construction Inspectorate "Silesia" with the subject "New Birkenau delousing plant": — RGVA, 502-1-336, p. 84.
"The new disinfestation plant can only be put into operation during the day and by the hour, since the fencing and the lodgings have not yet been completed. Because of the urgent need to put the delousing plant into operation, I ask that its completion be expedited."

Headquarters of the Birkenau Labor-Education Camp. Release certificate for Semchenko Oleksander, in the camp from October 12 to December 9, 1943. "The release took place on December 9, 1943." — RGVA, 502-1-438, p. 69.

10. "Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in men's camp: 55,760, of whom unfit for labor and deployment: 10,141. — APMO, D-Aul-3a/370/, p. 448.

"Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in women's camp: 32,531, of whom unfit for labor and deployment: 9,233. — APMO, D-Aul-3a/370/7, p. 438.

Letter from the SS garrison physician to the Central Construction Office with the subject "Disinfestation of Barracks":
"According to the report of the disinfector assigned by me, SS-Oberscharführer Klehr, in spite of thorough instruction and warning, a civilian worker broke open an accommodation barrack on 9 Dec. 43 by means of a duplicate key, which was just being disinfested, and could only by chance be saved at the last moment from entering the barracks and thus from his certain death."

RGVA, 502-1-8, p. 25.

APMO, D-Aul-3a/370/7, p. 448.

"Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in women's camp: 30,475, of whom unfit for labor and deployment: 7,418.

APMO, D-Aul-3a/370/7, p. 438.

Letter from the camp physician of Auschwitz II Camp (women's camp) to the Central Construction Office:
"In order to carry out the immediate hygienic program ordered at the time by SS-Gruppenführer Glücks and SS-Brigadeführer Kammler, the following is requested for the expansion of the infirmary barracks of the inmate infirmary:"
1. cement, 2. brick, 3. lumber and roofing felt.

RGVA, 502-1-83, p. 14.

Headquarters of Auschwitz Concentration Camp I. Proposal List No. 1 for the Award of the War Merit Cross, 2nd Class with (without) Swords (*Kriegsverdienstkreuz*, KVK). The camp commandant, SS-Obersturmbannführer Arthur Liebehenschel, proposes SS-Hauptsturmführer Eduard Wirths for the award of this decoration with the following justification:
"SS-Hauptsturmführer Dr. Wirths, as garrison physician since 1 Sept. 1942, has achieved with a unique energy in restless work from morning to night that in Auschwitz CC the danger of epidemics was brought down to a minimum, and thus the health and working power of the SS men and also of the prisoners could be preserved on the whole. His work here in Auschwitz is universally recognized. Personally, SS-Hauptsturmführer Dr. Wirths is an indispensable colleague to me, whose work and

NARA, microcopy no. T-1021.Vol. III. Rec. Gr. No. 242/338, Roll. No. 18, Frame n. 477.

energy I greatly appreciate.
The award of the KVK is supported by me in every respect."

Proposal List No. 1 (23) for the award of the War Merit Cross II Class with (without) Swords. The camp commander of Monowitz proposes SS-Hauptsturmführer Josef Mengele for the award of this decoration with the following justification: *"SS-Hauptsturmführer Dr. Josef Mengele has been performing his duties as camp physician at Auschwitz since 17 June 1943. He has particularly distinguished himself in the fulfillment of the* [tasks] *assigned to him and, beyond his service, has still been active with urgent scientific problems in the research of the racial affiliation of the Gypsies. In addition, he has regularly collaborated in the completion of special tasks. In the course of his medical duties in combating the severe typhus epidemic in Auschwitz CC, he became infected himself and contracted a very severe typhus disease, after he had already contracted severe malaria in June/July 1943, also in the course of his duties at Auschwitz CC.*
His attitude both as a doctor and as a soldier is without reproach." — NARA, microcopy no. T-1021.Vol. III. Rec. Gr. No. 242/338, Roll. No. 18, Frame n. 484.

Headquarters Concentration Camp Auschwitz I. Proposal List No. 3 (20a) for the award of the War Merit Cross II Class with (without) Swords. The camp commandant proposes two SS block leaders for the award of this decoration: *"SS-Rottenführer Grimm is a reliable block leader who masters the tasks assigned to him to my complete satisfaction. During the suppression of the mutiny that took place in October of this year on the occasion of a transport of Jews, G., through his prudent and determined actions, contributed significantly to the suppression of the revolt, and in the process to the liberation of endangered comrades from their threatening situation. In recognition of his services, G. is proposed for the award of the KVK."*
"SS Rifleman Lackner has been at Auschwitz CC since 11 Nov. 41, performing the responsible service of a block leader. I am extremely satisfied with his services. During the suppression of the mutiny that occurred at the end of October on the occasion of a transport of Jews, L. distinguished himself by his prudent behavior, and rescued several comrades from very critical situations. He is therefore proposed for the award of the KVK." — NARA, microcopy no. T-1021.Vol. III. Rec. Gr. No. 242/338, Roll. No. 18, Frame n. 480.

14. "Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in men's camp: 55,937, of whom unfit for labor and deployment: 10,066. — APMO, D-Aul-3a/370/7, p. 448.

"Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in women's camp: 30,383, of whom unfit for labor and deployment: 7,584. — APMO, D-Aul-3a/370/7, p. 438.

Letter from the Central Construction Office to Richard Reckmann, Cottbus, with the subject "Tamping and alignment of the extension of track 21 West of Auschwitz Station. PoW camp BW 27": — RGVA, 502-1-186, p. 84.
"Order no. 297. The verbal order of 2 Dec., according to which the Reckmann Company is to carry out the tamping and alignment work of the extension of track 21 West of Auschwitz Station, is hereby confirmed."

Headquarters Order No. 2/43, Birkenau, appoints a company commander; reports that the fence around the effects warehouse in Construction Section II is energized as of Dec. 16; and mentions the distribution of an ordinance leaflet. — Frei, pp. 377f.

Garrison Order No. 55/43 mentions the result of a collection for the Winter Relief Charity. Frei, pp. 378-382

"2nd Commendation.
SS Rifleman Alois Kulowitz, 2nd Comp., thwarted the escape of a prisoner by decisive action on 6 Dec. 43. I express my appreciation to K. for his prudent behavior. He will receive 5 days special leave from me."

The order exhorts to discipline for the coming Yule; schedules a children's Yule event and a comradeship evening for the officers; explains organizational matters for holiday vacationers; mentions the hiring of telephone operators; orders total blackout and gives instructions for it; mentions the transfer of SS court officers, then:

"10. Disinfestation.
A special case gives me cause to point out that all quarters (SS family members, SS troop members, civilian workers, prisoners) where disinfestation is being carried out are not to be entered until they have been inspected by the disinfector assigned by the SS garrison physician Auschwitz, SS Oscha. Klehr, or his representative. The office in whose area disinfestation is to be carried out shall post a guard (for the protective-custody camps a block eldest) in front of the disinfested accommodation until it is released, who shall prevent anyone from entering the disinfested accommodation.
11. Impregnation of uniforms
At present the uniforms of SS members are impregnated with Lauseto [=DDT]. *I point out that the service clothing for officers is also to be impregnated with Lauseto. The SS garrison physician is to report to me by 21 Dec. 1943 that this order has been carried out.*
12. Prisoners on the phone
It has happened that a prisoner has answered the telephone. That this is an impossibility and strictly forbidden I do not need to explain in detail, nor the consequences that may result from it. In the future, I will hold the guilty party responsible."

The order gives instructions on fuel supplies in view of general shortages; reminds that pay matters go through the administration; urges care with shoes in view of extremely short allocations of leather and rubber; explains which camp departments are to be informed in case of vehicle accidents; gives place and time for collection of Christmas trees; orders X-ray lung examination of all civilian employees in food establishments; appoints a barracks eldest; reports three stolen, one lost and five found objects; and declares one camp ID card invalid.

16. "Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in men's camp: 55,090, of whom unfit for labor and deployment: 10,382. APMO, D-Aul-3a/370/7, p. 448.

"Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in women's camp: 30,140, of whom unfit for labor and deployment: 7,757. APMO, D-Aul-3a/370/7, p. 438.

Report of the camp physician of Auschwitz CC I to Office DIII of the WVHA. GARF, 7021-108-32, pp. 93-98.

Item 7:
"The prisoner infirmary had the following specialized wards during the quarter under report: X-ray room, chemical laboratory, oto-laryngological station, opticians' workshop, light station, herbal pharmacy, diet kitchen, dental station."

Item 10e:
"At the end of the reporting quarter, inmates suffering from malaria, or who underwent a malaria treatment course, were transferred to Lublin CC, which is considered

an anopheles-free area."

Report "Inmate Hospital of Conc. Camp Auschwitz I" to chief of Conc. Camp Auschwitz I for the period 16 September – 15 December 1943. GARF, 7021-108-50, p. 63.

"In the period under report, the surgical department, as before, [is] *housed in Block 21. Because of lack of space in Block 21, many prisoners suffering from surgical illnesses were treated in the surgical dept. in Block 19. Outpatient treatment took place in the outpatient clinic in Block 28.*
During the reporting period, 1800 prisoners passed through the surgical departments, of whom 314 prisoners underwent aseptic operations. Septic operations (for phlegmon, ulcers, etc.) were performed on 2135 men.
Of the aseptic operations, the following may be mentioned:

Gastric resections	*2*
Cervical lymph node removal	*3*
Gall bladder surgery	*1*
Laparatomy	*2*
Appendectomy	*10*
Inguinal hernia operations	*102*
Testicular amputation	*89*
"	*1*
Genital surgeries	*5*
Hydrocoele surgery	*9*
Vascular surgery	*7*
"	*2*
Extremity amputations	*11*
Operations of mastoidis	*30*
Tonsillectomy	*30*
Operations of septum nasi	*16*
Ovary removals	*2*
Resections of the scapular head	*1*
Removal of the fallopian tube	*1*
Thoracoplastica	

Several other septic operations were also performed. The treatment of septic diseases, such as phlegmon, suppurations, etc. was divided as follows:

lower extremities	*997*
upper "	*55*
various surg. diseases	*583*

Aseptic operations were performed under ether anesthesia or 2% Novocain. Chloroethyl was used for small septic ulcer operations. A shortage of narcotic agents for short-term anesthesia (chloroethyl) was palpable during the reporting period. The lack of premises for the treatment of wounds in the aseptic department had a bad effect on the treatment of postoperative cases and hindered this work.
Surgical linen, as a result of continuous use and lack of replacement linen, is in poor condition."

Letter from the Central Construction Office, Materials Administration Department, to the Accounting Department with the subject "Invoice Topf and Sons of 4 Nov. 43". RGVA, 502-1-327, p. 40.

"With reference to the above invoice, the amount RM 887.05 is to be reimbursed to the company; since the rail car mentioned in the letter with the designation: Frankfurt 93754, with the contents: 3750 pieces of fireclay standard bricks Axx and 400 pieces of wedge bricks Axx, as well as 1500 kg of fireclay mortar M 1, was received here by the company but was not credited because the work had not yet been completed."

The Chief of Office C III. — AGK, NTN, 94, p. 177. Odpis (transcript).
"Presentation for the meeting of the heads of the construction inspectorates or subgroups of the SS economists on 17 Dec. 1943.
In the crematoria, the consumption of liquid fuels can no longer be permitted. The conversion to solid fuels has been carried out everywhere.
For disinfestation plants the following short note:
The [buildings] *primarily installed coal-fired air heaters were originally intended for disinfestation with hydrogen cyanide. After the prohibition of hydrogen cyanide disinfestation, they were used as hot-air heaters. In this case, they overheated and leaked, so that the fans sucked embers out of the combustion chamber, causing fires in the disinfestation chamber. Only devices made of cast iron are suitable for hot-air disinfestation; wrought iron is prohibited.*
The Head of the Office C III
Technical Divisions
sgd. [signature]
SS-Obersturmbannführer."

"Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in women's camp: 29,654, of whom unfit for labor and deployment: 8,388. APMO, D-Aul-3a/370/7, p. 438.

Garrison Order No. 57/43 sends New Year's wishes from the head of the Office Group, Glücks; then: Frei, pp. 388f.
"2. Commendation
The SS members SS-Uscha. Pfeiffer, SS-Rifleman Gonglach, SS-Rifleman Metzger prevented the escape of 7 prisoners on 18 Dec. 1943 by acting with presence of mind and determination. I express my special appreciation to the aforementioned for their prudent behavior. As a reward, they will receive 5 days of special leave."
The order appoints Liebehenschel as director of the SS-owned economic enterprises (with the exception of agriculture); stray dogs are from now on no longer shot but caught; decrees that every soldier's book must now also contain a photograph; gives further instructions on impregnation with DDT; and declares a camp ID card invalid.

31. "Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in men's camp: 55,785, of whom unfit for labor and deployment: 11,433. APMO, D-Aul-3a/370/7, p. 448.

"Overview of inmate deployment at CC Auschwitz U/S. Month of December 1943." Occupancy. Total number in women's camp: 29,513, of whom unfit for labor and deployment: 8,266. APMO, D-Aul-3a/370/7, p. 438.

The accounting books of Tesch & Stabenow in Hamburg show a delivery of 116.5 kg of Zyklon B to Auschwitz CC worth RM 699. TNA, WO 309-1603.

[?] Auschwitz CC – CC dental station. December 1943. List of prisoners treated in the various dental stations of Auschwitz CC. (See entry for August 1943). Serial numbers: 1-45 APMO, D-Aul-5/1, pp. 19-20.
ISD, folder 166.

1944

January 1944

1. Garrison Order No. 1/44 wishes everyone a happy 1944. Frei, p. 389

4. This date begins the "Block 20 – 8 – Occupancy of 8 – Pulmonary TBC Station" directory, which extends from January 4 to June 1944. It contains about 1340 names of prisoners who passed through Block 20, No. 8. ISD, folder 61d.

Letter from the SS garrison physician Auschwitz to the medical orderlies of all camps of Auschwitz CC III with the subject "Corpses from branch camps": HvA, 9, 1966, p. 74.
"As of now, corpses may no longer be transported from Au. II. and Au. III to the morgue of camp Au. I.
Instead, the corpses are to be brought to the crematorium immediately after identification, careful checking of the prisoner's number.
Until further notice, however, the death reports are to be sent to the office of the inmate infirmary of the Au. I. by 12 noon on the day of delivery to the crematorium for the purpose of drawing up the necessary death papers.
In each case of death, the exact cause of death and the day of admission to the inmate infirmary must be stated."

5. Letter from the Construction Office Auschwitz CC to the Central Construction Office with the subject "Handover of the Central Construction Office by SS-Sturmbannführer Bischoff to SS-Obersturmführer (F) Jothann." "Index of Files" of the handover, which took place on January 1, 1944. More than 90 structures are listed, including: BW 32B: Italian camp; BW 11: chimney construction Crema.; BW 30: Crema II and III; BW 93: special barrack "B" [brothel]. RGVA, 502-1-48, pp. 42-49.

Letter from the Construction Inspectorate "Silesia" to the Central Construction Office with the subject "Compensation payment (residual claim) to the Topf & Sons Company, Erfurt": RGVA, 502-1-314, p. 34.
"For reasons of competence, the Construction Inspectorate is sending a file from the Topf & Sons Company concerning compensation payment for cremation furnaces delivered."
Civilian Employee Rudolf Jährling later wrote a note on that letter that Topf was still to receive 12,600 RM, that 10,000 RM were paid out on January 30, 1944, and 2,600 RM were still to be paid.

7. Letter from the Central Construction Office to Reichsbahn freight handling, Mr. Oberinspektor Barthelmus, with the subject "Delivery of rail cars": RGVA, 502-1-178, p. 162.
"The local office politely requests with immediate effect that all incoming freight of ballast and packing be delivered to the Kuznitzky track only, since the siding to PoW camp will be ballasted from there and track 21 West with the cutting operations can thereby be relieved."

Construction Office PoW camp. APMO, Aull BW 1/14/72, p. 1.
"Construction Section III.
Of the projected 131 air-force barracks, all have been completed to date:
22 barracks […followed by 22 numbers]*."*
Barracks 72 is under construction; another 13 barracks are to be refurbished; work is in progress in another 21 barracks; "work has not [yet] begun" in 72 barracks; of the projected 19 horse-stable barracks and 27 RAD [Reich Labor Service] barracks, 4 each have been completed.

Garrison Order No. 2/44 announces the installation of Liebehenschel as the new official commissar of the Auschwitz District; establishes sanitary posts for the prevention of venereal disease; cryptically refers to certain numbers in a Waffen-SS ordinance sheet; then: Frei, pp. 390-393

"4. Typhus Control.
Those companies from which members have fallen ill with typhus fever are to contact the SS garrison physician – Department 'Disinfection' – immediately for the purpose of delousing and disinfestation of the entire company area. Notification will be sent to the companies concerned by the SS camp hospital or by the typing pool of the troop doctor immediately after they become aware of a typhus case."

The order announces a slide presentation on a journey to Spain and a play; mentions available theater tickets for the opera house in Kattowitz; announces the issuance of the next quarter's training schedules; schedules an officers' and a NCOs' training evening; finds fault with the fact that female Aryan inmates do hard physical labor, whereas "Jewish broads" ("*Judenweiber*") sit in warm offices, and demands that this be remedied; forbids the burning of lumber and timber; arranges for the distribution of poultry as needed; gives detailed instructions on the management of arms and equipment; and forbids the unauthorized trimming of willows on lands belonging to the Reich Waterways Administration.

8. Central Construction Office, "List of requested or assigned prisoners for the construction projects of the Central Construction Office Auschwitz in the period from January 1, 1943 to December 31, 1943." Indication of cumulative prisoner day works. RGVA, 502-1-60, p. 90.

	Requested inmates	Allotted inmates	Difference
Total	5,249,694	2,976,270	2,273,424
Monthly average	437,475	284,023	189,452

Letter from headquarters CC Auschwitz II to the Central Construction Office with the subject "infirmary barracks of the inmate infirmary in women's camp Birkenau": RGVA, 502-1-83, p. 13.

"The camp physician of the women's camp, SS-Ustuf. Dr. Rohde, presented me with a copy of a letter dated 13 Dec. 43, in which he requested that work be carried out which had been ordered by SS-Gruppenführer Glücks and SS-Brigadeführer Kammler as immediate hygienic measures. […]
In view of the present state of the diseases, the implementation of these immediate measures appears to be extremely urgent."

10. A circular corrects a typo in the previous garrison order. Frei, p. 393

13. SS Economic and Administrative Main Office, Office Group D Concentration Camps. Letter to the camp commandants of all CCs with the subject "Preparation of the protective-custody-camp report." NO-1548.

"Enclosed I am sending 100 forms KL 12/4/43.
From now on, only these forms are to be used in preparing the protective-custody-camp reports of the concentration camps, and care is to be taken that the front and back pages are filled out meticulously.
Prisoner categories other than those indicated in columns 1-15 may not appear; they are to be divided in these columns according to the type of detention (e.g., police prisoners, if brought in by the Stapo, in columns 1 or 7, if brought in by the Kripo, in columns 9, 10 or 11).
The final numbers must correspond with the reports of the same day to the heads of offices DII and DIII.
An appendix is to be attached to the protective-custody-camp report, on which the fol-

lowing is to be listed:
1.) List of prominent persons by name,
2) Number of executions carried out,
3.) Number of prisoners with detention relief,
4.) breakdown of the transports indicated under 2 b) and 3 c).
(e.g.: On 2 April 43, 350 prisoners arrived from Neuengamme CC.
On 10 April 43, 1000 prisoners transferred to Buchenwald CC).
5) List of all external work camps (as before).
6) Only for CC Auschwitz I-III:
Number of SB (as before) [*Sonderbehandlung*, special treatment].
7) Only for Stutthof CC:
Number of Norwegian special prisoners, special report cancelled.
As of 1 Feb. 44, reports on the protective-custody camps are to be made only on the 15th and last of each month. The weekly report is cancelled. As ordered with order of 13 Jan. 44 D I/1 Az.: 14 c 2/Ot/We.-Geh. Tgb. No. 52/44, the protective-custody-camp reports are to be delivered by courier on the 1st or 16th of each month."

15. "Overview of the number and use of inmates of the Auschwitz II Concentration Camp (ML)". Total number: 22,012. GARF, 7021-108-33, pp. 121-124.
Unfit for work or deployment: 6,292, including:
1. inpatients: 3,649
2. invalids: 840
3. detained: /
4. youths under 14: 1,803.

18. Letter from headquarters Auschwitz CC II to the Central Construction Office with the subject "infirmary barracks of the inmate infirmary in women's camp Birkenau." RGVA, 502-1-83, p. 12.
"Because of the particular urgency of the immediate measures listed in the above letter [of 8 Jan. 1944]*, notification is requested of what has been arranged."*

Central Construction Office. File memo with the subject "Delivery of cast-iron pressure pipes, boilers and pumps from Prague": RGVA, 502-1-29, pp. 3-3a.
"Mr. Heibach was again informed by me in detail that the pressure pipes, boilers and pumps are urgently needed for the special measures in the PoW camp Auschwitz, and in case the deliveries are not made continuously, the manpower employed for this purpose would have to lie idle."

19. Garrison Order No. 3/44: Frei, pp. 394-397
"1. Commendation
The SS Uscha. Johann Ratzka, 3rd Comp., prevented the escape of 2 prisoners on 10 Jan. 44 through special attention and decisive action. I express my special appreciation to him for his prudent behavior. Ratzka receives 5 days special leave as a reward. I express my special appreciation to SS Rifleman Paul Korhamer, 5th Comp., for preventing the escape of a prisoner in Jaworzno on 4 Jan. 44 through prudent behavior. Korhammer receives 5 days of special leave as a reward."
The order decrees increased security precautions for guards on the occasion of the murder of a guard by prisoners; forbids, due to heavy traffic, the entry of Waffen-SS members into the girls' dormitory of IG-Farben, and the entry of any man into the dormitory of SS Maiden; deplores the falling asleep of guards on watchtowers and decrees countermeasures; reprimands the unauthorized taking of a frying stove by an SS member; suspects misuse of pistol ammunition for private purposes, and henceforth requires proof of ammunition used; finds fault with overdue loaned books; reprimands lack of attention to traffic regulations in the area of interest; mentions assignment of a car; gives instructions on how to quit religious affiliations; offers calendars for sale; orders the reporting of all ethnic German

and Germanic SS volunteers; points out new vacation homes for front-serving Waffen-SS members and explains details; and mentions one lost, found, and stolen item each.

21. Central Construction Office. File memo with the subject "Roofing of BA III". It turned out that nailing the seams of the roofing felt to cover the barracks was not sufficient to keep the roofs tight; all seams of the roofs were to be nailed with chamfer strips. RGVA, 502-1-29, p. 5.

Letter from head of construction PoW camp, SS-Untersturmführer Josef Janisch, to the Central Construction Office with the subject "PoW camp crematoria": *"Regarding the above letter* [of 22 November and 18 December 1943] *it is reported that the still-missing stoves have been set up in the inmate lodgings of Crematorium II. A roof over the garbage pit of Crematorium II was constructed at the time by the SS garrison administration. An order from the Central Construction Office for the erection of such a roof at Crematorium II by the Construction Office PoW camp does not exist, and is not included in the construction order at that time in terms of allotments."* RGVA, 502-1-313, p. 15.

Garrison Order No. 4/44 decrees the separate housing of sick Reich German prisoners and their treatment by SS physicians; decrees measures to save paper and labor; permits the wearing of ski caps, provided they are entered in the soldier's book; announces a crow-extermination campaign; and renews the ban on entering the poultry farm because of fowl cholera. Frei, pp. 397f.

22. Central Construction Office. Handover negotiation for BW 32, PoW camp, BA II [the Zentralsauna] to the SS garrison administration. Building description: RGVA, 502-1-335, pp. 1-4.
"Basement.
1 boiler room, 1 fuel room, 3 heating pits.
First floor
1 issuing room, 1 dressing room, 1 undressing room, 3 toilets, 1 clothing-issuing room, 1 valuables room, 2 passages clean & unclean, 4 disinfestation hot-air chambers, 3 disinfestation ovens, 2 magazines, 1 shearing room, 1 examination room, 1 doctor's room, 1 corridor, 1 wash room, 1 brewing room, 1 boiler room, 1 towel-issuing room, 1 supervision room, 1 drying room."

24. SS Economic and Administrative Main Office, Office Group D – Concentration Camps. Letter "to the Auschwitz CC Administration via the chief of administration in the house", with the subject "Transports from the Jewish Resettlement": AGK, NTN, 119, pp. 151-152.
"Enclosed, the office here presents the acceptance certificate of the Auschwitz CC shipment of 11 Nov. 43.
It is requested that a conscientious count of the items be made in each case, since differences of such large proportions must not occur.
In the future, only the following items will be accepted from Office D II:"
Enumerated are various types of watches, fountain pens and mechanical pencils.

25. A circular corrects a typo in the previous Garrison Order. Frei, p. 399

26. Letter from the Central Construction Office to headquarters CC II Birkenau with the subject "infirmary barracks of the inmate infirmary in women's camp Birkenau": RGVA, 502-1-83, pp. 10-11.
"The immediate measures ordered at that time by SS Brigadeführer Kammler consisted of:
1. finishing of the wash barracks […].
2. finishing of the toilet barracks […]
3. installation of heating stoves […]
These works have all been carried out and have already been handed over. For the final finishing, a washing and toilet facility with flush toilets has been arranged in each

barracks. The prerequisite for the execution of this work is the laying of a new sewer system, and the construction of a pump house which will pump the sewage, which will occur in the new sewer system at a significantly greater depth, into the existing sewage treatment plant."

Central Construction Office. "As-built plan of the small watchtower in the CC". Plan no. 3482 drawn by inmate no. 45218. Dimensions: 7.20 m × 3 m × 3 m. The guard area is on an upper level that can be reached by an internal ladder. RGVA, 502-2-2-50, p. 158.

27. Central Construction Office. File memo with the subject "Electrically operated circulating-air disinfestation device, implemented for Gypsy disinfestation barracks in Auschwitz CC": RGVA, 502-1-29, pp. 6-7.
"Reference: meeting in Auschwitz between civilian employee engineer Büttner of the Central Construction Office Breslau-Lissa, SS-Ustuf. (F) Pollok and civilian employee heating engineer Jährling of the Central Construction Office Auschwitz on 26 Jan. 1944."
Delivery company: Umlaufapparatebau-Gesellschaft Ltd. in Berlin-Charlottenburg. Designation of the plant: electrically heated circulating-air disinfestation device type II/50. Basic price of a type II/50 device with 2 chambers and 2 transport carts: RM. 6,600, including extra purchases RM 9,046. Total price of the 4 plants: RM 36,184.
"Also required is 1 shower-bath system according to the enclosed drawing no. 2437 with safety mixer tap and 38 shower heads."
Other device details. Size of a device: 2 m wide, 2.20 m high, 2 m deep.
"Each device has 2 delousing chambers, capacity for approx. 40 garments per chamber, daily output approx. 2800 garments. Depending on the quantity and nature of the garments, blankets, etc. Heating time approx. 30 min., disinfestation time approx. 1 hr."

28. Central Construction Office, "File Memo on the Handover Negotiation of the women's camp Birkenau": RGVA, 502-1-83, p. 49.
"The camp has not yet been completed, although the same has been occupied for about 1 1/2 years."
This is followed by an indication of improvement work that have been carried out.

"List of prisoner status as well as prisoner deployment in Auschwitz Concentration Camp on January 28, 1944. RGVA, 502-1-60, p. 96.

no. of inmates	*77,000*
of them	
deployed for labor	*40,000*
sick	*12,000*
quarantined	*8,000*
not deployed	*17,000*
	toegther 77,000 "

Document without header.

Central Construction Office. "Final account for aeration and deaeration work by Topf & Sons, Erfurt. Dreysestrasse 7/9". The following pages, however, refer to BW 32, disinfestation plant. Of the 39,192 RM, the Central Construction Office paid 19,600 RM on August 16, 1943, and the remaining 19,522 RM on January 28, 1944. RGVA, 502-2-27, pp. 21-23.

Headquarters Order No. 3/44, Monowitz, revises the ban on entering IG-Farben barracks and canteens; orders ongoing instructions on all kinds of official matters by company and staff leaders; repeats the ban on SS members entering the camp Frei, pp. 399-401

brothel; repeats and explains the permission to wear ski caps; exhorts to wear neat service uniforms; reminds that SS members may not use civilian railway tickets; reiterates the prohibition of alcohol on duty; announces that Auschwitz II has its own department for lodging supplies, its own armory, and an accounting officer; and reminds of proper conduct during entry and exit of inmate work units and their guards.

31. "Overview of the number and deployment of prisoners at Auschwitz II Concentration Camp (men's camp)". Total number: 19,911. GARF, 7021-108-33, pp. 125-128.
Unfit for work and deployment: 7,385, including:
1. inpatients: 2,518
2. invalids: 278
3. detained: /
4. juveniles under 14: 2,249
5. Jews from Theresienstadt: 2,340.

31. With this date begins a fragment of the "Report Book Inmate Infirmary of the Auschwitz CC, Camp I". It is two square sheets with graphically represented data of the "Auschwitz CC II Men" and the "Auschwitz CC II Women". Plotted on the y-axis are two ascending quantities: VMM, HC.
– Occupancy (in black) with values in steps of 1000, from 0 to 30000
– Inpatients and recovering patients (in red), with values in steps of 100 from 0 to 3000.

On the x-axis, time intervals of one week are plotted, starting with 31 Jan./6 Feb. and ending with 29 May/4 June. In the corresponding chart, the following curves are shown from top to bottom:
– Inpatients and recovering patients
– Occupancy
– Total transfers to the camp (in light blue)
– Total transfers out of the camp (in purple).

31 Jan./6 Feb. 1944:
Men's camp:
– Occupancy: ~ 12,000
– Inpatients & recovering patients: ~ 1,900 = 15.8%.

Women's camp:
– Occupancy: ~ 13,750
– Inpatients and recovering patients: ~ 3,350 = 24.4%.

The recorded data are consistent with each other, but do not agree with the received reports from this period, in which both values are much higher, as a comparison of the known ratios (R) and these sick statistics (K) shows:
For the men's camp:

	Occupancy		Inpatients	
Date	R	K	R	K
31/01/44	19,911	12,000	2,518	1,900
15/02/44	19,072	12,000	3,159	2,000
20/04/44	18,335	14,400	3,104	2,750

For the women's camp:

	Occupancy		Inpatients	
Date	R	K	R	K
03/04/44	21,416	13,000	5,358	3,100
15/05/44	23,778	15,500	4,409	2,950

05/07/44	30,898	18,000	3,853	2,550

It is not known why the hospital statistics report only a portion of the occupancy, and which portion.
The following percentages of inpatients are given in the series "Overview of the number …", from 15 Feb. 1944. Since these are exact percentages, they are directly dependent on the occupancy: if the relevant number increases, the percentage of inpatients decreases. The lowest percentage (29.5/4.6, women's camp) of 14.3% corresponds to about 2,550 inmates with an occupancy of about 17,800.

[?] Auschwitz CC – CC dental station. January 1944. List of prisoners treated in the various dental stations of Auschwitz CC. (See entry for August 1943). Serial numbers: 1-51. — APMO, D-Aul-5/1, pp. 21-22. ISD, folder 166.

February 1944

1. Letter from Richard Reckmann to the Central Construction Office: — RGVA, 502-1-186, p. 72.
"For the earthwork and superstructure work to be carried out by me, prisoners are constantly being made available to me. I have now been informed by my foreman that unfortunately the composition of these work crews changes almost daily, and that different people are always being assigned to the work. […] *I therefore kindly ask you to see to it that I am left with a permanent unit for the track work, as was the case in the past with the work carried out for the Reichsbahn.*

Central Construction Office. "Installment payment" of RM 10,000 to the J.A. Topf & Sons company, Erfurt, for the "construction of 2 large-capacity Topf cremation furnaces." — RGVA, 502-1-310, pp. 16-16a.

Garrison Order No. 5/44 lists a long series of promotions and awards; appoints an SS garrison veterinarian; informs that new connecting fences of camp sections adjacent to Crematoria II & III are now electrified; mentions the address of the responsible branch of the business health insurance fund in Breslau; notes a training evening for SS officers; confiscates in a motorcycle; and lists three found items and one stolen item. — Frei, pp. 401-403

2. Auschwitz CC III, mining camp Jawischowitz, report of the commandant with the subject "Suicide attempt of the Jewish prisoner Engel Josef, born 8 June 18 at Pabianice, prisoner no. 159344". Detailed report on the incident. The prisoner was in charge of mining coal and did not want to do this work anymore and tried to slit his wrists with a knife. Investigation revealed, "The injuries Engel inflicted on himself are of a lighter nature and not life-threatening." — AGK, NTN, 94, p. 224.

Letter from the Central Construction Office to the garrison eldest, SS-Obersturmbannführer Liebehenschel, with the subject "Passes for Mr. Chief Eng. Prüfer and Mr. Holick, of the Topf and Sons Company, Erfurt." — RGVA, 502-1-345, p. 50.
"The local office requests the issue of one camp pass each for the two gentlemen mentioned above.
Mr. Chief Eng. Prüfer and Mr. Holick were summoned here by the local office by telegraph to inspect or repair the damage that occurred in the large disinfestation plant in the PoW camp and in the crematoria. Both the disinfestation plant and the crematoria were built by the Topf Company and put into operation by the two aforementioned gentlemen, for which purpose they had previously possessed the appropriate passes, which were, however, returned to the headquarters after completion of the work.
Since it is imperative that the deficiencies which have occurred be remedied, the Central Construction Office requests that appropriate passes be issued."

3. Central Construction Office. "List of Total Inmate Labor Deployment as of January 31, 1944. According to decree of SS Main Office from August 12, 1943." To- — RGVA, 502-1-256, p. 118.

tal prisoner labor hours: men: 1,759,331½, women: 53,402½, total: 1,812,734.
"7.) Premium coupons issued to prisoners during the period under review (given in Reichsmarks) 24,941 from 1 Jan. 1944 – 31 Jan. 1944."

4. Letter from the head of the Construction Inspection "Silesia", SS-Sturmbannführer Bischoff, to the head of the SS garrison administration, SS-Obersturmführer Möckel, with the subject "Loan of 3 horse-stable barracks at Sonderkommando I": Bartosik, Doc. 34, p. 147.
"For the purpose of carrying out a special measure, I made available at that time 3 horse-stable barracks from Construction Section III of PoW camp.
Now that the crematoria have long since been completed and handed over to your administration, the above-mentioned barracks on loan at Sonderkommando I are no longer needed. The barracks are earmarked for a specific purpose and must be placed in Construction Section III of PoW camp. The same applies to two barracks at the staff building which have been made available on loan, but which will not be needed until a somewhat later date.
I have issued orders that the barracks at Sonderkommando I are to be dismantled and erected in Construction Section III.
I ask that this be noted."

"File memo on the planning game 'Immediate Aid' on 4 Feb. 44 – 4.00 p.m. in the NCOs' mess of the *Kameradschaftsheim*". A detailed air-raid plan was discussed. SS-Sturmbannführer Friedrich Hartjenstein, SS-Obersturmbannführer Arthur Liebehenschel and other officers and NCOs attended the meeting. RGVA, 502-1-29, pp. 9-11.
"SS-Oscha. Klehr: has set up one gas-detection and one decontamination squad each from his disinfectors. However, it is necessary that gas detectors and decontaminators also be trained in the companies: two men per company are to be called up for this purpose."

7. "The SS garrison eldest and local air-raid warden. air-raid-protection command post for the area of interest of Auschwitz CC U/S." Letter to Central Construction Office: RGVA, 502-1-401, pp. 100-100a.
"By order of 1 Jan. 1944 concerning the implementation of air protection in the area of interest of Auschwitz CC, the construction of fire ponds was ordered."

Central Construction Office. "Stakeout sketch of watchtowers around PoW camp". Plan no. 3512 drawn by inmate no. 3512. Listed are: RGVA, 502-2-95, p. 19.
– Small watchtower 3.12 x 3.12: 31
– Large watchtower: 11
– Existing fence
– Projected fence
Names of the main streets in PoW camp: Main Street, Ring Street, Street "A", Street "B".

Headquarters Auschwitz CC. Garrison Order No. 6/44. AGK, NTN, 121, pp. 96-98; Frei, pp. 403-406
"1. Inmate transport.
If we have to transport people (prisoners) to another work assignment, then, in order to preserve manpower, all necessary preliminary conditions are to be met for the transport as well, so that the working capacity established before the transport's departure does not suffer as a result of the transport. To this end, I again order the following:
a) The overall responsibility for each outgoing transport shall be borne personally by the camp commandant.
b) The selection (muster) will be done, as ordered, by the camp physician, the leader of the protective-custody camp and the inmate deployment leader; in the case of transfer from camp to camp, if necessary, also in the presence of corresponding officers of

the new camp.
The leader of the protective-custody camp is solely responsible to the camp commandant for the proper preparation of the transport until the departure of the train. This includes:
Provision of a sufficient transport escort, arming (m[achine] *pi*[istol]*) and sufficient rations for them; in the case of larger transports (more than 4 rail cars), an SS officer is always to be assigned as transport leader. Likewise, prisoners are to be provided with proper clothing and sufficient rations for transport, as ordered. When carrying the rations, the current traffic conditions are to be taken into account, so always give along more! The transport rations must not be handed out to the prisoners all at once. For storage, wood shavings and the like must be put down in the transport train. In each train car, there is a container with boiled water or tea, a toilet bucket, and secured light (stable lanterns). In the event of severe cold, the railroad cars must be equipped with stoves by the Reichsbahn. In moderately cold weather, the floor covering already indicated will suffice as protection against the cold, as will wrapping the feet and chest with newspaper.* […]*"*
Further, the order redefines and explains duty hours; forbids the wearing of breeches by non-riders; announces a play, an orchestral recital, and a political education evening; threatens adulterers with punishment; arranges for guard dogs to be equipped with identification blankets; announces courses in German and arithmetic; reminds that prisoners are to be requisitioned centrally for work; rations the issue of batteries; refers to two ordinance sheets; and declares two camp passes invalid.

7.-13. "Report Book Inmate Infirmary of Auschwitz CC Camp I". "Inpatients and recovering patients": men's camp: 16.2%; women's camp: 24.3%. — VMM, HC.

8. Central Construction Office. "Handover Negotiation": — RGVA, 502-1-285, pp. 17-20.
"Construction No. 32 H 3 Swiss barracks, erected by the Central Construction Office of the Waffen-SS and Police Auschwitz. Italian's camp was handed over today to the Construction Inspectorate of the Waffen-SS and Police 'Silesia,' Kattowitz."

Letter from the Central Construction Office to the headquarters Auschwitz CC, SS court-officers, with the subject "Theft of pine trees from the crematoria": — RGVA, 502-1-82, pp. 173-174.
"The following is communicated concerning the above-mentioned incident:
In the course of carrying out construction work at PoW camp, it was necessary to cut down various trees. In the area of the sewage-treatment plant of the BA II, approx. 15 pcs. of trees (pines and birches) had to be removed in view of the structures to be erected, such as trickling filters, clarifiers, temporary earthen treatment pools, wire obstacles, etc. The tree trunks were removed by order of the authorities. The logs were stored near the road on the orders of the Construction Office. According to the company representative of Deutsche Bau-A.G., these logs were removed by prisoner units accompanied by guards.
In this connection, it is pointed out that, in the area of the PoW camp, thefts constantly occur, in which not only stored construction materials are stolen, but also construction huts and workshops are broken into by force and tools are stolen. Despite continuous reporting to the responsible headquarters, the perpetrators have not yet been identified."

Central Construction Office. Order no. 1321. PoW camp, Crematorium I and II, BW 30 and 30a: — APMO, Höss Trial, Vol. 11a, p. 96.
"Przedmiot [Subject]*: Repair of the gate latches on the entrance gates of Crematoria I and II. Any necessary materials will be provided by the Central Construction Office. Order of the Central Construction Office No. 10 of 4 Feb. 44. Urgent! The prisoner performing the work is to report to construction-office barracks PoW camp to construction supervisor Teichmann! Wykonawcy* [Executioner]*: Zając /Birkenau/.*

Ukończono [Finished]*: 10 Feb. 44."*

9. Letter from J.A. Topf & Sons, Erfurt, to the Central Construction Office with the subject "Disinfestation Plant": RGVA, 302-1-336, pp. 88-88a.
"We acknowledge receipt of your telegram of 30 Jan. 44 with the following wording: 'Chief Engineer Prüfer and fitter Koch to march immediately to here. All hot-air chamber walls of large disinfestation building burst. Repair to be carried out immediately on higher order. Awaiting wire reply about arrival'.
In accordance with your request, we have dispatched our Chief Engineer Prüfer and Foreman Holick to there to ascertain and repair the alleged damage.
After inspecting the disinfestation furnace we had erected, it was determined in the presence of your Herr Untersturmführer Janisch that only the joints between the masonry and the heating ducts had failed. The fears that heating gases could escape from the ducts through these joints are not correct.
During the inspection, it was determined that the heating ducts were still completely closed and showed no cracks. Our foreman, Holick, has been instructed to fill the joints between the heating ducts and the masonry with monolithic tamping compound."

10. Letter from the Central Construction Office to the district president – Dept. III Q – Kattowitz, with the subject "Application for permission to draw water from the Sola for drinking purposes": RGVA, 502-1-155, pp. 11-11a.
"As a result of the catastrophic drop of the groundwater level in the Auschwitz area, wells drilled are no longer sufficient to supply the CC and its associated enterprises. An enlargement of the well gallery is not possible due to the severely limited space, and as a result of the pressure pipes required for the expansion and their difficult procurement."
The Central Construction Office requests permission to draw water from the Sola.

Central Construction Office. File memo with the subject "Barracks extension in BA III": RGVA, 502-1-29, p. 54.
"On 6 Aug. 1943, in agreement with Head of Construction SS-Ostuf. Kirschnek, the finishing of 12 barracks for the seriously ill in the PoW camp BA III was assigned on a daily-wage basis, while the remaining part of the barracks to be finished was to be awarded as taskwork after completion of the plans and contract documents."
Due to difficulties in obtaining materials, the work must be performed on an hourly-wage basis until further notice.

12. Letter from the Central Construction Office to the Construction Inspectorate "Silesia" with the subject "Approval for second layer roofing of barracks in B.A. II PoW camp – allotment of quotas": RGVA, 502-1-83, p. 47.
"It is imperative that the barracks erected in B.A. II PoW camp be covered with a second layer of roofing felt",
because they had been damaged by rain.
"Not only will the barracks rot in a very short time, but the prisoners who are housed in them must also be taken care of. The cases of illness that have occurred are attributed by the garrison physician to this emergency. The camp leader, too, demands a speedy remedy, for after all he is responsible for providing healthy living quarters."
The permit covers 10,824 sq. m. of roofing felt and 22,000 kg of bonding compound.

Letter from the Central Construction Office to the SS garrison physician Auschwitz CC with the subject "Hygiene in the Civilian Labor Camp Birkenau": RGVA, 502-1-332, p. 271.
"The above office informs in reply to your letter of 4 Feb. 1944 that the same has contacted the German Labor Front – Dept. of Labor Deployment – Bielitz, in regard to the procurement of soap for the civilian workers in the Birkenau communal camp."

14. Garrison Order No. 7/44 organizes access permits for the Waffen-SS house; announces an anti-aircraft practice shooting; points out the relocation of the sanitation post; announces a recitation evening, a ballet performance, two lectures, and an espionage film; mentions the availability of foreign-language dictionaries; announces the sale of cigarettes and soap, and the free distribution of cigarettes and books to ethnic German SS members from a donation by the Association for German Cultural Relations Abroad; reprimands the taking along of radios on transfer; requires applications for driving orders even for trips in the camp area; regulates garbage collection; orders that broken windows be covered with wood for lack of glass; exhorts horse teams to drive slowly; mentions one lost and found item each; and declares three camp passes invalid. Frei, pp. 406-410

The SS garrison eldest Auschwitz. "Special Order on the Reduction of Prisoner Labor Units at all divisions of the Auschwitz garrison." SS-Obersturmbannführer Liebehenschel finds fault with ineffective use of manpower and gives instructions for improvements. Excerpts: GARF, 7021-108-32, pp. 79-81; Frei, pp. 410f.

"We have to start immediately with this in our own camp household. If here in Auschwitz, out of about 41,000 prisoners capable of work, more than 12,000 prisoners are employed for maintaining camp operations, etc., then this peacetime, wasteful view of the use of labor can no longer be justified. Through prolonged personal observations I have found that on all workplaces – except for the armament factories – far too many prisoners are employed, who are not utilized, are lazy, and are even educated to laziness through wrong work assignment and inadequate supervision. […]

1. There will be only <u>one</u> roll call during the day, as before, lasting no longer than 10-15 minutes.

2. Spare time is used for the recovery of exhausted strength; this includes sufficient sleep. Unnecessary and even harassing demands on prisoners during spare time will be eliminated. Violations of this are to be punished with the strictest penalties.

3. The utmost attention must be paid to rations, i.e. each prisoner must receive what he is entitled to (extra allowances for heavy and hard laborers). The supply of parcels also plays an important role. In Auschwitz, well over 1 million parcels were received within 2 1/2 months. Recipients of many parcels, who, as I have convinced myself, are unable to consume perishable goods on their own, have [excess items], *if they do not do so on their own, given to other inmates who are worse off in this respect, after proper instruction.*

4. The condition of clothing, especially footwear, must be constantly monitored.

5. Sick prisoners must be taken to the infirmary in good time, and then returned to the workplace in good health, rather than left sick at work for a long time without performing any work.

6. The industrious prisoner should be given every possible kind of relief, in stages up to and including regaining freedom; the lazy, incorrigible prisoner should be given the severity of all possible punishments."

Invoice from DEGESCH (*Deutsche Gesellschaft für Schädlingsbekämpfung m.b.H.*, German Association for Pest Control Ltd.) Herr Obersturmführer Kurt Gerstein, Berlin. PS-1553, p. 23.

"We sent today by rail from Dessau with a Wehrmacht freight letter from the Dessau Army Base Administration to the Auschwitz Concentration Camp, Dept. Disinfestation and Decontamination, Station: Auschwitz, as express freight the following consignment:

Zyklon B hydrogen cyanide without irritant.*

= <u>13 boxes, each containing:</u> 30 = 390 cans of 500 g = 195 kg CN."

Unit price: RM 5; total price: RM 975.

* See the entry for May 23, 1944.

1. inpatients: 3,159
2. invalids and the elderly over 60: 275
3. detained: /
4. juveniles under 14: 1,682
5. Jews from Theresienstadt: 2,978.

Telegram from SS-Untersturmführer Erich Pambor, SS-WVHA, to Central Construction Office: RGVA, 502-1-280, p. 286.
"Installation of the short-wave delousing system can begin immediately."

Letter from the Central Construction Office to the J.A. Topf & Sons Company, Erfurt, with the subject "PoW camp. Large Disinfestation Plant BW. 32": RGVA, 502-1-336, p. 34.
"On the basis of the above quotation [of February 11, 1944] *we herewith order from you: 6 thermometers as already supplied by you for BW. 32 (large disinfestation plant), at the price of RM 7.50 per piece. You are requested to pack the thermometers well and ship them immediately."*

17. "The SS garrison eldest as local head of air-raid protection, air-raid-protection ancillary office (for the area of interest of Auschwitz CC U/S.)". Letter to Central Construction Office: RGVA, 502-1-410, p. 100-100a; 502-1-401, p. 200.
"By order of 1 Jan. 1944 concerning the implementation of air protection in the area of interest of Auschwitz CC, the construction of fire-fighting ponds was ordered. […] *The fire-fighting ponds that were built in the Birkenau Camp are for the most part leaky and have only relative value for fire-extinguishing purposes. In the area of Headquarters I, no fire-fighting ponds were built at all. The water-supply plant is equally insufficient in quantity for fire-extinguishing purposes here. I therefore request you to initiate the development of the fire-fighting ponds without delay and without interruption."*

Central Construction Office. Handover negotiation for the disinfestation barrack BW 7b in Construction Section IIe of the PoW camp to the SS garrison physician. The facility (Gypsy disinfestation barracks) includes: Heating room, anteroom, capo room, waiting and dressing room, bath room, 2 toilets, disinfestation chamber, undressing room, lounge. RGVA, 502-2-148, pp. 39-41.

[17.] Central Construction Office (civilian employee Rudolf Jährling). Report on the "Gypsy Disinfestation Barracks PoW camp, Section II." RGVA, 502-2-148, pp. 42-43.
Existing installations:
1) Hot-water heating device, with hot-water boiler for 12 m² heating surface, 96,000 cal. output;
2) Hot-water preparation device, with hot-water boiler 2000 ltr. capacity;
3) Shower system, with 28 pieces of shower heads;
4) *"4 pieces of complete electrically operated circulating-air disinfection systems, brand: Umluft-Apparaten Ges.m.b.H., factory Lehnini/Mark".*

21.-27. "Report Book Inmate Infirmary of Auschwitz CC Camp I". "Inpatients and recovering patients: men's camp: 21.1%; women's camp: 24.9%. VMM, HC.

22. Letter from the Central Construction Office to the Construction Inspectorate "Silesia" with the subject "Request for 500 bales of wood wool for civilian workers' community camps": RGVA, 502-1-229, p. 234.
"New workers will be assigned from the resettlement camps in the next few days, for

whom accommodation and sleeping quarters must be created immediately. Furthermore, at the beginning of spring, a new large-scale delousing campaign will be launched in the local camp area, during which the old straw bag fillings will be destroyed. New fillings must be provided in good time, especially since the transport situation must also be taken into consideration."

Headquarters Order No. 4/44, Monowitz, decrees the introduction of guard books; sets regular behavioral instructions for guards; admonishes not to let roll calls last more than 10 minutes; demands that soldier books and camp passes be carried at all times when going out and on leave; criticizes the reluctant issuance of premium coupons to prisoners; admonishes the saving of gasoline with motorcycles; then: Frei, pp. 412f.

"7. Prisoner maltreatment
In one subcamp it has happened that prisoners were beaten and sometimes maltreated by civilians with whom they were employed at the same work site, so that they had to be temporarily admitted to the infirmary. In cases where working with civilians is unavoidable, the camp leaders are responsible to me for order, and must have the civilians instructed again by the enterprise on how to deal with inmates. On the other hand, any mistreatment of a prisoner by a civilian is to be reported to me immediately. On this occasion, I again expressly call attention to the existing order that no SS man may lay a hand on a prisoner. In the 5th year of the war, every effort must be made to preserve the manpower of the prisoners. If a prisoner commits an offense, the prescribed report is to be made.
8. Prisoners' spare time
Prisoners coming from the night shift are not to be used for other work. In order to preserve the working capacity of these prisoners, care shall be taken that they have 7-8 hours of rest in order to be able to start their work again rested."

23. Letter from the Central Construction Office to the Bielitz Economic Office with the subject "Hygiene in the Civilian Workers' Camp, Birkenau": RGVA, 502-1-332, p. 160.
"For the civilian workers of the Central Construction Office of the Waffen-SS and Police Auschwitz, a bathing and delousing facility was erected in the Birkenau communal camp. The civilian workers had to pass through this barrack in the morning and in the evening. The regular use of the bathing facility in the communal camp for civilian workers is intended to stop the resurgence of typhus. The SS garrison physician considers it urgently necessary to provide soap for the civilian workers in addition to the daily body bath. The above office asks for approval of additional soap for 900 employees."

Central Construction Office. File memo: RGVA, 502-1-29, p. 17.
"On February 18, 1944, SS-Unterscharführer Pantke conducted an inspection of the quarters of the Russian-Germans employed in forestry work in the forests of Pless. It was unanimously stated that they were satisfied with the accommodation and the rations. After consultation with the shop steward Henner, the treatment by the forestry administration is the very best."

24. The head of the Central Construction Office drafts a "Construction application for the expansion of the Waffen-SS prisoner-of-war camp in Auschwitz U/S. Construction of 1 morgue barracks (effects chamber) solid construction". Attached is an explanatory report and cost estimate. The barracks measures 11.66 m × 64.20 m. The attached floor plan "PoW camp Auschwitz B.A.I B.W. 8a, effects chamber" is plan no. 2411, drawn by the Central Construction Office on 15 April 1943. RGVA, 502-1-230, pp. 28-32; *ibid.*, 502-1-230, p. 201.

Letter from the Central Construction Office to the Construction Inspectorate "Silesia" with the subject "Metal request by the Knauth Company": RGVA, 502-1-83, pp. 158-158a.
"This concerns the allocation of 1844.4 kg of zinc-aluminum and 87.8 kg of brass for the procurement of the fittings and furnishings required for Construction Section III of

PoW camp – prisoners' hospital with quarantine camp. […]
To justify the requested metals, it is noted that BA III of PoW camp includes a total of 180 barracks including kitchen, operating, treatment, infirmary and quarantine barracks. The expansion, including sanitary facilities, was expressly ordered by SS Gruppenführer and Lieutenant General of the Waffen-SS Dr. Ing. Kammler on 12 May 43 as part of the special measures ordered to eliminate the danger of epidemics."

Letter from the Central Construction Office to the Commandant's Office of CC II Birkenau with the subject "Return of the light railway material lent to the Sonderkommando": RGVA, 502-1-83, p. 41.
"According to information from Headquarters I, the case concerning the return of the field-railway material borrowed for the Sonderkommando has been handed over to Headquarters II for handling.
Since the light-railway material is urgently needed at the Construction Office PoW camp, it is requested to be returned as soon as possible."

Letter from the SS garrison administration Auschwitz CC to the Central Construction Office with the subject "Crematoria Birkenau": RGVA, 502-1-313, p. 13.
"The SS garrison administration, Dept. Construction Operations Office requests, on the basis of the above reference, the transfer of:
20 sacks of Manolith [monolith]
200 fireclay bricks and
200 pcs. fireclay wedge bricks
in exchange for mock bills – for urgent repairs in the crematoria."

25. Garrison Order No. 8/44 reports a promotion and a decoration; cites two orders from Pohl, one to punish a dawdler, the other about discrimination against Germans abroad; again complains of trespassing on railroad property on the occasion of a fatal accident; orders the appointment of company-level accounting officers; bans an SS member from borrowing books for persistent failure to return them; announces sports courses; leaves approval of small-animal husbandry (poultry) to the head of agricultural enterprises; announces a training evening for SS officers; schedules a weapons and equipment inspection; forbids SS members from joining the Croatian local police or their homeland protection squad; announces a tour of all sanitary facilities at the Auschwitz garrison; declares nine camp passes invalid; and lists two lost and found items each. Frei, pp. 414-416

28. Letter from the Construction Inspectorate "Silesia" to the Central Construction Office with the subject "Auschwitz CC – laundry building". On February 25, 1944, the head of Office Group C visited Auschwitz, including "the laundry building together with the ultra-shortwave delousing plant under construction." RGVA, 502-1-332, p. 175.

A special garrison order organized the Wehrmacht-Day events. Frei, p. 417

7. Telegram from the head of the Central Construction Office to F. Boos:
"For reception building, instead of 19 pieces, 11 delousing chambers must be executed as soon as possible."

RGVA, 502-1-333, p. 59.

8. The Chief of the SS Economic and Administrative Main Office. Letter with the subject "Inmate Deployment" to the commandants of CC Au. I-III:
"1. New, extensive armament production, which we must carry out with prisoners, requires that whoever is not absolutely necessary at his present place of work be released for these measures. Anything that does not serve victory is to be discontinued. This includees beautification work."
The gardens are to be converted into vegetable gardens to grow vegetables, tomatoes and the like. Street cleaning can be done once a week.
"3. I repeatedly call attention to the fact that the labor of the prisoners belongs to the Reich. Anyone who employs prisoners in his household or for his private purposes without my express permission and without pay is guilty of fraud. I will intervene against transgressions.
(4) I have no objection to the existence of inmate music bands at some CCs if these prisoners are fully engaged in work during the day. They can play music in their spare time.
The commandants shall instruct the protective custody camps and the leaders of the labor camps that they must ensure undisturbed sleep for the prisoners who are assigned to shift work. Under no circumstances may these prisoners be awakened from their sleep, for example, in order to determine the completeness of the command during a roll call."

NARA, microcopy no. T-1021. Vol. III. Rec. Gr. No. 242/338, Roll. No. 18, Frame 581.

File memo by SS-Unterscharführer Heinrich Swoboda with the subject "Appointment at the SS-WVHA concerning the procurement of transformers and urgency classification of the electrical power-supply systems in CC and PoW camp Auschwitz".

RGVA, 502-1-29, pp. 19-19a.

Headquarters Order No. 5/44, Monowitz, complains of undisciplined behavior of SS members toward civilians; reports issuing of patches for uniform repair; then: Frei, pp. 418f.
"3. Obligation to Secrecy
I have reason to point out once again the duty of silence of SS members toward civilians. The company leaders are to hold descriptive briefings precisely on this and on the possible consequences of violating the duty of secrecy."
The order lifts the ban on leave for Romania; instructs on correct reporting when taking calls; orders the listing of German and non-German restaurants in the labor-camp locations; quotes from an ordinance sheet on wearing pants, and refers to various items from two other ordinance sheets; and exhorts punctuality.

Garrison Order No. 9/44 reports events on occasion of collection for Winter Relief Charity and on collection results; expects SS members to give seats to women, the handicapped and the infirm; calls for reporting of service address of all SS leaders for the purpose of Himmler sending gifts of books; then: Frei, pp. 420-425
"4. Nonsensical shooting in the area of interest.
I have cause to point out once again that all nonsensical shooting at game and other things must be refrained from and is strictly forbidden, since
a) it endangers people,
b) shooting at game is punishable by the SS as poaching,
c) shooting without orders is a military impossibility.
Violations of this prohibition will be severely punished in the future. Heads of departments and company commanders are to monitor the stock of ammunition by means of continuous ammunition checks. In the event of requisitions of ammunition, documented proof is to be kept and presented in every case of ammunition fired."
The order deplores the presence of SS members "with girls" in parked Reichsbahn cars; demands return of camp passes upon transfer; reminds that photography in camp area is permitted only with prior permission; prohibits outgoing official phone calls from field telephones; informs of a new monthly charge for private phone lines running through the camp; demands a listing of all those working with hazardous materials for the purpose of allocating additional rations; advises of cancellation or curtailment of poultry chick supplies; schedules NCO training; advises of miscellaneous items from two ordinance sheets; threatens punishment for misuse of furloughs for procurement purposes; schedules weapons overhauls for the various companies; reports the closing of the lodging chamber due to relocation; mentions six stolen items and three lost items; and declares four camp passes invalid.

11. Central Construction Office. "Compilation of material to be allocated during the year 1944 for structures of Construction Office CC & agriculture". RGVA, 502-1-229, p. 233.

16. The Topf & Sons company, Erfurt, sends invoice No. 318 to the Central Construction Office regarding "Stock thermometer from 0 to 120 degrees C with metal sleeve" with reference: "Your reference Corr.Reg. 45232/44 Jä/R. of 15 Feb. 44. PoW camp large disinfestation plant BW 32." RGVA, 502-1-316, p. 441.

17. "Overview of Maintenance Costs for Prisoners in the Conc. Camps": AGK, NTN, 94, pp. 125-126.
"The cost of clothing, lodging and food per head and day is:
a/ for female prisoners RM 1.22
b/ for male prisoners RM 1.34."
A detailed explanation of how these figures were calculated follows.

18. Letter from the SS Auschwitz CC to the Central Construction Office with the subject "Installation of air-raid sirens": RGVA, 502-1-401, p. 84.
"While giving an alarm, it has become apparent that the air-raid siren currently mounted on the theater building is inappropriately placed and is by far insufficient to sound the alarm. The SS garrison administration has now procured another air-raid siren. The relocation or assembly of the two sirens is to take place in the next few days. The two sirens are to be put into operation by the air-raid-protection command post by means of a control line. At the moment, the local office has no materials available for the production of the control line.
It is therefore requested that the cable – 4 x 6 sq. m. 1 KV – running to Bunker I., Birkenau, which is no longer needed, be made available to the SS garrisobn administration for this purpose."

20. Letter from Prof. Dr. Freiherr von Verschuer, Director of the Kaiser Wilhelm Institute for Anthropology, Berlin-Dahlem, to the President of the Reich Research Council, Berlin-Steglitz: BAK, R 73/15342, sheet 60.
"[…] *In the testing of the method, renewed difficulties have arisen which have been solved in agreement with Geheimrat Abderhalben, Halle. Series of rabbits were tested in order to find suitable animals free of spontaneous ferments for the experiment.*
As a collaborator in this branch of research, my assistant Dr. med. et Dr. phil. Mengele joined the team. He is assigned as Hauptsturmführer and camp physician in the Auschwitz Concentration Camp. With the permission of the Reichsführer SS, anthropological examinations are carried out on the various racial groups of this concentration camp, and the blood samples are sent to my laboratory for processing."

20.-26. "Report book Inmate Infirmary of Auschwitz CC Camp I". "Inpatients and recovering patients: men's camp: 24.5%; women's camp: 24.1%. — VMM, HC.

22. Letter from the Central Construction Office to the SS-garrison administration Auschwitz CC with the subject "Setting up air-raid sirens": — RGVA, 502-1-401, p. 83.
"The Central Construction Office is prepared to lend the 4 x 6 sq. mm cable for the control line of the sirens to the SS garrison administration, which has become available from the temporary supply line to Bunker I, Birkenau. However, it is requested to be concerned about the return of the cable, since it is contingent and intended for other purposes, and can only be handed over due to the special importance of the installations.
The Central Construction Office asks to confirm the taking over of the cable while stating the exact length."

Garrison Order No. 10/44: — Frei, pp. 425-429
"1st Commendation
SS-Sturmmann Konrad Strecker, Monowitz Guard Company, prevented the escape of a prisoner on 6 March 44 through independent, prudent behavior. I express my special appreciation to him for the perseverance and skill shown in the pursuit of the prisoner. SS-Strm. Strecker has received 5 days of special leave in appreciation."
The order reports the closing of the House of the Waffen-SS for renovation; criticizes the overloading of the phone network during alarms by private calls; changes office hours; announces a variety show and a play; announces the awarding or sale of various "troop-care items"; deplores loss of clothing, orders stricter reporting procedures, insists on compensation and threatens consequences; calls for streamlining staffing of underemployed inmate units; deplores sabotage of motorcycles; reprimands the presence of guards between railroad tracks during prisoner arrivals; cites ordinance sheets on motor-vehicle inspections, ambulance use and relocation of an office; reports the theft of a bicycle; declares six camp passes invalid; and mentions one lost and found item each.

23. Letter from the 1st camp physician CC AU II, Gypsy Camp (Mengele) to the Central Construction Office with the subject "Roofs in the Kindergarten": — RGVA, 502-1-332, pp. 175-175a.
"For the damaged roofs of Kindergarten blocks 29 and 31 in the Gypsy Camp, 100 rolls of roofing felt are requested (very urgently)."

Letter from the Auschwitz CC headquarters to the Bielitz Labor Office, Auschwitz Branch, with the subject "Russian Sledena Nadia". — RGVA, 502-1-436, pp. 1-1a.
The prisoner, who had been in Auschwitz since January 31, 1944, gave birth to a child. Transport difficulties made it impossible to send her back to her old place of work. The Magdeburg State-Police Office ordered the release of the woman and child.
"Sledena is expected to be released on June 1, 1944."

The SS Economic and Administrative Main Office, Chief of Office D I: — NO-1553.
"Guidelines to be announced to the heads of the political departments at the meeting on March 23, 1944." […]
Escape of prisoners:
1.) In the case of escape reports, it must be evident from the telex that the Reichsführer-SS has been notified.
2.) After recapture and return to the camp, a detailed interrogation is to be conducted immediately, at the latest the next day, which must provide exhaustive information about the escape route and criminal acts committed during the escape. The interrogation [protocol] *is to be submitted here immediately, since possible execution petitions to the Reichsführer-SS cannot be filed only after months.* […]
1) Deaths of Poles who are not included or are not to be included in the German Peo-

ple's List and of Russians are reported by most camps to the RSHA or RKPA by express letter or telex. This is forbidden by the existing order. Deaths of these Poles and Russians are to be reported only on form KL 51/4.43 to the committing office (as already ordered by circular decree on 20 Sept. 43).
All other reports are omitted. As a matter of principle, Jews are only reported in lists. Express letters and all other reports are also omitted.
2) Monthly lists of deceased Jews are to be compiled according to the order ref. 14 f Allg./Ot./S.- of 21 Nov. 42 secret Corr.Reg. No. 848/42; the file number of the RSHA or RKPA must be indicated. It is not permissible that only RSHA. or RKPA. is written. The files must be examined carefully to determine whether they contain transport Jews (IV B 4 a) or Jews with protective-custody orders from IV C 2. The latter are to be underlined in red, as already ordered a thousand times."

Letter from the head of the SS Garrison Administration Auschwitz, to the SS-WVHA, chief of Office A II, with the subject "Special Remuneration for the Senior Supervisor of the Women's Auschwitz CC, Miss Mandl ": BAK, NS 3/405, sheet 7.
"In the accounting year 1943/44, on the instructions of the head of Office Groups A, the head supervisor of the women's camp here, Frl. Maria Mandl, received a special remuneration of RM 100 per month. I request that this special remuneration continue to be granted as of 1 April 44.
Miss Mandl is subject to an increased risk of epidemics in her work as head guard, especially since the sanitary and hygienic conditions in the women's camp are still inadequate. Her extensive duties continue to require her to work a large number of overtime hours each day, which are increased in particular by the fact that she is still responsible for the overall supervision of the guards in the staff building after her shift ends. The usual monthly overtime allowance of RM 35,- for supervisors is far from adequate for their work.
It is requested that this amount be approved in the form of an overtime and hazard pay."

25. Letter from the Central Construction Office to the Construction Office PoW camp Auschwitz with the subject "Implementation of the immediate hygienic measures according to the order of SS Gruppenführer Kammler". Reference: Letter from the SS garrison physician Auschwitz dated 13 March of this year. If the appropriate allotments are available, "the execution of the work is to be started immediately." RGVA, 502-1-332, p. 176.

[2.] Central Construction Office. "List of total inmate deployment as of 31 March 1944. According to Order of SS Main Office, August 12, 1943." RGVA, 502-1-256, p. 111.
Total inmate-labor hours: men: 1,913,360; Frauen: 144,709; total: 2,058,069.
"7.) Premium coupons issued to prisoners during the period under review (given in Reichsmarks) 12327.50 RM from 1 March 1944 – 31 March 1944."

3. Overview of the number and deployment of female inmates of the Concentration Camp Auschwitz U/S. Number of inmates: 21,416, including: GARF, 7021-108-33, pp. 160-162.
Inmates unfit for work and deployment: 8,454
1. inpatients: 5,358
2. invalids and the elderly over 60: 282
3. detained: /
4. juveniles under 14: 909
5. juveniles from Theresienstadt: 215
6. Jews from Theresienstadt: 1,685.

3.-9. "Report book Inmate Infirmary of Auschwitz CC Camp I". "Inpatients and recovering patients: men's camp: 26.5%; women's camp: 22.5%. VMM, HC.

4. Central Construction Office. File memo with the subject "Development of Construction Sections I and II in Camp II": RGVA, 502-1-29, pp. 21-21a.
"Today at 2:30 p.m. a meeting on the above matter took place in the office of the camp commandant of Camp II, SS-Stubaf. Hartjenstein. Present were:

The camp commandant of Camp II SS-Stubaf. Hartjenstein
The 1st leader of the protective-custody camp CC II SS-Ostuf. Schwarzhuber
The camp leader of the women's camp Birkenau Head Warden Mandl
The head of the Central Construction Office SS-Ostuf. (F) Jothann
The deputy head of construction of Camp II Z.A. Teichmann

After the construction work in BA III had to be stopped for the time being by order of the superior office, and the completion work in BA I & BA II had to be started, an agreement was reached between the camp commandant of Camp II, SS-Stubaf. Hartjenstein, and the head of the Central Construction Office SS-Ostuf. Jothann, as follows:"

For safety reasons, the work will be done only by inmates. Civilian workers who worked in BA III are employed in sector BIIc, which is not yet occupied by prisoners.

"The carpentry unit, consisting of 180 prisoners, must finish the 5 barracks in BA III, 50% of which have already been built, and properly stack the remaining barrack sections. A period of 4 weeks has been allotted for this work."

Garrison Order No. 11/44 conditionally lifts the ban on entering Auschwitz; cites a Himmler order to reduce accidents with pistols; forbids unauthorized entry into the Raisko nursery; gives instructions on de-ironing laundry water; announces a variety show; announces the distribution of field-post letters; sets new firewood prices; advises of closure of certain roads due to construction; reminds all vehicles to stop at turnpikes for inspection; cancels an officers' evening; assigns certain sauna use times to all departments; reschedules the taps; and mentions a stolen service bicycle and some lost property. Frei, pp. 429-433

5. Letter from the chief of the SS Economic and Administrative Main Office to the Reichsführer-SS with the subject "Safeguard Measures at Auschwitz". NO-021

"About the safeguard measures taken for case A[26], I report the following:
1.) Camp I comprises the massive men's camp, and at present has an occupancy of about 16,000 prisoners. […]
Camp II is located about 3 km away from Camp I. It houses 15,000 male and 21,000 female prisoners. Of the total number of about 36,000 prisoners, about 15,000 are not deployable. […]
Camp III comprises all the subcamps in Upper Silesia which are located far from each other at industrial plants. At present, it consists of 14 subcamps with a total prisoner strength of about 15,000 men. […]
In summary, the following picture emerges:

Auschwitz I	*16,000*	*men*	*–*	*–*
Auschwitz II	*15,000*	*"*	*21,000*	*women*
Auschwitz III	*15,000*	*"*	*–*	*–*
	40,000	*men*	*21,000*	*women*
	together:		*67,000*	

Camp II has the largest occupancy, although it must be taken into account that, of the total of 36,000 prisoners there, about 21,000 are women.
2) From the total number of 67,000 prisoners, the prisoners in the subcamps and those who were sick as inmates must be deducted, if the question of the danger posed to Upper Silesia by a possible uprising or outbreak is to be considered.

From the total number of prisoners:	*67,000*
The prisoners housed in the subcamps (Camp III):	*15,000, are deducted.*
The number of stationary sick and invalids at present is:	*18,000,*
so that practically	*34,000 inmates*

Have to be reckoned with. These would pose a danger to Auschwitz in case A, if security measures were insufficient.

[26] A = *Aufstand* = Uprising.

7. Letter from the "Head of the Auschwitz Concentration Camp Administration" to Mrs. Käthe Westhof with the subject "Estate of the deceased prisoner no. 172266 Finkelstein Kurt": ISD, folder 342.
"As a postal parcel, the belongings of the aforementioned prisoner, who died in the local camp on 29 Jan. 44, is sent today to your further disposal. (Belongings parcel is especially marked.) The address of the relatives is:
An inventory of the belongings is enclosed with the parcel. It is requested that the enclosed acknowledgement of receipt be signed and returned."
Printed form on which personal information is handwritten.

8. This date marks the beginning of an unnumbered X-ray book of the prisoner infirmary of Auschwitz CC, which is a continuation of X-ray book No. 22. It begins on April 8, ends on August 4, 1944, and contains entries numbered 3498 to 6685. ISD, folder 67x.

10.-16. "Report book Inmate Infirmary of Auschwitz CC Camp I". "Inpatients and recovering patients: men's camp: 23.0%; women's camp: 20.5%. VMM, HC.

12. Garrison Order No. 12/44 restricts vacation time because of increased risk of air-raid alarms; informs of evasion locations in case of air-raid alarms; informs that work in Construction Section III (inmate hospital) has been stopped: AGK, NTN, 121, pp. 114-115.
"3. <u>Working in Auschwitz CC II.</u>
On 11 April 44, the Central Construction Office suspended work in Construction Section III of Auschwitz CC II. The civilian workers and prisoners who became free were used to complete the work in the women's camp (Section I) and men's camp (Section II) after verbal discussion and according to the instructions of the Central Construction Office."
The order moreover points out that SS members with certain ailments must be examined by a physician before using the sauna; further restricts the keeping of small animals; announces the handing in of young fruit trees; informs of an anti-aircraft practice shooting; lists successful SS athletes; calls for the return of permanent certificates to enter the city of Auschwitz; mentions one lost and one found object; and orders stricter hygiene measures for prisoners before their release.

Letter from the headquarters of the CC to the Central Construction Office with the subject "Entry of civilian workers into the camp area of Auschwitz CC II after closing time": Frei, pp. 433-436
"On April 12, 44, at about 7:50 p.m., a civilian named Lorenz Wilhelm, who is a machine supervisor for the Lenz & Co. Company, was encountered on the Auschwitz-Birkenau railroad crossing. He presented a slip of paper by which he had been authorized by the company to supervise the machines during the night. This certificate was issued on 23 March 44. L. is a Polish civilian worker. On the basis of this certificate, this man is authorized to enter the work sites without supervision after the large chain of guards has been retracted."
This, however, was inadmissible because of the possibility of sabotage, smuggling and espionage. Civilians performing such tasks must always be accompanied by a guard.

14. Letter from the Railroad Master's Office to the Central Construction Office with the subject "Connection to PoW camp": RGVA, 502-1-83, p. 18.
"The connection was inspected yesterday with your Scharführer Sihorsch; except for minor defects, which the contractor Reckmann has undertaken to correct, no major complaints were found.
The track can therefore be used by Reichsbahn locomotives for the time being until the final completion of the track installation up to the switch behind the guardhouse."

17. Central Construction Office. "<u>Cost estimate</u> for the expansion of the Waffen-SS RGVA, 502-1-186,

prisoner-of-war camp at Auschwitz – construction of 1 disinfestation plant. The total cost amounts to RM 568,500. Dimensions of the structure: 32.00 m × 12.76 m + 72.76 m × 12.76 m. The corresponding explanatory report bears the same date: p. 49a.

"Work began in April 1943. The structures have been completed and handed over to the SS site administration for use."

"Report book Inmate Infirmary of Auschwitz CC Camp I". "Inpatients and recovering patients: men's camp: 19.6%; women's camp: 18.8%. RGVA, 502-1-148, pp. 19-20; *ibid.*, 502-2-149, p. 31a.

17.-23. Letter from the Central Construction Office to the Construction Office Camp II with the subject "Track connection for the prisoner-of-war camp": VMM, HC.
"According to the district president's notification of 6 March of this year, before the siding can be put into operation, application must be made to the district president for approval by the state police, who will then carry out the approval in agreement with the technical supervisory authority. Since the siding is largely completed and the commissioning has to be requested in a hurry due to the urgent construction works to be carried out, the aforementioned has to be arranged immediately."

18. Letter from the station to the Central Construction Office: RGVA, 502-1-186, p. 48.
"On 16 April 44, the siding to the PoW camp from Reichsbahn track 21 West to the gate (guardhouse) was opened for operation by Reichsbahn locomotives. From this point on, rail cars carrying prisoner transports are staged for loading and unloading at the PoW camp behind the archway. Track 21 W is used as the main Reichsbahn track. No more rail cars may be staged there for potato storage, rations, building materials etc.
We request immediate indication of where these rail cars are now to be staged. If we do not receive a reply by 24 April 44, we will place the cars in question on the east end of this siding just beyond the junction switch of the dismantling plant. No cars can be made available on the siding 21 W up to the archway, since this track must remain free for shunting operations (prisoner transports, etc.)."

19. Auschwitz CC II. Labor deployment for April 20, 1944. total: 18,335. prisoners and Gypsies unfit for labor and deployment: 4,759, including: RGVA, 502-1-186, p. 47.
1. stationary & recovering inmates: 3,078
2. ″ ″ ″ Gypsies: 26
3. invalid prisoners: 16
4. boys up to 14 years, inmates: 91
″ up to 14 years, Gyp.: 1
5. Theres.[ienstadt] Camp boys up to 14 y., inmates: 210
″ ″ *adult inmates: 1,268*

20. Letter from the commanding officer of Commando Golleschau to the first leader of the protective-custody camp Commandant Auschwitz CC III: APMO, D-Aul-3a/1a, Inv. No. 425/3.
"Report.
On 20 April 44 at 6 p.m., the following was reported to me by the foreman of commando 'Lime Kiln I', Jewish prisoner no.: 51876, Manheimer Samuel:
For several days now, the prisoners of the above-mentioned unit have been constantly harassed and insulted by the civilian Paul Ozyes, Godischen No. 54, who was assigned as a burner.
Furthermore, he uses phrases such as 'whether you stinking Jews work or not, you will still end up in the crematorium and go through the furnace,' etc. During one of the earlier shifts he also wanted to shake off a Jew who was climbing down a ladder into the lime kiln with the same remark, 'You will go into the furnace anyway.'

Since this kind of talk has a bad effect on the condition of the prisoners and endangers the work and safety of the camp, I ask [the] *Obersturmführer to take immediate measures.*
The unit himself has been at the lime kiln for a year, is one of the best, and on the part of the enterprise, no complaint has ever been made either about the foreman or about the other inmates assigned there.
I made representations to the management in this regard, and they, too, attach great importance to strict punishment of the above-mentioned.
1 carbon copy for the Pol. Dept."

"Headquarter of the Labor-Education Camp Birkenau." Release certificate for Toms [sic] *Paul, in the camp from March 31 to April 21, 1944. "The release took place on 21 April 1944."* ISD. OCC 2/7/a folder 56 II C/1.

21. Headquarters Order No. 6/44, Monowitz, lists the phone numbers of the various departments; exempts Hungary as a vacation destiny; insists on observance of official channels for requests; forbids entering listed restaurants; gives instructions for evasion points in case of air-raid alarms; exhorts to cleanliness of accommodations; adopts provisions of last garrison order on restricted furloughs because of increased risk of air-raid alarms; orders that searches for escaped prisoners not be called off at dusk; makes photo IDs mandatory for civilian workers to enter camp; then: RGVA, 502-1-436, p. 8.
"Use of skilled laborers.
The camp leaders are again to check carefully whether any skilled workers are not employed in their profession. In the future, I will call to account any camp leader who does not ensure that even the last skilled worker is employed in his profession, and will defer promotions.
Sickness rate of prisoners
In some camps, the number of prisoners on sick leave has risen enormously. The camp, Rapport and labor-service leaders must constantly monitor the sickness level of the prisoners and have malingerers examined by the first camp physician.

Premiums

The amount of premiums issued by the companies is still too small in relation to the total number of prisoners employed. The camp leaders are to maintain constant contact with the management of these firms in order to achieve the purpose of paying out the premium coupons completely."
The order then recalls the obligation of camp leaders to report, and refers to certain points of a ordinance sheet.

22. Letter from "SS garrison physician, Auschwitz, 1: Camp physician of CC Au. II. B. II. f (hospital camp)," to the Construction Office of PoW camp Auschwitz II: Frei, pp. 436-439
"Since the newly erected Blocks 17 and 18 (a Swiss and an air-force barracks) were only very poorly painted, the camp physician asks for the provision of good pasta [sic] *for the purpose of painting the blocks again.*
Block 17 serves as a tuberculosis ward and must therefore be scrupulously clean."

25. Letter from SS-WVHA, Office Group D, Concentration Camps, to Ost-Maschinenbau GmbH, Sosnowitz U/S, with the subject "Deployment of Prisoners": RGVA, 502-1-332, p. 174.
"I hereby confirm the agreements made with you on 12 of last month in Sosnowitz concerning the deployment of prisoners in your plant in Sosnowitz as follows:"
1. Deployment and housing.
2. Clothing.
3. Rations.
4. Remuneration.

"5.) Bonuses.
The prisoners shall receive bonus coupons for appropriate work performance, so that an incentive to higher performance is given to them, and those prisoners with lower performance are thereby given an incentive to improve their performance. The bonus coupons must be purchased by you from the Auschwitz Concentration Camp administration. At the end of each week, they will be handed out to the prisoners in question by your representative. The amount of the bonus is to be based on performance. In individual cases, it may amount to up to Rm 10 per week.
The inmates have the option of using these premium coupons to make canteen purchases in the labor camp. The distribution of cash to prisoners is not permitted.
6) The labor camp is under the command of the commandant of the Auschwitz III Concentration Camp near Kattowitz U/S, SS-Hauptsturmführer Schwarz."

1.-7. "Report book Inmate Infirmary of Auschwitz CC Camp I". "Inpatients and recovering patients: men's camp: 23.4%; women's camp: 17.3%. — VMM, HC.

2. Garrison Order No. 13/44 gives instructions on how to sign teletype; appoints new pest control officer and announces anti-malarial actions by fly and mosquito control; lists telephone numbers of Headquarters III (satellite camps); warns of poisonous eggs for crow control; reiterates ban on entering cultivated fields; then: — Frei, pp. 440-444

"6. Soiling of the bunker line.
The prisoners primarily use the manufactured field positions and bunkers within the large post chain as latrines. The command leaders, etc., are to see to it that this filth is stopped immediately. The Kapos are to be informed of the prohibition by the leaders of the protective-custody camps, so that they, too, will have an appropriate influence on the prisoners."

The order then deplores senseless shooting; points out the ban on listening to foreign radio stations; demands permission for private orders from the armory; closes Bahnhofstrasse to inmate units; announces an increase in alimony payments for dependents for SS members from Croatia; punishes two SS members for trespassing on railroad property; points out rule change on entering the city of Auschwitz; orders entry of private pistols in the soldier's book; changes two office designations; points out a number of items in two ordinance sheets; and mentions four lost and found items and one stolen bicycle.

[2.] Central Construction Office, "List of total inmate deployment as of 30 April 1944. According to Order of SS Main Office, August 12, 1943." — RGVA, 502-1-256, p. 118.
Total inmate-labor hours: men: 1,811,505; Frauen: 205,867; total: 2,017,372
"7.) Premium coupons issued to prisoners during the period under review (given in Reichsmarks) 13055,- RM from 1 April 1944 – 30 April 1944."

3. Auschwitz CC II. Labor deployment for 3 Mai 1944. Total number of inmates: 18,403. Inmates and gypsies unfit for work and deployment: 5,789, including: — APMO, D-Aul-3a/1a/325.
1. inpatients and recovering inmates: 4,135
2. ″ ″ ″ Gypsies: 20
3. invalid inmates: 47
4. juveniles until 14 y., inmates: 85
5. Theres[ienstadt] C[am]p juveniles until 14 y., inmates: 210
″ ″ adult inmates: 1,250

Letter from the SS-WVHA to the Building Inspectorate of "Silesia" with the subject "PoW camp Auschwitz (BAII) – Erection of 12 infirmary barracks (Swiss barracks)": — RGVA, 502-1-281, p. 70.
"Construction Order No. 1372. On the basis of the documents submitted, I retroactively issue the order for the construction of 12 infirmary barracks (Swiss barracks) at PoW camp Auschwitz (BAII)."

4. Letter from F. Boos to Tesch & Stabenow with the subject "Auschwitz CC, my com. no. 2273/W, hydrogen cyanide delousing plant". The Central Construction — RGVA, 502-1-333, p. 51.

Office asked F. Boos for a "design and exact drawing of 11 hydrogen-cyanide delousing cells." F. Boos requested from Tesch & Stabenow "the latest drawing of the device and the ventilator systems for a delousing cell."

Letter from the Central Construction Office to headquarters Auschwitz CC with the subject "Certificate on the identification card of civilian employee, engineer Jährling of the Central Construction Office": RGVA, 502-1-83, p. 380.
"Civilian employee Jährling is to carry out the assembly inspections in Sections I, II and III. In addition, Jährling is instructed to supervise the repair work in the crematoria.
It is therefore requested that permission to enter the buildings or sections in question be certified on the back of the identification card."

5. The Central Construction Office writes a letter to Ewald Berninghaus with the subject "Auschwitz CC BW 160 A = short-wave delousing system": RGVA, 502-1-337, pp. 7f. (carbon copy and transcript).
"The Central Construction Office of the Waffen-SS and Police Auschwitz places an order with you for the delivery of 22 pieces of single-leaf, gas-tight doors according to drawing No. 3590 at the price of RM 164.50 per piece according to the offer of 9 July 42. The delivery is to be made as soon as possible."

"Headquarters of the Birkenau Labor-Education Camp." Release certificate for Kostenko Iwan, in the camp from January 8 to May 5, 1944. "The discharge took place on 5 May 1944." RGVA, 502-1-436, p. 34.

8. Headquarters Auschwitz CC. Garrison Order No. 14/44: AGK, NTN, 94, p. 61. Odpis (transcript); Frei, pp. 445f.
"1. <u>Transfers.</u>
a/ I am transferred with immediate effect as Commandant of Lublin CC with the labor camps Warsaw, Radom, Budzyn and Blizyn. The duties of SS garrison eldest have been taken over by SS-Obersturmbannführer Höss, chief of Office D I, until further notice. I thank all officers, NCOs and men for their faithful cooperation.
b/ SS-Sturmbannführer Hartjenstein, Commandant of Auschwitz CC II, has been transferred with immediate effect as Commandant of Natzweiler CC with its labor and subcamps.
sdg. Liebehenschel, SS-Obersturmbannführer."
The order then reschedules an officers' evening; organizes gymnastics classes for children; opens up the Auschwitz brothel to SS members for certain days and hours; extends a road closure due to construction work; permits the passage of flour trucks through Bahnhofstrasse, which is otherwise closed to inmate units; and decrees that smuggled foodstuffs will not be confiscated but presented for decision along with delinquents.

8.-14. "Report book Inmate Infirmary of Auschwitz CC Camp I". "Inpatients and recovering patients: men's camp: 22.3%; women's camp: 17.7%. VMM, HC.

9. Letter from the Central Construction Office to the company F. Boos with the subject "BW 160 – hydrogen-cyanide delousing for 11 cells". On May 3, the Construction Office requested a "design with cost offer and drawings for 11 cells of hydrogen-cyanide delousing building. The request is confirmed. RGVA, 502-1-347, pp. 31-31a.
"This plant is to be put into operation as soon as possible, it is therefore absolutely necessary that your supplier finishes the apparatus as soon as possible and gets it on its way."

Letter from the Construction Office of CC II Birkenau to the headquarters of CC II with the subject "Permission to enter Crematoria I – IV": RGVA, 502-1-83, p. 377.
"The local office requests permission for enclosed passes to enter all crematoria, since the Koehler Company has been commissioned with urgent repair work at the crematoria."

11. Auschwitz CC II. Labor deployment for 14 May 1944. Total number of inmates: 17,589. Inmates and Gypsies unfit for work and deployment: 7,099, including:
1. inpatients and recovering inmates: 3,918
2. ″ ″ ″ Gypsies: 16
3. invalid inmates: 50
4. juveniles until 14 y., inmates: 53
5. Theres[ienstadt] C[am]p juveniles until 14 y., inmates: 210
″ ″ adult inmates: 1,242

Blumental, p. 105 (transcript).

Headquarters Auschwitz CC. Garrison Order No. 15/44:
"1. Transfer of duties.
SS-Hauptsturmführer Richard Baer has today taken over responsibly the official duties of the camp commandant Auschwitz CC I. "
The order also schedules one training session each for SS women and SS men; announces two plays, a lecture, and a concert and theater evening; makes dog leashes mandatory; and mentions a lost property.

AGK, NTN, 94, p. 62. Odpis (transcript).

12. Letter from Ewald Berninghaus to the Central Construction Office regarding Building 160. The company confirms receipt of the order dated May 5 for "22 gas-chamber doors in single-leaf, double-walled design according to enclosed drawing St. 3748, for a clear wall dimension of 1350 x 1900 mm, clear frame dimension 1320 x 1870 mm (according to regulations)." Weight of one door: 140 kg; price: RM 174. A description of the construction method follows.

RGVA, 502-1-333, pp. 42-42a.

Letter from the Central Construction Office to the Construction Office CC and agriculture with the subject "Auschwitz CC – laundry building":
"With the above-mentioned letter of 3 March, the immediate finishing of the blue-gas [hydrogen-cyanide] *delousing plant was demanded. It is to be reported no later than the 20th of this month what measures have been initiated from there, and when commissioning is to be expected."*

RGVA, 502-1-347, p. 30.

Telegram from SS-Gruppenführer and Lieutenant General of the Waffen-SS Dr. Ing. Kammler to Central Construction Office:
"Have directed the following telegram to chief of Office Group D – Concerns crematorium facilities at Auschwitz, safety measures. Reference completed letter of 9 May 44. I acknowledge receipt of letter of 9 May. Since wire mesh and concrete posts as well as iron require quotas (47 tons), I can issue construction orders only when quotas are provided by Reich Ministry of Armament and War Production. Have ordered Central Construction Office Auschwitz via Construction Inspection Silesia = Dr. Ing Kammler to prepare measures immediately."

RGVA, 502-1-313, pp. 8-8a.

"Urgent telegram" from the Central Construction Office to the "Topfwerke Erfurt":
"Installation of the 2 elevators cannot take place now. Installation will take place later together with the installation of the deaeration systems in 4 and 5.

RGVA, 502-1-313, p. 10.

13. Letter from the Construction Office of CC II Birkenau to the headquarters of CC II with the subject "Permission to enter the grounds of Crematoria I – V":
"The bricklayer Apolinary Golinski, born 5 Aug. 1904, has been assigned by the Koehler Company to do repair work at the crematoria. It is requested that his temporary pass be accompanied by a permit to enter the same."

RGVA, 502-1-83, p. 375.

Letter from the SS garrison physician Auschwitz CC to the Central Construction Office with the subject "Auschwitz CC II, B II f":
"It is requested that cement floors be provided in blocks 14 and 15 of the B II f infirmary camp of Auschwitz CC II, since otherwise it will be very difficult to keep the barracks clean.

RGVA, 502-1-332, p. 173.

Furthermore, it is requested that a terrazzo floor be laid in the operating room of camp B II f, since all urgent operations of all camps of Auschwitz CC II must be performed in this room, and the expansion of the prisoners' hospital will be suspended for the time being."

Letter from F. Boos to Central Construction Office: RGVA, 502-1-333, pp. 47-47a.
"Acknowledge receipt of your telex of 3rd of this month and your letter of 9th of this month concerning design with cost offer and drawings for 11 cells of hydrogen-cyanide delousing in the reception building of the camp there."

Bielitz Labor Office, Auschwitz Branch Office in Auschwitz. Certificate: RGVA, 502-1-436, p. 48.
"I hereby certify that on today's date the following workers were handed over to me by the Auschwitz Labor-Education Camp for new placements:"
Zaczyk Stannislaus, Hosiawa Eugeniusz, Skorupski Konstantin, Platek Piotr, Hetmanczyk Peter, Hrabnik Dmytro, Kairys Alfons, Dronik Michal, Czyn Paul.

14. Auschwitz CC II. Labor deployment for 14 May 1944. Total number of inmates: 17,558. Inmates and Gypsies unfit for work and deployment: 5,544, including: APMO, D-Aul-3a/1a/333.
1. inpatients and recovering inmates: 3,891

Overview of the number and deployment of female inmates of the Concentration Camp Auschwitz U/S. Number of inmates: 23,778, including: GARF, 7021-108-33, pp. 144-147.
Inmates unfit for work and deployment: 7,425
1. inpatients: 4,409
2. invalids: 222
3. detained: 3
4. juveniles under 14: 987
5. juveniles from Theresienstadt: 215
6. Jews from Theresienstadt: 1,589.

The Construction Inspectorate "Silesia" writes the Central Construction Office: RGVA, 502-1.170, p. 259.
"The SS garrison physician has requested the construction of a massive mortuary in Construction Section II – CC II Auschwitz."

Letter from the Central Construction Office to the Construction Inspectorate "Silesia" with the subject "Crematoria Facilities at Auschwitz CC, Safeguard Measures": RGVA, 502-1-313, p. 11; *ibid.*, pp. 12-13; *ibid.*, p. 14
"With reference to the above telegram [of May 12, 1944] *from the head of Office Groups C, the Central Construction Office submits in the enclosure a list of iron and cement requirements for the erection of a wire-mesh fence between concrete posts around the crematoria in Camp II Auschwitz, with the request that it be forwarded to the head of Office Group C."*

The enclosed list is titled "Determination of procurement rights for the erection of a wire-mesh fence between reinforced-concrete posts around the crematoria at Auschwitz CC," and provides for a total requirement of 31,500 kg of iron and 24,761 kg of cement. A "site plan" shows the two fences for Crematoria II and III, which form a rectangle measuring 100 m × 125 m.

15.-21. "Report book Inmate Infirmary of Auschwitz CC Camp I". "Inpatients and recovering patients: men's camp: 20.6%; women's camp: 17.1%. — VMM, HC.

16. Auschwitz CC II. Labor deployment for 16 May 1944. Total number of inmates: 17,509. Inmates and Gypsies unfit for work and deployment: 5,372, including:
1. inpatients and recovering inmates: 3,744
2. ″ ″ ″ Gypsies: 15
3. invalid inmates: 50
4. juveniles until 14 y., inmates: 82
5. Theresien[stadt] c[am]p. juveniles until 14 y. inmates: 210
″ ″ adult inmates: 1,233.

— Friedman/Hołuj, pp. 238-243 (Abschrift).

Letter from the Central Construction Office to the Construction Inspectorate "Silesia" with the subject "Crematoria Facilities at Auschwitz CC, Safeguard Measures":
"With reference to the above telegram [of May 12, 1944] *from the head of Office Groups C, the Central Construction Office submits in the enclosure a list of iron and cement requirements for the erection of a wire-mesh fence between concrete posts around the crematoria in Camp II Auschwitz, with the request that it be forwarded to the head of Office Group C."*
The enclosed list is titled "Determination of procurement rights for the erection of a wire-mesh fence between reinforced-concrete posts around the crematoria at Auschwitz CC," as well as a "site plan" showing the wire-mesh fence around the crematoria: two 100 m × 125 m rectangles around Crematoria II and III, and two 75 m × 100 m rectangles around Crematoria IV and V. — RGVA, 502-1-229, pp. 11-14.

17. Letter from the Construction Inspectorate "Silesia" to the Central Construction Office with the subject "Safeguard measures (camouflage) of the crematoria in CC Camp II Auschwitz":
"For the safeguarding measures (camouflage) of the crematoria in Auschwitz, the necessary documents for allotment and the construction-funds application are to be prepared immediately and submitted here." — RGVA, 502-1-313, p. 4.

Letter from medical orderly SS-Rottenführer Jorss to the office of the inmate infirmary, Auschwitz CC I:
"On 17 May 44, I was notified that the Jewish prisoner no.: 178258, Kinmann Josef, suffered a fatal accident while working in the quarry.
The above-named was fatally hit by a stone in the Golleschau branch camp in the area of his work unit 'Quarry IV'.
I found him already dead with a complicated skull fracture and extensive brain injury. Death was instantaneous. Occurrence of death 1:10 p.m. on 17 May 1944.
Cause of death: complicated skull fracture with brain injury. (Work accident).
Medical orderly Jorss, SS-Rottenführer." — HvA, 9, 1966, p. 72.

19. "Headquarters of the Birkenau Labor-Education Camp." Release certificate for Wolarek Antoni, in the camp from April 7 to May 19, 1944. "The release took place on 19 May 1944." — RGVA, 502-1-436, p. 55.

20. Letter from the SS garrison physician to the Central Construction Office with the subject "Zyklon-B disinfestation plant in the new laundry building": — RGVA, 502-1-333, p. 38.

"Information is requested as to whether the new construction of the fumigation chambers in the new laundry building are recirculating fumigation chambers, since according to SS Obersturmführer Jotham [Jothann] *the fumigation chambers are to be completed.*
According to an order of the OKW, Zyklon-B fumigation chambers are to be converted to Ariginal gassing. Minor modifications are required for this purpose. The conversion would have to be carried out by a technician from Degesch (Friedberg/Hesse, P.O. Box 98, Postal Code 16)."

22. Letter from the Construction Inspectorate "Silesia" to the Operations Office at the SS Garrison Administration Auschwitz with the subject "Conversion of Block 4, BA I, Camp II Birkenau": RGVA, 502-1-83, p. 8.
"According to the above letter [of May 12, 1944], *Block 4 in Construction Section I Camp II Birkenau is to be converted to an infirmary in accordance with the sketch enclosed as an appendix."*

22.-28. "Report book Inmate Infirmary of Auschwitz CC Camp I". "Inpatients and recovering patients: men's camp: 20.8%; women's camp: 15.7%. VMM, HC.

23. File memo from the head of the Central Construction Office in response to the letter of May 15. On 22 May, a meeting took place between SS-Obersturmbannführer Höss, SS-Sturmbannführer Bischoff, SS-Hauptsturmführer Baer, and SS-Obersturmführer Jothann: RGVA, 502-1-170, p. 260.
"SS-Obersturmbannführer Höss points out that, according to an existing order, the daily accumulation of c.[orpses] *is to be collected by a truck specially designated for this purpose in the morning hours of each day; if this order is observed, therefore, an accumulation of c. cannot take place at all, and therefore there is no compelling necessity for the erection of the aforementioned halls. SS-Ostubaf. Höss therefore asks to refrain for the time being from building the halls under discussion."*

Construction Inspectorate "Silesia". Letter to the Central Construction Office with the subject "Construction application for the erection of 2 disinfestation barracks in CC Camp II Auschwitz". Enclosed is the corresponding construction order no. 1373 of the SS-WVHA dated April 29, 1944. RGVA, 502-1-230, p. 171.

Telegram from DEGESCH to Dessauer Werke, Dessau: Dokument Degesch No. 29, Exhibit No. 41 (IG-Farben Trial).
"As already communicated to you by the Berlin Working Committee, Zyklon production must not be shut down under any circumstances due to lack of irritant. Produce until further notice without irritant in accordance with instructions of the Production Committee as an authorized body of the Reich Minister for Armaments and War Production. Letter follows."

Letter from Dessauer Werke für Zucker- und Chemische Industrieaktiengesellschaft, Dessau, to Deutsche Gesellschaft für Schädlingsbekämpfung m.b.H., Friedberg. Dokument Degesch No. 52, (IG-Farben Trial).
"As telegraphed to you on the 19th of this month as follows:
'Degesch Kasernenstrasse 70 Friedberg-Hessen.
We would like to ask you to stop production as soon as possible, referring to the regulation that the type and quantity of the additive must be approved by the Chemical-technical Reich Institute, and to state whether chlorine ester alone and in what quantity can be added.' [Doc. Degesch No. 69]
You will have to tell us how Zyklon is to be composed, because we are not informed about your negotiations with the Chemical-technical Reich Institute at that time, and therefore do not know which additives are approved or prescribed. Without your decision in this respect, we cannot of course change the composition without further ado, especially since we do not know whether you have to take any organizational measures for your fumigation companies (e.g. because of changed odor or the like).

One could possibly think of adding twice the amount, i.e. 0.2% chlorate ester, instead of 0.1%, in case of possible failure of bromate ester in addition to 0.5% oxalic acid. But this is only a suggestion from us.
If you tell us how Zyklon is to be composed, we will take it for granted that this complies with the regulations of the Chemical-technical Reich Institute and the Traffic Regulations of the Reichseisenbahn.

Letter from the head of the production committee of the penal "crop-protection and pest-control agents" of the Economic Group Chemical Industry to Dessauer Werke für Zucker und Chemische Industrie-AG, Dessau, with the subject "Zyklon production":
"The interruption of bromoacetic ester deliveries from Schering A.G. Berlin, reported by you to DEGESCH, must under no circumstances lead to a restriction of Zyklon production. There are no technical or professional reservations about temporarily producing non-irritant Zyklon hydrogen cyanide, and making it available primarily to the hydrogen-cyanide disinfestation companies.
I will endeavor to accelerate the procurement of bromoacetic ester from Schering A.G."

Dokument Degesch No. 29, Exhibit No. 42 (IG-Farben Trial).

24. X-ray book No. 23 of the prisoner infirmary of Auschwitz CC begins with this date. It extends from May 24 to July 10, 1944, and contains entries numbered 545 to 1153.

APMO, D-Aul-5/23. ISD, folder 67w.

25. Response of the SS garrison physician to the decision of May 22:
"In the inmate infirmaries of the camps of Auschwitz CC II, a certain number of corpses naturally accumulate daily, whose removal to the crematoria is indeed scheduled and takes place twice daily, in the morning and in the evening. However, in view of the shortage of vehicles and at times of fuel in Auschwitz CC, it happens that the corpses are left lying around for up to 24 hours. For reasons of epidemic hygiene, every hospital has a morgue for the short-term storage of the corpses that accumulate. The number of sick persons in the general hospitals does not fall below 500 beds on average, while in the individual prisoner infirmary of Auschwitz CC II, the number of beds averages 3-4000. In my opinion, it is therefore no more than self-evident that appropriate storage rooms are available for the numerous corpses that accumulate."
He therefore renewed his request for a brick mortuary.

RGVA, 502-1-170, p. 261, p. 264: transcript.

Central Construction Office. "Explanatory Report on the Expansion of the Waffen-SS Prisoner-of-War Camp at Auschwitz U/S. Construction of 111 hospital barracks," including the corresponding cost estimate. The structure in question is Structure 3 e, f, consisting of 111 type 501/34 infirmary barracks, each 42.50 m × 12.50 m.
"Work was started on 15 March 1943. 37 barracks have been completed and partly finished inside."
Total RM 4,728,000, corrected to a 3,799,000.

RGVA, 502-1-110, pp. 1-3

civilian workers from the Zöllner Company, "since the company is in charge of finishing barracks in this camp."

Central Construction Office. "Addition of an air-raid shelter to the commandant's house". Plan no. 3998 drawn by inmate no. 71134. — RGVA, 502-1-404, p. 36.

The camp physician Auschwitz CC II. "Inmate infirmary camp B II f. Premium certificates received:" 81 prisoners (12 of whom are crossed out) are listed with registration number, nationality, last name, activity, amount received (RM), and signature. The activity concerns the inmate infirmary (physician, nurse, pharmacist, laboratory assistant, corpse capo etc.) and related services (block clerk, boiler command, washroom, hairdresser etc.). The list contains 16 Jewish prisoners, including 11 physicians and 1 pharmacist. — ZO, 15,1974, pp. 86-87.

6. A transport with Jews from the Dutch camp Vught brings 496 prisoners to Auschwitz. The transport consists of 90 men, 389 women and 17 children up to 15 years old. According to a document from the Arolsen International Tracing Service, the deportees were all registered. Among the 17 children are: — HNRK, V, pp. 4, 31. KA, p. 794. AGK, NTN, 156, p. 175.
– Heinie Jacobsohn, born on December 19, 1935, registration number 188930;
– Hans Noach, born December 4, 1934, registration number 188931;
– Jack Slagher, born June 4, 1933, registration number 188932;
– Jack Robert Viskoper, born April 20, 1938, registration number 188934.

7. SS Garrison Administration Auschwitz CC. Crematorium Administration: — APMO, Höss Trial, Vol. 11a, p. 96.
"Przedmiot [Subject]*: Ongoing repairs in crematoria 1-4 from 8 June – 20 July 44. Iron consumption to be reported to raw materials office after completion of work. Ordered SS Garrison Admin. 337/4 of 31 May 44. Wykonawcy* [Executor]*: Zając. Ukończono* [Finished]*: 4 July 44."*

8. Letter from the Central Construction Office to Tesch & Stabenow with the subject "Auschwitz CC, hydrogen-cyanide disinfestation facility (11 cells)": — RGVA, 502-1-333, p. 35.
"On May 12, 44, you wrote to the Boos Company that you had requested exact drawings of a 'normal gas chamber'[27] *from your supplier. This drawing, which must be executed on a larger scale and in which all dimensions must be entered in plan and elevation, is urgently required here. The drawing must also indicate in which direction the doors open, since the latter must be ordered from here.*
According to information from the local garrison physician, the Zyklon-B fumigation chambers are recently to be converted to 'Ariginal gassing'[28] *The garrison physician wanted to contact you directly about the changes to be made. Likewise, you want to send the drawing in triplicate."*

"Headquarters of the Birkenau Labor-Education Camp." Release certificate for Kristian Jan, in the camp from May 3 to June 8, 1944. "The release took place on June 8, 1944." — RGVA, 502-1-436, p. 105.

9. "Headquarters of the Birkenau Labor-Education Camp." Release certificate for Zieba Josef, in the camp from 17 April to 9 June 1944" The release took place on 9 June 1944." — RGVA, 502-1-436, p. 120.

Garrison Order No. 17/44 mentions the result of a collection for the Red Cross; then: — APMO, *Standortbefehl*, t.3. D-Aul-1/72, pp. 331-334; Frei, pp. 453-457
"2. Wire obstacle around the protective-custody camps of Auschwitz CC II.
In a letter dated 3 June 44, it was already pointed out that the wire obstacle around the Birkenau camps is also energized during the day. This is hereby again

[27] Standardized delousing chambers according to the Degesch circulation system.
[28] "Areginal" is a disinfestation agent based on ethyl formate (alcohol ester of formic acid).

brought to the attention of all services."
The order then mentions a closed road due to construction work, and after that:
"4. Commendation
SS-Unterscharführer Johann Trunz, 7th Company, prevented the escape of two prisoners on 1 June 44 by his prudent behavior. I express my appreciation to him for the attention he showed."
It announces punishment for loss of equipment while on furlough; forbids smoking while riding bicycles; points out duty of salute to wardens, maidens, and nurses; then:
"8. Entry of strangers into the camp area
There are more and more cases of strangers entering the camp area, even within the guard lines. This is to be observed above all after the chains of guards have been retracted. Every SS member is obligated to immediately ascertain the personal details of these strangers and to report them to the office of the SS garrison eldest. If a person cannot identify himself and there is suspicion of any intentions, this person is to be arrested immediately. SS members of the garrison area who are in the camp area with civilians who are without identification will also be held responsible, and objections that the same are in his company will not be recognized in any way."
The order reiterates the ban on drinking at counters; calls for the exchange of old war-disabled ID cards for new ones; schedules a meeting on troop care; announces a play and a vaudeville event; gives instructions on borrowing books, games, instruments; mentions a new phone number; explains police ranks due to the merger of SS and police; and mentions a stolen bicycle and three lost and found items.

10. A special garrison order states: AGK, NTN, 121, p. 129; Frei, p. 457
"In order to put a definite stop to the prowling of civilians in the area of the Birkenau camp, I have appointed, with immediate effect, an increased patrol service of the local police company. This company has the task of checking all civilians, including women who are in the company of SS men, for identity cards as closely as possible. Doubtful persons are to be arrested and brought before the Political Department.
The patrol is authorized to take the SS men's pay book from them and to hand it in to headquarters Auschwitz CC II for further action, if they make it difficult or impossible to carry out the inspection by trying to protect the women in their company
All NCOs and men are to be instructed and taught immediately that they are to obey the instructions of the police patrol and to assist them as far as possible. I will personally call to account and punish in an exemplary manner any SS member who opposes this necessary measure.
sgd. Höss, SS-Obersturmbannführer"

Letter from the SS garrison physician Auschwitz CC to the Central Construction Office with the subject "Soap for the civilian workers' camp Auschwitz CC". RGVA, 502-1-332, p. 159.
"It has become apparent that the cleaning facilities for the civilian workers are becoming more or less illusory because they lack soap for body cleansing. In the interest of the complete freedom from epidemics now achieved in the civilian workers' camp, I urge that every effort be made to ensure that sufficient quantities of washing soap are made available for the daily cleaning bath of the civilian workers. In this connection I refer to the fact that from the medical point of view there is no longer any reason for maintaining the quarantine in the civilian workers' camp as long as new cases of infection do not occur again. Avoiding this, however, depends largely on the cleaning facilities available there."

12. Letter from the head of the Central Construction Office to the Construction Inspectorate "Silesia" regarding "Construction of Mortuary Chambers in CC RGVA, 502-1-170, p. 251.

Auschwitz II." The head of the Central Construction Office Jothann asks whether mortuaries must be built "in the form demanded by the SS garrison physician".

"Construction application for the expansion of Camp II of the Waffen-SS in Auschwitz U/S. Erection of 6 pieces of mortuary chambers in already constructed lodging barracks BW 3b and 3d", written by the head of the Central Construction Office, together with explanatory report and cost estimate. The corresponding barracks are marked on the site plan of POW camp no. 3664 dated March 23, 1944. The documentation also includes a "Plan for the installation of a mortuary in a horse-stable barracks. Scale 1:50". RGVA, 502-2-95, pp. 10-13; *ibid.*, 502-2-95, p. 14; *ibid.*, 502-2-95, p. 15.

13. Letter from the Central Construction Office to J.A. Topf & Sons, Erfurt, with the subject "Accounting". Clarifications from the Central Construction Office regarding certain invoices from the Topf Company. Item 3 reads: RGVA, 502-1-327, pp. 28-28a.
"On your invoice of 23 Dec. 43, upon delivery of the material, a down payment in the amount of RM. 1200,-- was instructed. Since the device has already been manufactured, the remaining amount can now be paid. For this purpose, a final invoice is required, which will be prepared from here and enclosed for the purpose of affixing your company stamp with signature."
This refers to Invoice No. 2134, Deaeration Systems for Crematoria IV and V, Order No. 43 D 775, for RM 2,524, dated December 23, 1943.

Letter from Tesch & Stabenow to the *Reichsarz*t SS & Police, the Chief Hygienist, with the subject "Delivery of 11 circulation units for Zyklon B for Auschwitz CC". The conversion of Zyklon circulation chambers for use as Areginal gassing chambers requires "only a few assembly parts more" at a price of RM 27 per chamber. RGVA, 502-1-333, pp. 32-32a.

Response from Tesch & Stabenow to the letter from the Central Construction Office dated June 8, 1944: RGVA, 502-1-333, pp. 30-30a.
"On the basis of your telegram of 3 May 44 to the Friedrich Boos Company, Cologne-Bickendorf, the latter has contacted us. We then asked our supplier whether there has been any changes in the installation of the standard gas chambers in the meantime. After receiving a reply from the plant, we then sent a letter of inquiry on May 18 of this year to Friedr. Boos that there have been no changes in the design of the standard gas chambers in the recent past."
The Tesch Company sends the drawings DK 271, 283 and 284 to the Boos Company.
"After these drawings are available, together with the illustrations in our manual on normal gas chambers, there is a perfectly clear picture for manufacture and assembly of the device."
Regarding the conversion to Areginal fumigation, "only the Areginal fumigation system is to be assembled." Each plant costs RM 27 and requires 12 kg of iron.

14. Letter from the Construction Inspectorate "Silesia" to the Central Construction Office with the subject "Immediate hygienic measures in CC II Auschwitz. Construction of mortuaries in each subsection". The head of Office Group C did not give permission for the construction. RGVA, 502-1-170, p. 245.

15. Central Construction Office. "Report on the Use of Trucks and Construction Machinery for the Period 15 March – 15 June 1944". The 26 available trucks made a total of 6315 trips covering 86774 km. 53 construction machines were used. A detailed report follows. RGVA, 502-1-1188, pp. 83-84.

Letter from the Auschwitz Labor Office to I.G. Farbenindustrie-AG, with the subject "Notification of State-Police Measures against Foreign Workers" (Matej Przekona, Karel Ruzieka, Wenzel Fait): RGVA, 503-1-436, p. 146.

"As the Secret State Police inform me, the above-named have been sent to the Birkenau labor-education camp for 56 days for having exceeded their leave. The release of the first two will take place on 17 July 1944. The day of Fait's release was not given."

16. The hygienist of the Construction Inspectorate "Silesia" writes to the head of his office regarding "PoW camp Construction Section III". The inmate lodgings in this part of the camp have not yet been completed. RGVA, 502-1-168, pp. 6-6a.
"The first prisoner transport arrived on 9 June 44. At present the construction section is occupied by about 7000 female prisoners (Jews)."

Headquarters of the Birkenau Labor-Education Camp. Release certificate for Mierzwa Wojciech, in the camp from May 12 to June 16, 1944 "The release took place on 16 June 1944." RGVA, 502-1-436, p. 142.

A special garrison order announces a Führer order for a general ban on taking leaves, and explains the details. Frei, pp. 457f.

17. Central Construction Office, file note with the subject "Meeting on the occasion of the visit of the chief of the Main Office, SS-Obergruppenführer and General of the Waffen-SS Pohl, about constructional matters in Auschwitz. The visit took place on June 16. RGVA, 502-1-29, pp. 26-28. NO-2359.
"Participants:
1.) SS-Obergruppenführer and General of the Waffen-SS Pohl.
2.) SS-Standartenführer Maurer, head of Office Group D.
3.) SS-Obersturmbannführer Höss, SS garrison eldest Auschwitz

Under discussion is the execution of construction work not included in the G.B. construction list for 1944. […]
Expansion of the planned provisional bakery by two additional ovens is to be started immediately, since there is an increased demand for bread, and the ovens now in continuous operation are in need of urgent repair. Execution of this work is considered possible by SS-Sturmbannführer Bischoff in day-and-night operation within 14 days, provided that the appropriate staff is available from the protective custody camp.
Requests for carrying out additional construction projects is discussed on the basis of a list submitted by the Central Construction Office.
The following projects, after review of urgency, are approved by SS-Obergruppenführer Pohl and released for implementation."
A list of 29 construction projects follows:
"1.) Expansion of the bakery and two baking ovens. […]
5.) Air-protection measure – 10 fire ponds of 400 cbm each […].
8) Finishing of barracks in CC (II); it is noted that the installation of washrooms and toilet rooms is considered necessary only in every third or fourth barracks.
9) Roofing of all barracks with two-ply roofing felt, including the cow- and horse-stable barracks in Raisko.
10) 3 barracks for immediate measure 'Jew Action'. […]
16) Camouflage of the Crema, and security measures by erecting a second fence (The camouflage has to be done by wicker mats, to be procured by the SS garrison admin-

istration).
17.) Creation of 6 mortuary chambers in BA I and II. […]
29.) Security line for camp (I) – 15 pieces of 1-man shrapnel shelters."

19. Overview of the number and deployment of female inmates of the Concentration Camp Auschwitz U/S. Number of inmates: 30,994, including: GARF, 7021-108-33, pp. 152-155.
Inmates unfit for work and deployment: 11,399
1. inpatients: 3,759
2. invalids: 227
3. detained: 15
4. juveniles under 14: 989
5. juveniles from Theresienstadt: 895
6. Jews from Theresienstadt: 5,514.

SS Garrison Administration Auschwitz CC. Crematorium administration. APMO, Höss Trial, Vol. 11a, p. 96.
"Przedmiot [Subject]*: 4 sieves of ashes in the form of the sand sieves. Order form of SS garrison admin. of 7 June 44. Wykonawcy* [Executor]*: Dunikowski. Ukończono* [Finished]*: 26 June 44."*

Headquarters Order No. 7/44, Monowitz, reports a transfer; lists changed phone numbers; censures lazy and careless behavior of guards and gives orders; deplores and threatens to punish black trafficking between guards and inmates; prohibits individual action during prisoner escapes and insists on immediate reports; commends seven SS members for "preventing prisoners from escaping through their prudent conduct"; recalls the obligation to carrying along camp passes; repeats the Führer order on the ban on taking leaves; lifts the ban for vacation trips to Romania; orders the confiscation of certain ammunition that has become unusable; advises that lodging equipment requests should be directed to the lodging chamber; requests the registration of all radios; and offers the issuance of games. Frei, pp. 458-461

28. *"Travel Report. Tour of Auschwitz Concentration Camp on June 28, 1944 by MinDirektor Engert, MinRat Müller and EStA Dr. Gündner (RJM), GStA Dr. Haffner, OStA Scheunpflug and Vice-President Caliebe (Katowice), Reichshauptamtsleiter Giese (Chancellery of the Führer). Report authors: MinRat Müller and EStA Dr. Gündner"* BAK, R22/1468, pp. 57-60a.

A detailed description of all aspects of the situation follows.

"The total occupancy of the camp – including all outposts covering large parts of the German Reich – was stated to be about 135,000. Auschwitz itself appears to have housed slightly over 30,000 prisoners. Among them were political prisoners, anti-socials and habitual criminals, work-shirkers, prostitutes, and prisoners in preventive custody. According to the impression gained during the inspection, the majority of prisoners are foreigners and Jews; recently, Hungarian Jews in particular have been admitted.
The number of personnel in the guard force was first given as 1,000, later as 2,500 and over 3,000 men."
"Selected prisoners are also admitted to the SS; recently about 300 men had joined a special formation under an SS leader Dirrlewanger [sic]*."*
"Correspondence with relatives is permitted without major time restrictions. It is sub-

ject to censorship. When censoring letters in foreign languages, prisoners are used as interpreters. Prisoners are allowed to receive food shipments from their relatives."
The camp is divided into Headquarters I, II and III. The commission first visits Headquarters I (Auschwitz I). In one barracks, "a band (wind orchestra) consisting of at least 60 prisoners gave a square concert."
"Subsequently, a barracks located in the same block was shown, which contained an inmate hospital with a dental station, dressing rooms, operating room, etc. As physicians for the prisoners, under the supervision of an SS doctor, there are 60 prisoner physicians who perform all treatments and operations themselves. Among them were said to be eminent surgeons and other specialists. Capo was a doctor from Lemberg (not German). He stated that the number of sick people was 2,000. When questioned, he explained that many TB patients were there, but to whom, except for vitamin D, lime preparations, etc., he could not give any special allowances."
"The writing room is a prisoner's library, not very large in space, which, according to the prisoner who administers it, should contain 45,000 volumes."
"At another loading point a freight train with Hungarian Jews was unloaded."
"A large, completely new and modern plant nursery with wide greenhouse facilities was shown in detail, where mainly the early cultivation of cucumbers and tomatoes was carried out. With this nursery is an experimental station for the planting of Kok-Sagis, a dandelion-like plant from whose milk raw gum is obtained. The plant, hitherto unknown in Germany, is cultivated on a large scale in Soviet Russia and is expected to meet much of the demand for natural gum there. In a modern laboratory, female inmates were engaged in scientific work under the direction of three men."
"At the end of the tour of the camp, a large dog kennel was shown where several hundred dogs are trained for police and Wehrmacht purposes, and for hunting with SS riding schools. The way back to the camp led past a crematorium where corpses were apparently burned on pyres."
The commission then visited the construction site of IG-Farben's Buna and hydrogenation plant, "where, in addition to some 20,000 other workers, about 10,000 camp prisoners are engaged in construction work. There was no discernible separation of the prisoners from each other or from the other workers."
Finally, the Jawischowitz mine of the Reichswerke Hermann Göring was visited, where 2,500 prisoners worked, "mostly Jews."
"No work pay is given to the prisoners."
But to encourage the highest work performance, deserving prisoners received vouchers for 1 or 2 RM, which they can use to buy tobacco products, additional foodstuffs, stationery, etc. in the camp.
"As a reward for performance, brothel visits are also allowed, which are also paid for with vouchers. Only women who have already surrendered to prostitution before being taken into custody and who volunteer for it will be allowed into the brothel."

Central Construction Office. File note with the subject "air-raid protection measures at Auschwitz CC". RGVA, 502-1-401, pp. 35-38.
"Reference: Meeting on 26 June 44, 16.00.
Participants:
SS-Ostubaf. Höss, SS garrison eldest Auschwitz
SS-Ostubaf. (F) Dr. Caesar, head of agricultural enterprises at Auschwitz CC
SS-Stubaf. Bischoff, head of the Construction Inspectorate of the Waffen-SS and Police 'Silesia'.
SS-Stubaf. Baer, camp commandant CC I

SS-Hstuf. Polenz, representing the head of the SS garrison administration
SS-Hstuf. Dr. Wirths, SS garrison physician, Auschwitz air-force engineer Gerdemann, head of the 'Rorück' disassembling plant
SS-Ostuf. (F) Jothann, head of the Central Construction Office of the Waffen-SS and

Police Auschwitz
SS-Ostuf. Hössler, leader of Protective-Custody Camp, Camp I
SS-Ostuf. Sell, chief of Labor Dept. IIIa
SS-Hscha. Dr. Münch, deputy to the head of the Hygiene Institute
SS-Osha. Hatzinger, head of the B.D."
Detailed construction plan for air-raid protection measures (cellar rooms, shrapnel protection trenches, fire-fighting ponds, equipment bunkers, guard bunkers).
"4.) Garrison physician. Development of a gas-tight treatment room in the former Crema I of 4 x 5 m."
"As protective measures for prisoners of Camp I, the construction of shrapnel-protection trenches is not possible due to the existing open spaces. However, 2 – 3000 prisoners can be accommodated in the existing basements. In Camp II, shrapnel-protection trenches for prisoners can likewise not be constructed in view of the ground-water level and the existing open spaces."
"The air-raid shelters constructed so far are:
1.) Headquarters Camp I
12 fire extinguishing ponds, each with a capacity of 400 cubic meters.
10 pieces of shrapnel-protection trenches in prefabricated concrete parts for 130 persons each
1 bunker for the houses
22 pieces of 1-man or 2-man anti-shrapnel bunkers for small chain of posts
2) Headquarters Camp II
8 fire ponds of 400 cbm capacity each
1 shrapnel-protection trench for 130 persons."

July 1944

1. With this date begins the register "Block 20 – 8 – Occupancy of 8 – Pulmonary TB Station", which extends from July 1, 1944 to January 17. It contains about — ISD, folder 61d.

860 names of prisoners who passed through Block 20, No. 8.

Bielitz Labor Office, Auschwitz Branch Office in Auschwitz. Certificate: *"It is hereby certified that on today's date the following workers were presented by the Auschwitz Labor-Education Camp for new placements":* Czajkowski Josef, Totek Martin, Misiorz Ferdinand, Kaczmarczyk Josef, Sochacki Zenon, Walnik Josef, Moltschaniuk Kusma, Iwanski Stanislaw. — RGVA, 502-1-436, p. 126.

3. From the transit camp in Birkenau, 174 Hungarian Jews are registered (with numbers A-15857 to A-16030), among them:
– Laszlo Leslauer, born in Budapest on March 2, 1933, registration number A-15952;
– Isaac Herskowitz, born in Czanahosz on February 4, 1936, registration number A-15922 — ROD, c(21.23)31, serial nos. 1866, 1836

4. Letter from the Central Construction Office of the Waffen-SS and Police Weimar to the Central Construction Office of Auschwitz with the subject "Auschwitz CC, hydrogen-cyanide delousing facility B.W. 160". Detailed instructions for use of the Degesch circulation chambers in 6 points.
"To 4.) The decontamination is radical and absolutely effective. The following theorem applies: little and well loosened charging material – short exposure time; dense storage – long duration of fumigation. Thus, the times vary between 1 and 12 hours when using the 200-gr can. One calculates for 100 garments plus all accessories (shoes etc.) per chamber about 3 hours, venting 1/2. The chamber packed with suitcases and bags (without using the trolleys) is left under gas for one night." — RGVA, 502-1-333, pp. 17-17a.

6. Letter from the Central Construction Office to the SS garrison physician with the subject "Implementation of the disinfestation plants for Section III PoW camp, and hydrogen-cyanide disinfestation plant in CC I":
"For Section III, 6 disinfestation plants had always been planned, which were to be equipped with heating, shower baths and disinfestation devices. Since the mobile short-wave delousing system in the PoW camp is working satisfactorily, 4 systems are to be omitted, and only 2 are to be built. Materials for these devices have already been ordered.
According to the order, the hydrogen-cyanide disinfestation facility in the CC I reception building is to be completed as soon as possible." — RGVA, 502-1-332, p. 7.

"Headquarters of the Birkenau Labor-Education Camp." Release certificate for Ziltek Jozef, in the camp from 22 May to 6 July 1944" The release took place on 6 July 1944." — RGVA, 502-1-436, p. 230.

The SS Garrison Administration Auschwitz hands over to the Central Construction Office a letter from the Construction Inspectorate "Silesia" dated May 22, 1944. Subject: "Refurnishing BW 4 in BA I, Camp II, Birkenau". — RGVA, 502-1-83, p. 7.

Letter from the Central Construction Office to the SS garrison physician, SS-Hauptsturmführer Wirths, with the subject "Implementation of the Disinfestation Facilities for Section III, PoW camp, and Hydrogen-Cyanide Disinfestation Facility in CC 1":
"For Section III, 6 disinfestation units had always been planned, which were to be equipped with heating, shower baths, and a disinfestation device. Since the mobile short-wave delousing system in the PoW camp is working satisfactorily, 4 devices are to be omitted and only 2 are to be built. Materials for these devices have already been ordered.
According to the order, the hydrogen-cyanide disinfestation facility in the CC I reception building is to be completed as soon as possible. In this connection it is noted: The necessary boiler and piping to the 11 disinfestation chambers have already been — RGVA, 502-1-332, p. 7.

laid. The entire equipment for the disinfestation chambers is still in progress at the supplier's plant. Completion is not expected before autumn of this year, because the order was cancelled earlier and the new order was placed only recently."

"Headquarters of the Birkenau Labor-Education Camp." Release certificate for Ziltek Jozef, in the camp from 22 May to 6 July 1944" The release took place on 6 July 1944." — RGVA, 502-1-436, p. 23.

7. Letter from the Central Construction Office to the Construction Inspectorate "Silesia" with the subject "Implementation of the construction projects included in the R-list 1944". — RGVA, 502-1-85, p. 35.
SS-Obersturmführer Jothann emphasizes the difficulty caused by the use of prisoners, such as the use of women units in the execution of above- and below-ground construction work:
"The forthcoming exchange of Polish prisoners for Jewish prisoners is not likely to be without influence on work performance. According to the experience available so far, the work performance of the Jewish prisoners amounts to only about 1/3 of that of the Polish prisoners."

"Headquarters of the Birkenau Labor-Education Camp." Release certificate for Ewa Fedyk, in the camp from 24 April to 7 July 1944" The release took place on 7 July 1944." — RGVA, 502-1-438, p. 15.

8. Auschwitz Labor Office, certificate: — RGVA, 502-1-438, p. 24.
"I hereby certify that on today's date the following workers were handed over to me by the Auschwitz Labor-Education Camp for new placements:"
Machniewski Johann, Czauderna Ladislaus, Rozalski Henryk, Kott Josef, Kapucinski Boleslaw, Ribalka Petro, Stankiewicz Jadwiga, Zarebska Gabriele, Kwiatek Janina, Czupryk Stefania, Fydek Ewa, Gorna Gertrud.

German Air Force. Air photo of Auschwitz CC II/Birkenau and the surrounding area in the east. Film: 14/44 (LGK VIII) B. No. 123. — NARA, Record Group no. 373.

9. Letter from E. Berninghaus to Central Construction Office: — RGVA, 502-1-354, pp. 9-9a.
"Offer. 19 single-leaf gas-tight, double-walled doors of steel-saving design, executed according to enclosed drawing no. 3596 for a clear wall dimension of 1350/1900 mm."
Iron weight 110 kg per door, unit price RM 164.50.

10. X-ray book No. 24 of the prisoner infirmary of Auschwitz CC begins with this date. It extends from July 10 to August 3, 1944, and contains entries numbered 1154 to 1457. — APMO, D-Aul-5/24. ISD, folder 67w.

Central Construction Office. "Statement of the quantities of timber required for the siding of Deutsche Ausrüstungs-Werke GmbH": — RGVA, 502-1-183, p. 172.

"1. Sleepers for the track
4350 m track, sleeper spacing 75 cm
Volume of sleeper 15 · 24 · 2,50 = 0,09 cbm
5800 sleepers." — *522.000 cbm*
2. Sleepers for simple switches — *175.500 cbm*
697.500 cbm

Letter from the 1st camp physician of Auschwitz CC I "to the hyg.-bact. Research Office of the Waffen-SS, Southeast, Auschwitz U/S": — YVA, O.430, pp. 2-4.
"Enclosed are throat swabs for examination for Streptococcus haemoliticus, taken on 9 Jul 1944, from the following prisoners of Block 5a."
A list of 112 prisoners follows. The second page is missing; the third lists 39 Jewish prisoners from the A-Series.

11. Inmate Infirmary B. II.f. Main writing room. To Camp B IIa: APMO, microfilm no. 1523/1.
"A list of the mentally and emotionally ill is to be drawn up immediately, stating:

I.	*II.*	*III.*	*IV.*	*V.*
Inmate No.	*Last name*	*First name*	*Nationality*	*Brief diagnosis*

This list is to be prepared as soon as possible and forwarded to the main typing office of Infirmary B. II.f.""

Letter from the Construction Inspectorate "Silesia" to the Central Construction Office with the subject "Application for construction of 3 barracks for special measures": RGVA, 502-1-281, p. 89.
"Construction Order No. 61.
On the basis of the documents submitted, I hereby issue the construction order for the erection of 3 barracks for special measures in Auschwitz CC. Camp II Auschwitz."

Letter from the Construction Inspectorate "Silesia" with the subject "Application for construction of 3 barracks for special measures in CC II Auschwitz". Construction Order No. 61: RGVA, 502-1-281, p. 54.
"On the basis of the documents submitted, I hereby issue the construction order for the erection of 3 barracks for special measures in C Camp II Auschwitz. […]
The handing over of the construction to the building-administration office is to be reported to me in accordance with the order of the SS Economic and Administrative Main Office Office C VI, dated 18 Jan. 44 – ref.: C VI/3-Allg./61/e (neu) Ta/Ka/Tgb. No. 208."
Total amount RM 51,000.

13. Central Construction Office. "Final invoice for deaeration systems for crematorium BW: 30b from J.A. Topf & Sons, Erfurt, Dreyserstr. 7/9". Total cost RM 2,510. 1,200 RM paid on 2 Feb. 1944; balance of 1,324 RM on 13 July 1944. RGVA, 502-2-26, pp. 217-219.

14. SS-WVHA, Office Group C, Office C III. "Guideline No. 58", with the subject "Correct designation of air-raid protection installations": RGVA, 502-1-401, p. 52.
"Air-raid protection bunkers are bombproof structures (see Guideline 50!) High bunkers are constructed above ground, whereas low bunkers are constructed below ground level, hence also called earth bunkers. Likewise, only bomb-proof tunnels are referred to as air-raid protection tunnels. Most often, the term 'bunker' is misapplied to air-raid protection special structures."
"Another misapplication of the word bunker are the terms 'one-man bunker', 'two-man bunker', etc. What is meant in these cases are (shrapnel) protective cells (see Guidelines 39 and 51), (shrapnel) protective booths, shrapnel-proof observation booths or guard booths, shrapnel-proof machine gun booths, shrapnel-proof dugouts, or earth shelters for fire engines, etc."

Blechhammer CC, Civil Engineering Department. "G Program. Construction Drawings." VHA, Fond OT, 19/5.
Type I: bunkers 1-18, 29;
Type II: bunkers 19, 20, 30;
Firefighting bunkers 21-28.
paramedical bunker, hospital 29.

Headquarters Order No. 8/44, Monowitz, commends seven SS members for successful escape prevention; clarifies disciplinary subordination of Wehrmacht members serving in Waffen SS units; complains of negligent guards and expects improvement; finds fault with stacked objects in barracks as an opportunity to hide; exhorts to care for weapons; cites an order encouraging inventions and improvements; draws attention to one item each of two ordinance sheets; prescribes radical fuel-saving measures; reserves to Political Department and Gestapo admission of educational prisoners; orders capos to supervise rather than work; in- Frei, pp. 466-468

sists on the use of skilled inmate workers in their area of expertise; and gives further instructions to prevent escapes.

Garrison Order No. 19/44 announces the result of a collection for the Red Cross; prohibits the private use of service letterheads; cites an order on uniform wearing; deplores the failure to surrender weapons on transfer and arrest; decrees that hospitalized SS members have a gas mask with them; reprimands a case of poaching; underscores the ban on men visiting female SS helpers' quarters; puts out a manhunt for an SS man; commends SS track-and-field athletes for their mentioned successes at the district championships, and announces a district sports festival in Auschwitz; schedules training sessions for the entire force and SS officers; announces the performance of a theater play and a dance play; mentions a book sale in the library; orders that all units report their weekly training dates to the garrison eldest; announces the availability of the yearbook of German ethnic groups; calls for the reporting of all artistically talented SS members; appoints a clerk to take care of SS members from the southeast; reports the theft of a service bicycle; reports three lost and found items each; declares three camp passes invalid; and criticizes the only partial compilation of a list of existing radios. Frei, pp. 468-473

15. Bielitz Labor Office, Auschwitz Branch Office in Auschwitz. Certificate: *"I hereby certify that on today's date the following workers were presented by the Auschwitz Labor-Education Camp for new placements":* Gluza Wladislaus, Strzeminski Ryszard, Chmielewski Czeslaw, Slusarkiewicz Wieclaw. RGVA, 502-1-438, p. 127.

Headquarters of the CC, to the Bielitz Labor Office, Auschwitz Branch Office in Auschwitz: *"Wladyslawa Gruszynska was brought to the local labor-education camp by the State Police Station Kattowitz, Field Office Sosnowitz. She gave birth to a male child on 11 April 1944. The child is alive and well. G. was last employed at the Henschel & Sohn Company in Kassel. It is not possible to return Gruszynska with the child to Kassel. It is therefore requested that Gruszynska, who arrives for discharge with her child on July 20, 1944, be placed in work from there."* RGVA, 502-1-436, pp. 311-311a.

17. Central Construction Office. Handover record. SS-Oberscharführer Josef Pollok hands over the files to SS-Obersturmführer Krauss "due to transfer to field unit." RGVA, 502-1-48, pp. 14-15.

Inmates for experiments: 59

Letter from the head of the Central Construction Office to the SS garrison physician with the subject "Construction of mortuary chambers in Camp II Birkenau". RGVA, 502- 1-52, p. 7.

Camp physician Dr. Mengele considers dimensions of 4.50 m × 3 m sufficient for the mortuary chambers. Access must be from the outside only.

3. Auschwitz CC II. Labor deployment for 1 August 1944. Total number of inmates: 19,302 — APMO, D-Aul-3a/20.

Inmates unfit for work and deployment: 3,055, including:
1. inpatients and recovering inmates: 2,378
2. ″ ″ ″ Gypsies: 1
3. invalid inmates: 135
4. juveniles until 14 y., inmates: 190
″ twins for experiments: 49

Inmates for experiments: 59

Garrison Order No. 21/44: — Frei, pp. 476-480

"1. Commendation
I commend SS-Strm. Heinrich Edelmann, 2nd Comp. CC. Au. I, for his exemplary performance of duty and authorize him 5 days free stay at the Sola Hut.
E. made successful use of the firearm on the night of 1 – 2 Aug. 44, when a civilian – presumably a propped-off agent – attempted to cross the post chain."

The order points out that unauthorized persons are forbidden to enter the SS hospital; prohibits the drawing of water from fire-extinguishing ponds; reminds that changes in housing in Auschwitz require permission; gives instructions on the payment of siding rent charges; reminds of the need to hand in the driving-record books at the beginning of the month; reminds of the need for driving orders for trips outside the camp as well as the obligation to report motor-vehicle accidents; orders that prisoners may only be transported in a sitting position on trucks; reminds of the obligation to carry the blood -group mark on the identification tag; mentions that bicycle tires may only be replaced every 18 months due to lack of rubber; schedules one training evening each for female workers, for NCOs, and a general education lecture evening; then:

"15. Robbery of a service pistol.
An incident known here, in which a human life was lost, gives cause to point out that the unbuckling of the belt with service weapon is to be refrained from in all public means of transportation, and that when entering public premises the weapon is to be secured from any third-party access."

The order then explains how to wear the gray-green shirt; cites the correction of an ordinance sheet; searches for four SS members; mentions three lost and eight found items; and declares three camp passes invalid.

4. Auschwitz CC II. Labor deployment for 4 August 1944. Total number of inmates: 19,293 — APMO, D-Aul-3a/21.

Inmates unfit for work and deployment: 3,083, including:
1. inpatients and recovering inmates: 2,090
2. ″ ″ ″ Gypsies: 1
3. invalid inmates: 135
4. juveniles until 14 y., inmates: 206
″ twins for experiments: 49

Letter from the SS-WVHA to the Construction Inspectorate "Silesia" with the subject "Erection of 111 hospital barracks in PoW camp, Camp II":
"Construction order no. 1432. On the basis of the documents submitted, I hereby issue the order for the construction of 111 hospital barracks in PoW camp, Camp II, Auschwitz, BA III, BW 3 e and 3 f."
The site plan of POW camp no. 3764 drawn by prisoner no. 63003 on March 23, 1944 and "examined" by the chief of Office C II on July 13, is attached, wherein the 111 barracks in question are listed.

RGVA, 502-1-281, p. 49; *ibid.*, 502-2-110. p. 13.

Letter from the SS garrison physician to the SS-WVHA, Office Group C, with the subject "Report on the effectiveness of the stationary shortwave delousing plant" (microwave delousing): The plant was put into operation on 30 June 1944 and was fully operational on 5 July:
"In 32 working days up to 6 Aug. 44, a total of 46,122 people were deloused with their clothing equipment and bedding. […]
The delousing plant works very promptly and reliably, as numerous trial tests have shown. […]
In order to make the lice-free condition achieved through short-wave delousing last for a longer period of time, injection with a Lauseto solution [=DDT] *is now being carried out on a trial basis."*

RGVA. 502-1-333, pp, 7-8.

Iron 363,000 cu. yds.
Softwood lumber 714 cbm
Ballast 6,930 cbm."

With a Jewish transport from Trieste, Luigi Ferri, born on September 9, 1932, arrives in Auschwitz and is given the registration number B-7525. LPF, p. 266.

A circular from the headquarters in Monowitz criticizes the lax security precautions and poor morale in the subcamps. Frei, pp. 480f.

Garrison Order No. 22/44 announces the result of a collection for the Red Cross; commends two SS members for successfully preventing the escape by gunshot of Frei, pp. 481-485

four prisoners; mentions that the SS garrison administration has been renamed SS central administration; informs of a road closure due to construction work; then:
"5. Residence Permit.
The influx of families of SS members has reached such proportions that it is impossible to issue any more permits. Any applications and housing allocations or residence permits for longer periods are futile and will no longer be processed."
The order refers to the compulsory registration of newcomers from the cleared eastern areas and bombed-out western areas; sets times for the exchange of linen for the various departments; changes the mode of issuing special rations; reprimands the dumping of garbage next to the SS kitchen; decrees the registration of all SS members engaged in artistic activities; insists on wearing mosquito veils to combat malaria; reports the escape of three horses; deplores the mass theft of fruits and vegetables from the fields; mentions two lost and found items each and a stolen ladies' bicycle; and declares five camp passes invalid.

19. Auschwitz CC II. Labor deployment for 19 August 1944. Total number of inmates: 19,424. APMO, D-Aul-3a/36.

The SS garrison physician Auschwitz: APMO, microfilm no. 1613/93.
"Evaluation of SS-Hauptsturmführer (R) Dr. Josef Mengele born 16 March 1911 SS-No. 317 885.
SS-Hauptsturmführer (R) Dr. Josef Mengele has been serving with the SS garrison physician Auschwitz since 30 May 1943. Dr. Mengele has an open, honest, firm character. He is absolutely reliable, upright and straight. In his appearance he shows no weakness of character, opinions or addictions. He acquired his knowledge during his work in Auschwitz CC practically and theoretically as a camp physician in the fight against serious epidemics. With prudence, perseverance and energy he fulfilled all the tasks assigned to him, often under the most difficult conditions, to the complete satisfaction of his superiors, and showed himself ready to face any situation. In addition, as an anthropologist, he has eagerly used the short time he had left off duty to further his own education, and has made a valuable contribution to anthropological science in his work by evaluating the scientific material available to him on the basis of his official position. His achievements are therefore to be described as outstanding. […] *He is catholic.* […] *In the face of the enemy, he performed brilliantly during the Eastern campaign from June 1941 to June 1943. He was awarded the K I, the EK II and the Eastern Medal. In addition, he was awarded the Wounded Badge black, the Medal for German Ethnic Care. In the most conscientious performance of his medical duties, he contracted typhus while fighting the epidemic in Auschwitz. On account of his special achievements, he was awarded the Kriegsverdienstkreuz II. Kl. m/Schw. (Cross of War Merit, 2nd class with swords). In addition to his medical knowledge, Dr. M. possesses special knowledge as an anthropologist. He appears quite suitable for any other assignment and also for the next higher assignment. He has no criminal record. As an SS doctor, he is popular and respected everywhere."*

Garrison Order No. 23/44: Frei, pp. 485-487
"1. Commendation.
In the recapture of three escaped prisoners.
Police officer of the reserves Wochnik and
police officer of the reserves Werner,
both members of the 2nd Comp./II.Pol.Guard-Btl.VIII, behaved extremely prudently and skillfully. I express my special appreciation to them for the successful arrest."
The order announces that the House of the Waffen-SS is no longer to be used as a public restaurant, but only as a comradeship home; establishes certain marching routes for prisoner units to the Raisko nursery; prohibits prisoners from riding in trucks on the way from one camp to another; schedules one training evening each for SS officers and NCOs; Requires a report of all SS members with film projection slips; reminds them to fill out and send in receipt slips for brochures distributed; mentions one stolen service bicycle, one lost and found; and declares two camp passes invalid.

31. A special garrison order mentions the distribution of copies of the pamphlet "The World's Largest Mosquitoes" at Himmler's request to all unit commanders and heads of service, and then gives detailed instructions on the control of flies and mosquitoes. Frei, pp. 487-489

12. covering of all agriculture barracks with a 2nd layer of roofing felt 70%.
13. 3 barracks for immediate action (Jew Action) 90%.
17. camouflage of the Crema. and security measures by erecting a 2nd fence 90%.
18. construction of 6 mortuaries in CC II, BA I and II 15% […].
25. security line for camp I – 15 pieces of 1-man shrapnel shelters 95% […].
28. construction of a gas-tight treatment room in the former Crema for the garrison physician 5%."

5. Letter from the Central Construction Office to the Construction Office CC II Birkenau with the subject "Camouflage of the Crema. in the PoW camp": RGVA, 502-1-317, p. 13.
"The Construction Office there has submitted to here the allocation documents concerning the camouflage of the Crema. in the PoW camp, but only with erection of wooden posts with shrubbery. Originally, in place of the wooden posts now standing, ferroconcrete pillars with barbed wire were in place and the leader of the protective-custody camp there had these pillars removed and turned over to the disassembly plants. The Construction Office is asked to determine how many concrete columns have been delivered there and to report this to here. The allocation documents are enclosed."

Letter from the Central Construction Office to the District Economic Office Bielitz. On June 19, 1944, a vehicle with very poor tires was assigned to the Auschwitz Camp: RGVA, 502-1-190, p. 40.
"The truck in question is a generator-gas vehicle. In the present difficult liquid-fuel situation, it is not justifiable that generator-gas vehicles should be out of service for lack of tires at the expense of gasoline and diesel vehicles."

Construction Issue Book. "Building (BW) 54 = 3 barracks for special measures." A September 5, 1944 entry shows 362.42 RM in favor of Lenz & Co, A.G., Kattowitz, for "hourly wage work." RGVA, 502-1-111, pp. 573-573a.

Letter from the camp leader of the Golleschau subcamp to the first leader of the protective -custody camp Auschwitz CC III with the subject "Maltreatment of prisoners by civilians": ISD. OCC 2/7/a folder 56 C II C/1.
"On 4 Sept. 44 at 6 p.m., while entering the camp, it was reported to me by the Jewish protective-custody prisoner no.: 176456, Wolnerman Mayer, that he had been beaten by the foreman working at the primary crusher, Pinkas, afternoon at 3 p.m., and that his glasses had been smashed in the process.
I had the block leader call the foreman and questioned him as to whether and why he had beaten the above-mentioned prisoner. Initially he denied it, and only after being questioned several times did he admit that he had maltreated the prisoner, which he justified by the fact that he had found him asleep.
Master Pinkas had already been warned once by the management and by me, and he had often been instructed that, if a prisoner behaved improperly during work, he

should report it to me. Moreover, the information given by the foreman is not correct, since this incident was immediately investigated by the block leader, SS Uscha. Klehr on my orders.
I ask Obersturmführer to arrange for further action.
The management has been informed of the report."

6. Headquarters Order No. 9/44, Monowitz, reports two SS victims of an air raid; commends four SS members for preventing prisoner escapes and one SS member for brave and prudent behavior during an air raid; refers to a chief order by Pohl that carbon copies are no longer to be made; explains responsibilities of camp and troop leadership; again forbids SS members to serve as orderlies; decrees that mail couriers be used only for important matters; forbids unbuckling of belts in public transportation and bars; reprimands lack of locker and room order; recalls duty to salute Wehrmacht and party members; insists on observance of medically prescribed reduced fitness for duty; admonishes medics for pest control in troop quarters; orders preparation of vaccination lists for all SS members; issues a furlough ban for Slovakia and Romania; reminds to fill out and mail receipt slips for distributed pamphlets; points out two circulars and one item in an ordinance sheet; announces the dissolution of one subcamp; insists that prisoners may be withdrawn from current occupations only with the permission of the commandant; deplores black-marketing between civilian employees and prisoners, and calls for strict supervision of civilians; and declares that the prescribed quarantine period must be observed when transferring to another camp. Frei, pp. 489-493

7. Auschwitz CC II. Labor deployment for 7 September 1944. Total number of inmates: 18,708
Inmates unfit for work and deployment: 3,139, including:
1. inpatients and recovering inmates: 2,266
2. invalid inmates: 133
4. juveniles until 14 y., inmates: 566
″ twins for experiments: 49
Inmates for experiments: 82

11. "Report Book Inmate Infirmary of Auschwitz CC, Camp AI", fragment. Daily report for the week of September 11-17, 1944. The header column is divided into the following headings (dates for 9/11):
VMM, HC.

Occupancy of the camp:	16,036
Inpatients:	1,535
Block recovery:	245
Deaths (of which in camp):	3
Total Sick:	1,783
Sick as a % to occupancy:	11.1
Admissions from camp:	24
Transfer from other camps:	5
Departures healthy:	80
Outpatients treated:	868
Doctors Nurses	49-176
Infectious patients	49

(Erysipelas, T.B.C., syphilis, trachoma, gonorrhea, typhoid fever, meningitis)

Special incidents.

12. "Report Book Inmate Infirmary of Auschwitz CC, Camp AI". VMM, HC.

Occupancy of the camp:	16,049
Inpatients:	1,544
Block recovery:	259
Deaths (of which in camp):	1
Total Sick:	1,804
Sick as a % to occupancy:	11.2
Admissions from camp:	30
Transfer from other camps:	/
Departures healthy:	20
Outpatients treated:	1,206
Doctors Nurses	49-176
Infectious patients	47

(Erysipelas, T.B.C., syphilis, trachoma, gonorrhea, typhoid fever, meningitis)
Special incidents.

13. "Report Book Inmate Infirmary of Auschwitz CC, Camp AI". VMM, HC.

Occupancy of the camp:	16,051
Inpatients:	1,623
Block recovery:	253
Deaths (of which in camp):	44
Total Sick:	1,920
Sick as a % to occupancy:	12.0
Admissions from camp:	82
Transfer from other camps:	1
Departures healthy:	3
Outpatients treated:	576
Doctors Nurses	49-176
Infectious patients	52

(Erysipelas, T.B.C., syphilis, trachoma, gonorrhea, typhoid fever, meningitis)
Special incidents: "During the air raid: 43 dead, 12 missing, 65 seriously wounded and 150 lightly wounded. 15 female prisoners wounded."

20. BW 20: high-voltage plant	1/9/1944	2%

Labor deployment: civilian workers: 8 [sic]; inmates: 4,598.

20. Letter from the Central Construction Office to the Construction Inspectorate "Silesia" with the subject "Construction of air-raid protection bunkers": RGVA, 502-1-401, p. 9.
"With reference to the previous discussions [of 16 and 18 September 1944], *the ordered 4 air-raid protection bunkers were planned according to the attached sketch and started on schedule on Monday, 18 Sept. 44."*

21. Central Construction Office. "Conversion of the old crematorium. Air-raid shelter for SS infirmary with an operation room". Plan no. 4287 drawn by prisoner no. 57347. Floor plan and cross section. From left to right: airlock, operation room, dry toilet, 3 unnamed rooms, airlock. RGVA, 502-2-147, p. 20.

Garrison Order No. 24/44 announces the result of a collection for the Winter Relief Charity; cites a Himmler order deploring accidents due to speeding; refers to a chief order by Pohl that carbon copies are no longer to be made; gives a date for taking passport photographs; restricts the possibilities of private dog ownership; orders radios to be secured to prevent prisoners from listening to enemy stations; then: Frei, pp. 493-495
"7. Passes for prisoners.
It has been repeatedly noted that the authorities issue passes to prisoners, granting them the right to move unaccompanied within the camp area. These passes have no validity whatsoever and must be confiscated immediately. Permission can only be granted by the respective camp commandant."
The order then prohibits the purchase of locally farmed foodstuffs; mentions two lost and found items each, as well as one stolen and one swapped service bicycle; and declares one camp ID card invalid.

23. DAW. Invoice no. 68/9 to the Central Construction Office "for disinfestation plant for women, Construction Section I, BW 5B CC II. 1 hot-air furnace set up for 2 chambers": RM 551.10, including supplementary work. RGVA, 502-1-3228, p. 142.

Letter from the Construction Inspectorate "Silesia" to the Central Construction Office with the subject "Application for construction of fences for security measures (camouflage) of the Cremas in CC Camp II Auschwitz": RGVA, 502-1-281, p. 104.
"Construction order no. 91.
On the basis of the documents submitted, I hereby issue the order for the erection of fences for the security measures, (camouflage) of the Cresman [sic] *in CC camp II Auschwitz."*

27. Central Construction Office. "As-built plan of the temporary slaughterhouse B.W. 33 B". GARF, 7021-108-48, p. 14.
It is a 36.02 meters long square building that extends on three levels: basement, ground floor and attic. A refrigeration system is installed in the basement, which serves two cold rooms. The ground floor contains, among other things, a bone degreasing device.

28. Letter from the Construction Inspectorate "Silesia" to the Central Construction Office of Auschwitz, Breslau and Kattowitz, with the subject "Beginning and end of blackout": RGVA, 502-1-401, p. 8.

"According to notification from the Reich Propaganda Office, the clocks will be set back to 2:00 a.m. on 2 Oct. 1944, 3:00 a.m. At this time, normal time will be restored. Therefore, for the period from 2 Oct. – 31 Dec. 1944, the beginning and end of the blackout for the area of LGK [*Luftgaukommando*] *VIII (District Lower Silesia, District Upper Silesia, Wartheland and General Government) will be set as follows:*

Week	*from:*	*to:*	*Blackout: Start:*		*End:*
2/10	–	*8/10*	*18.20*	–	*5.30*
9/10	–	*15/10*	*18.05*	–	*5.40*
16/10	–	*22/10*	*17.50*	–	*5.50*
23/10	–	*29/10*	*17.40*	–	*6.00*
30/10	–	*5/11*	*17.25*	–	*6.10*
6/11	–	*12/11*	*17.15*	–	*6.25*
13/11	–	*19/11*	*17.05*	–	*6.40*
20/11	–	*26/11*	*16.55*	–	*6.50*
27/11	–	*3/12*	*16.50*	–	*7.00*
4/12	–	*10/12*	*16.45*	–	*7.10*
11/12	–	*17/12*	*16.40*	–	*7.20*
18/12	–	*24/12*	*16.45*	–	*7.25*
25/12	–	*31/12*	*16.50*	–	*7.25 "*

30. Headquarters Auschwitz CC. Garrison Order No. 25/44: AGK, NTN, 94, p. 34. Odpis (transcript); Frei, pp. 496f.

"1. Women's Camp Auschwitz CC 1
Effective October 1, 1944, the new women's camp in the extension building of the protective-custody camp is taken over by CC Auschwitz I. In addition, all estates and units in the area of CC Auschwitz I, which were previously under the control of Headquarters II. The supervisors taken over are transferred to Auschwitz CC I as of the same date. The leadership of the women's camp is entrusted to Mrs. Volkenrath."
The order then informs about a new site veterinarian; gives instructions on air-raid protection; reports the relocation of the office of the agricultural enterprises as well as of the office of the Construction Inspectorate "Silesia"; lists the phone numbers of the SS hospital; mentions four lost property items; and declares one camp ID card and two armbands invalid.

Printed form: GARF, 7021-103-1, p. 49; *ibid.*, 7021-103-1, p. 49.

"Auschwitz Concentration Camp, Headquarters
Instruction
Today I was instructed in detail by the company leader SS-Obersturmführer Kollner about the following points, which I hereby confirm with my own signature:
1. Prisoner abuse
2. Interactions with prisoners
3. Conduct as a prisoner escort post
4. Conduct as a prisoner guard
5. Behavior as a control post at camp entrances
6. Conduct in the event of arrest of persons with insufficient identification
7. Conduct during escape of prisoners.
Auschwitz, 30 Sept. 1944.
SS-Obersturmführer Kollner *Heinrich Kist*
Sturm. and company leader *SS-Rottf."*

Printed form:
"Obligation certificate
1) I am aware and have been informed today that I will be punished by death if I tamper with Jewish property of any kind.
2) I must maintain absolute secrecy about all measures taken during the evacuation of

the Jews, also towards my comrades.
3) I undertake to devote my entire person and manpower to the speedy and smooth implementation of these measures.
Auschwitz, 30 Sept. 1944.

Heinrich Kist
SS-Rottf."

[?] Sickness statistics of Quarantine Camp BIIa from September 1944. See the respective entries for May 1944. AGK, Zbiór "OB", 383, pp. 9-10

[?] *"Visit of an ICRC delegate to the camp commandant of Auschwitz (September 1944). ... Along the roads, or more precisely the Polish roads, leading from Teschen to Auschwitz, we encountered groups of men and women who were being looked after by SS men, wearing the striped clothing of the concentration camps and forming small commandos (work detachments). These commandos worked partly in agriculture and partly in mines.*
These people all have pale, ashen complexions despite working outdoors. All march in step and in rows of four; the guards, rifle under arm, are SS men of the Totenkopf Division….
Finally, we arrive at Auschwitz and, having summoned up the necessary patience, are led into the interior of the concentration camp. From the camp itself, we see only six to eight very large red brick barracks. These buildings appear to be new; all the windows are barred; the camp is surrounded by a wall of concrete slabs, a very high wall with barbed wire.
Conversation with the commandant: As in Oranienburg and Ravensbrück, the officers here are both friendly and reserved. Every word is well calculated, and one senses the fear of leaking even the smallest piece of information.
1) The distribution of the shipments made by the committee seems to be permitted and even regulated by a general order that applies to all concentration camps.
2) The commandant tells us that packages personally addressed to a prisoner are always handed over in full.
3) There are shop stewards for each nationality (French, Belgian, no other nationality was named, but certainly several others).
4) There is a 'Jewish Eldest' who is responsible for all Jewish internees.
5) The shop stewards and the 'Jewish Eldest' may receive collective shipments; these shipments are freely distributed by them. Personal parcels arriving under a name unknown in the camp will be given to the shop steward of the nationality concerned.
6) The distribution of the shipments made by the Committee appears to us to be safe. We have no proof, but our impression is that the commandant is telling the truth when he claims that these distributions are regular and that any theft is severely punished….
We hope to be able to send you soon last names, first names and numbers of Auschwitz prisoners as well as their nationality. In fact, there is a detachment of British POWs working in a mine in Auschwitz who are in contact with these people. We asked the chief confidant in Teschen to do his utmost to obtain all relevant information from the confidant of the commando in Auschwitz.
Spontaneously, the British chief confidant in Teschen asked us if we knew about the 'shower room'. There was a rumor that there was a very modern shower room in the camp where the prisoners were gassed in series. The British shop steward, through his command at Auschwitz, tried to get confirmation of this fact. It was impossible to prove anything. The prisoners themselves did not talk about it.
Once again, when we leave Auschwitz, we have the impression that the secret is well guarded. However, we take with us the certainty that parcels must be mailed, as many as possible and as quickly as possible. Once again, we believe that what is sent will be passed on completely to the prisoners." DCICR, pp. 91-92.

October 1944

1. Labor deployment of the women's camp Birkenau on 1 October 1944. Occupancy: 25,749. APMO, D-AuII/3a, pp. 339a-339b.
Inmates unfit for work and deployment: 6,733, including:
1. inpatients: 1,538

Letter from the Central Construction Office to the Construction Inspectorate "Silesia" with the subject "Construction of air-raid protection bunkers – system Salzgitter – for the CC area": RGVA, 502-1-401, p. 6.
"The chief of the Main Office, SS-Obergruppenführer and General of the Waffen-SS Pohl, during his presence here on 23 Sept. 44, ordered the construction of air-raid protection bunkers – system Salzgitter. After consultation with SS-Sturmbannführer Baer, SS garrison eldest, 2 bunkers of 50 m length each are considered necessary, which can accommodate a total of approx. 1000 persons. About 1200 tons of cement are required for 1 bunker."

Letter from the Central Construction Office to the Construction Inspectorate "Silesia" with the subject "Auschwitz CC II – BW 6 c": RGVA, 502-1-170, pp. 180-180a.
"For Auschwitz CC II BW 6 c, 3 electrically operated circulating-air disinfestation devices were previously planned, which have arrived here and are stored in the construction yard. According to the garrison physician Dr. Wirths, these three devices are now no longer needed, since the arrival of the mobile short-wave delousing device makes their installation unnecessary."
The head of the Central Construction Office asks whether this equipment can be used elsewhere or should remain in storage at Auschwitz.

3. Auschwitz CC II. Labor deployment for 3 October 1944. Total number of inmates: 23,286. APMO, D-AuI-3a/49.
Inmates unfit for work and deployment: 3,208, including:
1. inpatients and recovering inmates: 1,792
2. invalids: 316
4. juveniles until 14 y., inmates: 744

″ twins for experiments: 49

14. quarantine (release): 85.

4. Labor deployment of the women's camp Birkenau on 4 October 1944. Occupancy: 42,973 — APMO, D-AuII/3a, pp. 342a-342b.
Inmates unfit for work and deployment: 24,444, including:
1. inpatients: 1,539
2. inpatients BIIb: 320
3. recovering inmates: 688
4. outpatients: 234
6. juveniles under 14 years: 128
7. juveniles under 14 years BIIb: 40
8. invalids over 60 years: 38
10. quarantine (malaria): 572
13. quarantine (transiting Jews): 16,614
14. quarantine (release): 85.

Letter from the head of the administration to the Auschwitz Central Administration with the subject "Request for lodging equipment for the protective-custody camp": — Blumental, pp. 95-96 (transcript).
"At the request of the first leader of the protective-custody camp of Auschwitz CC II, we ask for the allocation of the following lodging equipment for Camp B II:
230 flatbeds
6000 full blankets
8000 flatbed floor boards
Justification:
1. This camp is used as a reception and transit camp.
2. Some blocks are without flatbeds (see no. 4).
3. The full blankets should be distributed in such a way that there are about 500 pieces on a block and 2 pieces on the inmate.
4. This camp was used as a gypsy camp.
During this time, in spite of the greatest vigilance, a part of platform floor boards disappeared, while another part was broken by overloading and thus became unusable. The flatbeds were occupied not by 5 prisoners, as prescribed, but by up to 15 prisoners in special cases. With this great load, the third level of the platform broke and all the prisoners lying on it fell onto those lying on the second level. This floor then also broke through due to the jolt and the load, so that finally all 3 levels were broken through, and thus the floor boards and partly also the flatbeds [could] *no longer be used."*

Headquarters Order No. 10/44, Monowitz, distinguishes eight SS members and — Frei, pp. 497-499

commends five because they "made successful use of the firearm and thereby prevented prisoners from escaping"; reports a case of inattentive guards, as a result of which prisoners were able to escape, and makes it the subject of instruction; then:

"In another case I had to have a block leader relieved because he irresponsibly allowed prisoners to leave the camp without a guard to go to the kitchen, and also left them without supervision for a long time.

If the many instructions in the headquarters orders, as well as the numerous instructions given by the unit, post and camp leaders are not sufficient to put a definite stop to the escapes of the prisoners, then in the future I will punish every case of neglect of duty – whether from lack of interest or lack of responsibility – with the severest punishment."

The order gives instructions for outdoor practice shootings; and admonishes that radios issued for troop care be used for that purpose as well, rather than for private purposes.

5. Labor deployment of the women's camp Birkenau on 5 October 1944. Occupancy: 42,961. APMO, D-AuII/3a, pp. 343a-343c.

Inmates unfit for work and deployment: 24,444, including:

1. inpatients: 1.580
2. inpatients BIIb: 317
3. recovering inmates: 663
4. outpatients: 251
6. juveniles under 14 years: 128
7. juveniles under 14 years BIIb: 40
8. invalids over 60 years: 38
10. quarantine (malaria): 566
13. quarantine (transiting Jews): 15,560
14. quarantine (release): 92.

"Conc. Camp Auschwitz II Auschwitz II, 4 October 1944 GARF, 7021-108-59, p. 3.

Service Schedule for Tuesday, 5 Oct. 1944." The following places or duty stations are listed with the names of the respective SS members:

Block leader on duty	collection unit
assistant block leader	off duty
disassembling plant	*Sonderkommando* Buch
Vistula trench	camp B II a
camp B II f	camp B II b
air-raid protection trench	camp B II c
Transport readiness	

The signatures of the report leader and the first leader of the protective-custody camp follow.

Letter from the Central Construction Office to the Auschwitz CC headquarters with the subject "Deployment of Prisoner Bricklayers and Carpenters for Gross-Rosen": RGVA, 502-1-256, p. 92.

"The requested 260 prisoner masons and carpenters are released on the basis of the prisoner requisition of 2 -7 Oct. 44 as follows from the listed units:

Unit	*109A, protective-custody camp extension*	*50*
"	*197 B, finishing barracks BA II*	*30*
"	*112B, construction unit BA I*	*50*
"	*114B, construction unit CC II*	*90*
"	*371P, coke bunker nursery Raisko*	*40"*

Letter from the Central Construction Office to SS garrison eldest SS- RGVA, 502-1-401,

Sturmbannführer Baer Auschwitz CC with the subject "Installation of a gas-tight treatment room and shrapnel-protection room in the former crematorium for the SS garrison physician": p. 4.
"The SS garrison physician, represented by SS-Hstuf. Dr. Fischer, requests the conversion of the former crematorium to a dressing or operating room and the construction of additional shrapnel-proof shelters. The conversion is proposed in accordance the attached plan."

10. quarantine (malaria): 575
14. quarantine (release): 94.
transiting Jews: 7,788

APMO, D-AuII/3a, pp. 350a-350c.

1. inpatients: 993
2. transport preparation: 1,907
3. admission: 155
4. juveniles: 321
5. available inmates: 4,412.

Garrison Order No. 26/44 commemorates three SS members who died during a prisoner uprising: Frei, pp. 499-501

"1. In the line of duty fell before the enemy true to their oath to the Führer on Saturday, 7 Oct. 44:
SS Uscha. Rudolf Eder, born 31 Aug. 04 5./33-T-Stuba. AU CC 1
" Willi Freese, " 30 Sept. 21 2./SS-T-Stuba. AU CC II
" Josef Purke, " 28 Feb. 03 1./SS-T-Stuba. AU CC II
We will always keep a faithful memory of the fallen comrades."
The order recalls the duty of secrecy, and announces the issuance of warning notices to be posted everywhere during a "warning week":
"During the warning week, continuous instruction on the dangers of careless chatter is to be given by unit leaders and heads of service. It is to be pointed out that the duty of silence applies primarily to the SS members themselves. Every chatterer is to be confronted with the warning word 'Pst' during this week. If from the beginning of this 'Pst' action ten percent of all SS members and followers warn the other ninety percent with the word 'Pst' and the meaning of this word is understood, namely.
'Attention, enemy is listening! Do not chatter! Silence!'
then the action has fulfilled its task. Care is to be taken that on 16 Oct. 44 the first instruction is given, and that the members of the units and services are made aware of the meaning of the warning slips."
The order then finds fault with sloppiness in motor-vehicle requests; reprimands the public airing of disputes with foreign civilians; announces an officer and a NCO training course each; informs that the library has received books for sale; points out that premium coupons are not to be labeled or stamped; and mentions one lost and six found items.

13. Labor deployment of the women's camp Birkenau on 13 October 1944. Occupancy: 32,098. APMO, D-AuII/3a, pp. 351a-351c.
Inmates unfit for work and deployment: 5,699, including:
1. inpatients: 1,693

Central Construction Office. "Construction application for repair work on buildings and outdoor facilities damaged by bombs in the area of interest of the Auschwitz Concentration Camp." Included is a detailed explanatory report and a cost estimate. RGVA, 502-1-159, pp. 81-90.
"On 13 Sept. 1944, a major air raid took place on the area of Auschwitz and the concentration camp."
Many buildings were damaged or destroyed:
"I. Structures: Repair work is being carried out on the following buildings:
Building Nos. 134, 235, 136, 137, 138, 128, 129, 116, 117, 118, 119, 120, 157A, 157B, 157C, 157G, 157D u. 125.
House nos. 35, 210, 36, 207, 891, 103, 115. 105, 56, 53, 52, 50, 49, 47, 33, 41, 43, 40, 27, 28, 33, 34, 16, 875, 6, 7, 8, 142, 131, 132, 133, 203, 105, 118, 118a, 149, 136, 126, 45, 25, 54, 139, 142, 46, 78, 1, 5, 9, 121, 21, 116, 117, 120, 122, 123, 125, 129, 130, 150, 152,163, 170, 208, Leather factory, bakery, staff buildings, plant nursery, workshops, and Central-Construction-Office office buildings, troop utility camp, motor

pool, blacksmith shop, agriculture, pest control, and armory, further factory buildings of the Vistula Metal Union, cabbage silo and potato storage halls.
Particularly roof damages have to be repaired, masonry and plaster damages have to be mended, destroyed windows and doors have to be replaced, and larger areas have to be reglazed.
II. Outdoor facilities:
Repair of damaged irrigation, drainage, sewerage and electrical systems.
Repair of the siding at PoW camp."
Total cost: RM 284,000.

SS Economic and Administration Main Office, head of Office Group D – Concentration Camps. NARA, microcopy no. T-1021.Vol. III.

"Concerning: preservation of the inmates' labor force.
To the Camp Commandant CC Au.III.
At various labor camps, it has been noted recently that the prisoners housed there do not have the opportunity for adequate sleep as a result of incorrect time management. It is imperative that the commandants of the concentration camps see to it that the prisoners, from whom we must demand the highest performance at all workplaces, have an opportunity to rest after their work is done by getting sufficient and undisturbed sleep.
Each prisoner must be able to sleep at least 7½ to 8 hours if he is to be able to function 100% again the next day. Special care must be taken to ensure that prisoners assigned to the night shift can also sleep the required number of hours undisturbed during the day after returning from their shifts, and that they do not have to interrupt their sleep by roll calls.
In addition, it must be ensured, especially in the labor camps, that each prisoner has a bed to himself and that he has the opportunity to dry wet clothing in his quarters or in rooms specifically provided for this purpose.
All these points must be given special attention by you, so that the health of the prisoners and their use for armament measures will be maintained.
sgd. Glücks
SS-Gruppenführer and Lieutenant General of the Waffen-SS."

Rec. Gr. No. 242/338, Roll. No. 18, Frame 598.

Inmate Infirmary, Outpatient Department B II/a: APMO, microfilm no. 1517/14.
"Sanitary report.
1. 298 prisoners and their clothing were deloused by the disinfection unit, and 543 blankets and various articles of clothing were disinfested.
2. Potato unit Block 3: 17 influenza, 7 diarrhea, 4 angina, 1 louse carrier.
3 Special quarantine for Block 13, Warsaw children/measles, ended today. Children were bathed, clothes, linen and blankets disinfected, block hosed down. Sick count: 3 flu, 1 angina, 1 diarrhea.
4. Block 15: all scabies and barber's-itch patients were transferred to B II/f.
5. November 3: the camp was liquidated, the prisoners transferred to B II/d. The sick and the outpatient clinic move to B II/f."

[2.] Central Construction Office. "List of total inmate deployment as of 31 Oct. 1944 according to decree of SS Main office of 12 Aug. 1943." RGVA, 502-1-256, p. 90.
Total inmate-labor hours: men: 1,377,333.50; women: 118,805; total: 1,496,138.50.
"7.) Premium coupons issued to prisoners during the period under review: Indication in Reichsmark from 1 Oct. 1944 – 31 Oct. 1944. RM 16389,-."

4. A special garrison order mentions that since 1 Nov. 1944 the SS together with the Wehrmacht and the police provide local patrol services, and explains organizational details about this. Frei, pp. 507f.

7. Letter from the Central Construction Office to the Construction Inspectorate "Silesia" with the subject "Shortwave delousing facilities at Auschwitz CC": RGVA, 502-1-332, p. 1.
"In CC Auschwitz there are currently one stationary short-wave delousing plant in CC I and a mobile unit in CC II. According to previous surveys, the mobile delousing plant will be needed until November 10, 1944, for delousing blankets in B.A. II. and afterwards, according to the camp physician SS-Hauptsturmführer Mengele, in the women's CC."

A special garrison order decrees that, because of the appearance of members of the Polish underground army in SS and Wehrmacht uniforms, tighter controls on SS members and Wehrmacht personnel are necessary, and gives detailed instructions to this effect; points out fictitious patrols and requires patrols to show writ- Frei, p. 509

ten commission.

8. Communication from the SS-T. Guards Command Freudenthal to the 8th SS-T. Guards Company Monowitz, with the subject "Gas-Mask Filter": GARF, 7021-103-3, p. 21
"To the above subject, the SS-T. Guards Command 12 gas-mask filters of the years 1941 1941 [sic] *and older. SS-Hascha. Ulbort, Post Leader".*

9. Letter from SS-WVHA to Construction Inspectorate "Silesia" with subject "Construction of air-raid protection trenches at PoW camp, Auschwitz BW 14 k": RGVA, 502-1-281, p. 120.
"Construction order no. 1486.
On the basis of the documents submitted, I hereby issue the order for the construction of air-raid protection trenches at PoW camp-Auschwitz – BW 14 k."

10. "Headquarters of Birkenau Labor-Education Camp. Auschwitz I". Release certificate for Franaszek Stefan, in the camp from 18 September to 10 November 1944" The release took place on 10 Nov. 1944." ISD, folder 103.

"Headquarters of Birkenau Labor-Education Camp. Auschwitz I". Release certificate for Susanne Arondel, in the camp from 18 August to 10 November 1944" The release took place on 10 Nov. 1944." ISD, folder 103.

"Headquarters of Birkenau Labor-Education Camp. Auschwitz I". Release certificate for Georgette Feret, in the camp from 2 September to 10 November 1944" The release took place on 10 Nov. 1944." ISD, folder 103.

"Headquarters of Birkenau Labor-Education Camp. Auschwitz I". Release certificate for Stanislawa Muszynska, in the camp from 15 August to 10 November 1944" The release took place on 10 Nov. 1944." ISD, folder 103.

11. Headquarters Order No. 11/44, Monowitz, promotes one SS member; appoints a new leader of the Auschwitz III guard battalion because of the transfer of the old one; appoints a new leader of the Blechhammer labor camp; commends four SS members for having "prevented the escape of prisoners by their prudent behavior"; then: Frei, pp. 510-512
"5. Use of firearms.
A very serious case of recklessness, which a member of the headquarters' staff committed in a subcamp in a drunken state and which resulted in the loss of a human life through misuse of a firearm, gives me cause to point out for the last time that I will call upon every SS member who shoots recklessly in the area – even if no consequences should result from it – for the severest punishment.
The above-mentioned case will find its atonement through the SS and Police Court."
The order then mentions the six-day imprisonment of a camp leader because of inadequate security precautions which allowed prisoners to escape; condemns the occasional lack of supervision of prisoners in certain departments, and demands constant supervision by at least one SS member; reminds prisoners to keep their lockers locked at all times; explains administrative matters of the Auschwitz III Camp; points out the compulsory nature of training sessions; and refers to certain paragraphs of an army directive.

Garrison Order No. 28/44: Frei, pp. 512-514
"1. Treatment of map material.
By order of the SS Economic and Administrative Main Office – Office Group D – Oranienburg, dated 1 Nov. 44, all maps displayed in the offices with markings of properties and external units, from which unauthorized persons can gain insight into the construction and distribution of production sites, are to be treated as secret Reich matter in accordance with Army Regulation 99.
The same applies to construction plans, floor plans etc. of the concentration camps

themselves.
2. Working hours of the prisoners
As of 13 Nov. 44, working hours for prisoners are set as follows:
6:30 o'clock move out
16.00 " return.
The prisoners have a short lunch and continue working without a break."
The order then schedules a training course for officers and NCOs; deplores the lack of participation in vocational training courses; orders that from now on, when leaving the camp, loaded firearms must be carried, and at least two men must go together; searches for an SS member; mentions the theft of two bicycles as well as one lost and one found object each; and declares three camp passes invalid:

16. Construction Order No. 1467 of the SS-WVHA regarding "Erection of 12 barracks for the severely Ill in BA III -BW 12b" to the Construction Inspectorate "Silesia": RGVA, 502-1-281, p. 44.
"On the basis of the documents submitted, I retroactively issue the order for the erection of 12 barracks for the seriously ill in BA III, BW 12b – PoW camp II Auschwitz."

17. "Headquarters of Birkenau Labor-Education Camp. Auschwitz I". Release certificate for Gawelczyk Alois, in the camp from 4 October to 17 November 1944" The release took place on 17 Nov. 1944." ISD, folder 103.

20. Letter from the WVHA, head of Office Group D, to the commandants of the CCs, including Auschwitz, with the subject "Identification of Jewish prisoners": NARA, microcopy no. T-1021.Vol. III. Rec. Gr. No. 242/338, Roll. No. 18, Frame n. 608.
"In the future, the identification of Jewish prisoners is to be done in such a way that a narrow yellow stripe is sewn over the triangular mark of the prisoner's type.
The yellow Jewish star is no longer to be used."

21. "Headquarters of Birkenau Labor-Education Camp. Auschwitz I". Release certificate for de Bonis Francesco, in the camp from 13 October to 21 November 1944" The release took place on 21.11.1944." ISD, folder 103.

Letter from the Central Construction Office to the Construction Inspectorate "Silesia" with the subject "Removal of the blue-gas [hydrogen-cyanide] delousing plant in the reception building" with reference to a letter from the Construction Inspectorate dated 28 February 1944: RGVA, 502-1-333, p. 2.
"According to the above-mentioned letter of 28 Feb. 44, the removal of the blue-gas delousing system in the reception building BW 160 was to be carried out by all means possible. Regarding an inquiry from Berninghaus, Duisburg – manufacturer of the 22 gas-chamber doors – information is requested as to whether, in view of the present situation, the installation should still be pursued."

24. "Headquarters of Birkenau Labor-Education Camp. Auschwitz I". Release certificate for Możak Josef, in the camp from 13 October to 24 November 1944" The release took place on 24.11.1944." ISD, folder 103.

25. Garrison Order No. 29/44: Frei, pp. 514-516
"1. Renaming.
By order of the chief of the SS Economic and Administrative Main Office Berlin, with immediate effect the Concentration Camp Auschwitz I is to be renamed
Auschwitz Concentration Camp,
the concentration camp Auschwitz III the designation
Monowitz Concentration Camp.
There is no longer an Auschwitz CC II."
The order then declares further renamings and transfers resulting from this; moves the curfew to 20:00 o'clock, and limits leaves to a maximum of 25% of the

SS members off duty; sets new duty hours; mentions the punishment of an SS member for giving unclear orders; again reprimands wild shootings and announces severe punishments for it; finds fault with laxity in the "German salute"; forbids taking out schnapps from public venues; forbids the payment of tips to prisoners' barbers as an aid to escape; permits trotting only for certain teams of horses; decrees weekly statements of the number of prisoners receiving premium coupons; recalls the prohibition against building campfires in the open; and announces the address of Mittelbau CC. (The rest of the document is missing.)

28. Central Construction Office. "List of material requirements for the construction of 2 Salzgitter Type I c bunkers on the grounds of CC I. Auschwitz." RGVA, 502-1-229, p. 6.
Listing of construction materials required "for 1 bunker … for 2 bunkers."

This date marks the beginning of the last part of the treatment book of the dental ward of the prisoner infirmary of Auschwitz CC, which extends until January 17 with daily entries. There, 2,775 prisoner registration numbers are noted, 42 of them on January 17, 1945. APMO, D-Aul-5/4, pp. 1-84. ISD, folder 166.

A Standort[sonder]befehl informs of changed instructions for the clothing of prisoners due to the serious supply situation. Frei, p. 517

29. Letter from the SS garrison physician to the Central Construction Office with the subject "Areginal delousing plant in the new laundry building": RGVA, 502-1-255, p. 137.
"As I have learned, the gas chambers there intended for hydrogen cyanide are now to be converted to the Areginal process. I would like to point out that I cannot recognize a need for the conversion, since the short-wave delousing system now installed there provides me with sufficient delousing capacity. Moreover, the procurement of Areginal, as with Cyklon B, is already fraught with difficulties."

The documents must be submitted by November 24. RGVA, 502-1-261, p. 116.

2. Central Construction Office. "List of total inmate deployment as of 30 November 1944 according to order of SS Main Office of 12 Aug. 1943." RGVA, 502-1-256, p. 90.
Total inmate-labor hours: men: 574,570; women: 218,513.75; total: 793,083.75.
"7.) Premium coupons issued to prisoners during the period under review: Indication in Reichsmark from 1 Nov. 1944 – 31 Nov. 1944. RM 7835,-."

Central Construction Office. Handwritten list of orders carried out by J.A. Topf & Sons, Erfurt: RGVA, 502-1-96, pp. 33-33a.

Invoice date	Amount RM	Description
24/5/1943	522	three-phase motor
27/5/1943	53,702	erection of 5 pcs. three-muffle cremation furnaces
27/5/1943	1,884	supply of a deaeration system
27/5/1943	40	delivery of steel
27/5/1943	7,820	supply of aeration and deaeration system
27/5/1943	916	hourly-wage work fitter for carrying out assembly
11/6/1943	1,070	supply of hot-air system for Crematorium II
16/6/1943	1,348	extension of Crematorium II and III
16/6/1943	842	work in crematorium
30/6/1943	1,255	non-contractual work – fitter
15/7/1943	110.61	hourly-wage work PoW camp B.W. 30b
2/2/1943	921.60	hourly-wage work from 4 Jan. – 31 Jan. 1943
22/2/1943	112	hourly-wage work from 18 Jan. -21 Jan. 1943
22/2/1943	7,820	delivery of deaeration system
23/8/1943	365	assembly and travel…
23/8/1943	5,791	installing waste incinerator
30/6/1943	1,583	hourly-wage work from 1 April – 30 May 1943
19/10/1943	39,192	installing disinfestation facility
21/12/1943	2,524	deaeration system for Cr. IV-V.
16/3/1944	46.75	6 stick thermometers
25/3/1944	18,760	safety elevators
12/6/1944	659.30	hourly-wage work Wilhelm Koch
2/12/1944	232.50	travel expenses for Chief Eng. Prüfer

5. A special garrison order gives detailed instructions for the next collection for the Winter Relief Charity, and it schedules the Yule celebrations. (The rest of the document is missing). Frei, p. 518

6. Letter from the head of the Central Construction Office to the Construction Inspectorate "Silesia" with the subject "Erection of 12 barracks for the seriously ill in BA. III – BW 12b". Description of the floor plans of the barracks in Construction Section III: RGVA, 502-1-261, pp. 115-115a.
"On the occasion of the meeting of the chief of the Main Office [WVHA, Office C V] *on 23 Sept. 44 in Auschwitz, the suspension of construction work in BA. III of CC II was ordered, and demolition of the 12 barracks for the seriously ill was begun."*

Letter from the Central Construction Office of Auschwitz to the Central Construction Office Breslau-Lissa with the subject "Arm bands of 3 Polish workers": RGVA, 502-1-280, p. 30.
"The Central Construction Office of the Waffen-SS and Police Auschwitz U/S asks for sending back the 3 armbands of 3 Polish workers sent to there."

7. Note from Central Construction Office: RGVA, 502-1-255, page number illegible.
"With reference to the letter there of 30 Nov. 44, the Central Construction Office is to see to accelerated completion of the hydrogen-cyanide plant. The conversion from hydrogen cyanide to the Areginal process is demanded by the Supreme Command of the Armed Forces according to a letter from the SS garrison physician dated 20 May 44."

Central Construction Office. File memo with the subject "Meeting on 4 Dec. 44 at the SS garrison eldest. Participants: SS-Stubaf. Baer, SS-Stubaf. Bischoff, SS-Ostuf. Jothann, SS-Oscha. Hatzinger". RGVA, 502-1-29, p. 57.
"1.) <u>*Demolition of the Cr. in Camp II Birkenau.*</u>

In order to ensure an accelerated completion of the demolition work, the Central Construction Office is to take over the overall management. The assigned prisoners and SS men of the BBD, and headquarters assigned for supervision will continue to remain at the construction site. Details about the further implementation will be arranged by the undersigned in connection with SS-Oscha. Hatzinger. […]
5.) Treatment room in the former Crema.
The northwest side of the building is to be filled with earth masses just like the southeast side. The entrance is to be made in alignment with the existing entrance on the southeast part. The window openings in the part of the building that has not yet been converted are to be bricked up. The approach of the earthworks shall be carried out by the BBD. of the Central Construction Office. The Central Construction Office shall perform the necessary masonry work."

Letter from the camp leader of the Fürstengrube subcamp to Bergassessor Düllberg, Fürstengrube-Altanlage, with the subject "Invalids' Unit": NI-10907.
"On the occasion of your recent visit to Camp South, you approved the formation of an invalids' unit, which was to consist of prisoners who, as a result of a mining accident, could be used temporarily or permanently for light work only. At the moment, according to the list overleaf, 5 prisoners are eligible for this unit."
The five prisoners are listed with the following information: inmate no., last name and first name, day of accident, findings; among them are two Jews (A-4152 and B-6904).

8. Letter from the Central Construction Office to the headquarters of the CC, Department IIIa, with the subject "Prisoner requisition." RGVA, 502-67, p. 227.
"Above office requests immediate assignment of 100 inmate workers for demolition work at crematorium Camp II."

9. Waffen-SS Monowitz CC, Administration. Letter to the camp leader of the Golleschau field command. "Secret!": NARA, microcopy no. T-1021.Vol. III. Rec. Gr. No. 242/338, Roll. No. 18, Frame n. 613-614.
"Subject: Rations allowance for prisoners assigned to the Interceptor Program. Reference: Decree of the Reich Minister for Food and Agriculture of 11 Sept. 1944. In accordance with the above decree, L.L. prisoners assigned to the Interceptor Program, who are used exclusively underground and have to perform the heaviest work under unfavorable conditions, receive, in addition to the basic rations and the heavy laborer allowance, a special allowance of
200 gr. meat
200 gr. margarine
800 gr. rye bread
100 gr. of nutriments
per head and week.
The management of the companies is to be approached so that a special application for the granting of this special allowance can be made to the responsible trade supervisory office for inmates who are called upon to perform heavy physical labor. The approval of the responsible trade supervisory office is then to be submitted immediately to here. It is expressly pointed out that this rations allowance may be applied for only for prisoners employed exclusively underground. The matter is to be treated as 'secret'."

SS Economic and Administrative Main Office, head of Office Group D – Concentration Camps. Letter to the commandants of the CCs with the subject "Treatment of incarcerated Jewish inmates": AGK, NTN, 94, p. 143. Odpis (transcript).
"In agreement with the Reich Security Main Office, I order, in amendment of my circular D I/1 Ref.: 14 c 9/U./S.- secret Comm. No. 1113/44 of 30.8.44, that Jewish prisoners may be transferred to the nearest hospital in case of urgent operations. The transfer may only take place if the operation to be performed is carried out by a Jewish doctor, who must also be transferred. The sick prisoner and the doctor must then

be transferred back immediately after the operation has been performed. I expect you to apply the strictest standards to all such cases, and to transfer only those prisoners for whom an operation is unavoidable.
Glücks
SS-Gruppenführer and Lieutenant General of the Waffen-SS."

11. Garrison Order No. 30/44 announces the results of a collection for the Winter Relief Charity; reports SS members with methanol poisoning after acquiring alcohol from Poles; requires monthly strength reports from all units and services; schedules a NCO training; announces free distribution of venison to married SS members for Yule; invites civilian employees to Yule; schedules a children's Yule party; announces guest performance by a comedian and a dance band; mentions organizational matters concerning motion pictures for children; exhorts reasons for vacation overruns; prohibits wearing of Finnish, Romanian and Bulgarian decorations; gives instructions for submitting applications to the Red Cross; and announces temporary closure of the SS library for Yule preparations. — Frei, pp. 519f.

14. SS Economic and Administrative Main Office, Office Group D – Concentration Camps. Letter to the commandants of theCCs with the subject "Treatment of the incarcerated Jewish prisoners": — AGK, NTN, 94, p. 145. Odpis (transcript).
"Subsequent to the above circular, I inform you in agreement with the chief of Office D III that, if a Jewish doctor is not available for the operation to be performed, another suitable prisoner doctor may also perform the necessary operation."

SS Economic and Administrative Main Office, Office Group D – Concentration Camps. Letter to the 1st camp physicians of the CCs with the subject "Treatment of the incarcerated Jewish prisoners": — AGK, NTN, 94, p. 144. Odpis (transcript).
"The camp physicians are instructed to obtain information from the camp commandants concerning circular DI/1, Ref: 1409/U./We. of 9 Dec. 44. It is noted that operations can be performed in civilian hospitals even if no Jewish prisoner doctor is available for the operation. In this case, a suitable other prisoner doctor is to be used for this purpose. Under no circumstances shall it occur that a physician of a civilian hospital shall perform the operation. A medical orderly or a supervisor must be present at every operation performed by an inmate doctor. The transfer back to the camp is to be carried out immediately after the operation. The first camp physicians will contact the hospitals and discuss the best-possible procedure. The 1st camp physicians instruct the doctors and medical orderlies assigned to the subcamps accordingly, and ensure that the above order is carried out properly.
The Chief of Office D III
Lolling, SS-Standartenführer."

15. "Headquarters of the Labor-Education Camp Auschwitz. Release certificate for Bettini Guido, in the camp from November 3 to December 15, 1944" The release took place on 15 Dec. 1944." — RGVA, 502-1. 437, p. 28.

20. Central Construction Office. File memo with the subject "14 delivered steel cylinders with chlorine gas": — RGVA, 502-1-29, p. 61.
"The 14 steel cylinders delivered by I.G. Farbenindustrie Werk Bitterfeld on behalf of the Chlorator Company on the basis of the above order [of 25 Sept. 1942], *which are currently still filled with chlorine gas, were intended for the 5 delivered chlorination plants 4092-94 and 4374-75."*

21. United States Army Air Forces. Four important air photos: — NARA, Record Group no. 373.
– Mission 15 SG/994 15 PG. Can D 1533, Exposure: 3021. Auschwitz CC II/Birkenau;
– Mission 15 SG/994 15 PG. Can: D 1533. Exposure: 3022. Mission 15 SG/994 15 PG. Can: D 1533. Exposure: 3022. Auschwitz CC II/Birkenau and the adja-

cent area to the east.
– Mission 15 SG/995 5 PG. Can: D 1535. Exposure: 4018. Auschwitz CC II/Birkenau;
– Mission 15 SG/997 5 PG. Can: D 1535 (first half), Exposure: 3013. Auschwitz CC II/Birkenau. Construction Sections II and III.

Payroll slip of a company of the guard battalion Auschwitz CC, listing 329 SS members with the indication of "Serial No.", "Rank", "Name", "Control No.", "Receipt" and a column without heading, in which changes are indicated (date and place of departure). In the column "Receipt" are the signatures of the persons concerned. The first name is 'Oscha. Mussfend," leaving 26 Sept. 44. The highest rank is SS-Oberscharführer; the others are SS-Unterscharführer, SS-Scharführer, SS-Rottenführer, SS-Sturmmann, SS-Schütze. There are also 2 staff sergeants and 5 sergeants. A list of 109 female supervisors begins with number 204, of which Chief Supervisor Mandl (leaving: 8 Dec. 1944) can be found under number 243. The list ends at no. 312 and continues on the last page with no. 321 to no. 336. Only male SS members are listed there. The list has no heading and no date; 21 Dec. 1944 is the last date that appears in the column of changes.

GARF, 7021-198-54, pp. 96-101.

22. Headquarters Order No. 12/44, Monowitz, conveys Christmas and New Year's wishes; announces the results of a collection for the Winter Relief Charity; commends seven SS members because "their prudent conduct prevented the escape of prisoners"; informs how to reach the new Hohenlinde labor camp by telephone; gives instructions for correct addresses of labor camps; exhorts adherence to official channels; and forbids raising flags at official buildings except by special order.

Frei, pp. 521f.

27. United States Army Air Forces. Air photo of Auschwitz CC II/Birkenau and the surrounding areas, especially to the west and south.

NARA, Record Group no. 373. GX 225/138.

Garrison Order No. 31/44 laments the death of five SS members in a bombing raid; announces the result of a collection for the Winter Relief Charity; commends an SS member "for the prisoner escape he prevented"; cancels the issue of extra soap, and requires showing ration documents for issuing any soap; demands immediate delivery of enemy leaflets to company commanders and station chiefs; declares attempts to subscribe to the "Upper Silesian Newspaper" futile because of circulation stop; mentions a lost property; and declares three camp ID cards or armbands for invalid.

Frei, pp. 522-524

29. Central Construction Office. "Report on destruction of buildings in the area of Auschwitz CC by bombing of enemy planes on 23 and 26 Dec. 1944":
"Destruction and damage caused by bombing by enemy planes on 23 Dec. at about 19 o'clock and on 26 Dec. at about 12.45 o'clock were as follows:"
A) SS troop hospital
1) gatehouse
2) accommodation barracks for physicians and administration
3) accommodation barracks for nurses
4) garage with heating center
5) kitchen barracks
6) barracks of the women's department
7) barrack for surgical department
8) barrack of dept. for internal medicine
9) barracks for maternity ward and children's department

RGVA, 502-1-401, pp. 154-156.

10) infection barracks
11) connecting corridors
12) duct of district heating plant
13) electric overhead lines
14) shrapnel-protection trenches
B) troop accommodation
1) lodging barracks
2) three lodging barracks
3) other barracks
C) Birkenau depot
1) barracks of the guard troops
2) yard facilities
D) railroad tracks
E) House of the Waffen-SS, House 25 and House 157
F) SS settlement.

1945

January 1945

16. Auschwitz CC II. Labor deployment for 16 January. Total number of inmates: 4.482 APMO, D-Aul-3a/41.
Inmates unfit for deployment: 2.228, including:
1. inpatients: 954
2. recovering inmates: 57
3. invalid inmates: 400
4. Juveniles up to 18 years: 770

Garrison Order No. 1/45 cites a Himmler order to recycle scrap material; schedules a NCO training course; reminds of vocational training courses still in progress; threatens penalties for various violations of railroad regulations; announces a slide show; prohibits trespassing on yards and barns because of livestock diseases; and mentions the accidental switching of two pistol couplers. Frei, pp. 524-526

Introduction

The trial of former Auschwitz camp commandant Rudolf Höss, staged in Warsaw from March 11 to 29, 1947, famously laid the foundation for the later historiography of the Auschwitz Camp: despite their inevitable biases and their obvious historical and methodical limitations, the Polish investigators nevertheless attempted to reconstruct as complete a picture as possible of events at the Auschwitz Camp. They focused on 50 aspects of camp life, each supported by numerous testimonies and a few documents. The aspects covered were:[1]

1. Function of Auschwitz Concentration Camp in the political system of the government of the Third Reich.
2. The creation of the camp and its expansion
3. Structure of the camp
4. Technical facilities of the camp
5. Organization of the camp
6. The system of camp authorities
7. People in the camp (local significance of arrivals/deportations)
8. Type of inmates, their numbering, external marking, and the treatment of the different groups
9. Registration of prisoners
10. Prisoners by nationality
11. Soviet prisoners of war
12. Women
13. Children and adolescents
14. Functionaries of the prisoners
15. Demoralization, denunciation, prostitution
16. Ways and means of preventing escapes
17. Admission to the camp

[1] AGK, NTN, 174, pp. 13-38.

18. Quarantine
19. Housing (water supply, latrines, delousing of blocks)
20. Clothing and bedding – delousing
21. Food rations
22. Hunger in the camp
23. Parcels and letters
24. Smuggling and "organization
25. Daily orders, roll calls, work, maltreatment
26. Discipline and punishment, courts
27. The penal company
28. Suicides
29. Diseases
30. Organization of camp hospitals and health care
31. The activities of the German doctors
32. The activities of the prisoners' doctors
33. Medical experiments
34. Selections/sorting and their function
35. Killings in the commandos
36. Shootings
37. Hangings
38. Injections with lethal poisons
39. Gassings
40. Data on the number of victims
41. Looting of victims' property
42. Covering of traces and [destruction] of crematoria
43. Transport to other camps
44. Releases
45. Underground [Resistance] organizations
46. Miscellaneous
47. Collective justice
48. Revolts
49. Criminals
50. Dissolution of the camp

The accusation of the alleged gassings was, of course, in the foreground because of its importance, but this did not prevent the investigators from treating the other aspects just as thoroughly. The trial of members of the Auschwitz camp staff, staged in Krakow from November 25 to December 16, 1947, followed the same line as the Höss Trial.

The Auschwitz Museum, founded in 1947, was entrusted with historical documentation in addition to its conservational duties. In 1957, when the first issue of the journal *Zeszyty Oświęcimskie* appeared – and two years later in German translation under the title *Hefte von Auschwitz* – the museum began to shed light on the various aspects of camp

life, and to analyze individual important documents. Beginning in 1958, Danuta Czech set about the arduous task of compiling the results of this research chronologically in a series of essays,[2] which were then presented in a summarized and updated form in a large book titled *Das Kalendarium von Auschwitz* (Czech 1989, English 1990 as *Auschwitz Chronicle*). In subsequent issues of the journal and in various monographs, the Auschwitz Museum staff continued their work along the line drawn by the Höss Trial, and for scholars in the field, the *Kalendarium* became a kind of vast thematic pool from which to draw topics for study. Whatever the verdict on the historical value of these writings – in some cases, starting with the *Kalendarium*, it can only be harsh (cf. Mattogno 2022) – the efforts of the Auschwitz Museum should be acknowledged for having captured camp life in Auschwitz in its entirety, something that is unfortunately unknown to most non-Polish historians.

European and American historians, despite their arrogance towards their Polish colleagues who worked for thirty years under the communist yoke, show that they are afflicted with a unique narrow-mindedness that leads them to see nothing in the Auschwitz Camp but the alleged "extermination camp." If one reads the books of their top specialists such as Jean-Claude Pressac (1989; 1994a, especially pp. 34 and 39; 1994b) and Robert Jan van Pelt (2002), one definitely gets the impression that Auschwitz had no other function for them than that of exterminating Jews. This narrow-mindedness is in direct proportion to their ignorance of the history of the camp and its documentation, which in turn leads to blindness, as in the case of Richard Breitman, whose enigmatic interpretations of various radio transmissions intercepted and decoded by the British in connection with Auschwitz show that he believes the Auschwitz camp authorities thought of nothing else day in and day out and had nothing else to do but exterminate Jews (see Mattogno 2021, pp. 26-48).

In this part of the present study, I examine three fundamental aspects of camp life that pertain exclusively to the registered prisoners:

1. The registration of prisoners admitted to the camp,
2. the number of prisoners in the camp (strength or occupancy), and
3. the mortality among the prisoners in the camp.

The first aspect was addressed by Danuta Czech in her *Kalendarium*, but her approach was purely chronological, so the prisoner registration numbers are given on the basis of the date on which they were assigned. However, if one wanted to know when a particular number was assigned, one would have to scour the pages of the *Kalendarium* and search for the appropriate transport among numerous other entries for a wide variety of events. This can be time-consuming because the numbering was not always strictly chronological; for example, registration numbers 20951-20986 were assigned on September 18, 1941, but subsequent numbers 20987-20992 were not assigned until February 11, 1942.

---

[2] The general title of this series of essays is "Kalendarz wydarzeń w obozie koncentracyjnym Oświęcim-Brzezinka"; they appeared divided by years as follows in the Museum's journal *Zeszyty Oświęcimskie*: 1940-41: No. 2/1958; 1942: No. 3/1958; 1943: No. 4/1960; 1944 (until June 30), No. 6/1962; 1 July 1944 to 27 January 1945: No. 7, 1963. German translation: "*Kalendarium* der Ereignisse im Konzentrationslager Auschwitz-Birkenau," in *Hefte von Auschwitz*: 1940-1941: No. 2 (1959), pp. 89-118; 1942: No. 3 (1960), pp. 47-110; first half 1943: No. 4 (1961), pp. 63-111; second half 1943: No. 6 (1962), pp. 43-87; first half 1944: No. 7 (1964), pp. 71-103; July 1944 to January 1945: No. 8 (1964), pp. 47-109.

In the present study, therefore, I present all known number series of all known categories, male and female, in a sequential order, as will be seen in detail in the first section.

The second aspect relates to the number of prisoners present in the camp. In this case, the *Kalendarium* provides sketchy partial data scattered over almost 1,000 pages, derived from much more extensive documents and from communications of the Resistance movement in Auschwitz. In this regard, it is known that some of the German radio transmissions intercepted by the British during World War II and decoded by the Code and Cypher School at Bletchley Park concern the Auschwitz Camp. As with other concentration camps, many of these intercepted radio transmissions report daily changes in occupancy, covering the period from January 1942 to January 1943 for the men's camp and from September 1942 to January 1943 for the women's camp.

In 1997, the British government turned over these decoded radio transmissions to what was then the Public Records Office in London, making them available to researchers. For the next 21 years, no orthodox Holocaust historian saw the need to analyze these documents. The reason for this is that they are seemingly abstruse columns of figures that must remain completely incomprehensible to any historian who has not studied in detail the relevant documents available, especially the Auschwitz *Stärkebuch* (Strength Books or Occupancy Books). The way prisoner numbers are added (new arrivals/admissions) and subtracted (departures) sometimes changes from message to message, and this is possibly the reason that has prevented even the historians of the Auschwitz Museum from dealing with these documents.[3]

In the second section, I fill this gap by placing the British decrypts in the context of documentation that is already known but has been little and unsystematically used.

The mortality of registered prisoners, i.e., prisoners who actually died and whose deaths were registered at Auschwitz, does not seem to be of much interest to Western historians, who are all obsessed with acknowledging and counting only the claimed gassing victims. Only Pressac attempted serious statistics, based largely on a summary of Auschwitz Death Books he found in Moscow, in addition to other sources. Pressac concluded that the death toll among the registered prisoners was in the order of 130,000.[4] Five years later, he corrected this figure, which is very close to that attested by documents: about 135,500.

Particularly meritorious for this research subject is the digitization of the data contained in the surviving Death Books by the Auschwitz Museum in collaboration with two German scientists, Thomas Grotum and Jan Parcer, who carried out a precise statistical analysis. The result of this work was the publication of 80,010 names of prisoners who died in Auschwitz, arranged alphabetically in two series depending on the source (Death Books or other documents), including all personal data (Staatliches Museum… 1995).

However, even the commendable essay by Grotum and Parcer has two serious shortcomings: first, it lists the number of deaths only by month and without any attempt to even understand the problem; second, it omits other important documents that enabled

---

[3] In contrast, the historians of the Majdanek Museum have already evaluated the data from the corresponding decrypts. See Kranz et al.

[4] Pressac 1989, pp. 144-146; in his 1994 book, he reduced that figure after a few corrections to 126,000 (1994b, pp. 192-195).

me to find the names of 3,452 other prisoners who died at Auschwitz and who do not appear in the Auschwitz Museum's two lists of names. These prisoners are listed in alphabetical order in the appendix of this study. In addition, thanks to all available names, I have reconstructed a daily picture of mortality in Auschwitz from October 1941 to December 1943, as far as the sources allow.

The three parts of this study are full of tables that clearly summarize the data on registrations, camp occupancy, and mortality. The result is an easy-to-read reference work that is useful and even indispensable for Auschwitz researchers.

1. Transports and Registrations

1.1. Prisoner Registrations and Related Documents

The "Service Regulations for Concentration Camps (Camp Regulations)", which was transcribed by Investigating Judge Jan Sehn without giving a date, contains very detailed instructions on the bureaucratic practices of interning people in concentration camps, which was the task of the political department of the camp. Here are the most important points:[5]

> *"The clerk deputizing for the aforementioned clerk in his absence is responsible for the accurate keeping of the registry. General correspondence not concerning the prisoners in detail is registered by file number, while correspondence directly concerning the prisoners is summarized in files (folders) arranged for each prisoner by inmate number. These folders are legibly labeled with numbers, names, dates of birth and prisoner types. These folders can be marked in a particularly clear manner by using colored folders in accordance with the color angles to be worn by each prisoner, without deviating from the current numbering.*
> *The clerk responsible for the continuous correction of the prisoners' file must pay particular attention to the fact that, for the sake of simplicity, two files are kept. In one file, all prisoners in the camp and those transferred for interrogations or trials are recorded in phonetic order. In the case of transferred prisoners, the cards are marked with a tab 'T' /i.e. on transport/. The second file includes, also in phonetic order, all deceased prisoners, released prisoners and prisoners transferred to another camp. In the case of deceased prisoners, the cards are crossed out in red.* […]
> *The officer in charge of new arrivals is responsible for the quickest and smoothest handling of the necessary admission formalities. In the case of ordered protective custody, he receives the necessary information days in advance from the referring authorities /RSHA, RKPA, Stapoleit-, Kripoleitstellen/:*
>
> *Protective-custody order*
> *Crime report*
> *Transfer form*

[5] AGK, NTN, 131, pp. 180-185.

In case preventive detention is ordered by the police:

Police order of preventive detention.
Disclosure of charges
Crime report
Transfer form
Extract of criminal record
Mug shot.

Missing admission or detention documents will be requested. The classification of the prisoners to be made is evident from the arrest warrant. With the available documents he [the case officer] goes to the protective-custody camp's prisoner-admission room to issue the new file cards. Each prisoner has to sign the completed card, and at the same time he is given his prisoner number. Each new inmate who has not been issued a warrant by the referring authority will be read the warrant. If the admitting authority has handed over the warrant to the detainee, the detainee must hand it in at the time of admission. In both cases, a certificate stating that he/she is aware of the contents of the arrest warrant or the reason for taking the detainee into custody shall be presented to him/her for signature. This certificate is sent to the admitting authorities. Before the new file card is phonetically filed, the existing detention records are filed in a new file /folder/ and these are numbered. Birth certificates are requested free of charge from the registry offices to supplement the detention records. The referring authorities are informed of the transfer of the prisoners. Honorary prisoners are given special treatment by order of the RSHA. They are granted the greatest possible relief in prison (permission to smoke, read books and magazines, etc.), are housed individually, and are not required to perform work of any kind. They are completely separated from the other prisoners. Prisoners of education committed by order of the RF-SS are housed separately, in accordance with their criminal offense, in the 1st or 2nd educational tower. When educational prisoners are admitted, the head of the Office Group D of the WVH in Oranienburg is to be informed in writing. Furthermore, a monthly report on the age of all prisoners serving time in the concentration camp must be submitted to the head of the Office Group D. […]

Transfers are carried out by an SS NCO /usually a block leader/, who receives the necessary accompanying papers from the officer in charge, and takes the prisoners the day before /transfers usually take place early the following day/ to the bath, to the doctor's examination and to get changed /effects chamber/. Afterwards, these prisoners are housed separately /cell building/ until they are transported away. Before the prisoners are transferred, they have to sign a declaration of loyalty. A distinction is made between individual and collective transports. In the case of individual transports, the prisoner in question is taken by train to the requesting office. In the case of collective transports, the prisoners are brought to the assembly points/railway stations/ by means of prisoner-transport vehicles, and taken over responsibly by the transport leader /police officer/ against signature on the accompanying document. The accompanying document is returned to Department II by the SS-NCO concerned. The transport leader receives the transport slips. The authority requesting the prisoners is notified in writing in the case of collective transports. The RSHA or RKPA is notified in writing in the case of transfers and repatriations.

Transfers of prisoners to other camps are ordered by the chief of Office Group D, with notification of the RSHA, RKPA, Stapoleit-, Kripoleitstellen, and are carried out only with collective transports. Larger transports are carried out by rail in wagons provided for this purpose. Smaller transports can also be carried out by prisoner-transport vehicle,

if the camp in question is not too far away. Individual transports will be made only on special instructions of the camp commandant.
Leave of absence will be granted only in very urgent cases. Permission will be given by the RSHA, which will announce the duration and conditions of the leave. When the leave begins, the RSHA and the office to which the prisoner in question is to report are notified by telex. In addition, the prisoners must be reminded of the strictest adherence to the instructions given in the order when taking leave. They have to sign the declaration of loyalty.
In the case of dismissals, the leader of the protective-custody camp must first decide whether the decree of the RF-SS applies – Inspector of Conc. Camps /now chief of Office Group D/ – of 10 Oct. 1940. – Ref. 14 c 11/10.40./L./Ot. If the prisoner to be released is still needed as a laborer, the chief of Office Group D, who in turn will pass on a corresponding justification to the office ordering the release, is to be notified immediately on the basis of the aforementioned decree. Until the final release, the prisoner may be granted relief from detention /food allowance, smoking, wearing long hair, segregation from other prisoners, etc./. When a prisoner is released, he has to sign a declaration of loyalty, just as in the case of transfers and leaves of absence, which is sent to the admitting authority /except RSHA and RKPA/. A second copy is placed in the file. The RSHA or RKPA, as appropriate, and the referring agency, if RSHA and RKPA are not directly involved, must be notified in writing of the release. If the prisoner to be released has sufficient cash at his disposal, he shall pay for his own transportation to the place designated by the ordering authority; otherwise he shall receive a voucher which he shall hand in at the station counter for the purpose of buying a ticket. The release certificate to be given to the prisoner may be signed only by the camp commandant or his representative."

Instructions on the death of prisoners are dealt with in the third section.

Prisoners arriving on a collective transport were accompanied by a transport list, which usually gave the last name, first name and date of birth for each prisoner.[6] Other lists, such as those for deportation from Berlin, were more detailed: in addition to the above data, place of birth, occupation, marital status (single/married), age, ability to work, residence, identification card no., identification number of deportation[7] and, if applicable, a comment were listed.[8] (see Document 2a).

Newly arrived prisoners (Admissions, admissions) were entered in special lists prepared by Department II (the political department) and titled "*Zugänge am* …[Date] *eingeliefert vom* RSHA" ("Admissions on… [date], committed by the RSHA"). These lists contained the prisoners' personal data: a serial number (*Lfd. Nr.*), the type of detention, the prisoner number assigned to them, last and first name, date and place of birth, and occupation.[9]

One copy of these lists also contained an additional column at the end indicating a date of death, if applicable.[10]

---

6 See Document 2.1-2. Transport list of July 31, 1942 for 1007 Jews from Westerbork to Auschwitz (first page) and accompanying letter of September 11, 1942. ROD, Doos 50, 250i.
7 The first number on the list, 28829, means that 28828 people had been previously deported.
8 See Document 2.3. Transport list of February 3, 1943 for 952 Jews from Berlin to Auschwitz (first page). NARA, A3355 Film I, Part I.
9 See Document 3.1, from: Staatliches Museum…, p. 56 of the illustrations appendix.
10 See Document 3.2. YVA, M.8.ITS.BD, AU 2, p. 716.

The Admissions Book (*Einlieferungsbuch*) consisted of double pages, each with 10 lines; the left page contained columns with the registration number, last and first name, marital status, date and place of birth, and residence. On the right side were listed the nationality, the type of imprisonment, the admitting office, the day of admission/transfer/release and, if applicable, the date of death. This type of documentation has not survived for Auschwitz; Document 4 refers to Stutthof CC.[11]

The Number Book (*Nummernbuch*) was a 500-page index; each page was divided into four columns of 25 consecutive numbers, corresponding to the prisoners' registration numbers. Next to each of the 4 columns of numbers were 3 additional columns for variants, which were given in abbreviated form, e.g., "*üb*.[*erstellt*]" = transferred, "*entl*.[*assen*]" = released, "†", deceased, etc. For the Auschwitz Camp, only the "Number Book 150001-200000" has survived, but it is incomplete. Document 5 reproduces the first page.[12] This register has been partially transcribed by the Office of Chief of Counsel for War Crimes. Document 5A is a transcription of page 87 of the original.[13]

Among the personnel documents, the most important were the Prisoner Personnel Card, which contained all data, including physical characteristics,[14] and the Prisoner Personnel Sheet, which was also detailed but structured differently.[15] There was also a special index card,[16] on which a prisoner had to indicate the preferred mailing address for his correspondence ("*Bevorzugte Post*"). At the bottom, the letters "E" and "A" indicated the receipt of a letter for the prisoner and the exit, i.e., the dispatch of one of his letters from the camp; the week of the prisoner's stay in the camp was noted in the corresponding field in columns 1-12.

In addition, an ID photo was taken of each prisoner, showing him from three sides.[17] All these personal documents made it impossible for a prisoner to leave the camp unnoticed; he could only leave the camp as released or escaped, transferred or deceased, and the corresponding change was noted in the aforementioned documents.

1.2. List of Registered Prisoners Compiled by Kazimierz Smoleń

On December 16, 1947, Kazimierz Smoleń, later director of the Auschwitz Museum from 1955 to 1990, made an "affidavit" in which he stated the following:

> *"I was a political prisoner in the Auschwitz Concentration Camp from June 6, 1940 to January 18, 1945. During this time, I worked as a responsible prisoner in the admissions office of the Political Department of Auschwitz Concentration Camp. My duties included registering the persons of all prisoner transports arriving at the camp. For each transport, I saw the list of names of the transport and all transport documents. Together*

[17] See Document 9, from: Piper/Świebocka, illustration on unpaginated page between p. 32 and p. 33.

with me worked 10 other prisoners, and our duties consisted of assigning prisoner [registration] numbers to all new arrivals, recording their personal data, filling out index cards, conducting correspondence with the offices that had arranged for their internment, and all routine bureaucratic work.

With each transport that arrived at the Auschwitz Camp, the office that had ordered the internment sent a letter to the camp, to which was attached the transport list or, in the case of individual arrests, the personal arrest orders. In this way, for each transport, we were able to determine where the prisoners came from and what the reason for their arrest was. We kept these transport lists and accompanying letters on file.

In July 1944, the burning of the files of the Political Department began. The reason for this was the rapid advance of the Red Army, and the first discussions also began about the future evacuation of the camp. Unterscharführer Brocks[18] *informed us that the transport lists were to be taken away within a week and burned in the crematorium in Birkenau* [which of the four?].

Therefore, I instructed my comrades to transcribe the transport lists. Since this material was too voluminous, we could not write down the names of the prisoners, but we made lists indicating the transport numbers, the date of arrival at the camp, the office that had ordered the internment, and the numbers assigned to the prisoners. Since the [registration] numbers of the prisoners were separate for men and women, we made two different lists. In the Auschwitz Camp, the [registration] numbers of the prisoners were assigned consecutively, i.e. the first prisoner received the number 1, the last prisoner the number 202499. Thus it was possible to determine the strength [=the number of registered prisoners] of each individual transport on the basis of the assigned prisoner numbers."

In August 1944, Smoleń handed over the two completed lists to a prisoner who was employed in an external unit. The latter smuggled the lists out of the camp. After the Soviets arrived in Auschwitz, Smoleń was able to retrieve them.[19]

There is an obvious inconsistency in these statements, for the lists are said to have been completed in August 1944 and smuggled out of Auschwitz during the same month, yet the men's list extends to September 18, 1944,[20] while the women's list ends on February 26, 1944.

In addition, the origin of the Jewish transports is not usually indicated in either list: The corresponding line is blank. This omission is obviously intentional, since, according to the preserved documents, Smoleń was able to know "where the prisoners came from and what was the reason for their arrest."

The two lists were used by Danuta Czech in her *Kalendarium*; she arranged the numbers in chronological order, while Smoleń arranged them in numerical order. The difference is not insignificant, because many numbers were assigned days or months after the immediately preceding numbers. I therefore reproduce here the lists compiled by Smoleń's prisoner group,[21] on the basis of which the day of transport can be easily traced by the registration numbers.

---

[18] Presumably SS-Unterscharführer Karl Reinhard Broch.

[19] Affidavit by Kazimierz Smoleń, Krakow, 16 December 1947. NOKW-2824. The attached lists were given the same identification number.

[20] See Document 10. NOKW 2824, p. 2.

[21] NOKW-2824, pp. 1-29 (Men's List to Nov. 2, 1943) and 1-13 (Women's List from Nov. 2, 1943 to Sept. 18, 1944), pp. 1-26.

The two lists were copied in typewritten form and evaluated by the Polish investigating judge Jan Sehn with regard to the trial of Rudolf Höss.[22]

For the later period not covered by these lists, I have used the incomplete data of the Auschwitz *Kalendarium*, obtained from the International Red Cross, and other sources, which I indicate where appropriate.

Boys born in the women's camp were registered with numbers of the men's series, girls with numbers of the women's series; both cases were designated by the term "newborn" or "child."

The places marked with an asterisk are taken from the "Quarantine List" (see Subchapter 1.5.), those in bold type from Czech's *Kalendarium*; for the period covered by the list of the camp doctor of Auschwitz CC (see Subchapter 1.3.), I have quoted the places given there.

The origin of the transports of Jews given in the *Kalendarium*, especially those from Poland, is not entirely correct, but from the point of view of the present study, which is purely numerical, the problem does not arise.

Table 1.1: List of registered male prisoners 1940-1944 / ordinary numbers

1940

Reg. Nos.	Date	Place of Origin	Quantity
1-30	20/5/1940	Sachsenhausen	30

?	202410-201413	4
January	202414-202499	86
Total	193130-202499	9370

Some of the prisoners deported to Auschwitz in the last months of 1944 remained in the camp after the general evacuation in January 1945. The prisoners were listed by nationality by the Soviets,[30] the sick were medically examined. With the help of prisoner physicians, most notably Otto Wolken, they compiled a long list that included the prisoner's last and first name, registration number, sex, age, nationality, date of arrest, date of arrival at Auschwitz, and medical diagnosis (see Documents 47f.). The date of arrival is sometimes approximate, sometimes patently incorrect. I list the numbers after the last number of the "Smoleń List" (No. 199531):

Table 1.3: Sick prisoners found by the Soviets in Auschwitz

Reg. No.	Age/Year of Birth	Nationality	Arrival in Auschwitz
199609	61	German Jew	25/9/1944

The "*Kommandobuch Arbeitskommando Golleschau*" ("Command Book of the Golleschau Labor Command"), which I will discuss in more detail in Chapter 1 of Part Three, contains the names of 36 prisoners with non-consecutive registration numbers from 201492 to 202267, unfortunately without the date of their arrival at Auschwitz.

1.3. List of the Camp Physician of Auschwitz CC

The camp physician of Auschwitz was obliged to prepare regular reports on those prisoners who had arrived and been registered in the camp within the last five days. These reports were addressed to the "Headquarters, 1st Leader of Protective-Custody Camp of the CC," and contained the results of the medical examination according to fitness for work, the assigned registration numbers, the origin of the prisoners, and any quarantine regulations. For example, the report of 12 February 1943 states:[31]

"To the
Headquarters
Leader of Protective-Custody Camp of the CC
Auschwitz

The 408 inmates admitted from 6 to 10 February 1943 were examined by the camp physician.
389 prisoners are healthy and fit for work.
16 prisoners are fit for light labor.
3 prisoners are unfit for work.

The new arrivals:
No. 100444 to 100497 from Kattowitz (prison)
100498 " 100522 " Vienna (prison)
100523 " 100805 " Jewish Homestead Bialystok
100806 " 100839 " Kattowitz (prison)
100840 " 100851 " Stutthof CC
must pass a 3-week quarantine here in the camp before they can be assigned to work.
Only those prisoners who do not come from a prison, collection camp or the like can be put to work directly.
The camp physician of Auschwitz CC
sgd. signature
SS-Untersturmführer".

In the following table, I summarize the data from the ten surviving reports.

Table 1.4: Summary of report data of the camp physician for 1943

Date	Period	Reg. Numbers	RGVA Fundus	page
7/2/1943	1-5/2/	98765-100443	502-1-121	121

[31] RGVA, 502-1-121, p. 119. See Document 11.

The numbering of the reports is broadly consistent with that of the Smoleń list, although there are some differences, as shown in the table below:

Table 1.5: Inmate registrations according to the camp physician's reports and to the Smoleń-List

Reg. No. Physician	Reg. No. Smoleń	Place of Origin
98765-98777	98765-98777	Kattowitz (prison)

1.4. List of Registered Inmates, Series "A" and "B"

This document is entitled "List of Jewish Transports."[32] Series "A" runs from 13 May to 24 August 1944 and contains numbers 1-20000; series "B" runs from 31 July to 21 September 1944 and contains numbers 1-10481. Also part of the document is the list of female prisoners in series "A," which covers the period from 16 May to 20 September 1944 and contains numbers 1-25378. The lists were made secretly, most likely by prisoners who worked in the Political Department, however, Smoleń did not mention anything about their preparation (bold: calendar; asterisk: quarantine list):

Table 1.6A: List of registered inmates of the "A" series

The list of prisoners employed in the Trzebinia oil refinery contains the names of 800 Jews (mainly Hungarians and Poles) with the non-consecutive numbers B-2905 to B-10269.[34] The "*Kommandobuch Arbeitskommando Golleschau*" lists another 458 Jews with the consecutive numbers B-5709-5859, B-11105-11404[35] and other scattered numbers.

1.5. The Quarantine List

This document titled "Quarantine List"[36] was furtively prepared by Otto Wolken. Wolken had been transferred to the quarantine camp BIIa in Birkenau on October 2, 1943, and was assigned to the outpatient clinic of this sector. This handwritten document contains the date of arrival of the prisoners in the camp (usually only men), their category (place of origin or nationality), the numbers assigned to them, the quantity of registered prisoners, the date of the end of quarantine, and the block number where they were to be housed. The first two pages contain a column indicating the strength on November 23, 1943, while the following pages contain a column for "Notes."

Attached to the interrogation protocol of Otto Wolken by Jan Sehn of April 24, 1945 is a typewritten version of the list, apparently based on the handwritten list, which explicitly lists the alleged gassings in an additional column entitled "Gassed."[37] This column is missing from the handwritten version of this document, and the numbers of the allegedly gassed persons are inserted in faded and often illegible writing into other columns containing normal information such as block number and strength. The series of numbers is not without gaps, since not all prisoners who came to Auschwitz passed through this quarantine camp.

25357-25378	20/9/1944	Hungary	22

Czech's *Kalendarium* is very incomplete with respect to later numbers, listing only A-25417-25438 (22 Jews from Annaberg on October 2, 1944), A-25471-25525 (55 Jews from Budapest on October 18, 1944), and A-25528-25640 (113 Jews from Slovakia on October 19, 1944; Czech 1989, pp. 892, 911). The prisoner list found by the Soviets in the Auschwitz-Birkenau-Monowitz complex shows the following assignments of registration numbers:[50]

Table 1.11: Female Jewish inmates of the "A" series who stayed in Auschwitz

Reg. No.	Age/Year of Birth	Nationality	Arrival in Auschwitz
A-25445	47	Polish Jewess	23/8/1944

[49] Number A 24469 was not issued.
[50] GARF, 7021-108-22 and 7021-108-23.

Reg. No.	Age/Year of Birth	Nationality	Arrival in Auschwitz

1.8. List of Educational Inmates of the "E" Series

Educational inmates were persons who were work-shy or who had not returned after a leave of absence and were interned for the purpose of "re-education for work". These prisoners were initially given consecutive camp numbers. Czech informs us, however, that Auschwitz CC introduced a new numbering system for this category of inmates on February 1, 1942, beginning with "EH 1." The new system applied not only to inmates who were already in the camp, but also to inmates who had already been released and those who had died. A total of 1137 "EH" numbers were assigned (Czech 1989, pp. 170f.). The list of numbers assigned in the concentration camps as prepared by the International Red Cross explains that the regular registration numbers previously assigned to educational prisoners were assigned to other prisoners in February and March 1942. From 16 July 1941 to 31 January 1942, 1,134 prisoners were interned, 13 of whom were classified as political prisoners and retained their original numbers (Internationales… 1965, p. 3). The quantity of reassigned numbers would thus amount to 1,121.

However, there are no German documents on the arrival of the educational prisoners at the camp; the only known document is a list prepared by the Resistance movement at Auschwitz, which shows the clearly anachronistic numbering of the "EH" series, which in fact begins with 1 on 16 July 1941.[51] Most of the inmates were Polish; there were also about a hundred Russians, a few dozen Frenchmen, and 35 Italians. I reproduce the list with its inconsistencies (number 292 appears twice, number 4543 is missing); the entry "1-26/9/1941" is duplicated because it concerns two different groups of internees (from Silesia and Eastern Poland).

[51] AGK, NTN, 155, p. 290.

Table 1.13: List of registered educational inmates (July 1941 – February 1944)

Date/Month	Reg. Numbers	Date/Month	Reg. Numbers	Date/Month	Reg. Numbers
16/7/1941	1-16	1-30/4/1942	1776-2144	May 1943	4240-4542

1-26/9/1941	181-292	1-23/7/1942	2825-3014	August 1943	5483-5832
1-26/9/1941	292-362	1-28/8/1942	3015-3024	September 1943	5833-6199
16/10/1941	363-396	1-25/9/1942	3025-3028	October 1943	6200-6600
17-31/10/1941	397-447	2-9/10/1942	3029-3035	November 1943	6601-6860
4-28/11/1941	448-645	3-20/12/1942	3036-3044	December 1943	6861-7144
1-31/12/1941	646-909	January 1943	3045-3434	1-17 January 1944	7145-7400
2-30/1/1942	910-1153	February 1943	3435-3640	February 1944	7401-7549
2-28/2/1942	1154-1374	March 1943	3641-3902		
3-31/3/1942	1375-1775	April 1943	3903-4239		

According to this source, on 20 February 1944, 489 educational prisoners were still present, 13 in Auschwitz I and 476 in Auschwitz III; 1,379 had died, 269 had been transferred to the status of protective-custody prisoners, and the remaining 5,901 had been released.[52]

Jan Sehn has compiled a long list of educational prisoners, beginning on 21 October 1941 and ending on 10 September 1944.[53] The source is not given, and the number he gives – 9.339[54] – does not correspond to the total of his list, which is 9,453 prisoners. The list does not coincide in any way with the list compiled by the Resistance.

F. Piper states that there were a total of 11,186 educational prisoners, 9,193 men and 1,993 women (Piper 1993, p. 102), but also gives no sources. It is curious that he reproduces the list of the Resistance mentioned above (*ibid*., p. 107), but it extends to February 1944 and to number E-7549; where the remaining 1,644 prisoners came from is not clear.

Total: 430

Between 1943 and 1944, numerous people were interned in the so-called “Birkenau Labor-Education Camp”, which was later called “Auschwitz I Labor-Education Camp”. These were foreign civilian workers who had violated their labor contracts. After serving their sentences, they were sent to the Bielitz Labor Office, a branch of Auschwitz, from where they were either sent back to the factory where they had previously worked or assigned to another job. These prisoners were not registered, so they were not included in

the "E" series of educational prisoners.[55] According to the surviving lists of names, at least 304 prisoners in this category were arrested and released, 205 men and 99 women.[56] In the following table, I give the chronological distribution of the releases:

Table 1.16: List of educational inmates released from the Birkenau Labor-Education Camp (July 1943 – December 1944)

Month/Date	#	Month	#	Month	#	Month	#
July 1943	2	November 1943	3	May 1944	27	September 1944	50
August 1943	3	December 1943	11	June 1944	57	October 1944	29
1/9/1943	3	January 1944	1	July 1944	67	November 1944	2
October 1943	7	April 1944	4	August 1944	37	December 1944	1

These figures are incomplete. In July 1944, 71 prisoners were released – 33 men and 38 women – and transferred to the Bielitz Labor Office;[57] in August 1944, 84 prisoners – 43 men and 41 women[58] –, were released, making a total of at least 355 prisoners.

Finally, no fewer than 192,300 prisoners were transferred from Auschwitz to other camps in 1944, not including the approximately 67,000 prisoners still in the camp on January 17, 1945, who were subsequently evacuated. Among these 192,300 transferred were at least 98,600 unregistered Jews (Mattogno 2005).

1.9. List of Gypsies of the "Z" series

The first transport of Gypsies arrived at Auschwitz on January 3, 1943. These inmates were recorded in two separate registers titled "*Hauptbuch des Zigeunerlagers*" ("Main Book of the Gypsy Camp"), one for men and one for women. The prisoners are listed there by name with all personal data, the date of internment and, if applicable, the date of death, according to a sequential numbering system that goes up to 10094 (July 8, 1944) for men and 10849 (July 21, 1944) for women. In July 1944, the two registers were stolen by three Polish prisoners working in the Gypsy camp and hidden in a barracks. On January 13, 1949, employees of the Auschwitz Museum found these books, some of which were damaged by moisture. In the early 1990s, the Auschwitz Museum published a complete transcription of the two registers in two volumes (State Museum…).

In many cases, the "Admission to Camp" column is illegible. However, Czech provides a continuous series of numbers ("Z" series), for both men and women, which I cite below.

1.10. List of Soviet PoWs

Soviet prisoners of war (PoWs) were registered in a special card file. Jerzy Brandhuber has written a detailed article about this, which is very old, but still fully valid. The cartotheque contains personal cards from no. 2 (7 October 1941) to 9997 (8 February 1942; Brandhuber, p. 51; see Document 18). In fact, however, 7,641 cards exist (ibid., p. 35). As the author explains in a note, the records for October 6 are to be assigned to the following day, when the first POWs arrived (ibid., note 48, p. 18). Danuta Czech mentions a quantity of entries that differs from that in the cartotheque, probably filling in the gaps based on the numerical order of the registration numbers.[59] In the following table, I compare the two records.

Table 1.18: List of registered Soviet PoWs, "R" series

Date	Admissions acc. to Cartotheque	Quarantine List	Admissions acc. to *Kalendarium*
6/10/1941	60	/	/
7/10/1941	1442	/	2014
8-9/10/1941	1558	/	2145
14/10/1941	785	/	900
19/10/1941	1512	/	1955
20/10/1941	940	/	986
25/10/1943	1209	/	1908

[59] By February 8, 1942, Czech lists 10,079 POWs, but the cartotheque lists only 9,997; since 49 numbers were duplicated, the total number of admissions is 10,046. It is not known how to explain the difference of (10,079 – 10,046 =) 33 prisoners.

Date	Admissions acc. to Cartotheque	Quarantine List	Admissions acc. to *Kalendarium*
15/11/1941	60	/	75

2. Occupancy

2.1. Fluctuations of Occupancy 1942: the *Stärkebuch* (Men's Camp)

This handwritten register is a fragment of the *Stärkebuch* (literally Strength Book) of the men's camp in two volumes: the first contains 240 pages, the second 156.[60] The document covers the period from January 19 to August 19, 1942. The following entries are registered there:[61]

– strength at morning roll call
– deceased prisoners
– deceased prisoners of war
– released prisoners
– transferred prisoners
– new arrivals during the day
– strength at evening roll call

As a rule, the strength from one day to the next is also given, for example: "Strength from 19 to 20 January 1942." From 1 February, once a week, the "at to noon roll call on…" is also given.

This list was evaluated with great care by Investigating Judge Jan Sehn, who transcribed its numerical data[62] and compiled various statistics. The most important among them are:

– a daily summary of Soviet prisoners and POWs who died, arrived, were released, escaped and were transferred;[63]
– a daily summary of the total strength and deaths of both inmates and Soviet prisoners of war;[64]
– statistics of deaths by age;[65]

[60] APMO, D-AuI-3/1, Stärkebuch.
[61] See Document 19. APMO, D-AuI-3/1, Stärkebuch, Vol. 2, p. 157.

[63] *Ibid.*, pp. 76-83.
[64] *Ibid.*, pp. 91-97.
[65] *Ibid.*, pp. 100-103.

– a summary of deaths by nationality: Jews, Poles, Czechs, re-education prisoners, Germans, Frenchmen, Yugoslavians, Russians, others;[66]
– a summary of deaths of Jews by nationality: stateless Jews, Frenchmen, Slovaks, Dutchman, Belgians.[67]

The strength book records the total strength of the men's camp and, separately, that of the Soviet prisoners of war. Prisoner occupancy is obtained by subtracting the first number from the second, but offset by one day, as I will explain below.

The following table shows the daily variations: the initial total strength, the prisoner occupancy, the number of Soviet PoWs from the previous day, new arrivals, departures, and the final total strength.

For further clarification, on January 20 the total strength was 11,610 prisoners, of whom 1,490 were Soviet PoWs; thus, the change was: 11,610 + 28 – 44 = 11,594. Prisoner occupancy (given in the versions intercepted by the British) is calculated as follows: 11,610 [total strength of the 20th] – 1,490 [Sov. PoWs of the 19th] = 10,120, inmate occupancy.

Table 2.1: January 1942

Day	Total Strength Start of Day	Inmates	Soviet PoWs	Admissions	Departures	Total Strength End of Day
19	11,703	10,193	1,510	4	97	11,610

2.2. Fluctuations of Occupancy According to British Intercepts

In my study, The Making of the Auschwitz Myth, I reported, supplemented and commented on the German radio messages intercepted by the British that referred to Auschwitz (Mattogno 2021, Part 1), with the exception of the messages about daily fluctuations in camp strength, which were transmitted monthly to the WVHA and required special investigation. These daily fluctuations were recorded in at least two regular reports, the daily prisoner-strength report (*Häftlingsstärkemeldung*) and the protective-custody camp report (*Schutzhaftlagerrapport*).[68] The British intercepted and deciphered the first series of reports for the men's camp, with some gaps, in the period from January 1942 to January 1943, and for the women's camp from September 1942 to January 1943.[69] For the period from January 19 to August 19, 1942, the series for the men's camp can be completed thanks to the *Stärkebuch*.

[68] TNA, HW 16-17. German Police Decodes Nr 3 Traffic: 16.4.42. ZIP/GPDD25/5.5.42, n. 22/23/24.
[69] TNA, HW 16-10; cf. Mattogno 2021, p. 23.

2.2.1. The Men's Camp

The reports were prepared monthly.[70] In the intercepted radio messages, the numbers have the following order: the day, the initial strength (morning roll call), admissions, departures, the final (end-of-day) strength (evening roll call), number of Jews, Poles, German political prisoners and Soviet prisoners of war.

The initial-strength column pertains only to inmates; the total strength is the sum of this column and the PoW column, but the strength for the latter refers to the previous day, as in the *Stärkebuch*. Total strength is the sum of the final strength of inmates and prisoners of war. On 20 January, for example, the final strength of inmates was 10,120, and that of PoWs was 1,490, so 10,120 + 1,490 = 11,610 total strength.

Admissions are added to the initial strength, departures are subtracted, and the result is the final strength.

For example, again referring to January 20: 10,225 + 3 – 35 = 10,193.

The final strength plus the number of PoWs gives the total strength: 10,120 + 1,490 = 11,610; this total strength is divided into the categories given in the last four columns, but incomplete; these individual numbers actually yield: 215 + 9,407 + 2 + 1,490 = 11,114, while the total strength on 20 January is 11,610; thus 496 unclassified PoWs are missing. This point will be clarified later.

January, February, March 1942

In January and February, the initial strength (with one exception) corresponds exactly to that of the *Stärkebuch*; from March 6, the prisoner occupancy corresponds to that recorded in the *Stärkebuch* a day or two earlier, which is due to errors by the British decipherers who assigned the intercepted data to wrong days, especially since data were not intercepted on all days. For this reason, I introduce a column of *Stärkebuch* data in the table in question, which I call "*Stärkebuch* Start". For days with missing data, the starting strength is the one specified in this column; for example, the starting strength on March 1 is 10,187.

Usually, the final strength of one day is the same as the initial strength of the next day; this fact, together with the *Stärkebuch* data, makes it possible to correct errors in the wiretap logs.

April and May 1942

As of April 10, the column that until then showed the inmate occupancy, shows instead the total strength, hence including the Soviet PoWs, so that the column "Initial Strength" becomes superfluous, since the corresponding data are already given in the tables to the *Stärkebuch*. To total strength, the admissions are added and the departures are subtracted, resulting in the final strength. Again, the breakdown of the categories into which the final strength is subdivided yields a lower total than the inmate occupancy. Again with reference to April 10, the result is 1,063 + 8,415 + 1 + 308 = 9,787, but the prisoner occupancy is 9,948.

May's summary follows the system in place since April 10. On May 1, the following anomalous data are reported, which therefore refer to the women's camp rather than the men's camp. The initial strength (morning roll call) is reported as 7,426 prisoners:

---

[70] See Document 20. TNA, HW 16-10. ZIP/GPCC20/14.5.42.

Admissions = 0; departures = 1; strength at evening roll call (7,426 – 1) = 7,425:

7,426	0	1	7,425	6,288	26	101	16	994

The distribution among the five categories then listed, the first of which undoubtedly concerns female Polish prisoners, corresponds exactly to the prisoner population at the evening roll call: 6,288 + 26 + 101 + 16 + 994 = 7,425.

There are, however, some minor inconsistencies, for by 1 May 1942 there were 7,433 women prisoners registered at Auschwitz, 26 of whom arrived that day; on 30 April there were no admissions, but there were 7,407 prisoners registered. Obviously, the 26 new arrivals affected the strength on the evening of 1 May: 7,407 + 26 = 7,433.

However, the tables of the strength of the women's camps compiled by the British on the basis of intercepted German radio messages begin in October 1942, as mentioned above, so it is not clear from which intercepted radio message the data in question originated.

June 1942

Beginning June 20, the column that previously indicated inmate occupancy at evening roll call contains the strength of the Reich Germans.

August 1942

The total strength for the month of August shows many discrepancies with that of the *Stärkebuch*, so I am including a column entitled "Total Strength *Stärkebuch*" in which I reproduce the correct data from that record.

September 1942

Starting in September, the summaries lose the section on German political prisoners. The change in document strength is given according to a different system: The additions and departures of a given day, added and subtracted from the total strength of the previous day, give the occupant strength for that day. The following examples from the first four days of September will make the explanation clearer:

Day	Total Strength	Admissions	Departures	Germans	Jews	Poles	PoWs
1	22,355	0	194	506	11,387	8,008	166
2	22,666	596	285	505	11,658	8,489	166
3	22,329	62	399	533	11,321	8,454	166
4	21,989	22	362	551	11,050	8,408	166

The calculation is as follows:

22.255 + 596 – 285 = 22.666

22.666 + 62 – 399 = 22.329

22,329 + 22 – 362 = 21,989, and so on.

As in the previous summaries, the sum of the numbers for the four categories into which the inmates are divided never adds up to the total strength, e.g., for September 1:

506 + 11,387 + 8,008 + 166 = 20,067, instead of 22,355,

or even (in terms of total occupancy)

505 + 11,658 + 8,489 + 166 = 20,818, instead of 22,355.

This calculation system allows us to check the numbers and correct the errors found in the summary of changes, and it even allows us to determine the occupancy for days

without data, provided that such data are available for the next day. The first day without data is September 6; the strength I gave (21,763) is the strength on 9/7 (19,684) minus the admissions plus the departures of that day, that is, 19,684 – 16 + 2,095 = 21,763.

In general, it can be assumed that the figures transmitted by the camp administration to the WVHA were correct, so that the calculation anomalies noted in the summary can be attributed to deciphering or transcription errors by the British.

The number of departures on 9/9 (302) is not given, but results from the calculation. The drop on 9/10 cannot be 1,543 prisoners, as stated in the summary; the correct figure is 543, since: 17,967 (strength on 9/9) + 128 – 543 = 17,552 (strength on 9/10). Therefore, the strength on 9/11 would be 17,552 + 42 – 463 = 17,131 instead of 17,113. Here, the digits of the number of admissions were swapped: 42 instead of 24; in reality, it is 17,552 + 24 – 463 = 17,113.

The strength on 17/9 (17.507) contains a spelling mistake: 17.507 instead of the correct 17.107. This results from the number of the previous day, 16/9: 17.196 + 85 – 174 = 17.107.

The strength of 22/9 could not have been 13,489 prisoners, since the "Overview of total deployment" ("*Übersicht über den Gesamteinsatz*") of 22 September 1942 shows a total strength of the men's camp Auschwitz and Birkenau of (12,237 + 4,222 =) 16,459 prisoners.[71]

The total occupancy on 9/22 can be calculated from both the numbers for 9/21 and those for 9/23, but the results do not match:

starting from 9/21: 17,288 + 38 – 47 = 17,279

starting from 23.9.: 16.806 – 51 + 234 = 16.989

The correct development of the occupancy results only if there were 337 admissions on 9/21 instead of only 47:

21/9: 7.288

22/9: 17.288 + 38 – 337 = 16.989

23/9: 16.989 + 51 – 234 = 16.806

The correct numbers and the missing ones I calculated are given in square brackets in Table 19.

October 1942

The total occupancy always agrees with the calculation, except in two cases. For 10/20 it reads: 16,665 + 434 – 123 = 16,976 instead of 16,966; it follows that the admissions figure is wrong and must read 424 instead of 434: 16,665 + 424 – 123 = 16,966.

On 28/10 there cannot have been 48 but must have been 456 admissions: 18,432 + 456 – 134 = 18,754 (as of 28/10).

November 1942

The only anomaly of this month concerns 11/27. If the document strength for 11/28 is correct (22,104), then it must have been 21,975 on 11/27, but in that case there must have been 59 instead of only 34 admissions on 11/27, as calculated from the occupancy for 11/26 and 11/28:

starting from 11/26: 22,068 + 59 – 152 = 21,975

---

[71] See Document 21. RGVA, 502-1-19, p. 20.

starting from 28/11: 22,014 – 162 + 135 = 21,975

December 1942

A message from the camp's Resistance movement reports on the situation in the Auschwitz-Birkenau men's camp on December 1, 1942;[72] I compare the corresponding data with those intercepted by the British (first line):

Source	Total Strength	Germans	Jews	Poles	Czechs	PoWs	Others
Brits	22,391	727	10,291	8,394	/	150	2,829
Resistance	22,391	395	8,588	7,745	3,216	150	2,297

The total strength and the number of prisoners of war are identical, the other numbers are very different. The numbers under the category "Others" are obtained by subtracting the numbers in the following five columns from the total strength; in the radio message these are Frenchmen, Dutchman, Belgians, Ukrainians, Russians, Yugoslavians, and, according to the Resistance message, apparently also Czechs. These were probably not considered important enough to be specifically mentioned in the German radio message.

The strength on 23/12 contains a spelling mistake: 25,277 instead of 25,077, as can be seen from the strength on 22/12 and 24/12:

starting from 22/12: 25,178 + 51 – 152 = 25,077

starting from 24/12: 25,007 – 60 + 130 = 25,077.

In the following tables, I give the data for the men's camp. The numbers in square brackets are not correct; the exact numbers before them are taken from the *Stärkebuch*.

2.2.2. The Women's Camp

The summaries for the women's camp are divided into nine columns, the meaning of which is explained below.[82]

The changes are the same as initially for the men's camp: admissions are added to the initial strength, and departures are subtracted from it, resulting in the final strength, which is then repeated as the next day's initial strength.

September 1942

This month's summary contains handwritten explanations of the prisoner categories: "*Gesamtzahl am Tagesanfang*" ("total at begin of day"), "*Zugänge*" ("increase"), "*Abgänge*" ("decrease"), "*Gesamtzahl am Tagesende*" ("total at end of day"), "*Juden*" ("Jews"), "*Polen*" ("Poles"), but no figures for "Russians".

The changes are the same as in the beginning for the men's camp: admissions are added to the initial strength, and departures are subtracted from it, resulting in the final strength, which is then repeated as the initial strength of the next day.

September 1942

This month's summary contains handwritten explanations of the prisoner categories: "total at start of day", "Admissions" ("increase"), "Departures" ("decrease"), "total at end of day", "Jews" ("Poles"), but no figures for "Russians".

As for the calculation, there are few discrepancies.

The strength change for 9/7 is: 16,635 + 96 – 3,529 = 13,202 instead of 13,200; if the total strength is correct, there must have been 94 instead of 96 departures: 16,635 + 94 – 3,529 = 13,200.

For 9/10 we find the following change: 12,664 + 9 – 481 = 12,192 instead of 12,242; this number is certainly correct, since it is given as the initial strength for 9/11. It follows that the number of admissions was 59, not 9:

12.664 + 59 – 481 = 12.242.

The strength on 9/21 is uncertain: 1,214 makes little sense; however, it is known that the initial occupancy on 9/22 was 11,804, so this must also have been the final strength on 9/21 (11,803 in the summary). From this, we can deduce that the starting strength for the 21st was (11,804 + 670 – 311 =) 12,163.

The final strength for 9/23, which is only partially given (11.8??), is: 11,748 + 119 – 48 = 11,819.

October 1942

This month's summary contains handwritten letters above the last five columns: "T" (Total), "G" (Germans), "J" (Jews), "?" and "R." (Russians). There are only two transcription errors in the numbers. On 10/22 the initial strength is 6,705 as the final strength

[82] See Document 22. TNA, HW 16-10. ZIP/GPCC75/4.11.42

of the previous day, not 6,105 as erroneously stated. On 10/28 there were not 34 but 84 departures: 6,544 + 292 – 84 = 7,752 (final strength of 10/28 and initial strength of 10/29).

November 1942

The change on 11/19 assumes the departure of 45 prisoners, not 4; the final strength is not 6,596, but 6,593, as indicated by the initial strength on 11/20, which is 6,593:

19/11: 6,615 + 23 – 45 = 6,593

11/20: 6,593 + 70 – 57 = 6,606 (final strength of 11/20 and initial strength of 11/21).

From 11/27 to 11/30, the final strength column contains arithmetically impossible data. These are most likely the numbers of Russian prisoners. I have reconstructed the actual possible numbers using the usual calculation.

The initial strength of November 30 is 6,551 prisoners, and that of December 1 is 6,549, i.e., a decrease of 2, so that the changes on 11/30 cannot be correct: + 197 – 86 = + 111. If the number of admissions is correct, the number of departures must have been 199; if, on the other hand, the number of departures is correct, the number of admissions must have been 84.

December 1942

The summary for December 1942 has two fundamental differences compared to the previous summaries. First, the column for the final strength is missing, and second, the system for calculating the initial strength is based on changes reported only the following day. For example, the initial strength for 12/2 is: 6,549 (strength 12/1) + 76 – 54 (admissions and departures reported on 12/2) = 6,571.

With the exception of 12/8, the initial strengths are always correct, as can be seen from the calculations of strength change.

Regarding the final strength for 12/3, assume that there were 23 arrivals instead of 33: 6,571 + 23 – 26 = 6,568.

The strength figure for 12/8 (4,782) contains a transcription error: the correct figure, which is results from calculation and with which it continues correctly, is 4,772.

To arrive at the 12/12 strength of 4,945, there must have been either one more admission or one less departure. The 12/16 departures, indicated as "(9)24" in the summary, are simply 24: 5,231 (12/15 strength) + 19 – 24 = 5,226 (12/16 strength).

The strength of 12/30 – written 5.40(5) – must be 5.401.

In Table 2.26, I have kept the column "End strength" and filled it up by the starting strength of the following day (therefore, the end strength of one day corresponds to the starting strength of the next day here, too).

Table 2.23: September 1942

2.3. Strength Fluctuations 1943

2.3.1. January 1943, Men's Camp

For January 1943, as already mentioned, two summaries are available from the British decipherers, one for the men's camp, the other for the women's camp. The data in the column "Total Strength" correspond exactly with the data in the report "Overview of Inmate Deployment at CC Auschwitz U/S" of January 1943, which will be examined later. Since these data are correct, while the calculation gives a different result, the error is obviously not in the total strength, but in the admissions and/or departures.

The number of Polish prisoners on Jan. 16 and 18 (16,138 and 16,869) is mathematically impossible; on Jan. 15, it was 10,142, and 303 persons were added, so that the theoretical maximum strength would have been 10,445. These are therefore transcription errors, for 10,138 and 10,869.

In the following tables, the corrections are indicated in square brackets next to the erroneous number.

Table 2.27: Strength fluctuation January 1943, men's camp

Day	Total Strength	Admissions	Departures	Reich Germans	Jews	Poles	PoWs	?

30	31,228	/	/	/	/	/	/	/
31	31,701	/	/	/	/	/	/	/

2.3.2. January 1943, Women's Camp

The figures in the column "Initial Strength" correspond to the data in the report "Overview of Inmate Deployment at CC Auschwitz U/S" with the exception of Jan. 16 (6,444 instead of 6,448) and Jan. 21 (6,845 instead of 6,885). The calculation of the changes is the same as for the Month of December 1942.

The changes for Jan. 4 must give a result of (5,411 – 5,384 =) – 27, but this does not fit the figures listed: + 42 – 37 = + 5. It should read instead, for example: + 10 – 37 = – 27 or + 42 – 69 = – 27.

On 8/1, the admissions were not 208, but 228, as the calculation shows:

5,307 (strength on 7/1) + 228 – 9 (changes on 8/1) = 5,576 (strength on 9/1).

On 11/1, the occupancy drops from 5,563 to 5,545, i.e. by 18 prisoners, but this cannot be deduced from the individual figures: + 0 – 31 = – 31; therefore, for example, either the admissions are 0 and the departures 18, or the departures 31 and the admissions 13.

On Jan. 16, there must have been 571 admissions instead of 171, because the strength on Jan. 16 (6,448) results from: 5,904 + 571 – 27 = 6,448.

The missing number for departures on Jan. 21 is 476: 7,111 (strength on Jan. 20) + 250 – 476 = 6,885 (strength on Jan. 21).

Finally, admissions on the 22/1 must have been 489 instead of 409, as the calculation requires: 6,885 (strength on Jan. 21) + 489 – 23 = 7,925 (strength on Jan. 22).

Table 2.28: Strength fluctuation January 1943, women's camp

2.3.3. Strength Fluctuations in the "Overview of Inmate Deployment at CC Auschwitz U/S"

This report is a very detailed monthly overview of the strength of the Auschwitz complex and shows how the labor force of the prisoners was used. The report is divided into 16 columns: "*Dat.*[*um*]," "total number," "unfit for work and deployment," "fit for work and deployment," "camp purposes"; this and all of the following nine columns are in turn divided into "*F.*[*ach*]*A.*[*rbeiter*]" (skilled workers), "*H.*[*ilfs*]*A.*[*rbeiter*]" (unskilled workers), "*Lagerwirtschaft*" (agriculture), "*Amtsgruppe C Bauleitungen*" (Office Group C, construction offices), "*Amt W1 Deutsche Erd- u. Steinwerke*" (prisoners who worked for the WVHA's Office WI in the company named Deutsche Erd- u. Steinwerke), "*Amt W IV Deutsche Ausrüstungswerke*," "*Amt W III Deutsche Lebensmit.*[*telwerke*]," "*Amt Z II Zementfabr.*[*ik* subcamp] Golleschau," "SS-*Dienststellen*" (SS offices) "*Rüstungsbe-*

triebe" (armament industries) "*Privatbetriebe*" (private enterprises), "*beschäftigt*" (employed) and "*unbeschäftigt*" (unemployed).[83]

For the men's camp, the reports of January, February, March, April, May, November and December 1943 have been preserved; for the women's camp, the reports of January, February, March, April, May, June, October, November and December 1943. Of all these reports, Judge Jan Sehn transcribed the columns "total number," "not fit for work or service," "employed," and "unemployed."[84]

In the following tables, I provide data only for the first two columns. For the months in which reports are available for both male and female camps, I summarize the data in a single table, to which I add a column for the total number of workers and one for the total number of inmates unfit for work or deployment.

The last row of the report contains the totals for each column; I add another row to give the month's average of each column, which is obtained by dividing this total by the number of days in the month. For example, for January we have a total average strength of (800,026 ÷ 31 =) 25,808, and an average of inmates unfit for work and deployment of (101,664 ÷ 31 =) 3,279, etc.

Table 2.29: Strength fluctuations in January 1943, men's and women's camp

	Men's Camp		Women's Camp		Sums Men + Women

Table 2.37: Average monthly occupancies 1943

	Men's Camp		Women's Camp		Sums Men + Women	
Month	Strength	unfit for work and deployment	Strength	unfit for work and deployment	Strength	unfit for work and deployment
January	25,808	3,279	6,712	1,547	32,520	4,826
February	31,251	4,253	10,630	1,852	41,881	6,105
March	29,967	3,672	13,135	2,044	43,102	5,716
April	32,592	5,482	16,600	4,672	49,192	10,154
May	36,972	7,381	20,049	6,609	57,021	13,990
June	–	–	20,021	7,120	–	
October	–	–	32,941	6,433	–	–
November	55,181	8,565	33,565	7,314	88,746	15,879
December	55,721	10,309	31,079	8,432	86,800	18,741

In 1943, the total number of prisoners increased from 32,520 to 86,800, and the number of those unfit for work and deployment increased from 4,826 (14.84%) to 18,741 (21.59%). According to the very incomplete picture sketched above, the number of those unfit for work and deployment results in a total of 2,706,438 prisoner days, on each of which three meals had to be served to so-called "useless eaters," i.e., more than 8 million meals.

2.4. Strength Fluctuations 1944

Several reports, which have survived only in fragments, provide information about the camp's strength in 1944.

a) The "Overview of the Number and Deployment of Inmates of Auschwitz II Concentration Camp" concerned the men's camp in Birkenau. There are three reports. The first, dated 15 January, covers the period from 10 to 15 January;[85] the second is dated 31 January and covers the period from 27 to 31 January;[86] the third is dated 15 February and covers the period from 10 to 15 February.[87] Each report consists of four pages of pre-printed entries.[88] On the first page, which is of interest to us here, there are, in order:

– Number of inmates on…
– Arrivals by:
  – Admissions
  – Transfers from CC
  – Total
– Departures by:
  – Releases
  – Transfers to CC
  – Deaths
  – Escapes
– Number of inmates today

This number is given on the first line (total) of the second page of the report, together with the number of persons unfit for work. On the last page, the category "Inmates unfit for work and deployment" is divided into three parts with pre-printed titles – 1) "Inpatients", 2) "Invalids" in addition typewritten "and the elderly o. 60 y.", 3) "Arrest" – two other parts were added typewritten: 4) "Juveniles under 14 y." and 5) "Jews from Theresienstadt".

I have analyzed this category, including the quantity of inpatients and invalids from the 1944 reports, in detail in a separate study (Mattogno 2016, pp. 72-85).

b) The reports on the women's camp are titled "Overview of the Number and Deployment of Female Inmates of Auschwitz II Concentration Camp U/S." Five reports remain, structured as follows:

#	Date	Period	Source: GARF, 7021-108-33, pages
1	3 April	1-3 April	160-162 (see Doc. 25)
2	15 May	9-15 May	160-162
3	5 June	1-5 June	148-151
4	19 June	16-19 June	152-155
5	30 June	20-30 June	156-159

[85] GARF, 7021-108-33, pp. 121-124.
[86] *Ibid.*, pp. 125-128.
[87] *Ibid.*, pp. 129-132.
[88] See Document 24. GARF, 7021-108-33, p. 121.

c) The report "Auschwitz II. Labor Deployment for the … 1944"[89] was a daily summary of the distribution of all prisoners fit for work in Birkenau (men's camp) who were employed in the more than 110 commandos of the camp (including those assigned to the 19 civilian companies working in Birkenau). The last page shows the distribution of "inmates unfit for work and deployment" by camp section and category (the first two are "inpatients and recovering inmates"/"*Stationäre u. Sch.*[*onungs*] *Kr.*[*anke*]"). At the end of each report, the occupancy for the day is given.[90]

These documents have been preserved for 43 days; from 28 July to 30 August, the series is continuous, with only two exceptions, 31 July and 20 August.

The Soviets were in possession of the complete set of October reports (as of Oct. 2), but it is not known where these reports are preserved. All that is known is the first page of the October 2 report,[91] and the listing of the crematorium staffing levels, divided into the following units:[92]

Commando	Activity	Location	Shift
57-B	stoker	Crematorium I	day
57-B	stoker	Crematorium I	night
58-B	stoker	Crematorium II	day
58-B	stoker	Crematorium II	night
59-B	stoker	Crematorium III	day
59-B	stoker	Crematorium III	night
60-B	stoker	Crematorium IV	day
60-B	stoker	Crematorium IV	night

The following table shows the total strength and number of inmates unfit for work and deployment.

Table 2.38: Data on occupancy and number of inmates unfit for work and deployment in Birkenau 1944

d) The report "Women's Camp Birkenau, Division IIIa BIa-b/ BIIb.g.e./B.III"[97] was structured in the same way as the previously mentioned report of the men's camp; the series in my possession runs from 1 October to 2 November, but probably goes to 30 December 1944, since Czech mentions dates of 10 and 30 December (Czech 1989, pp. 943, 953).

ee) The "Occupancy Report (Women's Camp, CC AuII Divison IIIa)"[98] is a concise summary of the development of the occupancy of the women's camp at Birkenau. It shows the date of creation, the strength on the morning of the previous day ("*Stärke am*…"), the arrivals, departures and the strength at the evening roll call. The arrivals are subdivided (where applicable) into admissions, transfers, and transit Jews; the departures are subdivided into natural mortality ("gest. nat. Tod"), special treatment (S.B.), releases, special treatment of Jews in the transit camp ("*Durchgangs-Juden S.B.*"), and transfers. The reports run from October 1 to November 30. The few gaps in the documentation can be filled thanks to the other reports mentioned under d), in which not only the daily strength but also the arrivals are reported, so that the departures can also be calculated from the difference to the daily strength.

In the following table I give a general overview of the development of the occupancy of the women's camp in Birkenau for this period.

30/11	13,651			

On January 28, 1944, the total strength of the camp was 77,000 prisoners, of whom 8,000 were sick.[99]

With regard to the Auschwitz III – Monowitz Camp, the following picture emerges from the surviving documents (Makowski, p. 134):

Table 2.40: Average monthly occupancy of the Monowitz Camp

Month	Occupancy	Inpatients	Outpatients
1942			
November	2,300	100	300
December	3,700	380	480
1943			
January	2,900	360	430
February	1,500	170	300
March	3,000	270	450
April	3,200	310	500
May	4,000	380	500
June	4,000	380	500
July	5,000	350	600
August	6,000	400	600
September	6,400	400	620
October	6,600	450	600
November	6,400	500	670
December	7,000	800	650
1944			
January	7,000	970	600
February	7,000	900	700
March	7,800	880	800
April	7,200	950	600
May	9,200	800	850

[99] "Aufstellung über den Häftlingsstand sowie Häftlingseinsatz im Konzentrationslager Auschwitz am 28. Januar 1944". RGVA, 502-1-60, p. 96. See Document 29.

Month	Occupancy	Inpatients	Outpatients
June	10,100	880	1,200
July	10,100	800	1,100
August	11,500	820	1,300
September	10,100	850	1,120
October	9,800	700	1,040
November	10,600	900	1,080
December	10,500	1,120	950

On 13 January 1945, the strength of the Monowitz Camp was 9,806 prisoners, of whom 9,054 were Jews (*ibid.*, p. 124).

On January 17, 1945, there were 66,020 prisoners in the Auschwitz-Birkenau complex, including 48,342 men and 17,768 women.[100]

Andrzej Strzelecki and Franciszek Piper state that on 19 January 1945, after the departure of the last evacuation transports, there were still about 8,000 prisoners in the camp (Strzelecki 1974, p. 9; Piper 1993, p. 163). The source is the following statement by former prisoner Otto Wolken:[101]

> *"After the escape of the Germans, 1,200 sick people remained in the Auschwitz Camp, 600 sick people in Monowitz, and 5,800 sick people in Birkenau. Of the latter number, 4,000 were women. In Auschwitz, after the escape of the Germans, there were still 48 dead and injured, in Birkenau over 600."*

The total number resulting from these figures, however, is only 7,600. Piper states that about 7,000 prisoners were liberated at Auschwitz, Birkenau and Monowitz, but that between January 19 and 27, a few hundred escaped and a few hundred were released from subcamps (Piper 1993, p. 163, note 126).

What is certain is that, according to a Soviet report, there were 4,299 prisoners in the Auschwitz-Birkenau-Monowitz complex on 2 February 1945, divided by nationality as follows:[102]

Russians	202	Dutchmen	230	Spaniards	1
Poles	960	Austrians	70	Persians	1
Yugoslavians	222	Germans	172	Norwegian	3
Czechoslovakians:	470	Greeks	60	US Americans	1
Frenchmen	481	Belgians	111	Argentinians	1
Italians	150	Chinese	1	unspecified	307
Hungarians	755	Brits	1		
Romanians	99	Turks	1	Total	4.299

The Soviets also found 536 corpses, which they subjected to an autopsy.[103] The documented number of prisoners remaining at Auschwitz after the evacuation is therefore about 4,800.

3. Mortality

3.1. The Death Books and other Sources on the Mortality at Auschwitz

In 1995, the three-volume work *Die Sterbebücher von Auschwitz* was published by the Auschwitz State Museum. The first volume contains several essays, including the one already mentioned by Thomas Grotum and Jan Parcer titled "EDP-supported evaluation of the death records" (Staatliches Museum…, Vol. 1, pp. 225-255), which I will discuss in more detail later. In the second and third volumes, the known names of inmates who died in Auschwitz are listed in alphabetical order (under the initial letters A-L and M-Z, respectively).

The *Sterbebücher* are death registers prepared under the responsibility of the "Department II - Political Department" of Auschwitz in the "Registry Office and Crematorium - Administration", which was called "Registry Office II Auschwitz" from 1 January 1943, and which was responsible for the entire area of interest of the Auschwitz camp.

The death certificates of the inmates were prepared on single sheets, typed with a typewriter in one original and two carbon copies, and then bound in volumes with a maximum of 1500 documents or pages, the *Sterbebücher*. The first register, called Erstbuch (First Book), was sent to the registry office in Bielitz; the second (Zweitbuch) was kept by the head of the camp registry office; the third was sent to the RSHA in Berlin (ibid., p. 235). The death certificates in question concern only registered inmates.

In addition to the *Sterbebücher,* which are the main source for evaluating the inmate mortality at Auschwitz, Grotum and Parcer used other documents recording inmate deaths, namely the already-mentioned "*Stärkebuch*," the "*Zugangslisten der Juden*" (arrival list of Jews) the "*Bunkerbuch*" (register of the prisoners incarcerated in Block 11 of the Main Camp), the "*Strafkompanie Buch*" (book of the penal squad), the "*Meldungen über die Entfernung von Zahngold*" (report son the removal of detnal gold [from deceased inmates]) the "*Sterbeverzeichnisse*" (death registers) and the "*Sterbeurkunden*" (death certificates; *ibid.*, p. 230).

Grotum and Parcer assert (*ibid.*, p. 225):

> *"a considerable part of the documents produced by the camp scribes of the former Auschwitz CC was destroyed before and during the evacuation of the camp, thus eliminating the traces of the crimes committed. However, the volume of the files, which were often made in several copies, made it impossible for the SS to burn all the documents. Part of them was transported away in January 1945, including files of the 'Political Department' on the 17th of that month, in the direction of the former Gross-Rosen Concentration Camp."*

In the introduction to the work, Jan Parcer and Sibylle Goldmann state that during their invasion of Auschwitz, the Red Army found, among other German documents, 46 Death Books (Staatliches Museum…, Vol. 1, p. 19), as many of which were kept in the Central Special State Archives (now the State Russian War Archives) in Moscow before being transferred to the Auschwitz Museum in 1991-1992.

Since these were bound volumes, it is incomprehensible why it should have been impossible for the SS to burn these documents, and such an assumption is all the more incomprehensible since the evacuation of Auschwitz had been decided at the end of August or the beginning of September 1944 (Strzelecki 1995, pp. 93f.), so the SS had more than four months to burn the Death Books. For obvious reasons, it is not even likely that the camp authorities intentionally left the Death Books to the Soviets. But then why did the Soviets find 46 Death Books in Auschwitz? To solve this mystery, one has to radically change the current perspective and ask a completely different question: How do we actually know that the Soviets really found the 46 Death Books in Auschwitz? The documentation preserved in the State Archives of the Russian Federation covering the work of the various investigative commissions active in the camp in early 1945,[104] contains no reference to the death books, nor does the "Communiqué of the Extraordinary State Commission for Investigation and Research into the Crimes of the German-Fascist Invaders and Their Accomplices," published by Pravda on May 7, 1945, which later became prosecution exhibit USSR-008 of the Nuremberg Trial,[105] contain any reference to them.

The solution to the problem is offered by some documents that Jürgen Graf and I found in the State Archives of the Russian Federation. The first is a secret letter dated January 15, 1948, addressed by S. Kozyrev, Director of the 1st European Department of the USSR Foreign Ministry, to the Secretary of the Extraordinary State Commission, P. Vogojavlesky. There was evidently an earlier correspondence, because the letter in question states:

> *"The Dutch Embassy in Moscow approached the USSR Ministry of Foreign Affairs with a request for information on the 80 registers /with lists of the dead/ which, according to the Embassy, pertained to the Auschwitz Camp, were discovered in the Gross-Rosen Camp and, according to the Embassy, were in Soviet hands."*

This was followed by the requests of the Dutch Embassy.[106] In his undated reply to this letter, Vogoyavleski confirmed to Kosyrev that the Extraordinary State Commission was in possession of 80 death books from the Auschwitz camp.[107]

---

[104] GARF, 7021-108.
[105] IMG, Vol. 39, pp. 241-261.
[106] GARF, 7021-149-189, p. 34. See Document 30.
[107] *Ibid.*, p. 36.

On January 21, 1948, Vogoyavleski asked the head of the Central Archives Directorate, Major General V.D. Styrov, if he had documental material on Auschwitz relating to Dutch prisoners, registration records, death books, and the like.[108]

On January 28, Styrov sent Vogoyavleski the list of documents on Dutch citizens that were "in the Special Central State Archives of the USSR in the fundus 'SS Central Construction Office'," without referring to death registers.[109]

On February 19, 1948, Kozyrev wrote the following letter to Vogoyavleski:[110]

"USSR Secret
Ministry of Foreign Affairs
Section: 1st European Section

To the responsible Secretary of the Extraordinary State Commission,

Comrade Vogoyavleski P.V.

To V/n. 26-s of 27 Jan. 1948.

For your information I inform you that the Ministry of Foreign Affairs of the USSR has informed the Dutch Embassy that it may inspect the contents of the 80 registers containing the lists of the dead in the Auschwitz Camp, and that for this purpose it is necessary to apply directly to the Extraordinary State Commission.
The Director of the 1st European Department of the Ministry of Foreign Affairs of the USSR..
S. Kosyrev"

The registers in question were the Death Books. According to the classification of April 29, 1958, the then Central Special State Archives in Moscow kept 46 death books: volumes 2 and 3 from 1941, 1-4, 6, 7, 9-26, 29 from 1942, 1-3, 5-11, 13, 16-18, 21-25 from 1943.[111] It is known with certainty that there were four registers for 1941, 31 for 1942, and 25 for 1943, making a total of 60, so at least 20 must cover 1944 and possibly 1945. The question will be addressed again later.

The transfer of the files of the Political Department of the Auschwitz Camp, especially the Death Books, to Gross-Rosen, where the Soviets found them, is confirmed by the discovery in the 1950s of 276 pages of Death Books Nos. 5 and 31 from 1942 on the grounds of that camp (Staatliches Museum…, Vol. 1, p. 19).

Currently, 47 death books are available;[112] of four others, a total of only 314 death certificates (including the 276 mentioned above) have survived. Grotum and Parcer summarize the relevant data in a table, which I compare with the data from the April 29, 1958 inventory of the then Central State Archives in Moscow on the 46 registers mentioned above, with slight discrepancies in numbers and dates (which I indicate in square brackets).

Table 3.1: Basic features of Auschwitz Death Books (italics: missing)

15/1943	/	/
16/1943	17/6/1943 - 2/7/1943	1482 [*1465*]
17/1943	2/7/1943 - 29/7/1943	1479 [*1480*]

Volume	Time Period of Entries	No. of Death Certificates
18/1943	29/7/1943 - 29/8/1943	1486 [*1494*]
19/1943	/	/
20/1943	/	/
21/1943	13/10/1943 - 12/11/1943	1466 [*1490*]
22/1943	12/11/1943 - 11/12/1943	1400 [*1414*]
23/1943	12/12/1943 [*11/12/1943*] - 29/12/1943	1492 [*1500*]
24/1943	29/12/1943 - 31/12/1943	1494
25/1943	/ - 31/12/1943	969 [*970*]

The fragmentary registers 5/1942, 8/1942, 31/1942, 4/1943, and 14/1943 were not part of the aforementioned inventory; leaving these aside, the remaining 46 registers have 67,282 documents in the inventory, and 67,053 in Grotum and Parcer's overview table; including the fragmentary registers, the total is 68,864 (Staatliches Museum…, Vol. 1, pp. 236f.).

Thus, the missing registers are numbers 2 and 4 from 1941, 5, 8, 27, 28, 30, and 31 from 1942, 4, 12, 15, 19, and 20 from 1943.

The death certificates are numbered; the numbering always starts with 1 at the beginning of each year, and generally continues consecutively, but sometimes skips weeks or even months, especially in 1943, as I will explain in detail later Each register must have contained 1,500 death certificates, as can be seen from the numbering; from this it can be deduced that some of the surviving registers are also incomplete. Thus, death register No. 1/1941 begins with the number 1 and ends with the number 1500, but contains only 1498 certificates; No. 3/1941 goes from number 3001 to the number 4500, but contains 1490 certificates; No. 1/1943 again begins with the number 1 and ends with 1500, but contains only 1,484 certificates. In total, 90,011 certificates were issued during the entire period covered by the death books, so 21,147 names are missing from Grotum and Parcer's list.

The dates given in the column "Issue Date" should not be misunderstood; as a rule, the issue date of the death certificate differs from the death date; moreover, the death certificates in the Death Books follow a chronological order, for which applies what I have said about the number sequence. Thus, register No. 24/1943 begins with certificate No. 34501/1943, issued on 29 December 1943 for the prisoner Rudolf Böhmer, who died on 14 December;[113] the last certificate, No. 36000/1943, was issued on 31 December and concerns the prisoner Marianna Miszczak, who died on 26 December.[114] It would therefore be nonsensical to believe that 1494 prisoners died on the three days of 29, 30, and 31 December; an analysis of the data I present below shows that there were 131, 105, and 31 deaths on these three days, respectively.

From the above secondary sources, by comparing the names of dead prisoners contained therein with those attested in the Death Books, the two researchers have identified an additional 11,146 deaths not included in these registers, which are also listed in alphabetical order in a special appendix in Volume 3. The total number of attested deaths is thus 80,010, omitting the names of 850 Gypsies with no or illegible death dates.[115]

[113] RGVA, 502-4-46, p. 1. See Document 33.
[114] *Ibid.*, p. 1494. See Document 34.
[115] Staatliches Museum…, Vol. 3, p. 1419. The appendix runs from p. 1421 to p. 1653.

The work of Grotum and Parcer is commendable, but it has two serious flaws.

The first concerns the sources. The two researchers ignore the alphabetical list of prisoners who died in 1942, of which the list of last names beginning with B through E has been preserved. Each sheet contains 31 rows and 5 columns with the pre-printed headings last name, first name of the deceased, religion, no. of the book, remarks, possibly place of residence. The fifth column always contains the home town of the dead prisoner. The religious affiliation of the inmates is indicated with the abbreviations: mos(aic), cath.(olic), ev.(angelical), gr.(eek)-orth.(odox), rus.(sian) orth.(odox)), b.(ohemian)m.(oravian) and *gl*(*aubens*)*l*.(*os*) meaning agnostic/atheist.[116]

In total, this fragment of the register comprises 260 pages and lists 7,980 names, of which 4,657 belong to Jewish prisoners. In detail:

– Letter B: 134 pages, 4,129 names, of which 2,546 Jews
– Letter C: 51 pages, 1,556 names, of which 772 Jews
– Letter D: 51 pages, 1,557 names, of which 706 Jews
– Letter E: 24 pages, 738 names, of which 633 Jews

These lists contain 1,277 names of prisoners who died in 1942, which are not included in the list of 80,010 names compiled by Grotum and Parcer.

Another important source overlooked by them is the death register of the outpatient clinic in Block 16 of quarantine camp BIIa in Birkenau. It contains 1750 names with consecutive numbers 1-1746 (four numbers appear twice). The register consists of two handwritten notebooks; the first has 43 pages with 19 or 20 lines, runs from 11 December 1943 to 28 April 1944, and contains 810 names (numbers 1-813, including three crossed out); the second notebook has 27 pages with 34 or 35 lines and continues the registration and numbering from 29 April 1944 (number 814) to 5 November 1944 (number 1746). The entries in both notebooks are divided into five columns; in the first notebook, these columns are headed with the serial number ("*L.N.*"), the date of death ("*Dat.*"), the prisoner number ("*Häftling Nr.*"), the last and first name ("*Name u. Vorname*"), and the cause of death ("*gestorben wegen*"); in the second notebook, this column is actually headed "cause of death" ("*Todesursache*").[117] I will return to the contents of this register later. In the Appendix, I reproduce 570 names from this list.

There are other sources not considered by Grotum and Parcer, which contain many inmate deaths; the most important are:

1) The register of the inmate infirmary of Auschwitz III Camp (Monowitz), which extends from 7 July 1943 to 19 June 1944 and contains the names of 15,706 admitted prisoners.[118] The entries of this register are divided into six columns indicating the prisoner's sequential number ("*Lfd. Nr.*"), prisoner number ("*Häftl. Nr.*"), first and last name ("*Name*"), admission ("*Zugang*"), and departure ("*Abgang*"). The last column, "Remarks" ("*Bemerkungen*"), usually bears the stamp "discharged," more rarely the note "to Auschwitz" or "to Birkenau." In the case of death in hospital, a cross stamp is placed in this column.[119] This register contains 762 names of deceased prisoners not included in the list compiled by Grotum and Parcer.

[116] See Document 35. RGVA, 502-4-48, p. 2.
[117] See Document 36. APMO, D-AuI-5/2, p. 85.
[118] NI-10186.
[119] See Document 37. NI-10186, p. 360.

2) The "*Kommandobuch Arbeitskommando Golleschau*." This is a list of 2,348 prisoners of this subcamp, which contains in six columns the consecutive number ("*Lauf. Nr*."), the prisoner number ("*Häftl. Nr*."), the date and place of birth ("*geb. am*"; "*geb. in*") and "remarks" ("*Bemerkungen*"); in the last column, the departure of the prisoner is indicated with the letter "A" ("*Abgang*") before the date. In the case of a death, there is a cross next to the date. Sometimes the note "shot on the run" appears ("*auf d. Flucht erschossen*").[120] Compared with the serial numbers recorded in the Mortuary Book (which I will discuss later), this list contains the names of 145 dead who are not included in the list of Grotum and Parcer.

3) The "Arrival lists of Jews" ("*Zugangslisten der Juden*"), used as a source by the two authors, contain at least 640 names of prisoners who died mainly between May 9 and June 21, 1942. Although they are listed in Death Book No. 8/1942, they are not included in Grotum and Parcer's list.

4) Another subordinate source ignored by them is the register of the inmate infirmary at Auschwitz, from which the Dutch Red Cross compiled a list of all Dutch Jewish inmates for the period from 24 July 1942 to 15 March 1943,[121] 39 of whom are not included in Grotum and Parcer's list.

5) A few dozen more names are eventually found in various other sources:

– The *Kommandobuch*, a register of prisoners who worked in the camp's various commands, contains 2,188 inmate names with date and place of birth, registration number, and detention category.[122] The "Uwagi" (= remarks) column also contains notations of change, including death.[123] At least six deceased prisoners noted there are not recorded by Grotum and Parcer.
– The report "*H.*[*äftlings*]*-Krankenbau. Lager* B.II.f." ("Inmate Infirmary, Camp BIIf") dated "Birkenau, 17 January 1945," lists the last and first name, registration number, nationality, and date of birth of seven prisoners (including three Jews) who died on 16 January (see Czech 1974, p. 15).
– The list of 254 Jewish prisoners (of whom 7 were deported) transferred from the auxiliary camp in Jaworzno, presumably to Auschwitz, on 18 January 1944,[124] contains a consecutive number, last and first name, registration number and category ("*Gef. Art*."), with the title "*Jude*" followed by the nationality ("R.D." = Reich German, "*Holl*." = Dutch, "*Kroat*." = Croat, "Belg.[ian]", "*Frz*." = French, "*Griech*." = Greek, "*Poln*." =Polish). In three cases, the death of a prisoner is given, which was not recorded by Grotum and Parcer.
– Finally, there is a list of prisoners who died on January 2, 1945, transcribed by Nachman Blumental (Blumental 1946, p. 98). The list is titled "*H.-Krankenbau des KL Auschwitz I*" ("*Inmate Infirmary of CC Auschwitz I*"), and is addressed "to crematorium administration, inmate records department, effects chamber, clerk's office." The list concerns inmates who died between morning roll call and evening roll call on

[120] I am using the certified copy of the original made by the Dutch Red Cross on December 15, 1947. ROD, c[21-23].31.
[121] ROD, c(26)38i.
[122] For example, political prisoners, educational prisoners, Jehovah's Witnesses etc.
[123] AGK, NTN, 149, pp. 15-149; transcript of the original document made by Judge Jan Sehn.
[124] APMO, D-AuIII(Jaworzno)-3/1, pp. 144-148.

January 2, 1944. It contains a consecutive number, nationality, registration number, last and first name, and date of birth. Of the 36 prisoners listed (30 were Jews), 26 are also listed in the "*Kommandobuch Arbeitskommando* Golleschau". From this document, therefore, there are only ten additional names that are not listed in Grotum and Parcer.

In total, then, there are 3,452 names of prisoners of whom Grotum and Parcer have no knowledge. I list them in alphabetical order in the Appendix.

The second shortcoming of Grotum and Parcer's work is that they did not even attempt to reconstruct daily mortality during the period covered by the Death Books, a fact of obvious historical significance. They confined themselves to presenting monthly morality figures solely on the basis of the Death Books, without taking into account the other 11,146 names in their appendix, at least 3,932 of which were recorded in the missing Death Books, especially in No. 8/1942, but some of which were also recorded in the existing but incomplete Death Books.

One of the aims of Part 3 of the present study is precisely to record the daily deaths as far as possible. As will be shown later, various death registers are of great help for this purpose, especially for the years 1941 and 1942, which were not taken into account by Grotum and Parcer.

3.2. WVHA Guidelines for Registration and Reporting of Deaths in Concentration Camps.

The registration and reporting of deaths in concentration camps was regulated by an order by SS-Brigadeführer and Major General of the Waffen-SS Richard Glücks, head of Office Group D of the SS-WVHA, dated 21 Nov. 1942. This letter concerns the "Reporting Procedure for Deaths in Concentration Camps" and refers to the "Order of the Reichsführer-SS of 11 Oct. 1942 - 1870 - and RSHA - IV C 2 Allg. No. 42 455 - of 13.11.42". The letter, which was sent to the commandants of all concentration camps, including Auschwitz, bears the protocol number "14 f *Allg*.[*emein* = general]", an abbreviation that referred to the mortality of prisoners in general. The letter reads:[125]

"By order of the Reichsführer-SS and Chief of the German Police, and in agreement with the Reich Security Main Office, the following guidelines are issued for the processing of deaths in the concentration camps, repealing all orders issued to date:

1.) Deaths of Jews are to be recorded only in a collective list (single copy), which must contain the following information:

Serial Nr.
last name, first name, for women also maiden name,
date and place of birth,
nationality,
last place of residence,
date of death,
cause of death,

[125] NO-1543.

committing authority.

By order of the Reichsführer-SS and Chief of the German Police, and in agreement with the Reich Security Main Office, the following guidelines are issued for the processing of deaths in the concentration camps, repealing all orders issued to date:

1.) Deaths of Jews are to be recorded only in a collective list (single copy), which must contain the following information:

Lfd. No.
last name, first name, for women also maiden name,
date and place of birth,
nationality,
last place of residence,
date of death,
cause of death,
committing authority.

If protective or preventive detention has been ordered for Jews by Office IV C 2 - or Office V - of the Reich Security Main Office, the names of the persons concerned are to be underlined in red pencil, and the detention number of Office IV or V is to be indicated. The lists are to be compiled in order of date of death, and submitted here by the 3rd of the following month.

Express letters and final reports of the deaths of Jewish inmates are thus no longer required.

2) Death reports on all other inmates are to be submitted to the Reich Security Main Office - Office IV C 2 or Office V - and to the SS Economic Administration Main Office - Office Group D - in simple form only, using the form used up to now (express letter). These forms are to be sent by regular mail continuously to the Reich Main Security Office or to the office here.

In both cases under 1. and 2., it is the same whether deaths are natural or unnatural.

This does not affect the direct notification by telex of the committing authority for the purpose of informing the next of kin, if prescribed.

The previous procedure for reporting the deaths of Soviet prisoners of war and Russian civilian workers will not be changed.

The camp commandants are responsible to the Reichsführer-SS and to me personally for ensuring that, despite this reduction in the number of reports, at no point in the camps is it forgotten that the human life of every criminal must also be taken into account."

According to an instruction of the SS-WVHA, which SS-Obersturmbannführer Arthur Liebehenschel, head of Office D I/Central Office, sent to all commandants of the CCs on 20 February 1943, "all deaths occurring" were also to be broken down by age as of February 1943, according to an enclosed sample which has not been found.[126]

The previously cited order was reiterated on 23 March 1944 by SS-Obersturmbannführer Rudolf Höss, then head of Office D of the SS-WVHA, in an instruction in which he stipulated the following with regard to deaths:[127]

"1.) Deaths of Poles who are not or are not to be included in the German ethnic list, and of Russians are reported by most camps to the RSHA or RKPA by express letter or telex.

---

[126] PS-3677.

[127] "*Richtlinien zur Bekanntgabe an die Leiter der Politischen Abteilungen bei der Besprechung am 23. März 1944*". NO-1553.

This is forbidden by the existing order. Deaths of these Poles and Russians are to be reported only on form KL 51/4.43 to the committing authority (as already ordered by circular on 20 Sept. 43).
All other reports are no longer required. As a matter of principle, Jews are only reported in lists. Express letters and all other reports are also not required.
2.) Monthly lists of deceased Jews are to be compiled in accordance with the order Ref. 14 f Allg./Ot./S.- of 21 Nov. 42 secret Corr.No. 848/42; the file number of the RSHA or the RKPA [Reichskriminalpolizeiamt] *must be indicated. It is not permissible to write only RSHA or RKPA. The files must be carefully checked to see whether they contain transport Jews (IV B 4 a)*[128] *or Jews with protective-custody orders from IV C 2*[129] *The latter are to be underlined in red, as already ordered a thousand times."*

The concentration camps usually produced several documents concerning the mortality of inmates; the most important (with respect to Auschwitz and other camps) were the following:

– Death certificate issued by the camp physician of Auschwitz CC, in which the attestation date, last and first name, date of birth, place of birth, home residence, last residence, date and hour of death, place of death, and cause of death are indicated. The document reproduced in the Appendix concerns the inmate Julyan Koziol, who was born in Boleslaw on 20 December 1906 and died at 7:15 p.m. on 15 June 1942.[130]
– Communication from the camp physician of Auschwitz CC to the Auschwitz Concentration Camp's headquarters concerning the death of a prisoner (giving registration number, last and first name, date and place of birth), the date of death and a few lines describing the cause of death.[131]
– Death notification from the inmate infirmary of Auschwitz CC to the Political Department of Auschwitz CC, in which the death of a prisoner was reported in a very concise form. For example, the document reproduced in the Appendix states, "On June 15, 1942, at 7.15 p.m., Pole Prisoner No. 11379 Koziol Julyan, born 20 Dec. 1906 in Boleslaw, died."[132] Another six copies of the notification were sent to just as many departments, listed on the document at the bottom left.
– Death notification from the block eldest, an inmate who reported the death of an inmate in his block, and identified the body in the morgue of the inmate infirmary.[133] The document shown in the Appendix also concerns inmate No. 11379 Julyan Koziol.

Originally, the death of a prisoner was communicated to his family by a telegram from the camp commandant. In the documental appendix to the first volume of the Auschwitz death books, a telex from Höss to Janina Glodek dated 9 January 1942 is printed, in which he informed her of the death of her husband Aleksander Glodek in Auschwitz (Staatliches Museum…, p. 132 of the photo appendix).

[133] See Document 41. AGK, NTN 173, p. 13.

In the circular of the Reichsführer-SS of May 21, 1942, concerning the notification of the death of concentration-camp inmates to their relatives, it was stated that the telex procedure used until then had in some cases led to confusion among the population:[134]

> *"In amendment of the previous order, I therefore decree that in future, in the case of deaths - regardless of whether they are natural or unnatural - notification by the commandants of the concentration camps is to be given without exception to the responsible committing authority by telex or, in the case of possible disruption of the telex network, by telegraph or telephone. The committing authority must then arrange for the immediate notification of the relatives."*

The family had to be informed that for the duration of the war it was impossible to hand over the body, and that it would be cremated, with the possibility for relatives - with the exception of Poles and Jews - to say their last goodbyes before cremation:

> *"The relatives must be informed that they must notify the camp by telegraph within 24 hours of any request to view the bodies. The time allowed for the relatives to inspect the corpse shall be such that they have sufficient time to make the journey to the camp. As a rule, however, it may not be extended beyond 3 days."*

Cremation could only take place within the prescribed period if the relatives had not expressed a wish to view the body during this time.[135]

On September 17, 1942, SS-Obersturmbannführer Arthur Liebehenschel, in his capacity as head of Office Group D of the WVHA, sent a letter to all CC commandants concerning "Notification of the Relatives of Inmates Who Died in Concentration Camps," in which he stated, referring to Himmler's order mentioned above:[136]

> *"A request has been made by some camp commandants to prohibit the viewing of the bodies of deceased prisoners by their relatives during the summer months for hygienic reasons. After consultation with the Reich Security Main Office, we are informed that an amendment of the RFSS decree is not possible at present."*

3.3. Numerical Statistics on Daily Inmate Mortality: Secondary Sources

At Auschwitz, the daily mortality of the prisoners was recorded in various registers by order of the camp administration, which were restricted to individual sections of the camp and also chronologically limited.

3.3.1. The *Totenbuch* (Book of the Dead)

The *Totenbuch* of Soviet POWs is a 21.7 x 16 cm notebook with 470 pages, two of which are blank. The cover bears a pasted label with the inscription "*R. Kr. Gef. Lager* Auschwitz" (Russian PoWs, Camp Auschwitz), and below it "*Totenbuch Krankenbau*" (Book of the Dead, Infirmary). Each page contains 18 or 19 lines and seven columns, headed as follows "L.[*aufende*] Nr.:" (consecutive no.), "R.[egistration] Nr.," "Bl.[ock No.]," "Dat.[e]" and "Hour" of death, "Last Name First Name Place of Birth" of the de-

[134] NI-12270.
[135] NI-12270.
[136] NO-1510.

ceased, and "Cause of Death."[137] The records range from 7 October 1941 to 28 February 1942, and contain 8,320 deaths. On February 28, another 45 prisoners died, and from March 1 to August 19, another 812 died, as reflected in the *Stärkebuch* (see below, Table 3.3).

This document was analyzed in detail by Judge Jan Sehn in 1946 during the investigations for the Höss Trial,[138] and 15 years later by Jerzy Brandhuber in an article titled "The Soviet Prisoners of War at Auschwitz". In the following table, I present the data contained therein according to the analysis of Jan Sehn.[139]

3.3.2. The *Stärkebuch* (Strength Book)

This register has already been described in Part 1. Here I summarize the mortality data compiled by Jan Sehn.[140] In total, the *Stärkebuch* contains data on 20,696 deaths, of which 11,391 were Jews and 1,472 Soviet PoWs.

In his statistical elaboration on this document, Jan Sehn also provided a breakdown of the deaths recorded in the *Stärkebuch* according to the age of the victims, the data for which I reproduce below.

Table 3.5: Distribution of 20,696 dead by year of birth (AGK, NTN, 92, pp. 100-102)

1872	70	13	1893	49	407	1914	28	490			
										Total:	20,696

These 20,696 deaths are distributed as follows. (AGK, NTN, 92, pp. 104-118):

Jews	Poles	Czechs	Ed.Inm.	Germans	Frenchmen	Yugoslavians	Russians	Others	Total
11,391	6,803	1,087	894	315	142	40	18	6	20,696

The nationality of the Jews is distributed as follows (*ibid.*):

Stateless	French	Slovakian	Dutch	Belgian	Total
1,389	3,953	5,272	775	2	11,391

3.3.3. The Mortuary Book

On October 7, 1941, the Mortuary Book of the crematorium in the Main Camp was established, which was kept until August 31, 1943. It consists of four books, two of them 15 cm × 10 cm, one 20 cm × 15 cm, and one 21.4 cm × 15 cm in size. The pages are usually divided into a top line, indicating the date, and three columns, indicating the day of the month, the registration number of the dead prisoner, and the block (or camp) from which he came (e.g., (Block) 27, Buna, etc.).[141] A total of 22,710 deaths are recorded in the Mortuary Book, distributed chronologically as follows:

3.3.4. List of Polish Female Inmates

This documentation, unknown to Grotum and Parcer, was collected by former inmate Antonina Piątkowska and given to the Krakow District Commission for the Investigation of German Crimes in Poland and explained by her in an interrogation on August 18, 1946.[142] Jan Sehn described it as follows:[143]

> *"A bundle of thin paper containing 30 sheets in letter-paper format, a half sheet and 11 sheets in various sizes and shapes. All sheets are written on in pencil in two columns, and in each column are written the number, the first and last name, a cross symbol, and the date. In some cases, next to the date, the cross symbol is inserted in a circle, or the word 'transport' is written."*

According to the mentioned witness, the first symbol marked prisoners who were killed by lethal injection, and the second symbol marked prisoners who were allegedly gassed. However, there is no evidence to support these claims.

This list contains the names of a total of 6,674 deceased Polish-female prisoners. I summarize here the statistical evaluation of the Polish judge in tabular form:[144]

One name is undated. The total number of deaths is thus 6,674.

3.3.5. The “Arrival Lists of Jews”

As mentioned earlier, these lists record deaths among registered prisoners of the first 15 transports of Jews up to August 15, 1942. The transports in question are as follows:

Table 3.11: The first 15 transports of Jews to Auschwitz

#	Date	Number of registered Deportees	Place of Origin
I	15 April 1942	973	Slovakia
II	19 April 1942	464	Slovakia
III	23 April 1942	543	Slovakia
IV	27 April 1942	442	Slovakia
V	29 April 1942	423	Slovakia
VI	22 May 1942	1000	Slovakia
VII	7 June 1942	1000	France
VIII	20 June 1942	404	Slovakia
IX	24 June 1942	933	France
X	27 June 1942	1000	France
XI	30 June 1942	1004	France

XII	30 June 1942	400	Lublin CC
XIII	4 July 1942	264	Slovakia
XIV	11 July 1942	182	Slovakia
XV	17 July 1942	651	Netherlands

The former inmate Otto Wolken has compiled statistics on the daily mortality among these prisoners. I reproduce it according to his scheme, with the necessary corrections to the totals.[145] The mortality rate was extraordinarily high: of 9,683 registered prisoners, 7,013, or 72.4 percent, had died by August 15, 1942, as the following table shows.

Table 3.12: Mortality of registered deportees by transports

3.3.7. *Stärkemeldung* of the Birkenau Women's Camp (October to November 1944)

In the series of reports on the occupancy of the Birkenau Women's Camp already described in Part 2, 153 cases of "died nat.[ural] death," 131 releases, and 3,910 cases of "S.B." are listed (including 1,203 Jews from the transit camp). As will be seen later, in Piper's overall calculation for 1944, these individuals would fall under the heading of ordinary mortality (i.e., they would have been recorded as having died of natural causes with a false death certificate).

Table 3.14: Departures by type in the *Stärkemeldungen* des Birkenau women's camp

December	14	75	13	132	10	36
Sums	29	139	123	541	112	681
Total: 1,625						

3.4. The Daily Statistics of Inmate Mortality: the *Sterbebücher*

3.4.1. November 1940 to June 1941

Several documents provide very scant evidence of mortality in the period from November 1940 to June 1941, before the Death Books were established. The following table lists the relevant data from Grotum and Parcer's list.

Table 3.16: Partial data of daily inmate mortality, November 1940 to June 1941

1/11/1940	1	27/4/1941	1	26/5/1941	2	23/6/1941	1	24/7/1941	1

* registered in Death Book 1/1941

3.4.2. July to December 1941

Death Book No. 1 of 1941 begins with death certificate no. 1 of July 27 (inmate Peter Pakosch, born April 11, 1895 in Oderhain); three more certificates are entered in July. In August there are 1,277 deaths, from September 1 to 7 there are 219.

The missing Death Book No. 2 covered the period from 7 September to 18 October with numbers 1501-3000 = 1500 death certificates.

Death Book No. 3 begins with number 3001, assigned on 18 October, and ends with number 4500, assigned on 20 November.

From 18 to 31 October there were 497 deaths, and from 1 to 20 November there were 1003.

The period from 7 November to 31 December was covered by the missing Death Book No. 4, which should contain numbers 4501-6000; this represents an average of about 36 deaths per day, which is consistent with the values for August (about 41 per day), September (about 31), and October (about 35).

Thus, from 27 July to 31 December 1941, 6,000 prisoners died.

Total: 4 + 1,277 + 219 + 1,500 + 497 + 1,003 + 1,500 = 6,000						

3.4.3. Death Cases in 1942

January:
Number of Deaths: **699**
assigned certificate numbers: 1- 674, moreover numbers 683-685, 691, 692-702, 743, 767, 845-852, in total 25 numbers assigned in February 1942: 674 + 25 = 699.

February:
Number of Deaths: **1,089**
assigned certificate numbers: 675-1787, moreover no. 3577, minus the 25 numbers for deaths in January: 1787 - 674 + 1 - 25 = 1,089.

March:
Number of Deaths: **2,458**

assigned certificate numbers: 1788-4246, minus no. 3577 for a death in February: 4246 – 1787 – 1 = 2,458.

April:
Number of Deaths: **2,015**
assigned certificate numbers: 4247-6263, minus nos. 6172 and 6207, assigned to deaths in May: 6263 – 4246 – 2 = 2,015.

May:
Number of Deaths: **3,314**
assigned certificate numbers: 6264-9571, plus the two assigned nos. 6172 and 6207 from the April series, plus the four nos. 10322, 10323, 10324, 10652 from the June series for May deaths: 9571 – 6263 + 2 + 4 = 3,314.

June:
Number of Deaths: **3,812**
assigned certificate numbers: 9572-13385, minus the four numbers of the May deaths (10322, 10323, 10324, 10652), plus nos. 15847 and 17765 for two June deaths assigned only in July: 13385 – 9571 – 4 + 2 = 3,812.

Volume 8/1942 is missing; it contained the numbers 10501-11920 = 1,420.

July:
Number of Deaths: **4,400**
assigned certificate numbers: 13386-17788 = 4,403, minus the two nos. assigned to June deaths (15847 and 17675) minus no. 16840 for a September death: = 4,403 – 2 – 1 = 4,400.

August:
Number of Deaths: **8,600**
assigned certificate numbers: 17789-26388 = 8,600.

September:
Number of Deaths: **7,419**
assigned certificate numbers: 26389-33806 = 7,418 plus one no. (16840) from the July series: 7,418 + 1 = 7,419.

October:
Number of Deaths: **4,570**
assigned certificate numbers: 33807-38381 = 4,575, minus five nos. (35919, 37298, 37495, 37526, 38330) assigned to deaths in December: 4,575 – 5 = 4,570.

November:
Number of Deaths: **4,046**
assigned certificate numbers: 38382-42410 = 4,029, plus 17 nos. (42822, 43228-432409, 43228, 43240, 43259) assigned in Dec.: 4,029 + 17 = 4,046.

December:
Number of Deaths: **4,598**

assigned certificate numbers: 42411-47020 = 4,610, minus the 17 nos. assigned for November cases, plus five nos. of the October series: 4,610 – 17 + 5 = 4,598.

Table 3.18: Daily inmate mortality, 1942

* partial data

Since the numerical order does not strictly follow the chronological one, the last document number of the Death Books for each month coincides with the cumulative number of deaths only in two cases. The highest documented number for 1942 is 47020, assigned to Jacques Caufman, a Jew from Paris, as indicated by the alphabetical list of prisoners who died in 1942, from which the list of last names beginning with B-E described above has been preserved. What actually was the last certificate number in December 1942 is not known, but the last certificate number agrees with the total number of deaths for the entire year 1942, as shown in the table below.

Table 3.19: Summary of mortality, 1942

Month	Number of Deaths	Cumulative Deaths	Lost Number in Death Book at Month's End
January	699	699	674
February	1,089	1,788	1,787
March	2,458	4,246	4,246
April	2,015	6,261	6,263
May	3,314	9,575	9,571
June	3,812	13,387	13,385
July	4,400	17,787	17,788
August	8,600	26,387	26,388
September	7,419	33,806	33,806
October	4,570	38,376	38,381
November	4,046	42,422	42,410
December	4,598	47,020	47,020

Summary for 1942: 47,020 prisoners deceased + 1,472 Soviet PoWs deceased = 48,492, rounded up to 48,500.

3.4.4. Death Cases in 1943

January:
assigned certificate numbers: 1-4500. Four numbers of the February series (6429, 6430, 7241, and 9905) were assigned to deaths in January, so the quantity of deaths was **4,504**.

The number of deaths on 31 January (12) is incomplete, as is already evident from the fact that the Mortuary Book records 13 deaths for that day. Undoubtedly, the entry was continued in the missing Death Book No. 4/1943 (see February).

February:
Death book No. 4/1943 is missing; it contained numbers 4501-6000, and covered the period from 31 January to 8 February. Thus, the certificates of Death Book No. 4/1943 begin with number 6001. The numbering for February ends with number 11963; 45 consecutive numbers are missing, which were probably assigned on the 21st; numbers 11980 and 11684 were assigned in March; number 11738 on August 12.

Numbering 4501-11963 includes 7,463 deaths, minus the three just mentioned = 7,460, which includes an unknown portion of deaths on January 31.

The number of deaths thus amounts to **7,460**.

In Table 3.22, the numbers in square brackets (February 1-5) are taken from the Mortuary Book; the numbers with an asterisk (February 6-8) are from the Death Books, but are incomplete.

The number sequence has another anomaly: 46 deaths in February have numbers from series of the Month of March (between 11980 and 16364).

March (1-23):
assigned certificate numbers: 11964-16500 = 4,537, minus 46 numbers assigned for February cases, plus one number assigned in February for a March case = 4,492.
Number of Deaths: **4,492**.

April-October:
Missing Death Book No. 12/43 contained numbers 16501-18000, and covered the period from 23 March to 4 April. Death Book No. 15 contained numbers 21001-22500, and covered the period from 22 April to 25 May. Death Books No. 19 and 20 contained numbers 27001-30000, and covered the period from 18 August to 29 September.

However, the series of numbers does not follow any chronological order, but jumps from day to day and month to month without any logic. For example, No. 18001 was assigned on April 4, No. 21000 on May 25, No. 22501 on April 22, No. 24000 on June 24, No. 25500 on July 19, and No. 27000 on August 19. This chaos ends on October 7, when No. 30001 was assigned, so the calculation of deaths is only possible cumulatively for the period from March 23 to October 7.

From 1 January to 23 March there were 16,456 deaths, to which must be added the 1,500 already mentioned up to 4 April, making a total of 17,965, so up to 7 October there were (30001 - 17956 =) 12,046 deaths. From Pohl's letter to Himmler of September 30, 1943, with the subject "Deaths in the conc. camps," it appears that 1442 male inmates and 938 female inmates died at Auschwitz in August 1943, for a total of 2,380.[146] It follows that the number of deaths from April 4 to October 7, that is, excluding the month of August, was (12,046 - 2,380 =) 9,666.

In the first four days of April, 39 unnumbered names were recorded in Death Book No. 12/43, that is, among the 1,500 deceased mentioned above. From October 1 to 7, there are 78 unnumbered names belonging to Death Book No. 20/43.

From the names received, the following monthly mortality rate is obtained (see Tables 3.18 and 3.19):

– April: 2,112 (acc. to Grotum/Parcer: 1,907)
– May: 1,937 (acc. to Grotum/Parcer: 1,591)
– June: 2,204 (acc. to Grotum/Parcer: 1,400)
– July: 1,758 (acc. to Grotum/Parcer: 1,581)
– September: 644 (acc. to Grotum/Parcer: 16)
– 1-. October: 78
Total: 8,733

It follows that (9,666 - 8,733 =) 933 deaths are missing, most of which are obviously attributable to the month of September, although the exact extent remains unknown.

October-December
On 7 October, number 30001 was assigned; numbering progressed continuously, with small gaps, to number 36991, so that by 31 December, 6,991 numbers had been assigned.

According to the numbering sequence, there were 1,339 deaths in the Month of October, to which must be added another 103 (partial number) without a number,[147] covering the period from 1 to 7 October. Thus, the total number is 1,442.

The number of deaths in November was 1,832, and in December 3,820.

---

[146] PS-1469.
[147] Names from sources other than death records and consequently without death certificate number.

The total is 7,094, i.e., the 6,991 deaths resulting from the numbering plus the 103 previously mentioned.

For the month of December, however, there is a contradiction between the numbers in the Death Books and the names in the Death Registers, which from 6 December 1943 to 8 January 1944 contain the names (without Death-Book numbers) of 836 prisoners and 736 inmates who perished in the Auschwitz, Birkenau, and Monowitz camps. The lists were compiled in the prisoner infirmary at Auschwitz and in the Political Department. The document, previously kept in St. Petersburg, was transferred to the Auschwitz Museum in March 1993 (Staatliches Museum…, Vol. 1, p. 232).

These lists, as I will explain later, include 856 prisoners who died in December 1943, 815 of whom are not recorded in the December 1943 Death Books, so that the total number of deaths attested for that month is (3,820 + 815 =) 4,635. Table 3.20 shows the numbers from the Death Books and, for December in square brackets, the numbers that include these 815 prisoners, broken down by date of death.

Table 3.20: Daily inmate mortality, 1943

3.5. The Registration of Deaths of Jewish Inmates in 1943

Grotum and Parcer list in a table the deaths broken down by month/year and by denomination: Mosaic, Roman Catholic, Greek Orthodox, Evangelical Lutheran, atheist, other denominations, denomination unknown (Staatliches Museum…, Vol. 1, p. 249). I summarize this by giving only the numbers for Jews and the total number of deaths.

Table 3.21: Total number of deaths of Jewish inmates and their percentage of the total mortality

Year	Month	Jews	Total	% Jews
1941	July	/	4	0
	August	144	1,275	11.3
	September	/	219	0

	December	175	3,782	4.6
	Totals	29,122	68,787	42.3

The table does not include the 77 deaths whose denomination or date are unknown, so the total number is 68,864.

From March 1943 onward, the number and percentage of Jewish deaths decreased considerably, and in the following months the decrease was even more radical. This fact

was already noted by Franciszek Piper, who wrote his well-known study of the number of Auschwitz victims before Grotum and Parcer's study, although in a much more limited form. He stated (Piper 1993, p. 160):

> *"Even fewer documents are preserved for 1943 than for 1942. Of the 3964 death certificates, only 260 concern the death of Jews. […] We find a comprehensive explanation of the process only again in the testimony of the already-mentioned prisoner Klari Weiss, who reported that the deaths of Jewish prisoners were no longer registered in 1943 even in the case of a 'natural' death (certainly no death certificates were issued in this case). As Klari Weiss reports, the evidence she kept showed that a total of 35,000 non-Jews died in 1943. However, the fact that a certain number of death certificates of Jews have been preserved for 1943 suggests that there must have been deviations from the principle of no longer registering deaths of Jews."*

Grotum and Parcer attempt to supplement Piper's explanation, particularly with regard to the "deviations" mentioned (Staatliches Museum…, Vol. 1, pp. 248, 250):

> *"The low proportion of Jews among the recorded victims from March 1943 onward is misleading, since at that time the civil registration of deaths of registered Jews who had been deported to Auschwitz on RSHA transports and admitted to the camp after selection was discontinued. From then on, only deaths of Jews who had been brought to the camp on the orders of the Kripo, Gestapo and other police stations were registered. These were persons with 'Aryan' spouses who were to be informed of the death of the Jewish husband or wife."*

However, they do not refer to documents as sources, but to simple testimonies. In this context, one can also mention the more radical testimony of the former Dutch Jewish prisoner Debora Brandel. She claimed that the Jews who arrived at the camp and were gassed,

> *"were registered in a special file (hidden in the Political Department and marked 'S.B.'* = Sonderbehandlung*), which means: gassed."*

She added that "as of March 1, 1943, Jews were no longer registered as a rule," and that by 1945 there were 180,000 registered deaths, but the number of deaths was probably even higher.[148]

Both Piper and Brandel speak of the "principle" or "rule" of no longer registering the deaths of Jews, but these terms are mere euphemisms for a WVHA order (which would also have been necessary for the establishment of the alleged "special index"), without which this practice would have been completely unjustified and arbitrary. However, there is no such order from the WVHA. Grotum and Parcer tacitly assume its existence, but without openly addressing the issue. Their explanation, also based on testimony, is also unsound. The only difference between the processing of deaths of Jewish and other deportees that emerges from documents is that set forth in the directives of November 21, 1942 and March 23, 1944, concerning Jews sent to Auschwitz by Office IV C2 and V of the RSHA in protective or preventive custody, as well as Jews from the transports of Office IV B 4 (Eichmann). The only difference was that in the lists the names of the dead of the first category had to be underlined with red pen.

---

[148] Testimony of Debora Brandel from Amsterdam, Ceintuurbaan 99. Testimony No. 224. In: Het Nederlandsche… 1947, p. 14.

Therefore, if in March 1943 there was no order to refrain from registering the deaths of Jews (or of a certain category of Jews), the explanatory approach of informing Aryan spouses about the passing away of their partners, as put forward by Grotum and Parcer, is misleading for two reasons.

First, the data for the March-December 1943 period are incomplete. As I have already explained, the Death Books record 5,992 deaths from March 1 to April 4, while the known certificates (March 1-31) account for only 4,432. From April 4 to December 31, there were 19,036 registered deaths, of which only 14,110 were certified. Thus, a total of 6,486 death certificates are missing from March to December 1943, although it is not known how many of these involve Jewish prisoners.

Second, comparison with the data from the Stärkebuch, which refer exclusively to the men's camp, shows that the proportion of Jews among the dead is quite different from that given by Grotum and Parcer:

Table 3.22: Total deaths and Jewish deaths according to the *Stärkebuch* and according to Grotum-Parcer

		Stärkebuch	Grotum-Parcer	Difference
March 1942	Total	2,932	2,446	486
	Jews	420	425	-5
April 1942	Total	1,999	1,671	328
	Jews	868	663	205
May 1942	Total	2,951	2,160	791
	Jews	1,907	1,373	534
June 1942	Total	3,683	2,335	1,348
	Jews	2,288	1,604	684
July 1942	Total	4,113	4,345	-232
	Jews	2,866	2,942	-76
Sums	Total	*15,678*	*12,957*	*2,721*
	Jews	*8,349*	*7,007*	*1,342*

As can be seen, the number of Jewish inmate deaths recorded in the Stärkebuch for the months of April, May, and June exceeds the number of Jewish inmates given by Grotum and Parcer by 1,423. This also casts doubt on the percentages of Jews in 1943 given by the two researchers. Moreover, it is not known for the year 1943 what the percentage of Jews in the total occupancy of the camp was. It is therefore certain that the phenomenon did not have the dimensions indicated by Grotum and Parcer. If it existed at all, it must have had a different significance than assumed by the two researchers. The fact remains that no particular category of Jews could be excluded from registration in the Death Books on the basis of the above-mentioned guidelines.

Therefore, the available documents only allow us to rule out the hypothesis of Piper and Grotum/Parcer, but not to give a comprehensive answer.

A no less important problem is that of the death registers, which I mentioned earlier. These lists contain 815 names more than the numbers assigned in December (41 certificates and numbers are missing) and among them are at least 644 Jewish female inmates, 80 Jews distinguished by the added names "Sara" and "Israel," and 91 non-Jews. Grotum and Parcer did not note this oddity, although they explicitly stated that the death registers were included in their data on death records, at least as a source for their database. There

is also a list of names from December 10, 1943, which lists 296 prisoners who died on December 6. It is divided into seven columns listing the inmates' personal data, last name, first name, registration number, date of birth, nationality, and the authority that had ordered the internment. There is also a column "T. No.", presumably the "death [*Todes*] number", ranging from 22450 to 22745 (= 296).[149] The meaning of this numbering is unclear, but it can be ruled out that it refers to the numbering of the Death Books, which at that time was over 33000.

However, the fact that these deaths are not recorded in these Death Books does not support Grotum and Parcer's thesis, both because the Jewish prisoners were recorded elsewhere in official documents, which, as mentioned, were compiled in the Inmate Infirmary at Auschwitz and in the Political Department, and because they also include over 90 non-Jews.

One could argue that the death book 25/1943 was not the last one, but that there was a later one; however, this possibility is ruled out by the attestation on the last page:[150]

> *"This 25th and last volume of the death register for 1943, containing entries 36001 to 36991, is closed. Auschwitz, 31 December 1943, the registrar. By proxy* [illegible signature]*."*

The most plausible explanation seems to me to be the following: For bureaucratic reasons, it was not possible to process the individual death certificates of inmates who died that month until December 1943, and this was made up for in January 1944, probably in an addendum to Death Book No. 25.

The fact remains, however, that from March to November 1943 no other similar cases of inmates dying beyond the number sequence of the Death Books are attested, so that the case examined above was not the rule but an exception.

In this context, it is appropriate to examine in detail a report of the Auschwitz Resistance movement that relates to this subject. It is a handwritten statistic on deaths and alleged gassings in the Auschwitz women's camp of registered female prisoners, divided into six columns: "Month", "Sum" (of the following three columns), "Poles", "Jews", "Aryans without Poles", "Jews only gas" ("Tylko Żydzi gaz").[151] In the following table I reproduce the data, adding two more columns (7 and 8) for sums.

Table 3.23: Claimed deaths of registered inmates in Auschwitz women's camp between February 1943 and 15 January 1944 according to Resistance reports

1	2	3	4	5	6	7	8
Month	Sum (Cl. 3+4+5)	Poles	Jews	Aryans w/o Poles	Only Jews Gas	Jews Total (Cols. 4 + 6)	Total (Cl. 2 + 6)

Sums	19766	4283	8008	7475	11930	19938	31696

Columns 3, 4 and 5 show the normal mortality, as they should have been recorded in the Death Books, and Column 6 the alleged gassings. As I have emphasized several times, no regularly registered inmate could disappear from the camp without any documentary trace, and this also applies to the alleged gassing victims. For example, the 498 alleged gassing victims in August, neatly listed with serial number, last name, first name, and registration number, are contained in a list titled "Frauen-Lager Birkenau. F.L. 8.43. Ma. Krt.", which is dated "Birkenau, August 21, 1943." The list bears the endorsement "*Die Lagerführerin*: /-/ Mandl *Oberaufseherin*" at the end.[152] This is a copy of the original list, which bears the signature of the female camp leader. The first and last pages of this document were published in the document appendix of the first volume of Die *Sterbebücher* von Auschwitz (Staatliches Museum…, Vol. 1, pp. 121f.). It must therefore be assumed that these and the other allegedly gassed persons on this list fell into the category of Jews excluded from the Death Books from the point of view of Grotum and Parcer.

However, there is no evidence that these prisoners were actually murdered; in this case, the reason why the mentioned list is associated with gassing is the subject line "Re.: G.U. of 21 Aug. 43" under the heading, where "G.U." stands for "*Getrennte Unterbringung*"/"separate accommodation," which is supposed to be a euphemism or a camouflage term for gassing. The fact is, however, that there is no real or falsified death certificate for any of these 498 prisoners, for these prisoners were probably simply disinfested in preparation for transfer to another camp, and then lodged separately. For example, the transport list of 500 Hungarian Jews to Dachau in July 1944 (the day is not given) is preceded by a certificate from the camp physician which states:[153]

> *"The Jewish prisoners on the transport to Dachau were examined by the camp physician and found to be healthy. They were deloused, provided with fresh linen and clothing."*

According to this view, there would have been 19,938 more deaths in the women's camp alone from February 1943 to January 15, 1944 than are listed in the Death Books, all of which would therefore not have been listed in these registers, and about which there are no records whatsoever, apart from 771 deaths in December 1943, which are not listed in the Death Books, but very much so in the Death Registers.

For August 1943, the Resistance statistics show a total of 1,035 ordinary deaths, of which 374 were Jews, plus the alleged 498 gassing victims.

I have already mentioned before the letter of September 30, 1943, with the subject "Deaths in the conc. camps." In the accompanying letter, Pohl wrote that the death rate had fallen from about 10% in December 1942 to about 8% in January 1943; in the first quarter of 1943, compared with the second half of 1942, it had fallen from 9.89% to

[152] AGK, NTN 155, pp. 262-266.
[153] YVA, M.8.ITS.BD-AU2, p. 123.

5.72%. This was due to the improvement in hygienic conditions, nutrition and clothing. For the Auschwitz men's camp, an average strength of 48,000 prisoners and a mortality of 1,442 were given; for the women's camp, a strength of 26,000 prisoners and a mortality of 938. One would therefore have to assume that Pohl concealed from Himmler the alleged 498 gassed inmates, which would have brought the total number of deaths in the women's camp to 1,436; however, this hypothesis is inadmissible, since Pohl's statistics concerned precisely registered prisoners.

In December 1943, according to the Resistance statistics, 4,247 people were supposed to have been gassed, but this figure is impossible because the documented death toll was 4,635, of which only (4,635 - 4,247 =) 388 prisoners would have died a "natural" death.

It must therefore be assumed that the column of claimed gassing victims has no basis in reality. As for the other data, they can at least have an orientation value.

The actual figure for August, as mentioned earlier, is 938, while the resistance statistics show 1,035 deaths. Pohl's letter indicates that in July 1943 the mortality rate in the women's camp was 5.13 percent of the average occupancy. It is known that the strength of this camp on June 30 was 20,538 prisoners and that there were 3,205 registrations in July, giving a total of 23,743. Assuming this maximum number, which does not take into account inmates who died (and may have been transferred), the maximum mortality rate would have been (23,743 × 0.0513 =) 1,218 inmates; the minimum, based on the June 30 population, would have been (20,538 × 0.0513 =) 1,053. Thus, the July figure in the Resistance statistics (1,073) is a perfectly plausible order of magnitude.

In the following table, I compare the figures from the Resistance statistics with those from Antonina Piątkowska's records; both figures refer to Polish female prisoners.

Table 3.24

Month	Resistance	Piątkowska	Month	Resistance	Piątkowska
February	627	540	August	98	109
March	935	876	September	8	83
April	445	460	October	32	94
May	222	208	November	91	231
June	153	153	December	1,081	1,109
July	91	110	Totals	3,783	3,973

Overall, the Resistance data have a margin of error of about -4%, so that the other data in column 2 of Resistance Table 3.23 can be considered relatively reliable, with the exception of the months of November and December, for which the figures given are clearly disproportionately high compared to the total mortality (1,603 versus 1,832 and 4,684 versus 4,591, including the 771 deaths in December not recorded in the Death Books).

It is noteworthy that in the months of May, June, and July, when, according to Resistance statistics, no gassings were supposed to have taken place, the percentage of Jewish inmates in the deaths was as follows:

251 ÷ 1,237 = 20.29%

439 ÷ 1,624 = 27.03%

476 ÷ 1,073 = 44.36%

The corresponding percentages of Grotum and Parcer (see above, Table 3.21) are merely 4.3, 1.9, and 3.9, respectively, confirming that the problem of the alleged drastic de-

crease in the number of Jewish deaths in the death records (which would not have been recorded anywhere) is false and aberrant.

In conclusion, although the hypothesis of non-registration of deaths among registered Jews due to alleged gassings would explain the alleged "selection" of regularly registered inmates, the Death Books and other death registers cannot be used to verify the truth of this hypothesis. On the other hand, this hypothesis would also mean that this practice of non-registration would have been applied only from March 1943, i.e., it would not have applied during 1942. However, according to Danuta Czech, "selections" with subsequent "gassings" were also carried out among registered Jewish prisoners during that year. If one adds up the numbers of presumed victims of these gassings given by her, one arrives at no less than 8,613 (on the following days: 11 June, 3 Aug., 30 Sept., 1, 2 and 3 Oct., 14 Nov., 5 and 8 Dec.). In the first three October days alone, there should have been 5,812 victims, whose names should therefore appear in the Death Books, but this is impressively contradicted by these very registers, which testify to the ordinary deaths of 4,598 prisoners. Where should these additional 5,812 allegedly gassed people have come from, and where are their traces in the documents?

3.6. Mortality in the Years 1944-1945

The Death Books of 1944 and January 1945 have not been preserved. According to what I have presented in Chapter 1, this period might have been covered by at most 20 registers, but beyond this number nothing is known. Therefore, one can only make guesses about the number of deaths, the most generous of which would be (20 × 1,500 =) 30,000 deaths.

In addition to a small quantity of individual deaths attested by various records, some very fragmentary documents provide collective data for short periods and for individual camps.

From the two surviving reports titled "Overview of the Number and Deployment of Inmates of Auschwitz II Concentration Camp" for January 1944, one written on January 15 and the other on January 31, it appears that 386 died from January 10 to 15,[154] and 257 from January 27 to 31,[155] for a total of 643 within 11 days in the Birkenau men's camp alone. If one adds up the individual deaths, the following partial picture emerges:

Table 3.25: Deaths in January 1944 (partial data from various sources)

Day	#	Day	#	Day	#
1	132	11	1	21	7
2	129	12	1	22	0
3	104	13	0	23	0
4	1	14	0	24	0
5	90	15	1 [386]	25	0
6	3	16	0	26	2
7	114	17	1	27	0
8	0	18	0	28	4

[154] GARF, 7021-108-23, p. 121.
[155] *Ibid.*, p. 128.

9	2	19	1	29	1
10	0	20	1	30	0
				31	1 [257]
				Sum	596
Total: 596 – 9 + 643 = 1,230					

In the overview of 15 February 1944, which refers to 10-15 February, 215 deaths are recorded.[156] For this month only 17 names are known, for March 10.

The "Overview of the Number and Deployment of Female Inmates of Auschwitz Concentration Camp U/S," dated April 3, 1944, records 81 deaths for the period April 1-3 (64 on 2[157] and 17 on 3 April).[158] There are 11 names attested.

A letter from the RSHA to the WVHA dated April 12, 1944, with the subject "Admission of Reich German Female Inmates to the Women's CC Auschwitz" proves that the mortality rate at this time was very high:

> *"In consideration of the high mortality rate, especially of the Reich German female inmates in Auschwitz CC, the admission of Germanic female inmates to Auschwitz CC is hereby prohibited, provided that in individual cases other arrangements are deemed necessary by this office."*

These inmates were therefore to be transferred to Ravensbrück CC as soon as possible.[159]

The overview of 15 May, covering the period from 9 to 15 May, contains the following data:[160]

Table 3.26: Deaths in Auschwitz, 9-15 May 1944

Day	9	10	11	12	13	14	15	Total
Deceased	32	18	15	21	13	31	6	136
S.B. (*Sonderbehandlung*)	7	2	4	2	6	3	0	24

The other three surviving summary documents cover 20 days of the month of June and are dated as follows:

– 5 June 1944, on 1-5 June [161]
– 19 June 1944, on 16-19 June [162]
– 30 June 1944, on 20-30 June [163]

The relevant dates are summarized in the table below:

Table 3.27: Death in Auschwitz, 1-5 June and 16-30 June 1944

Day	1	2	3	4	5	16	17	18	19	20
Deceased	0	31	10	18	8	6	8	10	4	15
S.B.	0	19	9	4	0	21	21	19	0	38
Day	21	22	23	24	25	26	27	28	29	30
Deceased	10	13	6	14	8	5	22	9	17	7
S.B.	15	22	11	20	14	0	51	22	15	17

[156] *Ibid.*, p. 129.
[157] There is, moreover, a column "S.B.", added with a typewriter, in which 13 inmates are listed.
[158] GARF, 7021-108-33, p. 160.
[159] RGVA, 504-2-8, p. 60.
[160] GARF, 7021-108-33, p. 144.
[161] *Ibid.*, p. 148.
[162] *Ibid.*, p. 152.
[163] *Ibid.*, p. 156.

The total number is 221 deceased prisoners and 318 cases of "S.B." On the problem of special treatment of registered inmates, I refer to a separate study (Mattogno 2016). It is worth noting that in addition to the "S.B." heading, these reports also include a "new born" heading, two on May 9, six in the first four days of June, two on 17, one on 25, two on 27, and one on 29. Finally, these summary documents did not deal with deaths as such, but rather with the prisoner population in general and their labor deployment.

The number of deaths known by name from May to December amounts to several dozen.

3.7. Franciszek Piper's Analysis of the Mortality at Auschwitz

In his book *Die Zahl der Opfer von Auschwitz* (*The Number of Victims at Auschwitz*), Piper also discusses in detail the mortality of registered inmates, and this is the only treatment of the subject to date. In fact, Grotum and Parcer did not even attempt a general evaluation of mortality at Auschwitz, but merely referred to Piper and claimed that about half of the 400,000 registered inmates perished (Staatliches Museum…, Vol. 1, p. 227). It is therefore worthwhile to revisit the analysis of Piper's remarks, which I already presented in 2003 (Mattogno 2003a), with the necessary additions.

3.7.1. May 1940 – December 1941

When Piper wrote his book, the Death Books were still unknown, so he could not have known that the death toll among inmates from August to December 1941 was 6,000. He therefore calculated: By the end of 1941, 25,149 inmates and about 10,000 Soviet PoWs had been registered, for a total of about 35,000 people in round figures; by the end of 1941, the number of Auschwitz inmates was about 11,500, so there was a shortfall of about 23,500. Of these, 2,383 were released or transferred, so that the death toll (Soviet inmates and POWs) was about **21,000** (Piper 1993, p. 154).

It should be noted that 24,085 inmates had been registered by the end of 1941. On 29 December 1941, number 25149 was actually assigned, as Piper indicates, but the numbering was not chronologically consecutive; several gaps were left in the numbering that were not filled until 1942. The first gap from numbers 18160 and 18161-18175 was filled on February 2 and 3, 1942, respectively. The count shows that 1,064 numbers before 25149 were assigned only in 1942, so that for 1941 there are actually (25149 - 1064 =) 24,085 casualties.

The death toll among Soviet POWs is known from the Book of the Dead, and is 6,893 for the period October-December 1941 (see Table 3.2, Section 3.3.1.).

The first known figure for the 1942 occupancy is from January 6. On that day, there were 11,988 persons in the camp (9,893 inmates and 2,095 Soviet PoWs). If we assume with Piper that 2,383 were released or transferred alive (but this figure is not documented), the correct calculation is as follows:

24,085 - 2,383 - 9,893 = 11,809 deaths, in round numbers **11,800**.

Of these (11,800 - 6,000 =), **5,800** occurred in the period May 1940 to July 1941, and **6,000** in the period August to December 1941. To these 11,800 deaths must be added approximately (rounded) **6,900** Soviet PoWs, bringing the total deaths to **18,700**.

3.7.2. 1942

Piper notes that the last death certificate for 1942 is number 45616; it was issued on December 31 for inmate Erna Haubenstock, who died on December 23. Since the average mortality rate at this time was 128 deaths per day, more than 1,000 inmates died between 24 and 31 December, so that 46,600 certified deaths must be considered for 1942 (rounded to 47,000). The certificate cited by Piper is not found in the Death Books and is not mentioned in Grotum and Parcer's list of names; nevertheless, his guess is correct, since the highest number for 1942 is 47020, as mentioned earlier.

Piper, however, is not satisfied with this figure, but suggests a speculative balance of arrivals and departures for 1942. He claims that by the end of the year 113,169 inmates (85,264 men and 27,905 women), about 10,100 Soviet PoWs, and 3,044 educational inmates were registered, for a total of about 126,000; on January 1, 1943, 29,630 inmates were still in the camp (24,263 men and 5,367 women). 23,500 of these had been lost in 1940-1941 (deaths, releases, and transfers). In 1942, 2,916 inmates were transferred to other camps, 48 escaped, and 997 were released, for a total of 3,961 persons.

> *"This shows that in 1942 about 69000 registered inmates died in Auschwitz CC (about 46500 men and about 22500 women). This number is therefore about 22,000 higher than the number resulting from the number of death certificates issued."* (*Ibid.*, p. 158)

Mathematically expressed:

126.000 - 29.630 - 3.961 - 23.500 ≈ 69.000 (68.909); 69.000 - 47.000 = 22.000.

Piper then wonders about the reason for these more than 22,000 undocumented dead and, in response, draws on the testimony of a former prisoner who worked in the camp's Political Department: Klari Weiss. Piper summarizes her testimony and writes,

> *"that in 1942 48,000 registered inmates died a 'natural' death (this figure thus corresponds approximately to the number of death certificates issued), not including those who, after selection, were killed in the gas chambers or by poison injections. The approximately 21,000 to 22,000 deaths not included in the evidence of inmate deaths are therefore 'non-natural' deaths - these inmates were killed in the gas chambers and by phenol injections."* (*Ibid.*)

Piper attempts to support his thesis by referring to a December 15, 1942, camp resistance report that I have examined in detail in another study (Mattogno 2021, pp. 138-140).

As shown below, he compares the data from the resistance report with what he believes to be the actual data:

Table 3.28: Claimed victim figures for 1942

	Report	Piper
total number of registered inmates	125,200	126,313
camp strength	24,200	29,630
transferred	4,500	5,290
released	1,200	977
deaths	95,300	90,239

The report in question contains the following data:[164]

[164] Report of the State Security Service of the Ministry of the Interior of the Delegation, January 1943; statistics range from the opening of the camp to 15 December 1942. Marczewska/Ważniewski, pp. 79f.

Poles	
released:	1,200
alive:	17,300
transferred to another camp:	4,500
shot:	5,000
gassed (*zagazowanych*):	16,000
killed by injections:	8,000
killed by torture and starvation:	3,000
died of disease:	22,000
gassed and shot without registration:	12,000
Soviet PoWs	
alive:	100
shot:	12,000
killed without registration:	14,000
Jews	
Gassed (*zagazowanych*), from France, Belgium, Holland:	502,000
gassed, from Poland:	20,000
Women, mostly from Poland	
alive:	6,800
shot:	2,800
gassed:	8,500
died of disease:	18,000
Inmates in total	
alive:	29,000
dead:	642,700

In his comparative table, Piper has taken without change the figures for those released (1,200) and transferred (4,500); his "camp strength" is the sum of the "alive" categories, i.e., 17,300 + 100 + 6,800 = 24,200. The number of dead is the sum of all categories of those dead and killed (5,000 + 8,000 + 3,000 + 22. 000 + 12,000 + 2,800 + 18,000 = 70,800) adding the presumed (16,000 + 8,500 =) 24,500 gassing victims, i.e., 95,300. Adding to this number the camp strength and the number of released and transferred inmates (24,200 + 1,200 + 4,500 = 29,900) gives Piper's total number of registered inmates (95,300 + 29,900 =) 125,200.

However, Piper did not even consider the question of how 21,000-22,000 inmates could disappear without a trace from the camp records, nor did he bother to take into account the 5,812 alleged "selectees" resulting from Czech's *Auschwitz Chronicle*, as noted earlier (plus a few hundred for the three smaller "selections" on 4 May, 10 August, and 30 October, for which Czech does not give a figure).

This statistic includes among the "non-natural" deaths, as Piper understands them, the 8,000 prisoners who are said to have been killed with lethal injections after a "selection" in lodgings or hospitals, so that the number of those "selected" is actually 32,500. There would thus be an embarrassing surplus of at least 26,000 "selectees," of whom there is not the slightest trace in Czech's *Auschwitz Chronicle*.

In addition, there are 7,800 allegedly shot prisoners, also to be attributed to "non-natural" mortality, but as Grotum and Parcer note, there are only 67 cases in the Death Books where the death certificates state "shot on the run" (Staatliches Museum…, Vol. 1, p. 247). In this regard, they state:

> *"Among the 68,864 death records, there are 2,727 in which 'sudden cardiac death' is listed as the cause of death. In several of these cases, however, it can be shown that unnatural causes of death were actually present."*

Among the examples they cite, the most relevant is that of 168 Poles interned at Auschwitz on April 24 and 25, 1942, and shot in reprisal on May 27, 1942; according to the Death Books, however, they all died of "sudden cardiac death" (ibid., pp. 243-245). In this way, according to Grotum and Parcer, the Death Books routinely recorded "non-natural" deaths, that is, either explicitly or implicitly with a false cause of death.

If the cause of death was sometimes falsified in the preparation of the certificates, then this was probably done in order to circumvent the strict bureaucratic practice provided for such cases in the concentration-camp regulations; among other things, they tasked the Political Department with dealing with a) natural and b) unnatural deaths and suicides. On the second point, the regulation stipulates:[165]

> *"The* RSHA *and the* RKPA[166] *as well as cognizant offices are to be notified of cases of unnatural death and suicide by teletype. Notification of next-of-kin is to be by telegram (for example, husband shot escaping, or committed suicide, etc.). When stating the time in messages, do not say "about," but rather "at" 4:40PM, etc. The chief of Office Group D is to be informed by priority mail as well as by teletype. Furthermore, the staff of the* Reichsführer *SS in Berlin is to be advised by teletype. The cognizant legal officer as representative of the cognizant SS and police jurisdictions is to be notified immediately; he will initiate an inspection of the corpse and the scene of the incident. In every case, two interrogations are to be conducted and a sketch as well as (documentary) photographs to be made. The cognizant SS and police authorities are to be notified in writing. Attachments will include:*
>
> *One each of* *transcript of witnesses' testimonies*
> *report of the legal officer*
> *medical report.*
>
> *Disposition reports will be forwarded regularly to the chief of Office Group D in two copies with the following attachments:*
>
> *(a) in cases of natural deaths, two copies each of*
> *post-medical-officer report of inspection of corpse*
> *commandant's report*
>
> *(b) in cases of unnatural deaths and suicides, two copies each of*
> *transcripts of witnesses' testimonies*
> *commandant's report*
> *doctor's death certificate*
> *dissection findings report*

funeral certificate by SS and police court

order for withdrawal of prosecution by the SS and police court.

If the concentration camp in question has a crematorium, a cremation order signed by the camp commandant or his deputy must be transmitted to the crematorium after release of the body by the SS and police court or by the district attorney, respectively. [...] *By the third of each month, per Regulation IKL*[167] *Pol./Az. 14 f 1/ö 3/L./F., numbered name lists sorted by date of death are to be forwarded with surname, given name, age at death (last birthday), death sentence, class of offense and prior offenses in two copies in the following order:*

I) natural deaths in concentration camp from ... to ...

II) suicides in concentration camp from ... to ...

III) fatal accidents in concentration camp from ... to ...

IV) executions by firing squad in concentration camp from ... to ....

Executions will be reported to the cognizant registrar's office for recording and issuance of the death certificates. The death certificates to be sent by the registrar's office to the camp headquarters will be passed on with the execution protocol to the RSHA*, c/o SS* Gruppenführer *Müller. The cremation order will be issued by the camp commandant or his deputy."*

In his letter of September 17, 1942, which bore the subject "Reports of Unnatural Deaths of Prisoners," the head of Office Group D of the SS-WVHA informed the commandants of the concentration camps that in the future such reports were no longer to be addressed to the RSHA, Office IV C, but only to the Reichsführer-SS and Office Group D4.[168]

The regulations therefore required that not only the killing of prisoners in escape attempts be recorded, but also executions, so that falsifying the cause of death in some of these cases constituted a violation of the regulations.

As for the first case, nothing was left to arbitrariness. The camp commandant of Auschwitz periodically transmitted to the SS and Police Court IV in Breslau the list of prisoners killed in an escape attempt, together with the list of guards who shot them, and the files against them, with the following wording:[169]

"It is requested that the investigation proceedings be closed and that the bodies be released for cremation, since the guards acted in accordance with their service instructions and not in violation of the law."

The bodies of the victims remained under lock and key until the case was decided.
This entire procedure presupposes that unlawful killings (notoriously common in testimonies and memoir literature) were indeed prohibited and punishable.

Grotum and Parcer, however, do not address the far more important question of the deaths of those allegedly "selected." Were they recorded? Or were they not? They are wisely silent on this thorny question. Piper's explanation assumes that there was a threefold accounting of deaths at Auschwitz: 1) the official registration recorded in the Death Books, 2) those concerning "unnatural" killings (e.g. escape attempts and executions),

---

[167] *Inspekteur der Konzentrationslager*, Inspectorate of concentration camps
[168] NO-3677.
[169] See Document 45. Files of the Frankfurt Auschwitz Trial.

which were also documented, but in some cases with false causes of death, and 3) the accounting concerning deaths due to selections (i.e., the alleged gassings and death injections), for which - as Debora Brandel has claimed - there was a secret special file in which these cases were registered with some initials or designations, although there is not the slightest documentary evidence for the existence of such a special file.

In summary, the "non-natural" deaths were recorded, whereas the claimed deaths of those allegedly "selected" are not documented, nor is there a single documented case that falls into this category, so the 22,000 prisoners missing from Piper's count are necessarily among the living.

In this connection it should be noted that Piper speaks of only 2,916 transfers and 997 releases for the whole of 1942, although for the much shorter period from 19 January to 19 August 1942 there were already 2,946 transfers and 1,049 releases in the men's camp alone (from the Birkenau "extermination camp" to boot!). The total number for the entire year, including the women's camp, was therefore necessarily much higher than what Piper suggests. Moreover, the figure of 22,000 missing inmates is the result of a rough calculation that starts at the time of the camp's construction, so that it can be assumed that the actual shortfall is covered by inmates transferred, released, escape, and lodged in subcamps during this long period.

3.7.3. 1943

Piper notes that the highest death-certificate number in the last Death Book of 1943 is 36991, assigned to inmate Zelik Gieclik, who died on 18 December. Since the average daily death rate during this period was 104 deaths, approximately another 1,400 prisoners died by 31 December, bringing the total for 1943 to over 38,000 deaths (Piper 1993, p. 160).

While the last Death Book of 1942 (No. 31) is very poorly preserved, the last Death Book of 1943 (No. 25) is complete. In fact, this Death Book extends to December 31, 1943, and the highest document number on that date is 36983, assigned to inmate Stanisław Domanski. The apparent contradiction with Piper's statement is due to the fact that the numbering of the records was not strictly chronological.

Again, Piper invokes Klari Weiss and claims that the deaths of Jewish inmates were no longer recorded in 1943, even if they were "natural" deaths - an unsubstantiated claim that I have already addressed in Section 3.5. Piper proposes a different calculation to determine the number of alleged excess deaths that were not recorded in the Death Books. He notes that by the end of 1943, 282,000 prisoners had been registered (about 195,000 men and about 83,000 women), of whom 85,298 were present on 31 December 1943 (55,785 men and 29,513 women), leaving about 197,000 prisoners missing. Of these, about 96,500 had died in 1940-1942, and in 1943 19,859 had been transferred to other camps and 139 had escaped, so that the number of dead was (197,000 - 96,500 - 19,859 - 139 =) about 80,500 (ibid.), or about (80,500 - 37,000 =) 43,500 more than he believed had been documented.

The above findings apply here as well. The crucial point is the transfers to other camps and, to a much lesser extent, the releases. According to Piper, these involved 19,859 prisoners by the end of 1943, of which (3,961 + 2,383 =) 6,344 occurred by the end of 1942, so that in 1943 there were (19,859 - 6,344 =) 13,515. Where does this fig-

ure come from? Since there is no documentation on this, it must be assumed that it is information from the camp's resistance movement. Among the various reports it compiled is a two-part list; the first is titled "Large Polish transports from Auschwitz CC for the year 1943" and lists 18 transports with a total of 13,071 prisoners.[170] However, smaller transports are not insignificant. For Sachsenhausen CC, for example, only one transport of 1,000 prisoners is listed on March 13, but an additional 605 inmates arrived at the camp from Auschwitz in 1943, so the list shows only 62% of the known transfers.[171] The list is also silent on the more than 844 prisoners suffering from malaria (542 men and 302 women) who were transferred to Majdanek CC on June 3, 1943 (Czech 1989, p. 511) because this region was considered an "anopheles-free area" (Mattogno 2016, pp. 49, 82f.). Moreover, the list refers only to Polish inmates, and it can be assumed that Jewish inmates from Auschwitz were also transferred during 1943. I will return to the second list, which concerns the year 1944, in the following section.

3.7.4. 1944-1945

Piper proposes another general method of calculation to determine the number of deaths during this period. The total number of inmates registered at Auschwitz is approximately 400,200, of whom 197,000 departed by the end of 1943. Of the remaining 203,000 inmates, 163,000 were transferred or evacuated, 300 escaped, about 500 were released, and about 8,000 were liberated from the camp by the Soviets. The number of dead would therefore be (203,000 - 163,000 - 300 - 500 - 8,000 =) 31,200, or 30,000 rounded down. The Polish historian explains that

> *"The majority of them, almost exclusively Jews, were selected within Auschwitz CC (in the inmate infirmaries, in quarantine, in the individual camps and subcamps) and killed in the gas chambers."* (Piper 1993, p. 163)

He adds that "the number of these 30,000 deaths includes both Jews and non-Jews, and both those who died a 'natural' death and the prisoners who were killed," whereas Klari Weiss stated that "the number 30,000 refers only to non-Jews and only to prisoners who died a 'natural' death." To explain this contradiction, Piper invokes the alleged practice of general falsification of all death book entries in this regard, which the SS allegedly undertook in 1944 "for camouflage reasons" (*ibid.*):

> *"Instead of the camouflage designations SB and GU, which had been used until then to designate the cause of death in non-natural deaths, diseases were now entered as causes of death; moreover, even old documents in which the aforementioned camouflage designations had been recorded were transcribed anew without them, in order to blur the evidence of the crime. For the same reason, Jews and non-Jews were subjected to this procedure."*

However, Piper also states in his discussion that according to Czech's *Kalendarium*, "about 30,000 registered inmates were killed in 1944" (*ibid*., p. 162). This is a glaring contradiction, for it would mean that there were virtually no ordinary deaths in 1944, but only 30,000 deaths due to "selections." In fact, Czech's *Kalendarium* shows more than 47,400 "selectees" for 1944, which I list chronologically in the following table:

---

[170] *Sprawozdanie okresowe /od 15 VII 1944 do 1 VIII 1944/* (Situation Report – July 15, 1944 to August 1, 1944). APMO, D-RO/91, Vol. VII, p. 453.

[171] *Veränderungsmeldung des KL Sachsenhausen*, 1943. GARF, 7021-104-4, pp. 110-124.

Table 3.29: The "selectees" of 1944 according to Czech's *Kalendarium*

Date	selected	Date	selected	Date	selected	Date	selected	Date	selected
2/1	141	15/4	184	3/10	989	12/10	3,000	17/10	2,000
15/1	363	18/4	299	6/10	1,888	13/10	2,000	17/10	156
22/1	220	10/7	3,000	6/10	2,000	13/10	2,000	18/10	13
22/1	542	11/7	4,000	7/10	1,229	13/10	3,000	20/10	248
23/1	26	2/8	2,897	7/10	20	14/10	477	21/10	513
2/2	800	18/9	395	7/10	451	14/10	3,000	21/10	1,000
8/3	3,791	2/10	101	9/10	2,000	15/10	3,000	29/10	64

Regarding the alleged replacement of the "camouflage designations SB and GU," Piper refers to a Polish book by Andrzej Strzelecki from 1982. This historian picked up information that he had taken from the statements of three postwar witnesses: In the late summer of 1944, the camp administration had forced several inmates who worked in the Political Department to copy the "*Hauptbuch*," leaving out the abbreviation "S.B." (*Sonderbehandlung*) from the copy, which allegedly meant that the prisoners had been gassed or killed with phenol injections.[172] The term "*Hauptbuch*" is completely inappropriate in this context, since it referred only to the registration books of the Gypsies; the other inmates, with the exception of the Soviet prisoners of war, were registered in two registers, one numerical (*Nummernbuch*) and one by name (*Einlieferungsbuch*). As I have already explained in Part 1, of these records, only the *Nummernbuch* 150000-200000 has survived,[173] a register of the changes in strength of the men's camp in which the 50,000 inmate registration numbers between No. 150,000 (which had been assigned on September 10, 1943) and No. 200,000 (which had been assigned between October 28 and November 7, 1944) are recorded. The numbers are listed in four columns of 25 lines per page, and next to each number the change affecting the inmate is noted in abbreviated form, but without a date. As Kazimierz Smoleń confirmed in an affidavit dated 16 December 1947,[174] the register contains 36 abbreviations, none of which are suspect; none of the abbreviations resemble "SB" ("*Sonderbehandlung*") or "GU" ("*gesondert untergebracht*") or other alleged camouflage abbreviations for "gassings." Common notations are "*üb.*[*erstellt*]" (transferred) "+" for died, "*gefloh.*[*en*]" (escaped), "*ent.*[*kommen*]" (absconded), "*entlassen*" (released), "II. *üb.*[*erstellt*]" for transferred from Birkenau (AII), "KB" for "*Krankenbau*" (infirmary), "Buna" for transferred to the Monowitz Camp, "Blechh." for transferred to the Blechhammer subcamp, and the abbreviations of 23 other Auschwitz subcamps.

The story given by Strzelecki is obviously absurd: What sense would it have made to transcribe the names of more than 100,000 prisoners and all their data with the exception of "SB" and "GU" completely and then to destroy both the originals and the transcripts?

In this context, a curious fact should be pointed out: The documents with the abbreviations "SB" and "GU", which, however, never refer specifically to deaths, always concern only female prisoners; no known document concerns male prisoners.

To return to Piper: He also grossly underestimated the number of inmates who were transferred or evacuated from Auschwitz in 1944 and 1945. Excluding the approximately

[172] Strzelecki, in: Długoborski/F. Piper, Vol. V, p. 49; Strzelecki 1995, pp. 129f.
[173] APMO, D-AuI-3/1,2.
[174] NOKW-2824, pp. 12-14.

4,800 inmates who remained in the camp in January 1945, this number is approximately 253,500, as I have documented in a separate study in which I listed nearly 300 transports from Auschwitz totaling 192,333 inmates (Mattogno 2005), to which must be added the 61,200 who were evacuated after January 17, 1945, for a total of exactly (192,300 + 61,200 =) 253,500.

The list of transferred inmates compiled by the Auschwitz Resistance Movement titled "Transports from CC Auschwitz I, II, III from 1 January 1944 to 10 July 1944" lists 29 transports with 10,907 inmates;[175] however, there were actually 70 transports with over 52,700 inmates. Thus, the Resistance reported only 21% of the transports, so the Resistance figures for 1940-1943 that Piper uses in his calculations are also highly dubious.

Another glaring error concerns the number of unregistered Jewish inmates who passed through the Birkenau transit camp and were transferred to other camps. Piper puts this figure at only 25,000 (Piper 1993, p. 163); in reality, this category includes at least 79,200 Hungarian Jews (Mattogno 2007, p. 20) and about 19,400 Jews from Lodz (see Mattogno 2003). Piper's figure undoubtedly includes the 7,500 Jews from Płaszów CC who, according to Danuta Czech, were housed in the Birkenau "transit camp" on August 6, 1944 (Czech 1989, p. 842). Magdalena Kunicka-Wyrzykowska, on the other hand, writes that on August 7, 1944 about 4,000-5,000 Hungarian Jewish inmates were transferred from Płaszów to Stutthof CC via Auschwitz (Kunicka-Wyrzykowska, p. 69). The total number of unregistered inmates transferred from Auschwitz was therefore at least 102,600. Andrzej Strzelecki confirms the reliability of this figure by stating (Strzelecki 1995, p. 352):

> *"In the period May-October 1944, several tens of thousands, most likely up to 100-thousand Jewish inmates passed through the Birkenau camp without being registered."*

On October 2, 1944, there were still 17,251 Jews in the transit camp, who were included in the camp population on that day,[176] but without having received registration numbers. On 31 December 1943, the camp had 85,298 prisoners (men and women). In 1944, 114,500 people were registered, and at least 102,600 inmates[177] passed through the Birkenau transit camp.

The number of prisoners transferred, evacuated and remaining in the camp is approximately (192,300 + 66,000 =) 258,300. Adding the 4,000 inmates mentioned earlier and the 300 who escaped gives the following figure:

(85.298 + 114.500 + 102.600) - (258.300 + 4.000 + 300) ≈ 39.800

Since the figures for transferred inmates are incomplete, the order of magnitude is consistent with the figure of 30,000 inmates given by Klari Weiss. Since the figure she gives for 1943 (48,000) has a margin of error of only 2% over the exact figure, the figure for 1944 can also be considered very reliable.

From this it can be concluded that in 1944 about 30,000 prisoners died, and anno 1945 about 500.

And now here is the comprehensive summary:

---

[175] APMO, D-RO/91, Vol. VII, p. 454.
[176] APMO, *Stärkemeldung*. D-AuII-3a, p. 53a.
[177] Including the above mentioned at least 4,000 prisoners from Płaszów CC.

Table 3.30: Summary of Deaths 1940-1945			
	Inmates	Soviet PoWs	Rounded Sums
1940-1941	11,809	6,893	18,700
1942	47,020	1,472	48,500

4. Lists of Names

4.1. Lists of Names of Inmates Who Died in Auschwitz but Are Not Registered in the Death Books

The first list, which contains 2,882 names, is based on the sources given in Section 3.1, with the exception of those recorded in the Death Register of Quarantine Camp BIIa in Birkenau, from which the 570 names in the second list are taken. The total number of previously unknown deaths thus amounts to 3,452.

The first list comes from various sources that uniformly report eight properties: last name, first name, registration number, religion, date of birth, Death-Book number, and date of death. Several inmates appear in different documents with different death dates: The earlier (Died 1) should be the actual date, and the later (Died 2) should be the registration date.

The alphabetical Death Register of 1942 does not contain any information on the date of death, but only the Death-Book number.

At least the month of death can be determined from the series of numbers in the 1942 Death Books:

January:	1-674	July:	13386-17788
February:	625-1787	August:	17789-26388
March:	1788-4246	September:	26389-33806
April:	4247-6263	October:	33807-38381
May:	6264-9571	November:	38382-42410
June:	9572-13385	December:	42411-47020

The numbers attributed to Jozef Blazejewicz (60015) and Jakob Chocinsk (70391) are obvious typos.

The second list, also in alphabetical order, is divided into five columns: nationality, registration number, last name, first name, date of death.

Table 4.1: First list of names

Last Name	First Name	Reg. No.	Religion	Born	Place of Birth	Died (1)	No. Death Book	Died (2)
Abkewicz	Moszek			18/8/1894	Grajewsk			4/10/1942
Abrachkopf	Izak			11/4/1910	Krijnow			15/6/1942

4.2. List of Italian survivors (February-March 1945)

The following two tables list the names recorded in the Soviet list of sick Italian survivors and in the list of names (see Documents 46-48 in the Appendix). They contain numerous spelling errors, which I have corrected as far as possible on the basis of the names given in Liliana Picciotto Fargion's work *Il libro della memoria* (*The Book of Memory*), from which I have also taken the dates in square brackets. Names in small caps and registration numbers in bold do not appear in this book. The names in bold refer to non-Jewish Italians.

5. Transfers

Inmates Transferred and Evacuated from Auschwitz in 1944-1945

Based on data contained in Danuta Czech's *Kalendarium* (*Auschwitz Chronicle*), Franciszek Piper calculated that 188,000 inmates were transferred and evacuated from Auschwitz in 1944-1945, of whom 163,000 had been registered and 25,000 had not been registered (Piper 1993, p. 163). This figure also includes the approximately 67,000 inmates who were still in the Auschwitz complex on January 17, 1945.

In Czech's *Kalendarium*, a total of about 95,300 transferred inmates are recorded for 1944-1945 (up to Jan. 17), including about 25,700 non-registered Jews. Piper approximated the first figure to 96,000, and erroneously added to it the approximately 25,000 transferred unregistered Jews (although they had already been included in the 96,000 figure), and the approximately 67,000 inmates present in the Auschwitz complex on Jan. 17, 1945, thus calculating:

96,000 + 25,000 + 67,000 = 188,000 inmates transferred, evacuated and liberated.

This figure is actually far lower than the real figure. In fact, in 1944 and January 1945, at least 280,500 inmates were transferred and evacuated from the Auschwitz complex, including about 177,000 Jews.

Needless to say, the (280,500 – 188,000 =) 92,500 inmates not counted by F. Piper fall for him into the category of those "gassed." But there is an even more important aspect. The transfer to other concentration camps of at least 277,000 inmates, including more than 180.000 during the peak period of the alleged Auschwitz extermination machine – from April to October 1944 – and the release of more than 300 inmates from the "Labor Education Camp Birkenau" ("*Arbeitserziehungslager Birkenau*"), including 238 from May to September 1944,[179] show that the authorities in Berlin (who ordered the transfers) and those in the camp (who carried them out) had not the slightest fear that some alleged "terrible secret" of Auschwitz might be revealed by these inmates in the

[179] See Mattogno 2016, Appendix, Table 3, pp. 278-285. I have also provided detailed explanations of these releases in that study in the chapter 1.8. "Releases from 'Labor Educational Camp Birkenau'," pp. 38-42. The data are not complete.

dozens of camps and sub-camps to which they were sent, evidently because there was no "terrible secret" to reveal.

In the following table I present the list of inmate transports from Auschwitz to other concentration camps in the years 1944-1945 (1 Jan. 1944 to 17 Jan. 1945). Although it is necessarily incomplete, it presents the highest number of inmates transferred ever published or mentioned in Holocaust historiography.[180]

List of inmates transferred from Auschwitz to other camps in the years 1944-1945

Date[181]	No. of Deportees	Nationality	Destination	Source[182]
8/1/1944	23	male inmates	CC Sachsenhausen	[183]
8/1/1944	8	female inmates	CC Ravensbrück	[184]
10/1/1944	21	Poles and Russians	CC Sachsenhausen	KA, 705
20/1/1944	104	Poles and Russians	CC Buchenwald	[185]
20/1/1944	300	male inmates	CC Flossenbürg	KA, 711
22/1/1944	336	male inmates	CC Mauthausen	M, 125
22/1/1944	91	male inmates	CC Buchenwald	KA, 713
24/1/1944	61	male inmates	CC Sachsenhausen	[186]
2/2/1944	303	male inmates	CC Flossenbürg	KA, 719
9/2/1944	112	male inmates	CC Flossenbürg	KA, 721
12/2/1944	1,500	male inmates	CC Mauthausen	[187]
23/2/1944	145	male inmates	CC Buchenwald	[188]
1/3/1944	13	male inmates	CC Sachsenhausen	KA, 732
3/3/1944	421	male inmates	CC Buchenwald	[189]
4/3/1944	47	male inmates	CC Mauthausen	[190]
7/3/1944	4	male inmates	CC Sachsenhausen	[191]
9/3/1944	85	Poles and Russians	CC Buchenwald	[192]
21/3/1944	30	Poles	CC Natzweiler	KA, 741
22/3/1944	1	male inmate	CC Sachsenhausen	[193]
30/3/1944	1	female inmate	CC Ravensbrück	[194]

[180] The most comprehensive but unpublished list, compiled by Stanisława Iwaszko, records about 225,000 "Überstellungen" (Piper 1992, p. 45, note 145).

[181] According to the documents cited, the date given is either the departure date of the transport from Auschwitz or the arrival date at the destination camp.

[182] The acronyms are explained in the Appendix, Abbreviations.

[239] Frauenlager Birkenau, II. K.L. Auschwitz. Birkenau, den 27.7.44. Transportliste (800 ung. Jüdinnen). ISD, 129637158-129637171. The inmates were without registration numbers, so they came from the transit camp ("Durchgangslager") in Birkenau.

[240] Namentliche Liste der am 31.7.44 vom K.L. Auschwitz beim Arbeitskdo. I. Lippstadt Kappeler Landstrasse 132 (Eisen. und Metallwerke.) eingetroffenen 530 weibl. Häftlinge. /Ungarische Jüdinnen/. ISD, 5288794-5288803, as well as 495478-495488. Politische Abteilung. Weimar-Buchenwald, 9. Dezember 1944. Neuzugänge vom 9. Dezember 1944. 530 weibl. Häftlinge von Kl. Auschwitz nach Akdo Lippstadt (eingetroffen 30.8.44). Politische Ungarinnen-Jüdinnen. ISD, 5288805-5288522.

[241] M.K.L. Auschwitz II. Abtlg. Arbeitseinsatz. Auschwitz II., den ... Juli 1944. Transportliste ungarischer Juden nach... ISD, 129637143-129637146. 800 Hungarian Jews were without registration numbers, so they came from the transit camp ("Durchgangslager") in Birkenau.

[242] On August 2, 1944 there were a total of 2,394 Gypsies (*) in Birkenau, 1,408 men and 986 women. The men were transferred to Buchenwald, the women to Ravensbrück. The Dutch Red Cross states that a transport of female inmates left Auschwitz on August 1 and arrived in Ravensbrück on August 3, and that their assigned registration numbers are unknown, then explains, "The transport from Auschwitz, which arrived on 3 Aug. 1944, consisted solely of the surviving Gypsies from the Birkenau Gypsy Camp." On Aug. 30, a part of these Gypsies were transferred to Wolkenburg, a subcamp of CC Flossenbürg, where they received the numbers 50001-50149 (**).

These are the detainees transferred from Auschwitz that have been documented, but the list is not complete because records have not been kept of all transfers.

In the following table, I list the transfers that are listed in the *Encyclopedia of Camps and Ghettos, 1933-1945*. The sources are mainly testimonial.

[396] Politische Abteilung. Weimar-Buchenwald, den 17. Januar 1945. Neuzugänge vom 17. Januar 1945. 37 Häftlinge von KL. Auschwitz II nach SS-Kommando Sennelager/Detmold. ISD, 5285624.

August	500	Hungarian female Jews	Neuengamme (Lübberstedt)	IB, 1157
Early September	1,000	Polish male Jews	Dachau (Riederloh)	IA, 536
10/9/1944	?	Polish male Jews	Flossenbürg (Steinschönau)	IA, 671
10/9/1944	1,000	Polish male Jews	Neuengamme (Hannover-Stöcken)	IB, 1146
[13/9/1944]	500	Polish female Jews	Hamburg-Sasel (Neuengamme)	IB, 1125
Mid-September	350	Polish male Jews[398]	Neuengamme (Braunschweig)	IB, 1086
18/9/1944	505	male inmates	Sachsenhausen (Karlsruhe)	IB, 1406
Mid-October	200	Hungarian female Jews	Neuengamme (Horneburg)	IB, 1149
24/10/1944	174	male inmates	Gross-Rosen (Breslau-Lissa)	IA, 713
2-3/11/1944[399]	350	Polish, Hungarian and Czech male Jews	Neuengamme (Braunschweig)	IA, 1086; IB, 1086
15/1/1945	15	male inmates	Gross-Rosen (Gablonz)	IA, 732
	20,857			

[397] According to D. Czech (1989, p. 857), 500 of these female inmates were transferred to Nebenlager (subcamp) Ebingen, and as such are recorded above, so only 1,200 transferred must be considered here.

[398] Karl Liedke asserts: "This group consisted almost exclusively of Polish Jews from the Lodz ghetto." Liedke, pp. 153-188. Available as a PDF file at www.lekket.com (there on p. 8); also at www.yadvashem.org.

[399] For Karl Liedke (*ibid*., p. 9) the transport left on November 9.

Of these 20,857 transferred inmates, 2,244 were non-Jewish detainees, 4,888 were male Jews, 2,500 were Jewesses, 6,225 male Hungarian Jews, and 5,000 female Hungarian Jews.

In Riga (and in Kretinga, Kiviöli and Kaunas), 2,300 to 3,500 Hungarian Jews arrived, having left Auschwitz on June 5-7, 1944 (Jahn, pp. 281-284; according to Gerlach and Aly, at least 4.000; Gerlach/Aly, p. 382); of these, 1,141 are attested by name (Graf/Mattogno, pp. 103f.). Here I assume a figure of 3,500.

Thus, the following general picture results from the above.

Male inmates	Female inmates	Male Jews	Female Jews	Hungarian Male Jews	Hungarian Female Jews	Unknown	Total
60,693	29,147	19,170	31,802	40,596	36,932		
89,840		50,972		77,528		2,850	221,190

non-Jews: 89,840
Jews: 128,500
unknown: 2,850

A clandestine message from the camp's inmate resistance movement informs that the following Jews were present in the Auschwitz complex on October 14, 1944:

Auschwitz I	Auschwitz II	Auschwitz III	Women's Camp	Total
9,098	12,771	29,309	23,891	75,069

Hence, there were 51,178 men and 23,8911 women present at that time.[400]

The women camp's "*Stärkemeldung*" (Occupancy Report) of October 14, 1944 records the presence of 31,123 female inmates;[401] the report "*Arbeitseinsatz des F.L. Birkenau*" (Labor Deployment of the Women's Camp Birkenau) of the same date gives the same figure, but specifies that it included 7,217 "*Durchgangsjuden*" (transiting Jews);[402] if one subtracts this figure from the total, one obtains 23,906, a figure practically identical to that in the report, which therefore referred to ordinary female inmates. The Jews present, including the "*Durchgangsjuden*," were thus about 82,300.

From October 15, 1944 to January 17, 1945, about 30,400 Jews, 10,550 men and 19,850 women, were evacuated from the Auschwitz complex.

According to D. Czech, there were 67,012 inmates (1989, pp. 966-968), in the Auschwitz complex on January 17, 1944, including, in round numbers, (82,300 - 30,400 =) 51,900 Jews,[403] men and women, who were mostly evacuated in large transports from the next day. Therefore, for the Auschwitz complex, in the years 1944-1945, no less than (50,972 + 74,028 + 51,900 =) about 176,900 Jews, men and women, passed through in total.

Regarding the number of inmates left behind by the Germans in the Auschwitz complex, D. Czech states that they numbered about 7,000 (1,200 in Auschwitz, 5,800 in

---

[400] AGK, NTN, 155, p. 186.
[401] APMO, Stärkemeldung AuII-FKL, D-AuII-3a, p. 62a.
[402] APMO, D-AuII-3a/1a-14c, p. 352c. The correct term would be "Durchgangsjüdinnen".
[403] This figure represents approximately 77.5 percent of the total number of detainees; the above-mentioned 75,069 Jews constituted about 80 percent of the total (93,973 detainees); adding the missing 7,217 Jews gives 82,286 Jews out of a total of 101,190, and the percentage is about 81 percent. Therefore, the above percentage of 77.5% is reliable.

Birkenau and 600 in Monowitz, plus 648 corpses), but the source is a statement by Dr. Otto Wolken, a former camp inmate (Czech 1989, p. 995). A. Strzelecki proposes the figure of more than 8,500 inmates but without going into too many details.[404]

Soviet expert reports mention the presence of 2,819 inmates (1,203 men and 1,616 women) at Auschwitz,[405] and 4,299 at Birkenau and Monowitz,[406] in addition to 536 corpses throughout the camp area,[407] a total of 7,654 inmates. The total number of inmates transferred and evacuated from the Auschwitz complex, including non-Jews, was thus (196,833 + 20,857 + 3,500 + 67,012 - 7,654 =) about 280,500.

[404] Strzelecki 1995, p. 246. Of these 8,500 inmates, 8,000 were in the three camps of Auschwitz, Birkenau and Monowitz, and another 800 (sic) in the subcamps Althammer, Blechhammer, Eintrachthütte, Fürstengrube, Janinagrubee Neu-Dachs, according to him. But the total is not 8,500, but 8,800.

Abschrift.

Der Lagerarzt des
K.L.Auschwitz.

Auschwitz, den 12.Febr.1943.

An

Kommandantur
d.Schutzhaftlagerführer des K.L.

Auschwitz

Die vom 6.bis 10.Februar 1943 eingelieferten 408 Häftlinge wurden vom Lagerarzt untersucht.

389 Häftlinge sind gesund und arbeitsfähig.
16.Häftlinge sind zur leichten Arbeit fähig.
3 Häftlinge sind arbeitsunfähig.

Die Neuzugänge:

Nr. 100444 bis 100497 aus Kattowitz (Gefängnis)
100498 " 100522 " Wien (Gefängnis)
100523 " 100805 " Judenheimstätte Bialystok
100806 " 100839 " Kattowitz (Gefängnis)
100840 " 100851 " K.L.Stutthof

müssen hier im Lager eine 3-wöchige Quarantäne überstehen, bevor sie zur Arbeit eingesetzt werden können.

Es können nur solche Häftlinge direkt zur Arbeit eingesetzt werden, die nicht aus einem Gefängnis, Sammellager oder dgl. kommen.

Der Lagerarzt des
K.L.Auschwitz

ОТВЕТСТВЕННОМУ СЕКРЕТАРЮ ЧРЕЗВЫЧАЙНОЙ ГОСУДАРСТВЕННОЙ КОМИССИИ СССР.
тов.БОГОЯВЛЕНСКОМУ П.В.

Голландское посольство в Москве обратилось в Министерство Иностранных Дел СССР с просьбой информировать его относительно 80 книг, /содержащих списки убитых/, принадлежавших, по словам посольства, лагеря Аушвиц, обнаруженных в лагере Гросс-Розен и находящихся, по заявлению посольства, у советских властей.

Посольство просит информировать его, в частности, по следующим вопросам:

а/ местонахождение упомянутых книг в настоящее время;

б/ какой период времени отражают книги;

в/ количество нидерландских подданных, умерших в этом лагере.

Прошу сообщить, что Вам известно относительно упомянутых книг и Ваше мнение по существу просьбы Посольства.

Заведующий I-м Сектор.
Отд.МИД СССР Козырев /С.Козырев/

Der Lagerarzt
des K. L. Auschwitz
L/Az.: 14 f 1/10.42.-K/-

Auschwitz, den 30. Oktober 194[illegible]

Betreff: Pole Häftl.Nr. 16465, K u k i e l k a Leo, geb. 5.4.1922 in Grodek Jagiellonski.

An die
Kommandantur des Konzentrationslagers
A u s c h w i t z

Der Obengenannte ist am 30. Oktober 1942 gestorben.

K. wurde am 24.5.41 in das K.L. Auschwitz eingeliefert. Am 20.10.42 wurde K. wegen einer Phlegmone am rechten Unterschenkel in den H.-Krankenbau aufgenommen. Die Phlegmone wurde inzidirt, die Wunde zeigte starken Eiterausfluß mit geringen Heilungstendenz. Anzeichen einer **Sepsis traten hinzu. K. wurde benommen, unruhig und verstarb nach** längerer Bewußtlosigkeit.
Eintritt des Todes am 30. Oktober 1942 um 12,15 Uhr.

Todesursache: **Sepsis bei Phlegmone.**

Der Lagerarzt
des K. L. Auschwitz
[signature]
SS-Untersturmführer.

Document 48: as Document 47, six pages later. Source: GARF, 7021-108-23, p. 208.

Documents 47 and 48 contain (with spelling mistakes) the names of the two sisters Tatiana Liliana and Alessandra Bucci (in the document erroneously Andrea), one of whom was born on September 19, 1937, and the other on July 1, 1939. The difference between the two children was therefore almost two years: at their arrival in Auschwitz (April 4, 1944) they were 6 years and 7 months and 4 years and 9 months old, respectively. They were, we are assured, mistaken for twins and selected as such by Dr. Josef Mengele for his allegedly cruel experiments. This explanation overlooks the fact that, as mentioned above, the deportees were accompanied by deportation lists in which their date of birth was also entered. Secondly, one can accuse the alleged "angel of death" of all sorts of evil, but certainly not that he was such an imbecile that he would mistake two little girls almost two years apart for twins – indeed, a complete moron, since the study of twins was his specialty. Third, since Dr. Mengele's experiments are claimed to have been fatal, it is not explained how the two sisters survived them. This fairy tale was spread by the inmate Dr. Otto Wolken, the compiler of the German-language lists (many pages are written in Russian), who attributed an age of seven years to both sisters, as if they were twins.

Part One:
The Deportation of Jews from Hungary to Auschwitz (May – July 1944)

Introduction

The last revisionist writings on the deportation of Hungarian Jews to Auschwitz date back more than twenty years: Jürgen Graf's article "What happened to the Jews Who Were Deported to Auschwitz but Were Not Registered There?" (Graf 2000a&b), and the related response by Arthur Butz. titled "A Reply to Jürgen Graf: On the 1944 Deportations of Hungarian Jews," plus the articles by Richard A. Widmann and Samuel Crowell, headlined "Transfers to the Reich. The Unregistered Inmates o*f Auschwitz*" and "Beyond Auschwitz: New Light on the Fate of the Hungarian Jews," respectively. My contribution to this exchange was the 2001 article headlined "The Deportation of Hungarian Jews from May to July 1944."

In 2002 appeared Christian Gerlach and Götz Aly's book whose German title translates to *The Final Chapter: Realpolitik, Ideology and the Murder of Hungarian Jews 1944-1945*, in which they mentioned a hitherto unknown document they had found in the archives of the Yad Vashem Institute. The German headline of this document translates to "Compilation of the transports /men/ arriving in Concentration Camp Auschwitz II Birkenau in the period from 16 May to 20 Sept. 1944, Lambach, 5 August 1945. For the correctness: sgd. Leo Glaser, Director of the Insurance Institute of the Austrian Federal States, Vienna."

In the book, the document is first mentioned in a marginal context (Gerlach/Aly 2004, p. 275, note 133):

> *"Trains from Hungary – 141 in all – arrived at Auschwitz almost daily from 16 May to 11 July, none during the periods of 19-26 June and 2-6 July."*

The second mention is also rather terse (*ibid.*, p. 286):

> *"The assumption that the people from the transports arriving at night were killed indiscriminately also proves to be clearly wrong. This is shown by numerous survivors' reports and a list newly discovered by us, according to which male Hungarian Jews from 141 deportation trains were selected as forced laborers in Birkenau between May 16 and July 11, 1944.* [note 185]*."*

I will discuss the related note later. After a fleeting mention a few pages later (*ibid.*, p. 292, note 221), Gerlach and Aly return to it in their calculation of Hungarian Jews – registered and unregistered – who were interned at Auschwitz (*ibid.*, p. 294):

> *"All this gives a picture that is as shocking as it is conclusive as to the total number of Hungarian Jews selected for forced labor at Auschwitz, and not immediately murdered. We estimate them at a little more than 100,000 people, a quarter of the deportees."*

Then they note that the number of Hungarian Jews (men and women) recorded in the A series is 29,210 according to Danuta Czech's *Auschwitz Chronicle*, and they refer to Glaser's list as follows:

> *"The list of male forced laborers selected from among Hungarian Jews at Auschwitz-Birkenau between 16 May and 11 July includes 55,937 men. If women made up about half of those 'selected' for forced labor,*[1] *as indicated by the ratio of Jewish men to women who returned to Hungary after the war (see chapter 7), the total number of those provisionally excluded from murder may have been about 110,000."*

In confirmation of this figure, Gerlach and Aly cite two testimonies:

> *"Dieter Wisliceny testified after the war that 108,000 Hungarian Jews had been selected for forced labor in Auschwitz. Even more serious is the postwar statement of Fritz Schmelter, the former head of the 'Jägerstab,' hence an important functionary, that about 100,000 Hungarian Jews had been used as forced laborers."* (Gerlach/Aly, pp. 295f.)

The overall balance of Hungarian Jews outlined by the authors is as follows:

> *"About 110,000 of them were taken to Auschwitz between May and July, where most of them were redistributed to other camps.* […] *Another 320,000 Hungarian Jews were murdered in the gas immediately after their arrival at Auschwitz-Birkenau."* (*ibid.*, p. 375)

The starting point is the transport from Hungary of 437,402 or 434,351 Jews in 147 trains (*ibid.*, p. 275), of which four trains with 15,000 people were diverted to Strasshof, Austria, one to Bergen-Belsen, and one with an unknown destination. Therefore, about 425,000 Hungarian Jews arrived at Auschwitz.[2] Subtracting the 110,000 mentioned earlier, they arrive at a figure of 320,000 (but it should be 315,000).

Despite the obvious historiographical force of this disruptive document, Gerlach and Aly did not care to prove its authenticity and veracity; indeed, they did not even ask who this Leo Glaser was, but merely wrote (*ibid.*, p. 286):

---

1 As reflected in Pohl's telegram to Himmler of 26 May 1944, quoted at the top of the page; see Chapter 1.2.

2 Gerlach/Aly, pp. 275f. The figure of 425,000 is a bit too high, because subtracting from the highest figure of deportees (Veesenmayer's) the four trains with 15,000 deportees of the six diverted trains gives (437,402 – 15,000 =) 420,712 deportees, and even less if the other two diverted transports are deducted (the one diverted to Bergen-Belsen had 1,690 deportees). I will return to this later.

> *"The authenticity of this document, which lists the number of male Jews selected for work from 141 transports from Hungary with the respective day (men classified as unfit for work and instantly murdered were certainly not registered as such), is confirmed, despite dubious documentation, by its correspondence with other documents, especially the match of the dates with those of the list of Slovak railroad officials (Braham, Politics, pp. 1403-1405)."*

This explanation is bafflingly superficial. Even assuming that there is a real "match of the dates," how can this fact prove that the figures given in the Glaser list are correct? On the other hand, since the transports from Hungary left practically every day (with two breaks from June 19 to 26 and July 2 to 6, 1944), and Košice [Kassa], where the "list of Slovak railroad officials" was compiled (*ibid.*, p. 275), is about 300 km from Auschwitz, the dates of passage through this location could very hardly coincide with the dates of departure from Hungary and arrival in Auschwitz. This issue will be addressed in Chapter 1.4.

The section of the book that contains the data I set out above ("'Selections' and mass murder at Auschwitz," *ibid*, pp. 274-298) denotes an unusual lack of critical sense and uncertainty regarding sources. For example, the authors devote ample space to the "Report of summer 1944" of an "unknown woman from Szolyva"– a rather fanciful account, as I have documented in another study (Mattogno 2021b, pp. 198f.) – and claim to establish its reliability on the basis of irrelevant details (Gerlach/Aly, pp. 285f.); they cite as a reliable witness the notorious impostor Miklós Nyiszli (*ibid.*, p. 298); they know Otto Wolken's "Quarantine List" (to which I will return below) only from this secondary source: "Höß, Kommandant, p. 163, footnote by the editor Martin Boszat" (*ibid.*, p. 295, note 235. Broszat's reference to the "quarantine station" is on p. 164, though). They also inexplicably transcribed the file memo about Pohl's visit to Auschwitz: "'Construction of 6 **corpse cremors** [crematoria]' in camp sections Ba I and II," although that phrase clearly states "Construction of 6 **corpse chambers** [=morgues] in BaI and II" (*ibid.*, p. 294; this is Nuremberg Document NO-2359). However, they should be praised for having published the Glaser list.

Gerlach and Aly's conclusions were promptly noticed by Fritjof Meyer, who, the same year, drafted his well-known article, whose German headline translates to "The Number of Victims of Auschwitz. New Insights through New Archive Findings." In it, he observed (Meyer, p. 638):

> *"The fate of the deportees from Hungary in 1944 requires its own investigation. If we rely solely on the information provided by Danuta Czech, 60 trains arrived at Birkenau between mid-May and early July.[34] Each*

> *transport contained 3,000 persons, so that according to this 180,000 would have arrived, of whom, according to Czech, 29210 received a registration number. 110 000 were transferred to other camps, and according to Czech probably 40564 people were killed in the gas in the month of October 1944 alone."*

In his note 34, Meyer refers indirectly to the Glaser list:

> *"Pressac, Menschen [Fn. 11],*[3] *pp. 198f., p. 201, reads from Czech only 53 Hungarian transports from May 2 to July 11, 1944 = 160,000 people, and concludes rather arbitrarily to a total of 240,000 arrivals. According to a dubious document, 141 trains, in: Christian Gerlach/Götz Aly: Das letzte Kapitel. Munich 2002, pp. 275, 286."* (*ibid.*)

Two years later, John C. Zimmerman published a scathing critique of the article in question, in which he also addressed the Glaser List:

> *"Meyer simply ignored all of this evidence. But even worse was his treatment of the evidence he did use. He based his claim that 110,000 Hungarian Jews were transferred from Auschwitz to other camps on a recent book by Christian Gerlach and Götz Aly. They based their conclusion on a document from the Yad Vashem Archives (Gerlach and Aly, 2002, pp 295–296). The author also obtained a copy of this document from Yad Vashem. It does not support their contention. The six page document was prepared after the war and lists over 55,000 Hungarian male Jews arriving at Auschwitz in addition to other arrivals. Gerlach and Aly doubled the number for female Jews since none were listed in the report. However, the document says nothing about those Jews being transferred from Auschwitz to other camps or that the Jews listed in the document even survived after entering the camp. Rather, it is merely an incomplete report by an unfamiliar individual, apparently not associated with Auschwitz, based on very limited information available to him on prisoner arrivals into the camp (Glaser, 1945)."* (Zimmerman, p. 253)

The final judgment, patently false, was dictated only by excessive polemical ardor. After this, the dispute took place only online, which lasted for a few years.

In 2006, the ARC (Aktion Reinhard Camps) website devoted an article specifically to the matter.[4] The authors first noted that the number of Jews admitted to the camp in the above-mentioned period was not 55,937, but about 52,000. Then they verified the veracity of the document with a "Table of comparison of the data in Glaser's list with the information from D.

---

[3] Here Meyer erroneously cited the second edition of Hermann Langbein's book *Menschen in Auschwitz*, which he mentioned in footnote 28; the reference should have pointed to Pressac 1994a.

[4] "Hungarian Jews deported to Auschwitz. Last Update 18 September 2006," online at http://www.deathcamps.org/occupation/glaser.htm.

Czech's *Auschwitz Chronicle* (1989)." Regarding the number of transports, they noted that

> *"the most complete list until now – the list of the Hungarian transports passing through Kosice – contains 136 entries for the period of 14 May to 9 July. Glaser's list has 142 relevant entries for the period of 16 May to 11 July (Gerlach and Aly erroneously state that 141 transports are listed; if we disregard two entries which state that 3 and 5 Jews were selected, then there are 140 transports; if we take them into account, then we have 142 transports). Thus, Glaser's information is the most complete."*

They concluded

> *"that Leo Glaser's list of Hungarian transports is indeed generally correct, and thus the number of the Hungarian Jews gassed in Birkenau upon arrival during the Hungarian action must be reduced to about 320,000."*

Regarding Glaser and the circumstances of the document's drafting, the ARC authors stated that Glaser had been foreman at the inmate clothing department at Auschwitz, which lent credibility to him and his list.

In a 2007 article, former deportee Gábor Hirsch published the document drafted by Glaser, and argued its historical value based primarily on the so-called Kassa List (see Chapter 1.4), and observed:[5]

> *"One has to wonder how it is possible that this explosive document could remain unnoticed / undiscovered – at least for the general public – for 58 years, and that the discovery did not make big waves in Hungary* […]*."*

In 2017, he included the text of this article with some modifications in his book *Békéscsaba, Auschwitz-Birkenau and Back*, which contains precisely the paragraph "Leo Glaser's List" (Hirsch, pp. 97-115), to which I will return later.

In 2008, Michael Honey published an article online, titled "Research Notes on The Hungarian Holocaust," which made extensive use of the Glaser List, the reliability of which was simply assumed, as reflected in his brief presentation of this issue:[6]

> *"The Leo Glaser list was made by the Capo of the Kleiderkammer (Clothing Department) at the arrival rail ramp in Birkenau Auschwitz. This list records only date of arrival of each train, a general description of the prisoners such as 'Hungarian Jews' and it records the number of men selected to be prisoners able to do manual labour."*

Honey also presented the original text of the Glaser List, and compiled a table ("Train Analysis of the Hungarian Genocide Action") in which he compared the "Gaško List" (the list of trains that passed through Kassa; see Chapter 1.4) and the Glaser List. By assuming "that 10% more women

---

5 G. Hirsch, "Die Leo-Glaser-Liste," https://www.zukunft-braucht-erinnerung.de/glasers-liste.

6 http://www.zchor.org/hungaria.

were selected than men," and by deducting from the number of deportees the men and women "selected," he believed he could calculate the number of victims "gassed," as I will explain more fully later.

In subsequent Holocaust literature, the first references to the Glaser List resurfaced only many years later. In an article that appeared in 2014, Gabriel Mayer mentioned it in a "Table 2. Deportations (tabulated by author from the 'Leo Glaser' list)" (Mayer, p. 102).

The following year, Stefan Hördler, Christoph Kreutzmüller and Tal Bruttmann dusted off the Glaser List with great ease, as if it were a document known to all, and of proven authenticity and veracity:[7]

> *"According to a list by Auschwitz survivor Leo Glaser, only 53172 Jewish men from Hungary were registered in Birkenau in the period from 16 May to 22 July. No figures are available for women. Leo Glaser gives the percentage of registered prisoners as about 20 percent. With a similar proportion of women and men, it is estimated that 325,000 to 349,000 Hungarian Jews were murdered directly upon arrival, when comparing the number of deportees and those registered."*

In a book published in 2018, Hungarian historian Szita Szabolcs referred to the Glaser List with equal ease, presenting it as follows:

> *"In the tragedy of Hungarian Jewry, Leo Glaser's important train list is an authoritative document* [*hiteles*]. *It is worthy of attention, because it contains valuable data on the Hungarian convoys that arrived at Birkenau."* (Szabolcs 2018, p. 152)

In this sense, he used Glaser's data several times (*ibid.*, pp. 152f., 156f.).

In a book that appeared in 2022, Anna-Raphaela Schmitz evoked the Glaser List in these terms (Schmitz, p. 376):

> *"Research currently assumes that around 350,000 Jews from Hungary were murdered in Birkenau,"*

with the following source reference in a footnote:

> *"Cf. Compilation by former camp inmate Leo Glaser dated 5 Aug. 1945, Nurembg. Doc. PS-3686."*

The author does not explain which "research" she is referring to, nor how the Glaser List can prove that 350,000 Hungarian Jews were exterminated in Auschwitz.

Also in 2022, Ian Baxter's book *Images of War: Operation Höss. The Deportation of Hungarian Jews to Auschwitz-Birkenau May-July 1944*,

---

[7] Hördler/Kreutzmüller/Bruttmann 2015, p. 610. They repeated these statements almost verbatim in their book (*idem*, 2019, p. 42). Stefan Hördler was likely the author, because he had already considered the Glaser List, and expressed himself in similar terms, in a book by him published in 2015 (Hördler 2015), in which he came to the following conclusion (p. 299): "Based on these figures, it is estimated that 325,000 to 349,000 Hungarian Jews were murdered."

appeared, in which he included, as his "Appendix IV," a table headlined "Hungarians Deported and Selected for Labor," with a transcription of the data from the Glaser List (*ibid.*, pp. 129f.), which he also reproduced as illustrations (*ibid.*, pp. 135-139).

According to him, 52,752 deportees are recorded in this this list, but the sum of the figures he transcribed is 52,036; moreover, three figures are transcribed incorrectly: 20 May: 647 instead of 447; 23 May: 575 instead of 573; 29 June: 5 deportees are recorded who were not Hungarians but Polish Jews ("*poln. Juden*"). The correct figure is 51,829 (see Chapter 1.3).

The book's "Appendix V" contains a "Detailed Listing of Male and Female Train Transports" (*ibid.*, pp. 131-134) which I will analyze later.

Considering the merit of these historians, one should not be surprised that they did not take the slightest care to examine the three fundamental questions raised by the Glaser list: authenticity, veracity and completeness. The first is the most difficult to address, but, in the end, also the least important: what really matters is whether the list in question corresponds to reality and whether it is complete.

These three problems – authenticity, veracity and completeness – are dealt with organically in Chapter 7. A similar treatment is also given with regard to the list of trains that passed through Kassa (see Chapter 1.4).

In the Italian edition of my article on the subject mentioned earlier, which appeared in 2007 as a booklet, I relegated to an appendix a brief analysis of Glaser's transport list ("A New Document on the Deportation of Hungarian Jews to Auschwitz"). I merely noted in it that the list confirmed the number of Hungarian Jews who were admitted to Auschwitz as fit for work, some 107,200, which I had established with another method thanks to the sources then available (Mattogno 2007, pp. 59f.).

The reason for this caution, in retrospect and hindsight, was rather naive, for I observed (*ibid.*, p. 60):

> *"The Auschwitz Museum has not yet commented on this matter, so I am relegating to the appendix the treatment of this document, which is currently kept at the Yad Vashem Institute in Jerusalem."*

In fact, the Auschwitz Museum waited 20 years before reluctantly mentioning this document in its historical context (see Chapter 1.8). The reasons for this hesitation will be exposed in Part Two.

* * *

Despite the numerous Holocaust books that have appeared so far, there are still issues that have barely been touched upon, and in any case have never been set forth organically. The most important of them concerns the Birkenau "Transit Camp": how many Jewish deportees were admitted there

without being registered? And how many were transferred from this camp section to other camps?

The present study systematically analyzes this and other questions, and attempts to provide well-founded answers.

1.1. The Orthodoxy's Stance one the 1944 Deportation of Jews from Hungary

The first (German) edition of the *Auschwitz Chronicle* (Czech 1959-1962, 1964) lists 91 transports of Jews from Hungary between 2 May and 18 October 1944, from which a total of 29,159 persons were registered.[8] As for the fate of unregistered deportees, the *Chronicle* invariably claims: "The remaining people are gassed"; Czech 1964a, starting on p. 91).

In his 1983 essay – which was the most important study on this topic until Franciszek Piper's 1993 monograph – Georges Wellers presented precisely an attempt to calculate the number of Auschwitz dead based on Danuta Czech's *Chronicle*. Treating the case of Hungary, he stated that a total of 437,402 Jews were deported to Auschwitz in 87 trains, averaging about 5,028 people per train. Subtracting from the total number of deportees the number of those registered: – which he calculated at 27,758 – Wellers concluded that 409,640 Hungarian Jews had been gassed at Auschwitz (*ibid.*, pp. 147, 153).

This calculation was based on a jarring contradiction and a serious omission by Czech regarding the Hungarian Jews. In my critique of Wellers' article, I noted that, according to Exhibit 112 of the Eichmann Trial in Jerusalem (based on the report by Hungarian Lieutenant Colonel Laszlo Ferenczy dated 9 July 1944[9]), from mid-May to 8 July 1944, 434,351 Jews were deported from Hungary in 147 trains (Poliakov, p. 199), but the *Auschwitz Chronicle* recorded only 91 transports, including 33 after 11 July, the certain arrival date of the last train that had left Hungary on 8 July.[10] The conclusion was inescapable: only the 58 transports recorded in the *Chronicle* up to 11 July had arrived at Auschwitz, while the remaining 33 did not arrive there (Mattogno 1987, pp. 15-20, 37, 39).

No historian noticed, or wanted to notice, this evident fact.

---

8 In Mattogno 1987, pp. 51-54, I reproduced the complete list of transports.

9 At that time, I did not yet have the text of this report.

10 As is known, Veesenmayer mentioned 437,402 deportees on 9 July 1944. NG-5615. See further below.

Before accepting this conclusion, I submitted the problem to various historical institutes specializing in the study of the Holocaust – *Institut für Zeitgeschichte* (17 February 1986), *Zentrale Stelle der Landesjustizverwaltungen* (21 February 1986), *Centre de Documentation Juive Contemporaine* (14 April 1986), *Wiener Library* (14 April 1986), *Yad Vashem* (21 January 1987), *Auschwitz Museum* (21 January 1987) – and, of course, to Wellers himself (17 February 1986). No one was able to resolve this contradiction. On 15 April 1987, when my aforementioned study had already been published, the Auschwitz Museum replied to my letter specifying the following:

1. A part of the Hungarian Jews who arrived in Auschwitz were assigned without registration to the so-called "Depot Camp" or "Transit Camp." From there, a certain quota had been registered subsequently and admitted to the camp. Therefore the *Chronicle* entries after 11 July 1944, do not refer to transports from Hungary, but to inmates from the Transit Camp.
2. The registration of the Hungarian Jews was cumulative, so that a registration could have referred to several transports which arrived the same day.

This explanation was then adopted two years later by D. Czech in the second edition of her *Chronicle.* In it the author states that a part of the Hungarian Jews deported to Auschwitz were assigned to the Sectors BIIe, BIIc, BIIb and BIII of Birkenau, which are called "Transit Camp CC Auschwitz II" in wartime documents (Czech 1990, pp. 563f.). The registrations of Hungarian Jews are often marked with the phrase "from the RSHA transports from Hungary," by which Czech indicates that the respective registrations refer to several transports. (*ibid.*, starting on p. 628).

As an aside it should be pointed out that the Auschwitz Museum was aware of the truth about the Birkenau Transit Camp already long before the publication of the first *Chronicle* edition. For example, already in the files of the 1947 Höss Trial, we find the following statement by Otto Wolken, a witness held in high regard by Polish historians and judges:[11]

> *"The women were initially housed in Camp* [Section] *B II c and, since there were 2,000 of them on each block, they had to sleep in 2 groups. Later, Construction Section III, which was still under construction and was demolished before completion, was occupied by 50,000 Hungarian girls."*

A year earlier, a transcript of a letter from the head of the *Verwaltung* (administration) of Auschwitz II to the head of the *Zentralverwaltung* (central administration) had been published in an important Polish documentary

[11] AGK, NTN, 88 [= Höss Trial, Vol. 6], pp. 46, 237.

collection, stating that the Birkenau Camp Section BII "is being used as a reception and transit camp" (Blumental 1946, p. 95). Moreover, the information regarding the presence of "30,000 unregistered Hungarian Jews in the transit camp," which appears in the second edition of the *Chronicle* (Czech 1990, p. 695), was also known since the Höss Trial. At the eighth hearing, witness Jerzy Skotnicki, to whom I will return later, stated Camp Section III, nick-named "Mexico," housed "30,000 Hungarian and Slovak Jews."[12]

This means that the Auschwitz Museum kept silent about the truth as long as possible.

In 1989, Jean-Claude Pressac accepted the hypothetical conclusion that I had conceded in my study on Georges Wellers and the gassing victims of Auschwitz: some 271,000 Hungarian Jews had been deported to Auschwitz, on the assumption that all 91 transports listed in the first edition of the *Chronicle* had actually arrived there.[13] In his first work on Auschwitz, Pressac calculated the number of Hungarian Jews allegedly gassed at Auschwitz at 200,000 to 250,000 (Pressac 1989, p. 253). These numbers were clearly inferred from those in my study (271,000 – 29,000 ≈ 242,000) with a wide margin of safety.

In 1993, Pressac also conceded my more rigorous conclusion. After summarizing the problem I outlined above, he noted that, according to the second edition of the *Chronicle*, between 2 May and 11 July 1944, 53 transports with Jews from Hungary arrived at Auschwitz,[14] corresponding to about 160,000 deportees.[15] He moreover provided a second figure of deportees – 240,000 – which is, however, based on erroneous data. In fact, Pressac assumed that 20,000 to 30,000 Hungarian Jews had been transferred to Stutthof from Auschwitz, which, when added to the approximately 28,000 registered and the approximately 25,000 transferred Jews, gives a total of about 80,000 people; as deportees fit for work, they accounted for one third of all deportees, so the total was precisely 240,000.[16] In reality, however, only about 10,600 Hungarian Jews were transferred to Stutthof.

In the interview he granted to Valérie Igounet on June 15, 1995, Pressac stated the following in this regard (Igounet, pp. 643f.):

---

[12] United Nations Archives. Security Microfilm Program, 1988, Reel No. 62. Höss Trial, 8th Session, 19 March 1947, Deposition of J. Skotnicki, p. 821.

[13] This number results from the following calculation: [(437,402 ÷ 147) × 91 ≈] 271,000.

[14] There were in fact 57 transports.

[15] Pressac 1994, pp. 170, 173. The appendix titled *"Numero degli ebrei ungheresi arrivati ad Auschwitz e loro tasso di mortalità"* (pp. 169-173) is not included in the original 1993 French edition.

[16] *ibid.*, pp. 171, 173.

> *"Concerning the Hungarian Jews he* [Mattogno] *was right when he wrote in 1987 that the deportations took place from May to June* [correct: beginning of July], *whereas Danuta Czech, the Polish editor of the 'Chronicle of the Events in the Concentration Camp Auschwitz-Birkenau 1939-1945,' as well as Georges Wellers, who used these sources unchecked, have alleged that they lasted from May to October. Wellers refused, to get into contact with Mattogno by letter about this question, because from his point of view, one does not discuss with revisionists. A super-zealous judge even issued an* [international] *arrest warrant against Mattogno, in case he should enter French territory.*[17] *Czech published her 'Chronicle' in the sixties, on which Wellers based his calculation of the number of Auschwitz victims (1.6 million instead of four million* [which was at that time still alleged by the Auschwitz museum]*). A corrected second edition of the 'Chronicle' appeared in 1989. Of the mentioned 91 transports* [in the first edition] *remained only some 50. Czech made a mistake and thought that the camp-internal transfers in Birkenau were transports.* […]
>
> *Since Czech was left with only some 50 transports which comprised 150,000 people, instead of the originally assumed 438,000, Czech, in order to 'compensate,' increased the number of transports which arrived in May and June – without any proof – by alleging that on this or that day 'transports' instead of 'a transport' arrived, by which she made herself guilty of history falsification. However no international arrest warrant was issued against Czech. Weller's calculation were worthless after the second 'Chronicle' edition had appeared, but that did not prevent the Poles to use Weller's erroneous results as a 'serious' source."*

To be exact, Georges Wellers wrote me a very arrogant letter in 1987, in which he accused me of "distorting historical truth." He probably disliked very much the fact that, in my study on him and the 'gassing victims' of Auschwitz, I had exposed his impostures with which this oh-so-honest whistleblower of alleged forgers had invented 594,191 "gassed" Jews!

---

[17] The fact goes back to early 1987, when the first issue of the revisionist periodical *Annales d'Histoire Révisionniste* appeared in France, in which a French translation of my paper "*The Myth of the Extermination of the Jews*" was published.

1.2. Purpose and Destination of the Deportation of Jews from Hungary

On 18 February 1944, the *Reichsmarschall* of the Greater German Reich, Hermann Göring, sent the following telegram to the *Reichsführer*-SS (Himmler) in response to a request from him on 14 February:[18]

> *"At the same time, I ask you to provide me with as large a number of concentration-camp convicts as possible for air-force arms production, since experience to date has shown these workers to be very useful. The air-war situation makes it necessary to move industry underground. It is precisely here that concentration-camp convicts can be grouped together particularly well in terms of labor and storage. These expansion measures are necessary to ensure that the most modern aircraft, which have been completed in development, can be manufactured. During his visit to Insterburg, the Führer attached great importance to these aircraft. Interim discussions have already taken place between my and your departments. I would be particularly grateful for your support in carrying out this task."*

Himmler responded on 18 February with another telegram:[19]

> *"I immediately gave corresponding instructions to SS Obergruppenführer Pohl. We will participate with all possible forces in the transfer of industry underground and in manufactures themselves."*

A few weeks later, the "Fighter Plane Construction Program" ("*Jägerbauprogramm*") arose from these demands. It was established on 1 March 1944 by decree of *Reichsminister* Albert Speer for the purpose of decentralizing and increasing the production of fighter aircraft.

At a meeting on 25 March 1944, *Generalfeldmarschall* Erhard Milch, General Inspector of the German Air Force, outlined the history of the *Jägerstab*. The Allies were pursuing a strategy of destroying German air defenses, particularly the airplane factories, and without these defenses, the entire armament industry would be destroyed:

> *"Thus it came about that a definite proposal was made to the Reich Marshal and the Fuehrer: the Jaegerstab was created. The order of the Fuehrer provides clearly that the fighter plane program which the Jaegerstab is starting has priority over all other fields of armament, which means, to be sure, that other important armaments are not to be infringed upon by it."*

Then Milch outlined the organizational chart of the Jägerstab,[20] at the top of which were *Reichsminister* Albert Speer and Milch himself. The other

---

19 *ibid.*, pp. 354f.

20 The complete organizational chart was reconstructed by Saur on 14 November 1946; NOKW-261. *NMT*, Vol. 2, p. 536.

leading officers were specialists in various fields. Engineer Karl-Otto Saur, state secretary at the armaments ministry, was the chief of the main office.[21]

SS Gruppenführer Hans Kammler became "Plenipotentiary of the Reichsführer-SS to the Reich Minister for Armaments and War Production. 'Jägerstab,'"[22] and was responsible for below-ground construction and inmate deployment. The "Fighter Plane Construction Program" was divided into three parts, the first two of which, (a) new construction underground, and (b) expansion underground, fell to Kammler, the third to Organization Todt.

On 9 March 1944, Himmler addressed a letter to Göring with the subject line "Deployment of inmates in aviation industry," in which he informed him:[23]

> *"Following my telex of 18 Feb. 1944, I am submitting herewith an overview of the deployment of inmates in the aviation industry. This overview shows that at present about 36,000 prisoners are being deployed for air-force purposes. The increase to a total of 90,000 prisoners is planned.* […] *The transfer of production facilities of the aviation industry underground requires a further deployment of about 100,000 inmates. The planning for this deployment on the basis of your letter of 14 Feb. 1944 is already in full swing."*

On March 16, 1944 Dietrich Wilhelm Bernhard von Jagow, German envoy in Hungary, informed Admiral Miklós Horthy that the Führer wished to meet with him. Two days later, Horthy, accompanied by General Ferenc Szombathelyi, Chief of the Hungarian General Staff, went to Klessheim Castle near Salzburg, where the meeting took place. Eugene Levai reports ass follows about this meeting (Levai, p. 77):

> *"In the course of the conversation that followed, Hitler informed the Hungarian representatives in terms which were both extremely cold and rude, that the attempts of the Kallay Government to establish contact with the British Government had come to his knowledge, and that he was aware of the fact that the purpose of the negotiations was to pave the way for the conclusion of a separate peace with the United Nations. Hitler declared that he had decided, as a result, to occupy Hungary."*

On that occasion, as Randolph L. Braham reports, Horthy agreed to Hitler's request

> *"to the delivery of at least 100,000 'Labor Jews' for the Germany war effort. These were to be employed by the Todt Organisation for the building*

> *of an underground aircraft factory in the Protectorate of Bohemia and Moravia within a few months. This quixotic plan was designed to overcome the losses suffered by the Luftwaffe and to compensate for the destruction of the German aircraft industry by the Allies. On the basis of the Klessheim agreement, Edmund Veesenmayer took up the question of the 100,000 'Jewish workers' immediately after arriving in Budapest as the Plenipotentiary of the Third Reich."* (Braham 1981, Vol. 2, p. 597)

The next day, 17 March 1944, a *Jägerstab* conference was held, during which Carl Stobbe-Dethleffsen, in charge of transfer of fighter-plane production to bomb-proof factories above ground, and Saur dwelt on the number of workers needed:[24]

> *"Stobbe-Dethleffsen: We already count on 100,000 men for the tasks of the Jaegerstab. To transfer them would mean breaking into the rest of the armament economy to an unheard-of degree.*
> *(Saur: 100,000 without Kammler !)*
> *Including the labor we give Kammler but not including the concentration camp people.*
> *Saur: Right from the beginning we realized that 200,000 men would be transferred."*

On 6 and 7 April 1944, meetings were held in the presence of Hitler, which were also attended by *Generalfeldmarschall* Milch, in which they discussed the activities of the *Jägerstab*. In the minutes, which were compiled by Saur, the following is said in this regard:[25]

> *"As an immediate task, in addition to the step-by-step securing of the bottleneck products of the Junkers plants, the production of the* [Messerschmitt jet fighters] *Me 262 with 1000 units per month and of a further fighter with 2000 units per month is to be scheduled, and it is to be ensured that it is suggested to the Fuehrer that, for lack of construction forces and facilities, the second large-scale construction project should not be built on German territory but in the immediate vicinity of the border on suitable terrain (above all gravel base and transport possibilities) on French, Belgian or Dutch territory. The Führer agrees with this proposal, if the plant can be built behind a fortified zone. In favor of the proposal on French soil is especially the fact that it will then be much easier to provide the necessary workers. Nevertheless, the Führer asks to try to build this second plant in a much safer area, namely in the Protectorate. If the labor force cannot be provided there either, the Fuehrer will personally contact the Reichsführer SS, and have him raise the necessary approximately 100,000 men from Hungary by providing appropriate contingents of Jews. The*

[24] NOKW-338. *NMT*, Vol. 2, p. 545.

[25] Der Chef des Technischen Amtes. Berlin, den 9. April 1944. Punkte aus den Besprechungen beim Führer am 6. und 7. April 1944. BK, R 3/1509, p. 26 (p. 6 of the report). Cf. Fritz, Document 128, pp. 450-452.

Fuehrer, sharply emphasizing the failure of the construction organization at the Industrial Community of Silesia, expressly demands that this plant be built exclusively by the OT, and that the manpower be supplied by the Reichsführer SS. He demands that a meeting be held with him at short notice to discuss the details in the presence of the men involved."

On 14 April 1944, Edmund Veesenmayer, Plenipotentiary of the Greater German Reich in Hungary, sent a telegram to Karl Ritter, Ambassador on special assignment to the German Foreign Office, stating:[26]

"Sztojay[27] *gave me a binding promise at a meeting yesterday that at least 50,000 Jews capable of work would be made available to the Reich by Hungary by the end of April. The practical measures are already under way through the action initiated by the SD and the Hungarian police. The agreement of the Reichsverweser and the willingness of the Honved*[28] *and the Ministry of the Interior to cooperate has also been obtained. At the same time, Jews between the ages of 36 and 49, who had not yet been affected by the Jewish labor service, will soon be registered and drafted. As a result of this and other actions already envisaged, it should be possible in the course of May to make available to the Reich an additional 50,000 Jews for labor service, and at the same time to increase the number of Jews grouped together in labor battalions in Hungary to between 100 and 150,000."*

In another telegram sent on 15 April to Ritter, Veesenmayer specified:[29]

"In response to my request to Prime Minister Sztojay, which he accepted, that 50,000 Jews be made available for work in Germany by the end of this month, I received word today from the Honved Ministry that 5,000 Jews would be made available immediately, and then another 5,000 every three to four days until the number of 50,000 was reached.

I will arrange the details of the transport with Obergruppenführer Winkelmann[30] *and reserve the right to report further on this matter. However, I request immediate instructions as to where the transport is to be directed in the Reich."*

On 16 April 1944, Ritter sent the following telegram to Germany's Foreign Office, Group Domestics II, "to be forwarded to SS *Obersturmbannfuehrer* Eichmann" (in capital letters, without umlauts):[31]

"Reich Plenipotentiary Budapest reports that Hungarian Prime Minister makes 50,000 Jews available for work in Germany. 5,000 Jews are to be

---

26 PAAA, RZ-214, 100892, p. 5.
27 Demö Sztojay, then prime minister of Hungary.
28 The Ministry of the Hungarian Armed Forces.
29 PAAA, RZ-214, 100892, p. 7.
30 Otto Winkelmann, then higher SS and police leader in Hungary.
31 PAAA, RZ-214, 100891B, p. 72.

made available immediately (semicolon) The rest are to be deported in further groups of 5,000 at intervals of 3-4 days each.
Reich Plenipotentiary, who will arrange the details of the removal with Obergruppenfuehrer Winkelmann, asks for a decision by the Reichsfuehrung-SS as to where the transport of Jews in the Reich is to be directed. (ABS) Foreign Office would be grateful if it could be informed immediately."

On 19 April, Veesenmayer sent the following letter to the Foreign Office:[32]

"Honved Ministry informs that 10,000 Jews are ready for deportation and asks that the transport begin as soon as possible. Administrator D e s [?] *(Obergruppenführer Winkelmann) announces that all preparations have been made and that the transport can begin as soon as the necessary railway cars are available. For the time being, however, I am encountering the greatest difficulties. Request all support from there as well on the question of providing railway cars."*

In an express letter of 20 April addressed to the RSHA, "c/o SS *Obersturmbannführer* Eichmann," Eberhard von Thadden, legation councilor in the Domestics II Group of the German Foreign Office, reported on the decision mentioned earlier:[33]

"The German envoy in Budapest has telegraphed that, according to information from the Honved Ministry, 10,000 Jews are now ready for deportation to Reich territory."

After mentioning the difficulties related to finding railway cars, von Thadden added:

"The German envoy has therefore requested that the question of railway-car provision be supported from here as well. As Sturmbannführer Günther informed us during a telephone discussion of the matter, the question of the provision of railway cars will be solved from there as soon as a final instruction is received from the head of the Reich Security Main Office on the overall question of taking over these Jews for work there."

On 24 April 1944, the office of "The head of the Security Police and the SD" (Ernst Kaltenbrunner) sent "to the Foreign Office" (*Legationsrat* von Thadden) a letter with the subject "Labor deployment of Jews from Hungary in the Reich," where we read:[34]

"In the meantime, the temporary head of the Security Police and SD in Hungary has been informed by express telegram of the contents of the telegram from the Plenipotentiary and Envoy of the Greater German Reich in Hungary, according to which the Hungarian Prime Minister, in a meeting

---

32 *ibid.*, p. 43.
33 *ibid.*, pp. 44f.
34 *ibid.*, pp. 50f.

on 13 April 1944, bindingly promised to make available to the Reich an initial 50,000 Jews fit for work from Hungary.

With reference to the transport difficulties mentioned above, it was asked at the same time whether it is considered necessary for the Reich Security Main Office to intervene with the Reich Ministry of Transport in order to remedy this. Nothing prevents the Jews in question from being taken over by labor camps located in the Reich and under the control of the Reichsführer SS. A so-called <u>open</u> labor deployment in factories of the Reich cannot be considered for fundamental reasons, as was already expressed during the telephone discussions, since it would contradict the de-Jewification of the Reich territory, which by and large has been completed in the meantime, and would make illusory the removal of the Jews from the factories, which was carried out some time ago."

Veesenmayer's telegram to the Foreign Office of April 23 shows a major change in deportation policy. He reported that the ghettoization had begun on 16 April "in the Carpathian region," which had affected 150,000 Jews, and another 250,000-300,000 were to be rounded up in other districts. He then added:[35]

"Transport negotiations are initiated and provide for the daily transport of 3,000 Jews, mainly from the Carpathian region, starting on 15 May. If technically possible, they will also be transported from other ghettos at the same time, with Auschwitz as receiving location. It is to be ensured that the implementation of this operation will largely take into account concerns of war economy. In order not to jeopardize the implementation of the operation, it seems expedient to postpone the removal of the 50,000 labor Jews from the area around Budapest, as demanded by me and already promised by the government, which will be necessary in any case in view of existing transport difficulties. Transport on foot not feasible."

Veesenmayer's telegram of 15 April referred to an initial quota of 5,000 Jews already set for deportation. Their fate was decided at the end of the month. On April 27, he informed the Foreign Office:[36]

"Of the Jews prepared for deportation by the Honved Ministry, two transports, each containing about 2,000 men and women fit for work between the ages of 16 and 50, are dispatched to Auschwitz on 27 and 28 April.

By consultation with the Hungarian police and by visiting the collection camps, it was ascertained that Jews from neutral and enemy countries were exempted from deportation."

On 29 April, Veesenmayer reported the departure of the first transport:[37]

---

35 PAAA, RZ-214, 100892, p. 13.

36 PAAA, RZ-214, 100891B, p. 54.

37 *ibid.*, p. 56.

> *"Today, the first transport of 1800 labor Jews between the ages of 16 and 50 left Budapest. Tomorrow, another train with 2000 labor Jews will leave from Topolya."*

These were the first two transports of Hungarian Jews to arrive at Auschwitz in 1944. They constituted the first quota of 50,000 "labor Jews" that the Hungarian government had made available to the Reich government. The deportees' were all "fit for work" and "between the ages of 16 and 50." Nevertheless, contrary to all logic and common sense, Danuta Czech found a way to introduce alleged gassing among these deportees as well. In her entry for 2 May 1944, she wrote:

> *"Two transports arrive from Hungary, the first sent from Budapest on April 29 and containing approximately 1,800 able-bodied Jewish men and women between the ages of 16 and 50, the second sent on April 30 from Topoly and containing 2,000 able-bodied prisoners. After the selection, 486 men, given Nos. 186645- 187130, and 616 women, given Nos. 76385-76459 and 80000-80540, are admitted to the camp. The remaining 2,698 men and women are killed in the gas chambers."* (Czech 1990, p. 618)

She therefore preferred to believe that 2,698 deportees, already selected in Hungary as fit for work, at Auschwitz were incomprehensibly sent to the "gas chambers," rather than to the Birkenau "transit camp."

Such conjecture is all the more unfounded, since the "List of names of inmates employed in the Trzebinia oil refinery,"[38] a list of 813 names compiled by Judge Jan Sehn from original documents and well known to Czech, contains the names of 188 inmates between the ages of 14 (year of birth 1930) and 68 (1876) (see Chapter 1.8).

Czech mentions the Trzebinia subcamp and its oil refinery in her entry on 7 August 1944, where she refers to a specific article by Franciszek Piper, titled "The Trzebinia Subcamp," in which he reproduced a "Directory of Adolescents" dated 21 August 1944 (Piper 1978, p. 125), and a breakdown by age groups (14-15 years to 66-68 years) of the 813 inmates on the list mentioned above (*ibid.*, p. 128). Therefore, Czech was fully aware of this and knew that deportees aged 14 to 68 had been admitted. But if that is so, then how could she seriously believe that the 2,698 deportees between the ages of 16 and 50 who were fit for work had been gassed?

On 2 May, von Thadden sent the following telegram to the German embassy in Bratislava:[39]

> *"The railway schedule for transporting a large number of Hungarian Jews to work in the Eastern territories will be drawn up in Vienna on 4-5 May.*

---

[38] "*Lista imienna więźniów zatrudnionych w Rafinerii Nafty w Trzebini*." AGK, NTN, 145.

[39] PAAA, RZ-214, 100891B, p. 58.

Most of the transports will probably have to pass through Slovakia. If there are serious reservations about this, please send a wire report."

On 3 May, Hans Ludin, a German minister in Bratislava, replied:[40]

"Request that, in the event of the removal of a large number of Hungarian Jews for work in the Eastern territories, the territory of Slovakia should not be touched if possible."

In a telegram dated 4 May, Veesenmayer communicated the following to the Foreign Office:[41]

"Ghettoization in the Carpathian region /Zone I/ completed these days. Some 200,000 Jews are contained in 10 camps and ghettos. In Transylvania /Zone II/, the concentration of about 110,000 Jews living in this area was initiated today.

The transport of the 310,000 Jews from Zones I and II to Germany is to begin in mid-May, planning four transports of 3000 Jews per day. On 4 May, a conference on the railway schedule for these transports will be held in Vienna, attended by representatives of the Reichsbahn, the security police and the Hungarian gendarmerie.

Since it is assumed that foreign Jews were also included in the concentration, the legation's liaison to the Special Operations Command Eichmann will visit eastern Hungary in the course of next week, to separate Jews from neutral and enemy countries, and have them placed in special accommodations."

In early May, a meeting was held in Nagybánya between Ferenczy, Police Captain László Uray and Gestapo Captain Martin Zöldi, in which the deportation schedule was discussed:[42]

"110 convoys will transport Jews to Kassa station, where German police take over transports. Designation: D.A.-unsiedler [DA Umsiedler[43]], *resettlement of German workers. One*[44] *convoy carries 3,000 people. It consists of 45 g* [G[45]] *cars each with 70 people including baggage, and 2 C cars*[46] *in front and back for guards.* […] *The lists of names are to be prepared in two copies. One copy stays with the transport, the other copy must be sent to the Munkács police headquarters, to the commander of the station of departure."*

---

40 *ibid.*, p. 60.
41 PAAA, RZ-214, 100892, p. 46.
42 T/1162, p. 16.
43 "Da" was the abbreviation for Jewish transports (*Sonderzüge*) outside Poland.
44 "1." in the original text.
45 *Güterwagen*, freight cars.
46 3rd-class passenger cars for the guards.

On 5 May, von Thadden sent Ludin another message with the subject line "Deportation of Hungarian Jews for Labor Deployment in the Eastern Territories," where we read:[47]

> *"The following difficulties arise in the matters mentioned above: For military reasons, it is extremely difficult to route transports via Lemberg; routing transports from Eastern Hungary – and it is in this part of the region that transports are to begin – via Budapest-Vienna would lead to considerable and at present undesirable agitation of the population of Budapest. For this reason, the RSHA has attached particular importance to the fact that at least the transports from eastern Hungary, in so far as they cannot pass through Lemberg, should be routed through Slovakia.*
>
> *In view of the extraordinarily tense transport situation, however, the decision on the routing will be made essentially from the purely transport-technical point of view. As soon as the result of the railway-schedule conference is available, further information will follow."*

A "memo" by von Thadden added the following comment:

> *"Sturmbannführer Günther was informed by telephone about the statement of the Bratislava embassy. He explained that he could not consider the statement for the schedule conference, since it would be concluded by noon on 5 May.*
>
> *Moreover, the RSHA was also most interested in routing the transports via Lemberg, because it would be the shortest route. Insofar as the Lemberg route was approved at all by the military authorities, it would therefore be used for the transports."*

From these documents, it appears that the deportation of Jews from Hungary was to begin in eastern Hungary, the purpose of the transports was "labor deployment," the destination of the transports was the "eastern territories," and the shortest route to that destination was via Lemberg.

However, if the destination was Auschwitz (which, however, was not in the eastern territories, but within Greater Germany, on the border with the *Generalgouvernement*, the route to Lemberg was the longest one. In his atlas, Martin Gilbert illustrated in a specific map the "Deportations from Carpathian Ukraine and Northern Transylvania, 15 May – 8 July 1944" (Gilbert, p. 197). It shows three main routes, two of which crossed eastern Slovakia. The first, the one furthest west, was the shortest and passed through Košice [Kassa, Kaschau], L'ubotin [Stará L'ubovna], Tarnów, Krakow and Auschwitz; the middle one went from Sanok to Przemyśl, then to Tarnów, Krakow and Auschwitz; the third route was the easternmost and longest: it reached Lemberg [Lwów] via Stryj, then bent west and followed the Przemyśl – Tarnów – Kraków – Auschwitz line.

---

[47] PAAA, RZ-214, 100891B, p. 61.

However, there is no doubt that the destination of the vast majority of transports was Auschwitz, as Veesenmayer had already said on 23 April: "Auschwitz as receiving location."

In his report of 29 May 1944 Ferenczy, confirmed this:[48]

> *"The German Security Police proposes, and it is its clear intention, that the Jews take food with them for at least five days for the duration of their transportation, since upon their arrival at Auschwitz, after selection has taken place, they are sent immediately (azonnal) by trains (vonatokkal) to their various workplaces (munkahelyekre)."*

Evidently, the term "eastern territories" was a misnomer for Auschwitz.

On 6 May 1944, the Foreign Office received the following communication:[49]

> *"Sturmbannführer Guenther communicated the route for the transports of Jews:*
>
> *Start on 15 May, every day 4 trains.*
>
> *Transport route: Karpatho-Ukraine, Kaschau, Muszyna, Tarnow, Krakow, etc.*
>
> *The route passes through Eastern Slovakia, namely through the best-known place there, Presov. Transports from Transylvania have the same route."*

This was the first of the three routes described earlier.

On 11 May, Himmler transmitted to the head of the SS Main Office and to the head of the SS WVHA the following order, issued by Hitler two days earlier:[50]

> *"The Fuehrer has ordered that 10,000 men, with officers and non-commissioned officers, be transferred to the Waffen SS to guard the 200,000 Jews whom the Reichsführer SS is transferring to the concentration camps of the Reich, to be used in the large OT constructions and other tasks important to the war effort."*

A "Memo for SS Brigadeführer Fegelein" dated 9 May specifies:[51]

> *"Today, the Fuehrer has determined that, of soldiers coming from Sevastopol, 10000 men will be withdrawn for guarding the manpower needed for the fighter construction program of Ministerial Director Dorsch."*

The project was also mentioned by Himmler on 24 May 1944 during his speech to German generals in Sonthofen (Smith/Peterson, p. 203):

> *"At present, however – it is peculiar in this war – we are introducing first 100,000, later another 100,000 male Jews from Hungary into concentration camps, with whom we are building underground factories."*

49 PAAA, RZ-214, 100891B, p. 64.
50 NO-5689, pp. 1f.
51 NO-5689, p. 3.

At a meeting of the *Jägerstab* that took place on 26 May 1944, Speer asked about the project involving the Hungarian Jews. Kammler replied:[52]

> *"This is underway, with the first transports for the above-ground bunkers arriving at the end of the month."*

At the same meeting, Walter Schlempp, the representative for general construction tasks in the *Jägerstab*, reported that Franz Xaver Dorsch, head of *Organisation Todt*, had told him the day before that he wanted to deploy "100,000 Jews from Hungary," along with other workers, including 50,000 Italians.

On 24 May 1944, Pohl sent Himmler a telegram with the subject line "Transports of Jews," in which he wrote:[53]

> *"The first transports of Jews from Hungary indicate that about 50 percent of the Jews capable of work are women. Since we do not have purely female labor on a corresponding scale for this large number of women, we have to deploy them for construction projects of the OT. I ask for permission, the OT agrees. Heil Hitler, Pohl."*

Himmler replied on 27 May with another telegram:[54]

> *"Of course, Jewish women are to be put to work. In this case, it is only necessary to provide healthy food. Here it is important to provide raw vegetables. You better don't forget to import garlic in sufficient quantity from Hungary."*

On 7 July, the regent (*Reichsverweser*) of Hungary, Miklós Horthy, prohibited further deportations of Jews from Hungary, but the last transports left the next day for Auschwitz. On 11 July, Veesenmayer informed the Foreign Office of the following:[55]

> *"I. Concentration and deportation of Jews in Zone V including Operation Budapest Suburbs completed as planned on 9 July, with 55,741. Total number from Zones I to V, including Operation Suburbs, now 437,402.*
>
> *II. Progress of operation against Budapest has been reported separately to Fuschl."*

Therefore, the operation was not yet over for the Germans. On 25 May 1944, von Thadden summarized the deportation situation and the plans of the Reich authorities as follows:[56]

> *"The next morning, I visited the Eichmann office. An overview showed that by noon on the 24th, 116,000 Jews had been transported to the Reich. Another 200,000 or so are concentrated and awaiting deportation. These are mainly Jews from the northeastern parts of Hungary. In addition, concen-*

55 PAAA, RZ-214, 100893, p. 27.
56 PAAA, RZ-214, 100894, p. 22.

tration has been carried out in the south, southeast and southwest of the country, in a 30 km wide border zone. On 7 June, concentration will begin in the provinces north and northwest of Budapest. It is expected that there will be about 250000 Jews. At the same time, the ghettoization of the provinces to the south of Budapest is completed. At the end of June, it is hoped that the concentration of the Jews living in Budapest can begin. It is believed that a total of about 1,000,000 (possibly even a little more) will be apprehended, of which about 1/3 will be fit for labor deployment, and will be received by Sauckel, the OT, etc. in Upper Silesia. Only 80,000 Jews fit for labor deployment are to remain behind in Hungary under Honved guard, to be employed in the Hungarian armaments industry. The entire operation is to be completed about the end of July (including deportation).”

Horthy had thus anticipated and thwarted the German government’s plans. However, the Germans did not consider this to be his final decision. A memo of the Group Domestics II A of the Foreign Office, dated 4 August 1944,[57] informs that the requests of the governments of Sweden, Switzerland and the United States, relating mainly to permission for the emigration of 7,000 Jews from Hungary, could only be considered on the assumption

“that the temporarily halted deportation of Jews from Hungary to the Reich be completed as quickly as possible, and that this deportation has not yet been resumed.”

Eichmann, on his own initiative, succeeded in organizing two Jewish transports, one of 1,220 deportees from Kistarcsa on 19 July (Levai, pp. 256f.), another from Sárvár on August 4. This is documented by a German radio message of 5 August 1944, which was intercepted and deciphered by the British:[58]

“To RSHA, Group IV A B C, c/o SS Sturmbannführer GUENTHER,
[…] *BERLIN.*
Subject: Deportation of Jews. Reference: known.
Special train with Transport No. 6320410 left SARVAR on 4 Aug. 44 at 2230 hours for Auschwitz. Transport occupancy – 1296. Head of transport SS Untersturmführer HARTENBERGER […]*”*

In August, Horthy rescinded his prohibition, albeit in a limited way. His administration, however, was more radical. On 14 August, Theodor Grell, who was legation councilor and a case handler for Jewish issues at the German embassy in Budapest, informed the German Foreign Office by telegram of these developments:[59]

59 PAAA, RZ-214,100893, p. 129, 206.

> *"The Hungarian minister of the interior* [Miklós Bonczos] *informed SS Obersturmbannführer Eichmann that the Hungarian government, with the approval of the Reichsverweser, would begin evacuating Jews from the urban area of Budapest on 25 of this month. The Reichsverweser had agreed to evacuate a limited number of Jews only, but his administration is determined to evacuate all Jews, except for Jews already segregated as of 1 January 1941, and other exempted Jews, as well as a special group of 3,000 Jews whose exceptional treatment the Reichsverweser had personally ordered. Concentration begins on 25 August as planned in 3 camps. First transport with 6 trains, a total of 20,000 Jews, to leave 27 August, followed by 3 trains daily with 9,000 Jews.* […]
> *Embassy has not yet received official notification from the Hungarian Foreign Ministry."*

Two notes in German from Hungary's foreign minister dated 23 August set out the Hungarian government's position:[60]

> *"The Royal Hungarian Government declares itself ready – after obtaining the consent of His Serene Highness the Reichsverweser – to place at the disposal of the German Reich Government Jewish laborers necessary for the German war economy – together with their families – as of 28 August 1944. In this respect, first of all the non-resident Eastern Jews, whose number is about 60,000, will be considered. After exhaustion of this category, if necessary, other Jews will also be made available to the Reich Government for the above purpose."*

This is followed by a list of the categories of Jews who were to remain in Hungary. The note continues as follows:

> *"The Jewish workers and their families who are to be delivered to the Reich government will be handed over to a Hungarian-German mixed commission in Hungary, in collection camps, and their removal and travel to the Hungarian state border will be under the supervision of the same. Care will be taken to ensure that no more than 50 persons travel in a rail car, and that the passengers are properly fed during the journey. Food, etc., will be provided for this purpose by Hungary. The Hungarian Red Cross will provide health care and refreshment services at the staging railway stations."*

The second note states:[61]

> *"The Royal Hungarian Government – after obtaining the consent of His Serene Highness the Reichsverweser – declares its readiness:*
> *a/ all those Jews called up for labor service whose families are already in Germany /about 55 – 60,000/,*

---

60 MOL, K64-1944-43, pp. 200f.
61 *ibid.*, p. 202a.

b/ to place at the disposal of the German Government, as of 28 August 1944, for German war-economic labor purposes, those Jews who have a criminal record or are dangerous to the public, whose presence endangers public order, national nutrition and the internal security of the country. The Reich Government assures the Hungarian Government that the Jews sent from Hungary to Germany – without distinction as to age and sex – will be used exclusively for labor-service or auxiliary-service purposes."

On 25 August 1944, Veesenmayer wrote to Berlin:[62]

"SS Obergruppenführer Winkelmann just informed me by telephone that he received an order from the Reichsführer SS by telex at 3 o'clock this morning, according to which any deportation of Hungarian Jews to the Reich is strictly forbidden with immediate effect. When I asked whether this order was official and whether I could make use of it, Winkelmann answered in the affirmative."

However, this order, which is possibly related to the negotiations then in progress between Saly Mayer, representative of the "American Jewish Joint Distribution Committee" in Switzerland, and SS Obersturmbannführer Kurt Becher, who spoke "as the personal representative of Himmler" in the deal for the liberation of Jews in exchange for materials (Braham 1981, Vol. II, p. 959), did not remain in force for long.

After Horthy's proclamation regarding Hungary's exit from the alliance with the Axis on 15 October 1944 and his arrest by the Germans, Ferenc Szálasi became the new minister president and head of state.

Three days later, Veesenmayer informed the Foreign Office of new developments in this regard:[63]

"Follow result of today's negotiations between Obersturmbannführer Eichmann and the new Hungarian minister of the interior concerning the Jewish question:

1.) In spite of Szalasi's basic statement that no Hungarian Jews should be transported into Reich territory, the minister of the interior will attempt to obtain exceptional approval for the requested temporary transfer of 50,000 male Jews fit for deployment, who are urgently needed in Reich territory for the fighter program and to replace Russian prisoners of war used elsewhere. Transport is to be by foot accompanied by German commandos, where, on crossing the Reich border, shorter deployment at the southeast fortification is planned."

In a memo dated 27 October 1944, Horst Wagner, legation councilor and head of Group Domestics II of the Foreign Office, expounded a summary of the situation. There had been about 900,000 Jews in Hungary, "of these, 437,402 had been sent to the Eastern territories for work by 10 July of this

62 PAAA, RZ-214, 100893, p. 69.

63 PAAA, RZ-214, 100891A, p. 65.

year." About 462,000 Jews were still in the country. Section 5) sets out future plans:[64]

> *"After the establishment of the Szálasi government, the evacuation of Jews in Budapest who are fit for work was begun; initially, 25,000 were to be sent to the Reich for work, and Envoy Veesenmeyer intends to negotiate for another 25,000 in the near future. Jews unfit for work are currently to be concentrated in camps outside Budapest."*

On 23 October, Veesenmayer wired to Berlin:[65]

> *"Today obtained concession from Szalasi that the first 25,000 (25,000)* [sic] *Hungarian male Jews fit for work be released provisionally for half a year to perform work in the Reich."*

The next day, Veesenmayer informed the foreign minister that the purpose of requesting these labor Jews was "their use in the German fighter-plane program."[66]

These additional 25,000 Jews were requested on 29 October with a "special train" (von Ribbentrop's code name for telegraphic messages) to "Diplogerma Budapest" (code name for the German embassy in Budapest):[67]

> *"Reich Foreign Minister asks you to raise and enforce with Szalasi as soon as possible the demand for the removal of another 25,000 labor Jews to the Reich, since the need for labor is very great."*

In the report of 27 October 1944, written by Hans-Ulrich Geschke as "The Commander of the Security Police and SD in Hungary and Chief of Einsatzgruppe G," we read the following (Boberach, p. SOE 0347-13; p. 5 of the report):

> *"In agreement with the minister for the total-war effort, the Honvéd Ministry carried out an operation, by which about 15,000 male Jews were registered, assigned to the Honvéd labor service and immediately transported to the Danube for fortification construction. – On 23 October, all Jews fit for work born between 1884 and 1928, as well as adolescents fit for work born between 1924 and 28, had to report for work at assembly points. The result was about 25,000 female and 4,000 male Jews. About half of these Jews were deployed by the Higher Pioneer Leader 19 for fortification construction. – With the approval of Minister President Szálasi, 25,000 Jewish laborers were transported to the Reich on foot. The first trek was started on 27 Oct. After apprehending all Jews fit for work, it is planned to ghettoize the rest of the Jews in Budapest, estimated at about 120,000."*

64 PAAA, RZ-214, 100891A, p. 53.
65 PAAA, RZ-214, 100894, p. 87.
66 PAAA, RZ-214, 100894, p. 89.
67 PAAA, RZ-214, 100891A, p. 41.

A telegram dated 13 November 1944 by Veesenmayer informs about the development of German demands:[68]

> *"According to SS Obersturmbannführer Eichmann, to date about 27,000 Jews of both sexes who are fit to march and working have been put on the march to Reich territory. It is expected that there will be a remaining contingent of about 40,000 Jews still fit for work, who will be transported away in daily installments of 2 - 4,000."*

He returned to the issue in more detail in another telegram dated 21 November 1944:[69]

> *"In the course of the evacuation of Jews from Budapest, a fundamental change occurred. Szalasi ordered that, in view of the inadequacies that had arisen in this connection, the transport of Jewish women should no longer be permitted by foot, but only by means of transport provided, which, in view of the impossibility of procuring rail cars, was practically tantamount to stopping the deportation. On the other hand, the head of the Jewish deployment in the Lower-Danube Area, SS Obersturmbannführer Hoess, who was present here, stated that he could only deploy men who were capable of the best work, if possible not over 40 years of age, and who were able to endure the particularly heavy work to be performed underground in the Reich territory for a longer period of time. Jews who did not meet these requirements, including women, currently represented the heaviest burden on his labor operations, so that he even had considered rejecting unsuitable contingents already en route to the Reich border, and had only refrained from doing so for political reasons. Accordingly, the principle of clearing out as much of the urban area as possible is no longer decisive for further work here, but only the removal of Jews who are absolutely fit for work."*

According to a "Report on the situation of the Hungarian Jews" by Swedish diplomat Raoul Wallenberg dated 8 December 1944,

> *"about 40,000 Jews, comprising 15,000 members of the Jewish Forced Labour Corps and 25,000 other persons of both sexes were apprehended in their homes or in the streets and forced to set out for Germany on foot.* […] *20,000 members of the Jewish Forced Labour Corps were taken to the frontier by train."* (Levai, pp. 381f.)

These Jews were not deported to Auschwitz, but to Austria, where they were mainly deployed in the construction of the line of fortifications called *Südostwall*.

1.3. Reports on the Deportation of Jews from Hungary

The course of the Jewish transports from Hungary is amply documented by multiple telegrams from German officials in Budapest to the authorities in Berlin, sent mainly by Veesenmayer to Ambassador Ritter.

The first is dated 16 May, and has the number 182:[70]

"The Higher SS and Police Leader reports to me on 15 May […]*:*
Jews: A total of about 300,000 Jews are now concentrated in the Carpathian Region and in Transylvania. Their removal began on 14 May. Four special trains with 3,000 Jews each are leaving daily."

Telegram No. 188, dated 18 May 1944:[71]

"The Higher SS and Police Leader reports to me on 17 May 1944 […]
Jews: Of the approximately 300,000 Jews concentrated in the Carpathian Region, 23,363 have been deported so far. […]*"*

Telegram No. 191, dated 19 May 1944:[72]

"The Higher SS and Police Leader reports to me on 18 May 1944 […]
Jews: Total number of deportees: 51,000"

Telegram No. 193, dated 20 May 1944:[73]

"The Higher SS and Police Leader reports to me on 19.5. 44 […]
Jews: The evacuation operation in eastern Hungary continues to proceed according to plan. So far, 62,644 Jews have been deported."

Telegram No. 207, dated 25 May 1944:[74]

"The Higher SS and Police Leader reports to me on 23 May […]
Jews: Total number deported to the Reich 110,556."

Telegram No. 212, dated 25 May 1944:[75]

"The Higher SS and Police Leader reports to me on 24 and 25 May 1944 […]
Jews: 24 May. Total number deported to the Reich 117,082. […]
25 May. Total number deported to the Reich 138,870."

Telegram No. 1474 by Veesenmayer to the Foreign Office, dated 25 May 1944:[76]

"Deportation Jews from Karpatho Region and Transylvania runs smoothly as planned. To date, about 150,000 have been dispatched to their destina-

"The Higher SS and Police Leader reports to me on 8 July 1944 […]

Jews: Total number deported to the Reich: 429.078."

Telegram No. 1927 by Veesenmayer to the Foreign Office, dated 11 July 1944:[99]

"I. Concentration and deportation of Jews in Zone V including Operation Budapest Suburbs completed as planned on 9 July, with 55,741. Total number from Zones I to V including Operation Suburbs now 437,402."

From the reports by Ferenczy which provide useful numerical data,[100] the following data about the deportations of Jews from Hungary can be drawn:

– 21 May: up to midnight, 94,667 Jews had been deported in 29 trains.[101]
– 28 May: up to midnight, 184,049 Jews had been deported in 58 trains.[102]
– By 7 June, 275,415 Jews had been deported in 92 trains.[103]
– By 29 June, 380,238 Jews had been deported in 129 trains.[104]

103 *ibid.*, p. 514. Report of 9 June. T/1165, p. 26.
104 *ibid.*, p. 519. Report of 29 June.

– From 14 May to 6 July, 410,223 Jews had been deported in 139 trains, with the exception of Police District I (Budapest, suburbs).[105]
– By 8 July, 434,351 Jews had been deported in 147 trains.[106]

These reports also contain more-specific information regarding individual areas of operation:

Zone III (Districts II & VII): deportation from 11 to 16 June.
Jews *concentrated* in preparation for deportation:
23,725 in the Szèkesfehérvár District,
28,104 in the Miskolc District,
a total of 51,829 (12-June report).
The number of trains is not given, but is obtained by subtracting the 28-June number (129 trains) from the 7-June number (92 trains): 37 trains, 14 of which belong to the period 25-28 June (see below), so 23 trains must be counted for the period 11-16 July.

Ferenczy does not report figures for Jews *deported*, except this: up to noon on 6 June, 16,238 Jews had been deported in 6 trains (12-June report).

Zone IV (Districts VI & VII): deportation from 25 to 28 June.
21,489 from the district of Szeged
19,016 from Debrecen district,
a total of 40,505 in 14 trains (29-June report).

Zone V (Districts III & VI): deportation from 4 to 6 July.
17,667 from Szombately district.
11,889 from the district of Pécs
a total of 29,556 in 10 trains (9-July report)

Zone V (District I): deportation from 6 to 8 July.
24,128 Jews in 8 trains (9-July report).

Braham summarizes Ferenczy's reports in a table, in which he compares them with Veesemmayer's data (Braham 1981, Vol. 2, p. 607):

[105] *ibid.*, p. 521. Report of 9 July. There are two different reports dated 9 July 1944.
[106] *ibid.*, p. 522. Report of 9 July. T/1166, p. 40: "From 14 May 1944 to today, a total of 434,351 people of the Jewish race have left this country by 147 trains."

Table 1.1: Deportation Data by Ferenczy and Veesenmayer Compared

Police District	Deportation Period	# Trains	# Deportees	
			Ferenczy	Veesenmayer
VIII, IX, X	15 May – 7 June	92	288,333 [275,415]	289,357
II, VII	11-16 June	23	23,725	50,805
			28,104	
V, VI	25-28 June	14	21,489	41,499
			19,016	
	4-6 July	10	17,667	55,741
			11,889	
III, IV, I	6-8 July	8	24,128	
Totals:		147	434,351	437,402

Although, on the whole correct, these figures require clarification. Braham writes (*ibid.*):

> *"In his report of June 8, 1944, Ferenczy lists the number of those deported from Police Districts VIII, IX, and X as 275,415. His later reports, however, brought the figure closer to that of Veesenmayer."*

However, in no report did Ferenczy mention the figure of 288,333 deportees; it is the result of a calculation. In fact, if we subtract from the total number of deportees the subtotals from June 5 to July 8, we obtain:

(434,351 – 51,929 – 40,505 – 29,556 – 24,128 =) 288,333

If, on the other hand, one subtracts from the figure of 29 June those for 5-28 June, one obtains:

(380,660 – 51.929 – 40,505 =) 288,326

On the other hand, Ferenczy never corrected the figure of 275,415 (as he did for a much less important case[107]), which, as I will explain later, was not the result of an error, but was only an incomplete figure.

Ferenczy's reports, for the periods of 11-16 and 25-28 June, and 4-6 July also present the relevant deportation plans with the indication of concentration centers, number of persons concentrated, day and number of transports planned. Examination of these plans shows that the numbers of trains actually departed diverges in some cases from those indicated above. I return to this question in Chapter 1.4.

The following general picture of Jewish deportations from Hungary can be deduced from the above data.

[107] In his report of 10 May 1944, Ferenczy specified that the numbers of Jews concentrated in Szilágysomlyó was not 8,500, as he had previously written, but 7,200. Karsai/Molnár, p. 506.

Table 1.2: Cumulative Deportation Figures	
Day 1944	Total # Deportees
17 May	23,363[108]
18 May	51,000
19 May	62,644
21 May	94,667
23 May	110,556
24 May	138,870
25 May	150,000
27 May	17[?],038
28 May	184,049
30 May	204,312
31 May	217,236
1 June	236,414
2 June	247,856
3 June	253,389
6 June	274,949
7 June	289,357 (Veesenmayer)
7 June	[288,333] (Ferenczy)
13 June	316,8035
14 June	324,005
17 June	340,142 [340,162][109]
26 June	351,850
29 June	377,601
29 June	380,660
30 June	381,661
6 July	410,223[110]
7 July	422,911
8 July	429,452
9 July	437,402 (Veesenmayer)
9 July	434,351 (Ferenczy)

[108] This figure is blatantly anomalous, because there would have been (51,000 – 23,363 =) 27,637 departures in just one day, meaning 8 or 9 trains. This most likely refers to the morning of 17 May, when 7 transports had presumably left.

[109] According to Veesenmayer's telegram of 30 June 1944, 340,162 Jews had been deported from Zones I-III, a figure confirmed by the sum of deportees from Zones I-II and III: 289,357 + 50,805 = 340,162. Therefore, the figure in Veesenmayer's telegram no. 1830 of 17 June 1944 (340,142 deportees) is incorrect.

[110] Without Zone VI (24.128 deportees).

1.4. The Kassa List

The "list of Slovak railroad officials" evoked by Gerlach and Aly, also called Gaskó List (Gaško in Czech), first appeared in 1984 in the Toronto magazine *Menora-Egyenlőség* with the title "*Halálvonatok*" ("Death Trains"). They published the documents they had received on 7 May 1984 from Mrs. Edith Alexander, widow of Dr. Dr. Ladislav Alexander, who had been a friend and colleague of Dr. Miklós Gaskó of Kassa.

The documents consist of (the accompanying letter is in English):

"1. Three pages of eyewitness testimony written by Dr. Miklos Gasko entitled 'Death Trains' (Halálvonat[ok]*).*

2. Excerpts from the original daily records of the military headquarters of Kassa, page 173,697 dealing with the trains (137 in number) deporting 401,439 Jews by way of Kassa.

3. Biography of Dr. Miklos Gasko and his obituary notice."

Although a reference to a document is given here – a note [or record: *feljegyezèse*] from the headquarters of the Kassa Railway Station, p. 173,697 (a somewhat improbable page number) – the article contains a simple list of 137 transports, the total of which, however, does not amount to 401,439 deportees, but to 400,426 ("Halálvonatok," 1984).

In 1988, Randoph L. Braham transcribed this list, with reference to the above-mentioned Canadian journal article, but with numerous transcription errors, so that the total turned out to be 398,233 deportees.[111] Later, Braham republished the list correctly (Braham/Tamás/Iván, Vol. II, pp. 1357-1359).

In the following years, more information about the origin of the list in question surfaced. Stefan Hördler wrote in 2015 (2015, pp. 298f., note 80):

"The Košice List originated from the notes of the railroad station official István Vrancsik in Kassa/Košice on the Slovak-Hungarian border, which were handed over to the lawyer Dr. Mikuláš Gaško and compiled by him into a typewritten list."

Recently, Dóra Pataricza reiterated (Pataricza, p. 309):

"István Vrancsik, the commander of the Kassa train station, compiled this data. He made notes on the trains passing through Kassa and the number of deportees. Vrancsik recorded every day at the station how many trains passed through the railway station, from which area of Hungary they came, and how many Jews the trains carried. According to him, the wagons were opened at the station, and people were counted and handed over to the German and Slovakian railway staff. The rail car doors were then

[111] Braham 1988. Vol. 2, pp. 514f.; in Mattogno 2007, I reproduced this flawed list (pp. 53-56).

> *resealed. Vrancsik's acquaintance, lawyer Gaskó, helped in preserving these records. As such, this is one of the most important sources on the number of victims of the Hungarian Holocaust."*

The problem in this narrative is that István Vrancsik was neither "the commander of the Kassa train station," nor a "railroad official" at all.

In the account published in the above-mentioned article (in Hungarian), Dr. Gaskó stated that the source of his information was a good friend of his, István Vrancsik, the owner of a delicatessen shop (*csemegeüzlet*) on Kossuth Lajos Street, which catered to the military railroad command at the Kassa Station. István reported to him how many trains had passed through Kassa, what region of Hungary they came from, and how many Jews they contained. At Kassa, the deportee cars were opened and people counted, then they were closed up and handed over to Slovak personnel. The first train passed through Kassa on 14 May 1944, the last on 20 July; there were a total of 137 trains carrying 401,439 deportees.

Dr. Gaskó added ("Halálvonatok," p. 4):

> *"This is attested by a copy* [*másolata*] *of the 1944 military register of the military command of the Kassa Station, obtained by Vrancsik and attached hereto as a copy* [*másolatban*]*."*

So the list published in Menora-Egyenlőség was a copy of a copy. The "military register" of transports does not exist, so it is impossible to know whether the list in question is an authentic copy of the original document. What is more, the manner in which it was obtained by Vrancsik is unknown.

The Gaskó List or Kassa List has been accepted by Holocaust historiography as authentic without any critical analysis. However, it poses significant problems. First, if, of the total of 437,402 or 434,351 deportees in 147 trains, 400,426 deportees in 136 trains passed through Kassa up to 8 July 1944, where did the remaining 36,976 or 34,105 deportees in 11 trains pass through?

Second, it cannot be said with absolute certainty that all trains that passed through Kassa were directed to Auschwitz, nor that all trains that did *not* pass through there were *not* directed to Auschwitz. But even assuming that all trains that passed through Kassa later arrived at Auschwitz, it is impossible to establish a direct correlation between the Kassa List and the Glaser List. This is precisely the "match-of-the-dates " argument proposed by Gerlach and Aly, which was later developed by Michael Honey and taken up by Ian Baxter, as I mentioned earlier.

Two documented events help shed light on the issue.

Kassa was the border station with Slovakia; across the border, the first station, a few miles away, was Kysak.

On 14 June 1944, Ludin sent the German Foreign Office a telegram, in which he reported an unpleasant incident:[112]

> *"Slovak intelligence has brought the following report of Police Station Kysak, Presov District, to the attention of German intelligence officer: 'On 24 May, while German transports No. 6332316, 6332316 and 6332318 were passing through, which brought Jews from Hungary, it was established that the German transport escorts, during their stay at the Kysak railroad station, went into the cars and forced the Jews, by shooting them, to give them jewelry and other valuables such as watches, rings, fountain pens and also money. It was found out that the accompanying German units of transport no. 6332317 entertained themselves with this money in the station restaurant, got drunk and sang.*
> *The transports stood in Kysak, No. 6332318 from 11:15 a.m. to 2:23 p.m., No. 6332316 from 1:35 p.m. to 4:12 p.m. No. 633231*[7] *from 6:25 p.m. to 9:35 p.m.'"*

On 27 August 1944, engineer Endre von Biró forwarded "to the German embassy" in Budapest a request for his wife's release, explaining the background:[113]

> *"On 28 May 1944, my wife, Iren von Biró, née Hirsch, was transported from Marosvásárhely by train no. 6,332,340 [sic] Da schedule 502, through Kassa to Greater Germany. The train left Kassa on 30 May 1944 at 2:23 p.m. as no. 4,637."*

Thus, there was a detailed "schedule" for the transit of each deportation train, which was assigned a specific number (the documents mention numbers 6332316, 6332317. 6332318 and 6332340, also the number 6320410, which left Sárvár on 4 August 1944).

These trains stopped at Kysak Station, and this was probably the norm. However, the military command of Kysak Station, like that at Kassa, should also have compiled a list of trains that passed through there. The numbering of the trains, one must assume, respected the chronological order of departure from Hungary, but train no. 6332318 arrived and departed there before the other two.

As for the other case, the Kassa List mentions precisely a train that left Marosvásárhely on 27 May 1944 with 3,183 people. It arrived in Kassa on the 28th, departed on the 30th, and arrived in Auschwitz probably on the

---

[112] PAAA, RZ-214, 100891AB, p. 20. NG-5569.

[113] PAAA, RZ-214, 100891A, pp. 80f. Von Biró had received a release certificate for his wife from the Hungarian Foreign Office, but it was received after the train had departed, so he asked for her to be sent back. On 10 September, the German embassy in Budapest replied that, "since the deported Jews whose return is requested must be considered as carriers of secrets with regard to their passage through A Camp or their present activity in Germany, sending them back to Hungary is unacceptable." PAAA, RZ-214, 100891A, p. 78.

31st. It is unknown whether such a long stop in Kassa was an exceptional event or whether it was the norm. All this makes the "match-of-the-dates" argument even more flimsy.

But already the mere fact that, up to 9 July 1944, the Kassa List contains 136 records and the Glaser List 142, makes it impossible to match dates accurately without arbitrary external forcing, as I shall show in more detail later.

Scholars who had unrestricted access to the archives, such as Braham and Gerlach/Aly, did not care at all to investigate the historically important issue of the railway schedules, the numbering of the trains and their passage through Kysak Station. Instead, from the first document quoted earlier, they simply drew a cock-and-bull story, as if this fact, from their perspective of a mass extermination of hundreds of thousands of people, was more valuable than issues concerning transportation.[114]

The problem of missing transports has been addressed in particular by Eszter Garai-Édler and Michael Honey. In 2014, the former compiled a list of transports sorted by zone and deportation location,[115] distributed as follows:

– Zone I: 57 transports with 174,589 persons[116]
– Zone II: 35 transports with 100,341 persons
– Zone III: 17 transports with 47,246 persons
– Zone IV: 16 transports with 44,942 persons
– Zone V: 14 transports with 34,086 persons
– Zone VI: 8 transports with 22,067 persons

Total: 147 transports with 423,271 persons (including the transport of 20 July).

The essential source is the Kassa List, with some additions (trains that did not pass through Kassa):

– 28 May: 5.200 deportees from Baja
– 26 June: 2.999 deportees from Debrecen
– 26 June: 2.567 deportees from Szolnok
– 27 June: 3.842 deportees from Debrecen
– 28 June: 3.263 deportees from Szeged
– 29 June:[117] 1.684 deportees from Szeged.

---

[114] Braham 1981, Vol. 2, p. 610; Gerlach/Aly, pp. 277f.

[115] https://hungarianfreepress.com/wp-content/uploads/2017/07/Tablazat_Menetrend-—-1944_-angol.pdf

[116] The deportations from Zone I (corresponding to Police District VIII) did not occur consecutively, but were interspersed with transports from Zone II (Districts IX and X). Therefore, the 57 transports in question bear no relation to the 58 indicated by Ferenczy up to 28 May 1944. See further below.

Total: 19.555 deportees in 6 trains.

The list compiled by Michael Honey, which was reproduced as such by Ian Baxter, is similarly based on the Kassa List, which is completed with 8 more transports (9 if including one transport on 19 July), each of 3,160 people. Honey explicitly mentions deportations to Strasshof, which he says involved 20,787 people, but another figure appears incomprehensibly in the summary:

3,800 deportees from Budapest (Kistarcsa) and Bácska Topolya arrived at Auschwitz on 2 May 1944, 402,117 deportees ascertained by the Hungarian government, and "9 more trains as per Glaser List (these are in the tabulation 3160 people per train) 28,440." Adding up these figures, he gets the total of 434,357 deportees, which is almost identical to Ferenczy's: 434,351.

This is actually a forced calculation in order to arrive at a predetermined result. First, Ferenczy's figure does not include the first two transports (29 and 30 April 1944), so 3,800 deportees must be subtracted. Second, the ninth train refers to 19 July, so up to 9 July, one has to consider 8 transports with 25,280 deportees, but those going to Strasshof were 20,787 (figure taken from Braham), so it is not clear where the remaining (25,280 – 20,787 =) 4,493 came from. This is another artifice to arrive at the figure of 434,357 deportees. Honey's true total is actually 426,064.

For the period 14 May to 9 July, Honey therefore incorrectly considers (434,357 – 3,800 – 3,160 =) 427,397 deportees in (136 + 8 =) 144 trains.

The 8 added trains are as follows:

1. 24 May: 3.160 deportees "possibly Barcs"
2. 26 May: 3.160 deportees, "possibly Baja via Gänserndorf, Aust."
3. 26 May: 3.160 deportees, "possibly Baja (as above)"
4. 29 May: 3.160 deportees, with no origin given
5. 6 June: 3.160 deportees from Dej
6. 10 June: 3.160 deportees from Székesfehérvár
7. 11 June: 3.160 deportees, with no origin given
8. 17 June: 3.160 deportees from Dunaszerdahely.

However, these are mere conjectures, especially – but not exclusively – for the claimed number of deportees.

R.L. Braham states that between 25 and 28 June, 6 or 7 trains with Jews departing from Zone IV went from Hungary to Strasshof (20,787 people). The deportees origins: 5,640 from Baja, 6,841 from Debrecen, 5,739 from Szeged and 2,567 from Szolnok (Braham 1981, Vol. 2, p. 652).

Szita Szabolcs writes on this subject (2005, p. 103):

---

[117] In the list incorrectly 29 July.

> *"At Eichmann's behest, a total of 15,011 Jews – 6,641 from Debrecen, 5,239 from Szeged, 2,567 from Szolnok and 564 from Baja – arrived to the labor camp with their families.* […]
> *The Vienna Landeswirtschaftsamt (regional economic office) recorded 14,700 Hungarian prisoners. Existing records from the end of August and beginning of September indicate that 5,972 people (41%) performed forced labor in the Greater Vienna region of the Reichsgau. According to data collected by one of the record keepers, a deportee from Mezőtúr named Éva Friedmann, there were 6,889 men (41.05%) and 9,812 women (58.95%) among the Hungarians who had been sent to the Strasshof camp."*

These data, however, do not come from a document, but from the testimony of former inmate Edit Csillag (never mentioned by Szabolcs), who claims to have had access to Strasshof's inmate personnel files. She mentioned the aforementioned transports while also specifying the dates of their arrival:[118]

Table 1.3: Strasshof Trains acc. to Edit Csillag

Day 1944	Origin	# Deportees
27 June	Szolnok	2,567
29 June	Debrecen	6,641
30 June and 1 July	Szeged	5,239
30 June	Budapest	1,690
30 June	Baja	564
Total:		16,701

The transport from Budapest is the one mentioned by Rudolf Kastner (who claimed 1,684 deportees for it), which left on 30 June and arrived in Belgen-Belsen on 8 July (Kastner 1961, pp. 130, 134).

Comparison of Braham's figures with those given by Edit Csillag suggests that the former (except for the one departing from Szolnok) are an obvious corruption of the latter, caused by transcription errors.

The 564 Jews from Baja deported to Strasshof were associated with the transport from Bácsalmás on 28 June 1944. Braham asserts that "approximately 400" Baja Jews remaining there after the two May deportations were transferred to Bácsalmás on 17 June and deported from there on 25 June (Braham 1981, Vol. 2, p. 644), but the date is inaccurate. In the entry "Bácsalmás" in the *Encyclopedia of Camps and Ghettos*, Cristina Bejan notes (White, p. 315):

> *"Between June 25 and 28, 1944 the Bácsalmás ghetto was emptied. Most of the Jews from Bácsalmás were sent to Auschwitz, with a smaller group*

[118] http://degob.hu/index.php?showjk_img_full=3628&page=1.

sent to the Strasshof camp, near Vienna, as part of Rudolf (Rezső) Kasztner's negotiations with Adolf Eichmann."

Evidently, the transport from Bácsalmás on 28 June, which contained 2,737 deportees, also passed through Vienna. 564 people were taken off at Strasshof, so that 2,173 arrived at Auschwitz.

Gábor Hirsch notes that "there were transports to Auschwitz via Kassa/Košice which are not mentioned in the Vrancsik/Gaško list. How many differences there are is difficult to say," and supports this assertion with two examples, but only the first is based on documents. He notes that Braham, in his book *A magyarországi Holocauszt földrajzi Encíklopédiája* (*Geographical Encyclopedia of the Hungarian Holocaust*), mentioned a transport of 2,743 deportees that arrived at Auschwitz on 17 June from Székesfehérvár, and followed the Gödöllö-Hatvan-Milskolc-Hidasnémeti railway line. Various accounts from the DEGOB[119] attest to this transport. The most important is No. 3564, which was written by the twins Andre and László Kiss.[120]

Hirsch continues:

"The twin László Kiss of Seregélyes writes in his 'Auschwitz Diary' that the train composition with 25-30 wagons and drawn by two locomotives halted in Kassa/Košice, where the police officials confiscated the last valuables and the transport was taken over by SS guards. It arrived in Auschwitz-Birkenau on Saturday, 17 Juni (the transport was not listed by Vrancsik/Gaško)." (Hirsch, p. 101)

The twins in question were registered at Auschwitz under numbers A-14319 and A-14320 (Kubica, p. 452). According to the "List of Jewish Transports," these numbers were assigned precisely on 17 June 1944 (see Appendix, Table 1.I).

The *Encyclopedia of Camps and Ghettos* also states that "documentation suggests that 2,743 Jews were deported from Székesfehérvár to Auschwitz on June 14, 1944" (White, p. 376).

To assess the reliability of the Kassa List, it must be compared with known transport data. This comparison cannot be made with the data in Table 1.2, because they refer to the departure of trains from Hungary, and it is not known with certainty when they passed through Kassa: the same day? On the next day? After two days?

Therefore, it is necessary to take as a reference the chronology of the various stages of deportation from the Hungarian police districts, which were separated by intervals of more than three days, so the passage of the

---

[119] *Deportáltakat Gondozó Országos Bizottság*, National Committee for Assistance to Deportees.

[120] http://degob.hu/index.php?showjk_img=3564.

trains through Kassa occurred before the start of the next stage. Since even the final figures for Veesenmayer (437,402) and Ferenczy (434,351) differ roughly by 1%, one should not expect a perfect coincidence between the number of deportees who left Hungary and the number of those who passed through Kassa. In practical terms, the respective figures can be considered coincident if they do not diverge much more than 1%.

With regard to the first phase of deportation (14 May to 7 June 1944), one must take up the data presented in Table 1.1.

Table 1.4: Deportation Data from Police Districts VIII, IX and X Compared

Date	# Trains	# Deportees		Kassa List	# Trains
		Ferenczy	Veesenmayer		
21 May	29	94,667		94,697	29
28 May	58	184,049		183,583	58
15 May- 7 June	92 [96]	288,333 275,415	289,357	273,517[121]	91

The following should be observed here.

1) Up to 21 and 28 May, the number of actual deportees and that of the Kassa List agree almost perfectly.

2) At the end of the first phase of deportation, 7 June 1944, the Kassa List records the passing of 273,517 deportees in 91 trains. The missing transport may be the one from Nagykálló (1,900 deportees on 21 May 1944) which is reported by Eszter Garai-Édler in the list mentioned earlier; in that case, this results in (273,517 + 1,900 =) 275,417 deportees in 92 trains, a figure virtually identical to Ferenczy's: 275,415. I have already mentioned that this was simply an incomplete figure, because it did not take into account the Jews sent to Gänserndorf, and probably to Estland, who were thus (288,333 – 275,415 =) 12,918 in 4 transports.

On the basis of testimony, Eleonore Lappin-Eppel informs us that at least two transports were directed to Gänserndorf, near Vienna, from Baja/Bácska on 25 and 26 May 1944. The second of them counted 4,200 people in 56 rail cars. From the first one, 200-300 deportees were taken off, 700 from the second.

According to information the witness received later, the latter transport continued on to Auschwitz (Lappin-Eppel 2010, pp. 45f.; 1996, pp. 57-59).

[121] Until 9 June, when the last transport from Districts IX and X passed through. The next transport (2,794 deportees from Maklár) was part of the deportation period 11-16 June 1944.

Judit Molnár cites reports from the mayor of Baja, Bernhart Sándor, that the camp strength was 5,154 people on 17 May 1944. On the same day, another 1,749 deportees arrived from Szabadka, and 2,260 more from Szeged (Molnár, p. 65), so the total number was 9,163 people. Subtracting the 564 people who were taken to Strasshof from the transport that left Bácsalmás on 28 June, that leaves 8,599 people. Hence, if the transport from Baja of 26 May contained 4,200 deportees, the one on 25 May contained about 4,400. Therefore, in the two remaining transports, probably sent to Estland, about (12,918 – 8,599 =) 4,300 people were deported.

Ruth Bettina Birn writes that "five hundred Jewish women from Hungary arrived in Estonia in June 1944" (Birn, p. 182, footnotes 135). Former deportee E. B. (DEGOB Protocol No. 5, see earlier) stated that she arrived in Auschwitz on 5 July 1944, and was transferred to Riga three days later in a transport, from which 500 female inmates were then sent "to a village called Urbe," evidently Ķurbe (Dondangen/Dundaga), a subcamp of the Riga-Kaiserwald Camp (camp nos. 16 and 28 in Szita Scabolcs's list mentioned earlier). Lilly Breuer was deported to Auschwitz on 10 June 1944, and was transferred to Kiviöli three days later (see Chapter 1.6).

Baja was located in Police District V, but the above-mentioned two transports departed during the deportations from Districts VIII, IX X. That is no doubt why they were not accounted for at once, and the two missing transports also likely came from another district.

As for the number of trains, it should be noted that Ferenczy indicated the number of 92 in connection with 275,415 deportees, but the final figure of 288,333 assumes 96 trains, viz:

275,415 in 92 trains

288,333 in 96 trains

As I anticipated above, for deportation phases 11-16 June, 25-28 June and July 4-6, Ferenczy set out detailed transportation plans, which I reproduce in the following tables.

Table 1.5: Transportation Plan for the Period 11-16 June 1944 (Karsai/Molnár, p. 516).

Origin Day:	11	12	13	14	15	16	# Deportees	# Trains
Miskolc	1	1	1	1	1	1	13,500	6
Eger	1	/	/	/	/	/	2,744	1
Hatvan	/	1	/	/	/	/	3,800	1
Salgótarján	/	/	1	/	/	/	2,240	1
Balassagyarmat	1	/	/	1	/	/	5,820	2
Komáron	/	1	/	/	1	/	5,040	2
Érsekújvár	/	1	/	1	/	/	4,843	2
Győr	/	1	/	/	1	/	5,085	2
Székesfehérvár	/	1	/	/	/	/	2,743	1
Dunaszerdahely	/	/	1	/	1	/	2,940	2
Léva	/	/	1	/	/	/	2,624	1
						Totals:	51,379 [51,829]	21

The above transport plan shows 51,379 deportees in 21 trains, but Ferenczy's general summary mentions 51,829 deportees in 23 trains. The initial plan (report of 29 May 1944; *ibid.*, pp. 511f.) envisaged for Miskolc the deportation of 19,100 (recte: 18,999)[122] in 6 trains, but there were actually 13,500 deportees, who were transported in 5 trains. Consequently, the train scheduled for 16 June was undoubtedly cancelled. For Dunaszerdahely, 4,500 people were counted on being deported in two trains, but in fact 2,940 were transported, and the train scheduled to leave on 13 June was cancelled. Therefore, 19 trains actually departed, and it is not explained why Ferenczy mentioned 23. The difference of four trains implies a higher number of deportees on the order of 9,000 to 12,000, while the difference between the two figures is only (51,829 – 51,379 =) 450. The actual number of trains must therefore be 19.

The Kassa List notes 47,180 deportees in 17 trains; two trains are missing: the one that left Győr on June 12 (2,100 deportees)[123] and the one from Székesfehérvár on June 14 (2,743 deportees). By adding these two transports, the Kassa List becomes complete, both for the number of trains (19) and for the number of deportees: (47,180 + 2,100 + 2,743 =) 52,023, as opposed to 51,829, a virtually identical figure.

This results in the following transportation plan:

[122] Error in the sum of Jews concentrated in 13 localities.

[123] Assuming that the figure from the Kassa List is correct, subtracting the figure of the Kassa List from the total number of deportees from Győr results in: (5,085 – 2,985 =) 2,100.

Table 1.6: Corrected Transportation Plan for the Period 11-16 June 1944

Day (F)	Day (K)	Origin	# Deportees	
			Ferenczy	Kassa List
11	11	Maklár [Eger]	2,744	2,794
11	12	Diósgyőr [Miskolc] (1)		2,675
11	12	Balassagyarmat (1)		2,810
12	12	Diósgyőr [Miskolc] (2)		2,941
12	12	Érsekújvár (1)		2,899
13	12	Diósgyőr [Miskolc] (3)		3,051
12	13	Hatvan	3,800	2,961
12	13	Komáron (1)		2,790
12	/	Győr (1)		missing
13	13	Salgótarján	2,240	2,310
14	14	Miskolc (4)		3,968
14	14	Balassagyarmat (2)	1 + 2 = 5,820	1,867
14	/	Székesfehérvár	2,743	missing
13	15	Léva	2,624	2,678
13	/	Dunaszerdahely (1)		
15	15	Miskolc (5)	∑1–5 = 13,500	2,829
14	15	Érsekújvár (2)	1 + 2 = 4,843	1,980
15	16	Győr (2)	1 + 2 = 5,085	2,985
15	16	Komáron (2)	1 + 2 = 5,040	2,673
15	16	Dunaszerdahely (2)	1 + 2 = 2,940	2,969
		Totals:	51,379 [51,829]	47,180

Adding the two missing transports to the Kassa List total yields: 47,180 + (2,100 + 2,743 =) 52,023.

Table 1.7: Transportation Plan for the Period 25-28 June 1944[124]

Origin Day:	25	26	27	28	# Deportees	# Trains
Kecskemét	1	/	1	/	5,413	2
Szeged	1		1	1	8,617	3
Bácsalmás		1			2,793	1
Debrecen	1	1	1	2	13,084	5
Nagyvárad		1			2,819	1
Szolnok	1		1		4,666	2
Békéscsaba		1			3,113	1
				Totals:	40,505	15

The transportation plan mentions 40,505 deportees in 15 trains; the general summary shows the same number of deportees, but in 14 trains. The Kassa

[124] Karsai/Molnár, report of 12 June 1944, p. 518; report of 29 June 1944, p. 518.

List has ten transports with 31,278 deportees. The four missing transports are those that were directed to Strasshof. At this point, it is conducive to take Edit Csillag's data and compare it with Ferenczy's data that of the Kassa List:

Table 1.8: Data Comparison, Number of Deportees acc. to Csillag, Kassa List, Ferenczy

Origin	Csillag	Kassa List	Ferenczy	Csillag + Kassa List
Debrecen	6,641	9,154	13,084	15,795
Szeged	5,239	3,199	8,617	8,438
Szolnok	2,567	2,038	4,666	4,605
Totals:	14,447	14,391	26,367	28,838

As can be seen, the total number of deportees from Debrecen (Csillag + Kassa List) turns out to be greater than the actual number: 15,795 versus 13,084. This means that the transports from Debrecen had 6,641 deportees withdrawn at Strasshof, and those that arrived at Auschwitz were (13,084 – 6,641 =) 6,443.

Thus, four transports with 13,084 deportees left Debrecen on 25, 26, 27 and 28 June, three of which are recorded in the Kassa List. The first two (25 and 26 June) carried (2,286 + 3,842 =) 6,128 deportees to Auschwitz; the remaining two (27 and 28 June) contained (13,084 – 6,128 =) 6,956 deportees. One of these two transports, the one on 28 June, after being registered in the Kassa List (3,026 deportees), went on to Auschwitz, so the other transport contained (6,956 – 3,026 =) 3,930. From these two transports were taken the 6,641 Strasshof deportees.

One transport departed from Szeged on 25 June with 3,199 deportees, which arrived at Auschwitz, and two transports on 27 and 28 June with (8,617 – 3,199 =) 5,418 deportees, which were directed to Strasshof, where 5,239 of them were taken off.

Finally, two transports departed from Szolnok, one with 2,038 deportees on 27 June, which went to Auschwitz, and one two days earlier (25 June) with (4,666 – 2,038 =) 2,628 deportees, which arrived at Strasshof, where 2,567 deportees were admitted.

The transport from Budapest with 1,690 deportees that arrived at Strasshof on 30 June is not part of Ferenczy's deportation records. This reduces the gap between Veesenmayer's total (437,402) and Ferenczy's to (434,351 + 1,690 =) 436,041.

The transports for this period are summarized in the following table.

Table 1.9: Comparison of Deportation Figures for 25-28 June 1944

Day (F)	Day (K)	Origin	# Deportees	
			Ferenczy	Kassa List
25	25	Debrecen (1)	*2,286*	2,286
25	26	Szeged (1)	*3,199*	3,199
25	/	Szolnok	*2,628*	/
26	27	Debrecen (2)	3,842	3,842
25	27	Kecskemét (1)		2,642
26	27	Nagyvárad	2,819	2,819
26	27	Békéscsaba	3,113	3,118
27	?	Debrecen (3)	*3,930*	/
26	28	Bácsalmás	2,793	2,737
27	29	Kecskemét (2)	1+ 2 = 5,413	2,790
27	/	Szeged (2)	5,418	
28	/	Szeged		
27	29	Szolnok	*2,038*	2,038
28	29	Debrecen (4)	3,026	3,026
		Totals:	40,505	31,278

Adding the four missing transports on the Kassa List, we obtain: 31,278 + (2,628 + 3,930 + 5,418 =) 40,473, versus Ferenczy's 40,505.

Table 1.10: Transportation Plan for the Period 4-6 July 1944[125]

Origin Day:	4	5	6	# Deportees	# Trains
Szombathely	1	/	/	3,000	1
Sárvár	1	/	1	5,621	2
Sopron	/	1	/	3,000	1
Pápa	/	1	/	3,000	1
Zalaegerszeg	/	1	/	3,000	1
Pécs	1	/	1	5,963	2
Kaposvár	1	/	/	5,139	2[126]
Paks	/	1	/	1,083	
			Totals:	29,806	10

Ferenczy's general summary shows 29,556 deportees in 10 trains, including 17,667 in Police District III (Szombathely) and 11,889 in District IV (Pécs). The Kassa List reports 10 transports[127] (the one from Zalaegerszeg on 5 July is missing), with 26,093 deportees, with 14,282 of them from

[125] *ibid.*, report of 30 June 1944, p. 520.

[126] 1/3 of the train loaded at Paks was to be merged at Pusztaszabolcs with 2/3 of the train coming from Kaposvár.

[127] The transport from Paks is counted separately there, while in the transport plan it is merged with transport from Kaposvár.

District III, and 11,811 from District IV. Adding the missing transport (3,000 deportees), the overall total is 29,093, that of District IV 17,282. These figures correspond to Ferenczy's. This results in the following list of transports:

Table 1.11: Comparison of Deportation Figures for 4-6 July 1944

Day (F)	Day (K)	Origin	# Deportees	
			Ferenczy	Kassa List
4	5	Sárvár (1)		3,105
4	5	Szombathely	3,000	3,103
4	6	Kaposvár (1)		3,050
4	6	Pécs (1)		3,100
5	6	Kaposvár (2)	1 + 2 = 5,139	2,066
5	7	Sopron	3,000	3,077
5	7	Pápa	3,000	2,793
5	7	Paks	1,083	1,072
5	?	Zalaegerszeg	3,000	/
6	7	Sárvár (2)	1 + 2 = 5,621	2,204
6	8	Pécs (2)	1 + 2 = 5,963	2,523

No transport plan exists for the period 6-8 July. Ferenczy's general summary speaks of 24,128 deportees in eight trains. On 30 June 1944, Ferenczy planned the deportation of 8,000 Jews in three trains from the Monor Collection Camp, and 18,000 in six trains from Budakalász (Karsai/Molnár, p. 521), a total of 24,000 people.

The Kassa List has eight trains, with a total of 23,909 deportees, as listed in the following table:

Table 1.12: Deportation Figures for 6-8 July 1944

Day	Origin	# Deportees	
		Ferenczy	Kassa List
7	Monor	?	3,549
7	Óbuda	?	3,151
8	Óbuda	?	2,997
9	Monor	?	3,065
9	Óbuda	?	3,072
9	Budakalász	?	3,072
9	Monor	?	3,079
9	Békásm	?	1,924
	Totals:	24,128	23,909

The conclusion drawn from the data presented above is that the Kassa List, from which 400,426 deportees result, is fully reliable (see Appendix, Table

1.II). On the basis of the data collected above, it thus enables us to reconstruct the complete picture of the deportations of Jews from Hungary, assuming that the 20-July transport from Rákoscsaba, both in terms of the date and the number of deportees, is evidently the same as the one mentioned earlier of 1,220 deported on 19 July 1944 from Kistarcsa.

The following table contains data of transports that are not contained in the Kassa List.

Table 1.13: Deportation Trains not included in the Kassa List

Date	Origin	Number of Deportees	Strasshof/ Gänserndorf	Auschwitz	Estonia
29 April	Kistarcsa	1,800	/	1,800	/
30 April	Topolya	2,000	/	2,000	/
25 May	Baja	4,400	4,400	/	/
26 May	Baja	4,200	4,200	/	/
?? May	?	4,300	/	/	4,300
14 May	Székesfehérvár	2,743	/	2,743	
25 June	Szolnok	2,628	2,567	61	/
27 June	Debrecen	3,930	6,641	315	/
28 June	Debrecen	3,026			
27 June 28 June	Szeged	5,418	5,239	179	/
28 June	Bácsalmás	[2,737][128]	564	2,173	/
30 June	Budapest	1,690	1,690	/	/
5 August	Sárvár	1,296	/	1,296	/
	Totals:	37,431	25,301	10,567	4,300

Therefore:

– Jews deported from, Hungary: 400,426 + 37,431 = **437,857**, of whom:
– deported to Strasshof/Gänserndorf: **25.301**
– deported to Auschwitz: 400.426 + 10.567 = **410.993**
– deported to Estland: **4.300**

The second problem remains to be examined: can the Kassa List be used in correlation with the Glaser List in order to calculate how many deportees were admitted to the Auschwitz Camp and how many were allegedly gassed each day?

In his table reproduced by Baxter, Honey places next to each entry on the Kassa List, with the corresponding number of deportees, an entry on the Glaser List, one purely conjectural relating to female inmates, and finally the number of deportees allegedly killed. For example, the first transport on 14 May contained 3,200 people, of whom 221 men and 243

[128] This transport is included in the Kassa List.

women were admitted to the camp, and the remaining 2,736 were therefore allegedly killed.

As mentioned earlier, such a correlation is marred first of all by the fact that the Glaser List contains 142 entries, while the Kassa List contains 136 transports. Second, it is not necessarily the case that the transports arrived at Auschwitz in exactly the same order as they passed through Kassa, so the order of the records in the Glaser List does not necessarily correspond to the order of the Kassa List, as G. Hirsch observed (Hirsch, p. 100):

> *"In comparing the lists, the question remains, however, whether the order of passing through Kassa/Košice was the same as that of arrival in Auschwitz, and whether this actually corresponds to the order documented by Glaser's list. As I have mentioned, I ascribe the discrepancies of the lists to the redirection of transports (such as that of Debrecen) and different routes taken which did not lead through Kassa/Košice (2 transports via Zsolna-Teschen-Krakow-Auschwitz and 6 transports via Vienna-Krakow-Auschwitz)."*

Third, the calculation of the number of women is based on the assumption that for each transport 10% more women were admitted to the camp than men, which is conjectural and simplistic. Finally, Honey neglects the "List of Jewish Transports," which would have prevented him from making some further gross errors. Thus, for 22 May, he assumes the admission to the Auschwitz Camp of (487 + 368 + 471 + 575 =) 1,901 deportees (men). However, on that day, 2,000 Hungarian Jews were registered (A-3103-5102). For May 30, he considers (457 + 170 + 554 =) 1,181 admitted inmates, of which 554 were fictitious (invented transport), while in fact 1,100 Hungarian Jews were registered on that date (A-10741-11840). For 7 June, Honey claims the admission of (376 + 328 + 269 + 444 =) 1,417 deportees, but 2,004 were registered on that day (A-12091-14094). For 28 June, he assumed the admission of just two Hungarian Jews, but on that day, 1,000 were registered (A-7270-8269). This obviously affects the assumed number of female inmates as well. A percentage of 110% of female deportees admitted to the camp compared to men undoubtedly makes sense. However, this is true only for the total, not for each individual entry, as I will show later.

1.5. The Birkenau Transit Camp

The first transport of Jews from Hungary arrived at Birkenau on 16 May 1944. Daily Report No. 246 concerning the work at railway siding (con-

struction project BW 27), written the same day by SS *Unterscharführer* Franz Sihorsch, states (Bartosik *et al.*, Document 75, p. 391):

> *"At 1350 h arrived the first special transport; the construction site had to be left by all workers and inmates."*

Upon arrival at Auschwitz, Hungarian Jews were divided into three categories:

1. inmates fit for work, registered upon arrival;
2. inmates fit for work, not registered upon arrival;
3. inmates unfit for work, not registered upon arrival.

The inmates fit for work and registered were deployed for the camp's labor needs. The unregistered inmates fit for work were crammed into a part of the Birkenau Camp called "transit camp," consisting of Camp Section BIIc, part of Camp Section BIIa, and later part of Camp Sections BIIe and BIII.

An important German document explains how the reception of this category of inmates took place.

On 26 June 1944, the Dachau Camp complained to the Auschwitz Camp's administration, because inmates who had been transferred from Auschwitz on 15 June had arrived at Kaufering Camp dressed in rags. In response, the head of the Birkenau Inmate Clothing Department wrote a letter to the camp administration on 14 July, trying to justify himself. I quote the most important passages:[129]

> *"In order to clarify the facts, the entire process from the arrival of the Hungarian Jewish inmates to their loading onto trains is described below. After the arrival of the inmates in the concentration camp, all civilian clothes is removed from them, and after a thorough delousing process, they are dressed in inmate clothes provided by the administration.* […] *After the individual inmate transports have been dressed, they are transferred to the transit camp of Concentration Camp Auschwitz II* [Birkenau], *and taken over by the Labor Service Leader Unterscharführer Olexius. He issues a receipt for the clothing with which the inmates are clothed. This receipt shows which clothing the inmates are provided with. This receipt is presented for inspection. In the transit camp, the inmates stay for several days (up to 2-3 weeks). In view of the lack of sufficient accommodation, 1,000 to 1,200 prisoners are lodged in each building, which is intended for a normal occupancy of 300 inmates. This circumstance alone causes severe contamination of the clothing. In the transit camp, transports are assembled from the inmates housed there, and these are transferred to the quarantine camp, where they remain for several days until they are transported away.* […]

[129] AGK, NTN, 88, pp. 111-113. See Doc. 1.

Since May 16, 1944, the clothing department of Concentration Camp Auschwitz II have dressed approximately 57,000 prisoners, and have dispatched 48 transports with 45,132 prisoners for deportation without receiving the slightest complaint."

The "quarantine camp" was Birkenau Camp Section BIIa. In Moscow, Jürgen Graf and I found an important report on the activities of this camp as a "transit camp" for Jews deported from Hungary. The document, dated 26 July 1944, lacks the second page, and is partially damaged at the right margin. It bears the following headline: "Prisoner Hospital. Outpatient Clinic BIIa. Auschwitz II. Monthly report on Hungarian Jews provisionally housed in the camp." The report refers to the period 26 June to 26 July. From this, it can be inferred that there was an earlier report that ran from 15 May to 25 June. I quote the essential part of the document:[130]

"In the reporting period /26 June to 26 July 1944/ […gap in original] *on average 2,500 Hungarian Jews, ready for transport in the camp in 3 blocks, remained in the camp for 3 to 10 days.*

On arrival and departure, they were subjected to a thorough medical examination, and checked for lice. Lice carriers detected during daily fever and lice checks were deloused in the camp's own delousing facility, and clothes and linen were disinfected in a steam boiler and impregnated with Lauseto.[131]

Seriously ill persons identified during the inspections were transferred back to [Hospital Section] *BII/f, or transferred to another camp.*

On 1 July of this year, arrival of 450 young Hungarian Jews from B II/d. […]

Since too many prisoners were accommodated in the blocks /up to 1000/, many had to sleep on the bare concrete floor or on the damp ground, resulting in an accumulation of colds and diarrhea. The young people in special quarantine in Block 12 have not changed their clothes for 10 weeks, the Hungarians in Block 8 for 8 weeks. Since both groups are not part of the camp strength, no soap could be distributed to them. Allocation of soap urgently needed."

There is moreover a report on "PoW Camp, Construction Sector III," compiled on 16 June 1944 by "The Hygienist of the Construction Inspection 'Silesia'," which describes the catastrophic sanitary conditions in this sector of the camp. The author of the report stated:

"The first transport of prisoners arrived on 9 June 44. At present, the construction section is occupied by about 7,000 female inmates (Jews)."

---

[130] GARF, 7021-108-32, p. 76. See Doc. 2.

[131] Trade name of the German-licensed version of the Swiss insecticide DDT, introduced at Auschwitz Camp in 1944.

Regarding "quarantine measures," the author explains:[132]

> *"Since the inmates of Construction Section III are to be put to work in an accelerated manner, an actual quarantine is not carried out. In order to avoid major delays in the work assignment in the event of an epidemic, it is necessary to subdivide the camp into 4 separate fields by fencing instead of the usual quarantine measures. In this way, in the event of an epidemic, at least a portion of the prisoners can continue to be used or transported away."*

Camp Section BIIc consisted of 32 lodging barracks. According to the documents cited earlier, 1,000 people were crammed into each building in June 1944, so that the occupancy of this section averaged about 35,000 unregistered Jews from Hungary. And if 7,000 Jews, evidently from Hungary, had been housed under very precarious conditions in Section BIII from 9 June to 16 June, it is clear that Camp Section BIIc's housing possibilities were exhausted. This means that there were at least 42,000 unregistered Jews deported from Hungary lodged inside the Birkenau Camp at that time.

1.6. Transfers of Hungarian Jews from the Transit Camp

Beginning on 17 May, huge numbers of male and female Jews from Hungary were transferred from the Birkenau Transit Camp to other concentration camps. Until 21 August 1944, the *Auschwitz Chronicle* (1990) records 21,497 of them. The actual figure is enormously higher, as demonstrated by the table presented below, which supplements the data provided by Czech.

In this context, it is also useful to turn to the testimonies of Jews deported from Hungary to Auschwitz. These were made accessible on the DEGOB website (the Hungarian National Committee for Assistance to Deportees).[133] These statements indicate various transfer locations (mostly

[132] RGVA, 502-1-168, pp. 6-6a.

[133] The witnesses are usually identified only by their initials, except for rare cases with full names. They were recorded in the original Hungarian or German text, and for most Hungarian depositions in an English translation. They are identified here by their protocol number. The following data are given about the witnesses: Name (usually initials only), gender, place of birth, date of birth, place of residence, occupation, concentration camps or ghetto. A single deposition may have been written by two or more witnesses. Each original deposition's URL is composed of http://www.degob.hu/index.php?showjk= followed by the protocol no., here given in the section headline. English translations are

subcamp of other concentration camps) that do not appear in the *Auschwitz Chronicle*.

Płaszów

I will start this with a brief compilation of testimonies about the Płaszów Camp.

Protocol No. 117

Name: S. F. Gender: female. Date of birth: 1924. Concentration: Munkács:

> *"We were entrained from the Mohács ghetto on 15th of May, 1944.* […] *The train left for Kassa, where SS troops took us over. After three days and three nights of travelling, we arrived in Birkenau.* […] *Three weeks later, there were selections, and we were taken to Krakow-Plaszow in freight cars.* […] *The journey was even more horrible than that to Birkenau, because there were 135 people in a freight car. The heat was enormous, they gave us no water, there was no toilet again, and we were travelling in these conditions without any food for two nights and two days. We were told that we would get to a better camp, when, to our greatest surprise, we found ourselves back in Birkenau when we got off. Here the already known procedures began again, such as selections, baths, haircut. Dr Mengele made the weaker ones stand aside in the baths, and we never saw them again. The same day, after a whole day of roll call, our left arm was tattooed and they registered our precise data on cards, which we had to sign."*

Protocol No. 220

Name: K.S. Gender: female. Date of birth: 1929. Ghetto: Ipolyság:

> *"We arrived in Auschwitz on June 19. We were received by men in striped clothes and SS officers. Men and women were separated. I was shouting that I wanted to go with the elderly; I was told that we would see each other in half an hour. Then we were taken to the bath and on the way we met a group of women who were close-cropped: it was a terrible sight. We were undressed in the bath, our hair was cut, our good clothes were taken away and we were given rags in exchange. The good shoes were also taken away and clogs were distributed. We were assigned to the Gypsy camp. There was no room; the barrack was not finished yet, so we did not even spend the night there. In the evening we were squeezed into a half-built block: 1300 of us into block 7.* […] *On the third day I was put on a transport after a medical examination. We were entrained, 50 of us in one cattle car. We got bread for the travel, some salami and margarine too. We arrived in Plaszow on about June 25.* […]

---

posted at http://www.degob.org, with the same URL pattern. A letter in parentheses behind the protocol number indicates the deposition's language as posted online, if no English translation is provided (D=German; H=Hungarian).

After arriving in Auschwitz in the afternoon of June 8, we had to get off the train, but the luggage stayed in the cattle cars. On the platform we were lined up in rows of three; I was queuing up with my mother, but a German officer separated us and ever since I have not heard anything from my poor mother. I was taken to the disinfecting room and my hair was cropped. I was given a ragged dress and put into a barrack. First I was taken to camp A where we were lying on the floor of the block, because there were no beds. We did not work yet. The food was the usual terrible German camp supply. Early morning we were woken up to report for roll call, then we had to stand at the roll call area for hours. This was repeated in the afternoon. We were treated very badly and beaten all the time. We knew about the crematoria only by hearsay. In ten days ca. 800 of us were put on a labourer's transport and taken to Plaszow, near Krakow. We arrived there after 10 days of travel in cattle cars with 50 prisoners each. We were accommodated in barracks in Plaszow as well, but here we had bunks, straw mattresses and blankets. […]

A revolt broke out in the Krakow, therefore the camp was evacuated and we were taken back to Auschwitz. We travelled for two days again; only a sliver of bread was distributed and only for a few people. After our arrival we were disinfected and cropped again, then we were put into camp B3. There were ca. 1000 of us and there was no work again; large part of the day was spent by lining up for roll call. Selections were frequent at the end of August. On September 2, 500 of us were put on a transport again and were taken to Augsburg. There were perhaps 60 prisoners in a freight car. We got a whole loaf of bread and some sausage for the four-day travel. After our arrival we were lodged in an aircraft factory; all of us had a separate berth and a blanket."

Protocol No. 2703 (D)

1. Name: Sára Simon. Gender: female. Date of birth: 1921. Ghetto: Mátészalka;
2. Name: Helén Simon. Gender: female. Date of birth: 1916. Ghetto: Beregszász;
3. Name: Laura Simon. Gender: female. Date of birth: 1919. Ghetto: Beregszász;
4. Name: Rosa Simon. Gender: female. Date of birth: 1923. Ghetto: Beregszász:

   "The sisters Laura, Rosa and Helén Simon were deported on 22 May from the ghetto of Beregszász, where they had been brought from their birthplace and permanent residence Nagymuzsaly, a village in the Carpathian Mountains, and the fourth sister Sára Simon was deported on 4 June 1944 from the ghetto of Mátészalka to Auschwitz. […] *Laura, Rosa and Helén Simon remained in Auschwitz even after the selection, which they were not*

to leave again until its evacuation. Sára Simon, on the other hand, was put on a labor transport two days after her arrival in Auschwitz, and she left for Krakow with it. The labor camp to which the transport was taken was located in Plaszow, a suburb of Krakow, and Sára Simon was assigned to work in a construction squad. […] *After three months, when the vast majority of the prisoners had achieved this goal, the transport, which consisted of 4,500 Hungarian Jewish women, was returned to Auschwitz."*

Protocol No. 958 (D)

Name: E. K. Gender: female. Date of birth: 1930. Ghetto: Dunaszerdahely.

"The above states the following: […]

Immediately after our arrival in Auschwitz, we were selected according to those who were able and those who were unable to work. I was placed among those fit for work, while my grandmother and mother were taken elsewhere with my two siblings, my 13-year-old brother and my 9-year-old sister. What happened to them and whether they are still alive at all, I have not been able to find out to this day. After only five days, I was placed in a work transport consisting of about 5,000 inmates, all of them women. […]

We had to stand roll call all night because the transport had not yet been completely assembled, and it took just as much time to put 5,000 girls and women into one transport. We literally breathed a sigh of relief when we were already sitting in the rail cars, and the train left Auschwitz. After a four-hour ride, the train stopped in Plaszow, a suburb of Krakow, which was actually the ghetto of that city, and surrounded by wires charged with high-voltage electricity. It was a terrible six weeks that I spent here. […]

As the Russians approached Krakow, and the thunder of the guns grew stronger and stronger, we were led away from Plaszow. We were put in rail cars, with 130 prisoners in one car. During the trip, we repeatedly stopped along the track, which only had the purpose of exposing us to the scorching rays of the sun without protection, and to increase our agonies of thirst even more. Of course, we had neither food nor water for the trip. Thus it happened that for the same distance which we had covered in four hours on the outward journey, it took us three full days on the return trip. Thus, we arrived back at Auschwitz, where we spent five weeks doing nothing, starving and standing in roll call. After this time, I was again put on a work transport, this time to Oederan near Chemnitz, where there was a cartridge factory."

Protocol No. 3055

Name: L. Z. Gender: female. Date of birth: 1930. Ghetto: Mezocsát:

"After arriving in Auschwitz in the afternoon of June 8, we had to get off the train, but the luggage stayed in the cattle cars. On the platform we were lined up in rows of three; I was queuing up with my mother, but a German

officer separated us and ever since I have not heard anything from my poor mother. I was taken to the disinfecting room and my hair was cropped. I was given a ragged dress and put into a barrack. First I was taken to camp A where we were lying on the floor of the block, because there were no beds. We did not work yet. The food was the usual terrible German camp supply. Early morning we were woken up to report for roll call, then we had to stand at the roll call area for hours. This was repeated in the afternoon. We were treated very badly and beaten all the time. We knew about the crematoria only by hearsay. In ten days ca. 800 of us were put on a labourer's transport and taken to Plaszow, near Krakow. We arrived there after 10 days of travel in cattle cars with 50 prisoners each. We were accommodated in barracks in Plaszow as well, but here we had bunks, straw mattresses and blankets. […]

A revolt broke out in the Krakow, therefore the camp was evacuated and we were taken back to Auschwitz. We got a whole loaf of bread and some sausage for the four-day travel. After our arrival we were lodged in an aircraft factory; all of us had a separate berth and a blanket."

Augsburg refers to a subcamp of the Dachau Camp located near the city of the same name.

Krakow

Based on various accounts, this was not the Płaszów Camp itself, but one of several labor camps in its vicinity that employed Jews. The Polish *Encyclopedic Informer* records at least four of them (Główna ... 1979, pp. 254f.)

Protocol No. 935

1. Name: R. M. Gender: female. Date of birth: 1919. Ghetto: Nagysurány;
2. Name: S. R. Gender: female. Date of birth: 1925. Ghetto: Nagysurány;
3. Name: S. O. Gender: female. Date of birth: 1927. Ghetto: Nagysurány;
4. Name: D. R. Gender: female. Date of birth: 1924. Ghetto: Nagysurány;
5. Name: D. I. Gender: female. Date of birth: 1926. Ghetto: Nagysurány:
   "After three days of travel we arrived in Auschwitz in the evening of June 15. After getting off we were selected and taken to the disinfection room. Here our hair was cut, our clothes were taken away and in exchange we were given grey prisoner's uniform. We were taken to the Gypsy camp

where we spent three days, but during the whole time we saw no sign of water whatsoever. From here we were taken away and after two days of travel we arrived in Krakow. We got one-fourth of a loaf of bread and some Zulag for the journey. After arrival 400 of us were put into one block and four of us slept on a bunk. We performed heavy work here in a quarry; the guards beat us, the rations were very small and there were two roll calls a day. There used to be a crematorium in Krakow, but when we were there, the corpses were burnt in ditches, since the crematorium was out of order. By the end of August we were transported back to Auschwitz where we spent six weeks. During this time we performed occasional work then we were taken with a worker's transport to Kratzau."

Protocol No. 2373 (D)

1. Name: M. J. Gender: female. Date of birth: 1927. Ghetto: Munkács;
2. Name: R. J. Gender: female. Date of birth: 1928. Ghetto: Munkács;
3. Name: S. J. Gender: female. Date of birth: 1925. Ghetto: Munkács;
4. Name: H. J. Gender: female. Date of birth: 1921. Ghetto: Munkács:
   "Early May, we were deported to Auschwitz from the ghetto of the town of Munkács, where we had been taken from our place of birth and permanent residence, Ilosva, after the publication of the Hungarian government's ghetto decree. […] *Already after two days, we left Auschwitz on a work transport that was brought to Krakow.* […]
   In Krakow, we worked first in a quarry and then in various other places, but each time the work we had to do was hard. […]
   Four weeks passed before we were put on a new work transport. The new transport went to Bunzlau, where we had to work for a construction commando. The work was not hard, and we would have resigned ourselves to our fate, if we had been given more to eat, and if we had not suffered so much from the cold."

Kratzau

Near the village of Kratzau was located a subcamp of the Gross-Rosen Concentration Camp.

Protocol No. 2179 (D)

1. Name: D. J. Gender: female. Date of birth: 1927. Ghetto: Mátészalka;
2. Name: E. D. Gender: female. Date of birth: 1928. Ghetto: Mátészalka:
   "After six weeks, we were deported to Auschwitz. Although selections were made very frequently in Auschwitz, and we were found fit for work each time, we were not placed on any work transport, which was all the less understandable, since during the six months we spent in Auschwitz, numerous transports left for various labor camps. We were not even used for internal camp work, but only had to stand roll call from half past two in the morn-

ing until eight in the morning, and from four in the afternoon until eight in the evening, starve and endure the most varied punishments. If we were ill, we were careful not to let anyone know, for we feared that we would be found unfit for work at the next selection, and we knew only too well the fate of these unfortunates. So six months passed until we were finally designated for a work transport, which, however, was only small – 250 women and girls – and had been requested by a munitions factory. This munitions factory was located in Kratzau /near Reichenberg/ in Bohemia."

Warsaw

Protocol No. 2

Name: S. N. Gender: male. Date of birth: 1927. Ghetto: Munkács:

"There were 90 people in the cattle car in which I was travelling. They put a bucket of water and a bucket to serve as a toilet in the cattle car. The cattle car was not opened until we reached Kassa: there we got water, but we were not allowed to get off. After a three-day-long horrible journey we arrived at Auschwitz at dawn. The Kanadakommando received us. There was a Star of David tattooed on their foreheads.[134] *We had to get out of the cattle cars quickly and leave all our luggage there. I lived in Auschwitz in Camp C for 8 days.* […] *8 days later they put us in cattle cars again and transported us to Warsaw. The Warsaw ghetto had already been destroyed by bombs, and our task was to separate the scraps and to clear away all the ruins."*

Protocol No. 4

Name: M. S. Gender: male. Date of birth: 1909. Ghetto: Técso:

"We spent three days in Auschwitz and then we were transported to Warsaw."

Protocol No. 38

Name: S. M. Gender: male. Date of birth: 1921. Ghetto: Huszt:

"In Kassa German soldiers appeared and took over the cars and we travelled on in their escort. Nobody knew where we were taken. Nobody tried to escape, as there was no way. The train rattled on with us on it for 3 days and 3 nights until we arrived in Birkenau, around the 5th of May [sic], last year. […] *The next morning each of us was interrogated as to what our job had been. Construction workers were taken to Warsaw, that is how I myself got to Warsaw a week later, there were ca. 2,000 of us like me. In Warsaw, accommodation and provisions were somewhat better than in Birkenau. We mostly cleared up debris."*

---

134 This is blatant nonsense.

Protocol No. 69
Name: B. J. Gender: male. Date of birth: 1911. Ghetto: Mátészalka:

> *"Obersturmbannführer Kadok* [Kaduk] *selected us: he sent the able bodied to the left and those doomed to die to the right. We were transported to Warsaw where we stayed for 3 months."*

Protocol No. 90
Name: G. E. Gender: male. Date of birth: 1924. Concentration: Nagyszöllos:

> *"I was assigned to block 19 where 1200 of us stayed for about five to six days. Our food was a small piece of bread and some soup. From there we were transported to Warsaw. I received my first prisoner number there and I was taken into a block."*

Protocol No. 124 (D)
Name: T. D. Gender: male. Date of birth: 1928. Ghetto: Sátoraljaújhely:

> *"We arrived at Auschwitz at 2 a.m. on 28 May. Immediately a selection was made: in one group came those able to work, in the other those unable to work, as well as women and children.* […] *After three days, we were put on the train again; this time, the journey went to Warsaw, where we worked in a brickyard. We lived in a camp, and were fed as follows: in the morning half a liter of coffee, at noon half a liter of soup, and in the evening 400 grams of bread and either coffee or soup. We stayed in Warsaw for twelve weeks. Then the city was evacuated before the Russians came closer and closer. Before the city was evacuated, a selection was made among us. Those who were unable to march were separated and gassed; the rest received a day's ration of bread, and then we began our march. The marching distance was 40 kilometers a day. Of the 4,500 men who marched from Warsaw, about half perished from the privations (hunger and thirst)."*

Protocol No. 655
Name: S. J. Gender: male. Date of birth: 1928. Ghetto: Sátoraljaújhely:

> *"Four days later we were taken to Warsaw with a transport. The trip lasted for two days; there were 50 of us in a freight car. We got one loaf of bread and margarine, but no water, despite the hot weather. Upon our arrival in Warsaw, we were standing outside, and all of us were given new numbers."*

Protocol No. 1732 (H)
Name: H.S. Gender: male. Date of birth: 1929. Ghetto: Munkács:

> *"We arrived in Warsaw with a transport at the end of May,* […]*."*

Protocol No. 2103 (D)
Name: L. B. Gender: male. Date of birth: 1924. Ghetto: Huszt:

"From the ghetto of my birthplace and permanent residence Huszt, where I arrived with my family immediately after the announcement of the ghetto decree in Hungary, I arrived at Birkenau on 23 May 1944. Of my entire family that had come here with me – father, mother, two sisters and three brothers – only my father remained with me after the selection carried out immediately after my arrival at Birkenau. What happened to the rest of the family, I do not know. I never saw them again, nor did I hear from them. I stayed in Birkenau with my father for only five or six days, because after this time, we were put into a work transport, which was 2,000 men strong and left for Warsaw."

Protocol No. 2305 (H)
Name: K.M. Gender: female (nő[135]). Date of birth: 1928. Ghetto: Chuszt:

"The journey took five days. We arrived in Birkenau. Here we were separated from our relatives, and three days later I went to Warsaw."

Protocol No. 2872 (H)
Name: S.N. Gender: male. Date of birth: 1921. Ghetto: Kolozsvár:

"I stayed four days in Auschwitz, then I went to Warsaw. We left with a transport of 2,000 [persons] *at the end of May."*

Protocol No. 2952
Name: D.W. Gender: male. Date of birth: 1927. Ghetto: Munkács:

"I got with the first working transport to Auschwitz. There were 72 persons travelling in one car. […] *During the 10 days that we passed in Auschwitz, we were led from one barrack to the other, in consequence we were not provided with food. We lived upon the small portion of bread that we given in the evening. Soon I was selected in a working transport, and were transferred to Warsaw. Fifty persons were crammed in one car, 2 SS guarded us there. We got bread sausages, and margarine. Next morning we arrived to our destination. We were put up into the old ghetto of Warsaw. We had to clear away the ruins. The town was in good repair, but the ghetto was demolished. The new barracks were just completed, for the newcomers, we were put up in those. The barracks were made from bricks. Everybody had his own bed to sleep in, and an extra rug to cover with. Each got a mess tin and a spoon. It was heavenly comparing the life here that of Auschwitz's. The work was very hard, we started at 6 a.m. It was not allowed to stop the work during the day. The usual pause 'Brotzeit'* [meal time] *was neither permitted to keep. There were 3.000 Hungarians in the camp."*

Protocol No. 3200 (H)
Name: D.J. Gender: male. Date of birth: 1925. Ghetto: Huszt:

[135] This is probably a mistake, because only men were transferred to Warsaw.

"After a couple of days in Auschwitz, I volunteered to work as a bricklayer, so I came to Warsaw as a construction worker. We went with two transports, about 4,000 [people]."

Riga

Protocol No. 5

Name: E. B. Gender: female. Date of birth: 1914. Ghetto: Nagyvárad:

"We arrived in Auschwitz on 5th July, after 5 days of travelling. They gave us water on the way in Debrecen and Kassa, but we could not get off. In Kassa, Hungarian gendarmes searched the cattle cars and they took away everything we still had: money, clothes, blankets, shoes, etc. SS soldiers took over in Kassa and one of them addressed a speech to us saying that we should not be afraid, because we would work and he who works would receive food. Our arrival in Auschwitz was horrible. We arrived in the evening in heavy rain and we had to leave the cattle car very quickly. They told us to leave our baggage there, they would take it after us. They selected us immediately. They bathed us in hot water and put a single ragged dress on us, then they chased us in an enormous toilet building where we were terribly cold after the hot bath, standing on cold stone ground in a single dress at night. A large number of us were crammed there and we were terribly tired, we could not even sit down. Many people died there that night. On the next day they made us line up for roll call, they put our names down and put together a transport. On the third day they sent us to Riga. From there they took 500 of us to a village called Urbe, where we cut down a forest and built a railway."

Protocol No. 348

Name: K. M. Gender: female. Date of birth: 1920:

"This is how we got to Auschwitz after three days of suffering. At the station of Auschwitz we went through the usual selections. […] *After three days suffering they transported me into Riga in a transport of labourers. I stayed in Riga for 2 weeks in quite good conditions. We took part in an airport construction; provisions were tolerable. Two weeks later, they took us in Latvia, in Dundagen. I had a very good life there, as I became the servant of the Oberscharführer. One day, the 13th of August, 1944, I escaped from the camp with the Latvian man and went hiding in the woods for a week."*

Protocol No. 644 (D)

Name: M. G. Gender: female. Date of birth: 1925. Ghetto: Ungvár:

"On 3 June, I was taken from the ghetto of my birthplace and permanent residence, Ungvár, to Auschwitz, from where, however, I was immediately taken away after a two-day stay. The journey, which lasted three days, led

to Riga, where a labor camp had been set up. The work site was not inside the camp, however, but 10 kilometers outside the city, where an airfield was being built. We were taken by car to the airfield every day, and picked up from there at 6 o'clock in the evening. The daily working time was twelve hours /with a half-hour lunch break/. There were about 4,000 women and girls, and 2,000 men in the camp. There were several work crews that built bunkers, did woodwork in the woods, etc. […]
I worked in Riga for fourteen days, and then came with a work transport consisting of 400 people to Dundanga, a place also located in Latvia. In Dundanga, we had to clear trees in the forest, which was very hard work for us. Dundanga was a new camp, and we were its first inmates. […]
I worked in Riga for fourteen days, and then came with a work transport consisting of 400 people to Dundanga, a place also located in Latvia. In Dundanga, we had to clear trees in the forest, which was very hard work for us. Dundanga was a new camp, and we were its first inmates. […]
After we had worked here for a month, the front was approaching with incredible speed, so that the place was evacuated, and we had to be taken away. The retreat was started on foot. The march lasted eight days, and we had received all in all a quarter loaf of bread as food for the whole time. Those who could not keep up from hunger or fatigue, or who were sick, were summarily shot. Finally, after great hardships, we arrived at Stutthof near Danzig. Protocol No. 2799 (D)

1. Name: E. E. Gender: female. Date of birth: 1922. Ghetto: Szeklence;
2. Name: P. E. Gender: female. Date of birth: 1916. Ghetto: Szeklence:
   "We were transported to Riga. On the way, which we covered with 50 people per car, we were terribly cold in our thin clothes. It was very hot there during the day, but very cold in the morning. To prepare an airfield, we had to haul stony sand in wagons; four girls or women had to fill seven wagons a day. It was very hard work. […] *Via Kaiserhof we were taken by train to Dundanga."*

Kiviöli

Kiviöli was a subcamp of the Vaivara Concentration Camp in Estonia

On 16 August, 1945, former inmate Lilly Breuer made a statement, in which she asserted that she arrived at Auschwitz on 10 June 1944, and on the 13th she was transferred to Kiviöli, where she remained until 30 August, after which she was transferred to Stutthof.[136]

[136] YVA, O.15E-2670.

Dörnhau

Another subcamp of the Gross-Rosen Concentration Camp was located near the town of Dörnhau.

Protocol No. 755 (D)
Name: M. W. Gender: male. Date of birth: 1924. Last residence: Budapest:

> *"The first night after our arrival at Auschwitz, after we had been bathed and given inmate clothes instead of our civilian clothes, we were led to our block at about half past ten at night.* […] *I stayed in Auschwitz for only three days, and was then put on a work transport that left for Dörnau. In Dörnau, a small town near Breslau, there was a men's camp with about 1,000 inmates. We worked in a quarry."*

Wolfsberg

Yet another subcamp of the Gross-Rosen Concentration Camp was located near the town of Wolfsberg.

Protocol No. 86.
Name: F. P. Gender: male. Date of birth: 1927. Ghetto: Kassa:

> *"After a three-day journey we arrived in Auschwitz on 21st May.* […] *Three days later we were taken to Wolfsberg."*

Protocol No. 91
Name: K. A. Gender: male. Date of birth: 1915:

> *"I spent five days in Auschwitz and then I was selected for work. I was transported to Upper Silesia, to Wolfsberg. We travelled for two days under SS escort. Wolfsberg is 200-300 kilometres from Auschwitz."*

Protocol No. 1217
Name: M. J. Gender: male. Date of birth: 1925. Ghetto: Ungvár:

> *"The Germans took over at Kassa and we were given water for the first time in Eperjes. Six days later, on a morning, we arrived in Auschwitz; prisoners told us that the baggage should stay in the cattle cars and we got off. Then they lined us up and separated men from women, then old people and able-bodied ones were stood on opposite sides. We spent only six days in Auschwitz, then they put us in a transport and took us to Wolfsberg. The journey lasted one and a half days. We received two thirds of a loaf of bread and some Zulag for the way."*

Protocol No. 1279
Name: E. I. Gender: male. Date of birth: 1889. Ghetto: Beregszász:

> *"When we arrived in Auschwitz, they immediately separated me from my wife and daughter already at the train. They took me in the camp, took off my dress, cut off my hair, made me have a bath and gave me striped clothes*

like the ones prisoners have. It is needless to say that I lost all my belongings as a result. After three days stay in Auschwitz they entrained me and took me into Wolfsberg. Here we constructed roads, which was a very hard work. There were 3,200 of us in this camp. Food was ok but of course not enough. We slept in tents lying on the floor, 20 of us in a tent. In August, they picked 40 people including me and transported us 6 kilometres away into Wüstegiersdorf."

Protocol No. 1394 (D)

Name: M. D. Gender: male. Date of birth: 1923. Ghetto: Munkács:

"In May of last year, we arrived at Auschwitz. At that time, about 2,000 people were accommodated in one barracks. I was here for only two days, when I was transported to Wolfsberg. Here, I was assigned to water-pipe work."

Geislingen

A subcamp of the Natzweiler Concentration Camp was located near the town of Geislingen.

Protocol No. 99

Name: H. R. Gender: female. Date of birth: 1906. Ghetto: Munkács:

"On our arrival in Auschwitz they separated me from the rest of my family and I had no idea what was in store for me. We did not even want to believe it from a Slovakian woman there that they were burning our family members in the crematorium. They took all the expectant mothers away and still we managed to hide an expectant woman, who gave birth to her child in secret; of course we arranged it so that the child would not remain alive. When we arrived in Geislingen, we thought that it would be a very good place to stay, because we could sit at a table, where we had to work 12 hours a day."

Protocol No. 125

Name: K. Z. Gender: female. Date of birth: 1931. Concentration: Munkács gettó:

"After four weeks we were entrained and taken to Auschwitz. […] *From Auschwitz we went to Geislingen. We did not work for three weeks and were not given anything to eat either, so we starved a lot."*

Markkleeberg

A subcamp of the Buchenwald Concentration Camp was located near the town of Markkleeberg.

Protocol No. 110

1. Name: L. E. Gender: female. Date of birth: 1926. Ghetto: Aknaszlatina;

2. Name: L. M. Gender: female. Date of birth: 1922. Ghetto: Aknaszlatina;
3. Name: L. R. Gender: female. Date of birth: 1925. Ghetto: Aknaszlatina:
   "On the 25th of May, gendarmes herded us together with our luggage into a huge garden. […] *After three days of horrible travel we arrived in Birkenau, where they selected us.* […]
   Three months later, they took us to Markleeberg, where we prepared aircraft parts in the Junker plant. Treatment was good here. There were 1,600 women working here."

Görlitz

Yet another subcamp of the Gross-Rosen Concentration Camp was located near the city of Görlitz.

Protocol No. 133
Name: P. M. Gender: female. Date of birth: 1923. Concentration: Szatmárnémeti Ghetto:

"The transport came to Auschwitz the 8th of May [sic]. […] *Appell* [roll call] *was not going well, or someone was missing out of the 32,000 people, the whole camp had to stay on their knees because of one person.* […] *It was in June, and it was somewhat better here. We got tattoos. We had to work carrying bricks.* […] *4 weeks later, after a selection they transported us into Görlicz, to an ammunition factory."*

Protocol No. 153
1. Name: H. G. Gender: female. Date of birth: 1924. Concentration: Huszt Ghetto;
2. Name: H. N. Gender: female. Place of birth: Huszt. Date of birth: 1930. Concentration: Huszt Ghetto;
3. Name: H. R. Gender: female. Date of birth: 1925. Concentration: Huszt Ghetto:
   "We stayed here for 4 days before they took us to another camp. […] *This is how we lived for three months in this camp.* […] *From Auschwitz we went to Görlicz* [Görlitz], *where they separated us and selected for different work in the plant."*

Gelsenkirchen

A subcamp of the Buchenwald Concentration Camp was located near the city of Gelsenkirchen.

Protocol No. 173
Name: T. H. Gender: female. Date of birth: 1927. Ghetto: Beregszász:

"When we arrived in Auschwitz, we were selected at the station. My mother and my twelve-year-old younger sister were made to stand apart, I was put among those fit for transport. They took my clothes, and because I ran away from haircutting, I was slapped twice so hard that I fainted. I was assigned to stay in Camp A. I did not have to work, but there was five hours of roll call every day. Food was very little. After two months we were selected again, and I was put among those fit for a transport. I was entrained and taken to Gelsenkirchen."

Protocol No. 1945

Name: S. P. Gender: female. Date of birth: 1921. Ghetto: Beregszász:

"The 21st of May 1944, Friday night, we arrived in Auschwitz, and stayed in freight cars till the morning of the following day when Polish prisoners in striped clothes came to receive us, together with SS soldiers. […] *We were led into the dressing room where there were 1,400 of us surrounded by 200 SS soldiers.* […] *I stayed in Auschwitz for six weeks, every day I heard sadder and sadder news. I could not work, and that was even worse. Six weeks later they put together a transport. As I was already very thin I did not hope to be selected but I had luck. In the afternoon they threatened us that this transport would be taken into the crematorium. As a result, many of us tried to get away from the blocks. They started to shoot around, and many got in injured. Luckily, I did not try to escape. After three days of travel we arrived in Gelsenkirchen. We received two-thirds of a loaf of bread, a portion of margarine, cheese and salami for the journey. There were 50 of us in a freight car; we had to sit leaning our backs to each other. One of the guards was a Wehrmacht soldier, the other one was an SS man who did not let us drink water. We arrived in Gelsenkirchen, and were accommodated in a tent, 500 of us in a block, 6-7 of us in a bed, we had also two blankets and were very happy about it."*

Protocol No. 1446

Name: W. H. Gender: female. Date of birth: 1929. Ghetto: Beregeszász:

"When we arrived in Auschwitz they made us get off the train; men had to stand aside, women with children and the elderly to the left side, and we were in another separate group. We entered a block, where they bathed us, grabbed our clothing and also the shoes if they were good shoes, and gave us ragged clothes in return. They shaved our hair and sent us back into the block the way we were. Twelve of us lay in a bed. We spent here six weeks. We did not work but lived in continuous terror. They kept coming to select us. I cannot even remember; it is so awful even to think of that suffering. Six weeks later, during a roll call they selected us for work. We travelled for two days with half a kilo of bread, sausage and margarine as provi-

sions. We arrived in Gelsen[kirchen] *to clear the rubble. We constructed a factory. We got food. We slept in a canvas tent."*

Gelsenberg

Yet another subcamp of the Buchenwald Concentration Camp was located near the town of Gelsenberg.

Protocol No. 174

Name: K. R. Gender: female. Date of birth: 1923. Ghetto: Ungvár:

"We arrived in Auschwitz at half past eight in the morning on the 26th of May, 1944. […] *The journey was not particularly hard, because Wehrmacht soldiers accompanied us. We got a loaf of bread, three portions of margarine and sausage for the journey. Our transport of labourers arrived in Gelsenberg at a large, ugly factory on the 5th of July, 1944."*

Reichenbach

Yet another subcamp of the Gross-Rosen Concentration Camp was located near the town of Reichenbach.

Protocol No. 418

1. Name: V. R. Gender: female. Date of birth: 1922. Ghetto: Kassa;
2. Name: T. H. Gender: female. Date of birth: 1922. Ghetto: Kassa:

"We arrived in Auschwitz, where they separated me from my parents and my younger sister. They accommodated me in Camp C. […]. *In August, we were taken with a transport of labourers to Reichenbach, Oberschlesien. We worked in a factory, 12 hours a day."*

Protocol No. 1860

Name: R. B. Gender: female. Date of birth: 1929. Ghetto: Huszt:

"We arrived in Auschwitz after four and a half days of travel. […] *The day after they took me into the baths, newly disinfected me, gave me back the same clothes and took me to the station where they entrained us and transported to Reichenbach. We got into a labour camp in Reichenbach, and went out to work for a company producing radio lamps."*

Lippstadt

Another subcamp of the Buchenwald Concentration Camp was located near the city of Lippstadt.

Protocol No. 437

Name: G. M. Gender: female. Date of birth: 1919:

"We arrived in Auschwitz in three days. At the station of Auschwitz Dr Mengele did the selections. I got separated from my parents and siblings

and was sent to the right side. They took us to the bath, cut our hair off, gave me cheap clothes and a bad pair of shoes, and put me in Camp C. I stayed here for 3 months. […] *At the end of August, they took us from Auschwitz to Liebenstadt* [Lippstadt]*, where we worked for an ammunition plant."*

Salzwedel

A subcamp of the Neuengamme Concentration Camp was located near the town of Salzwedel.

Protocol No. 502

Name: A. R. Gender: female. Date of birth: 1922. Concentration: Técsoi Ghetto:

"Three days later we arrived in Auschwitz. […] *Three months later there was a selection and the stronger ones (including myself) were taken away with a labourer's transport. After two days of travel we arrived in Salzwedel. We were working in an ammunition factory in Salzwedel."*

Protocol No. 699

1. Name: W. R. Gender: female. Date of birth: 1924. Ghetto: Ungvár;
2. Name: W. L. Gender: female. Date of birth: 1914. Ghetto: Ungvár;
3. Name: J. H. Gender: female. Date of birth: 1928. Ghetto: Ungvár;
4. Name: J. S. Gender: female. Date of birth: 1924. Ghetto: Ungvár;
5. Name: J. E. Gender: female. Date of birth: 1922. Ghetto: Ungvár:

"On the 20th of May, Friday evening, we arrived in Auschwitz. […] *At the end of August, we got on a train, 50 of us in a car. We received half a loaf of bread, sausage, and a little margarine for a three-day journey. In the end, we arrived in Salzwedel (close to Hamburg). We had to work here in a factory, 12 hours a day, swapping day and night shifts."*

Merzen

A subcamp of the Stutthof Concentration Camp was located near the town of Merzen.

Protocol No. 722

Name: L. E. Gender: female. Date of birth: 1930. Ghetto: Munkács:

"Three days later we arrived in Auschwitz. […] *After four weeks I was taken from Auschwitz to Mersen* [Merzen] *with a transport. We were performing very hard work: we were digging trenches for 12 hours a day."*

Weisswasser

Yet another subcamp of the Gross-Rosen Concentration Camp was located near the town of Weisswasser.

Protocol No. 759

1. Name: W. B. Gender: female. Date of birth: 1927. Ghetto: Felsovisó;
2. Name: P. B. Gender: female. Date of birth: 1927. Ghetto: Felsovisó;
3. Name: P. R. Gender: female. Date of birth: 1927. Ghetto: Felsovisó:
   "We arrived in Auschwitz on May 10. […] *Later she suggested that I should leave the camp with a transport. She put me on a transport in September and I departed along with the others. Luckily I could stay together with my relatives all along. We were given a lot of food for the trip, and there were only 25 women in each freight car, therefore one day later we arrived at Weisswasser in good condition, escorted by SS soldiers."*

Fallersleben

Another subcamp of the Neuengamme Concentration Camp was located near the city of Fallersleben.

Protocol No. 873

Name: K. L. Gender: female. Date of birth: 1920:

"That was how we lived till August, when they took us into a war plant in Fallersleben, which was a weapons factory."

Protocol No. 1339

Name: G. B. Gender: female. Date of birth: 1902. Ghetto: Iza:

"We arrived in Auschwitz. During the selection I was sent among those who were able to work. After bath we were sent into camp C. We did not have to work, but there were 3-4-hour-long roll calls either in the rain or in the blazing sun. There were constant selections in the block. One day I was put among the weak ones, but I joined the other group instead and I was taken to Fallersleben with a transport the next day. We were working in an ammunition factory in Fallersleben."

Erlenbusch

Yet another subcamp of the Gross-Rosen Concentration Camp was located near the town of Erlenbusch.

Protocol No. 929

Name: M. É. Gender: male. Date of birth: 1925. Ghetto: Munkács:

"After four days of travel we arrived in Auschwitz on May 15. We were taken to the bath; our hair was cropped and we were given other clothes. After spending three days in the quarantine I was put on a worker's

transport. In this transport only 50 people were put into one cattle car, but we were heavily beaten on the way. In Ellenburst [Erlenbusch] *we were accommodated in ten barracks. Two hundred fifty prisoners stayed in one of these barracks; we were lying on the ground on straw."*

Protocol No. 1799 (D)

Name: A.J. Gender: male. Date of birth: 1923. Ghetto: Ungvár:

"There were 60 of us in the railway car, after which we were severely beaten while boarding. Two older people died in our car; in others there were suicides. In Birkenau, we had to endure many beatings in the barracks, and stood for long roll calls in the pouring rain. From there, we came to Ellenbusch, where we spent three months building a large loading ramp. After completion, 160 railway cars with building materials arrived daily, and we unloaded them. I was the greaser for the excavator that unloaded and reloaded the gravel."

Bunzlau

Yet another subcamp of the Gross-Rosen Concentration Camp was located near the town of Bunzlau.

Protocol No. 1110

Name: V. M. Gender: male. Date of birth: 1918. Ghetto: Kistécso:

"We had travelled three days amidst terrible sufferings before we arrived in Auschwitz. There was a selection and then they made us have a shower and shaved our heads. They crammed 1500 people into one block. Sleeping was out of the question. When a little water was brought into the block, everybody ran for it, and in the turmoil the SS men shot dead a lot of prisoners. We did not have to work, but we had to line up for roll call from 3 am until sunrise. Afterwards we lined up for bread and meal, which took hours as well. The whole day was going on like that. I was there for 12 days. Then they selected the stronger ones and took 1000 people to Bunzlau. We travelled for one day. They assigned us to an aircraft factory; sometimes we had to unload trains too. We worked 16 hours a day (from 4 am to 10 am) with a 30-minute lunch break."

Protocol No. 1884 (D)

Name: D.N. Gender: male. Date of birth: 1924. Ghetto: Técső:

"After a three-day journey in a sealed railway car, without water, we arrived in Auschwitz on the morning of 29 May. The first and perhaps most terrible experience was the selection. My mother was placed with the old people, and with her my fourteen-year-old sister. We, who were able to work, were disinfected, dressed in striped suits, and herded into the Gypsy

Camp. After only 5 days, a transport was assembled, and I was part of it. In Bunzlau, there were 500 Polish Jews besides us, new arrivals."

Hamburg

Protocol No. 1176

1. Name: S. H. Gender: female. Date of birth: 1900. Ghetto: Ungvár;
2. Name: S. L. Gender: female. Date of birth: 1928. Ghetto: Ungvár:
   "We arrived in Birkenau after three days of travel. When we got off train they told us to leave beyond our belongings since they would carry them to our place. We did believe them. As we proceeded right away they separated me from my husband and son. They took me into the baths where they cut our hair off, seized our clothes, and gave us a long garment in return but nothing else. This was how we got into Camp A. Here, in the first block, ten of us slept on a sleeping place, although we could hardly sit so many on this little narrow place. We stayed here for seven weeks. We did not work at all but lined up for roll calls three times a day. There were several selections; once according to the alphabet, another time according to localities, always by chance. After seven weeks we were selected for a transport. It was the SS that entrained us. We travelled 65 of us in a freight car and arrived in Hamburg three days later. On the road, we got a little bread with margarine. As soon as we arrived we had to start working. We had to clear up the rubble. We cleared the rubble of factories for six months. We woke up at 4 am and sailed to our workplace, and walked another ca. 8 kilometres from the ship. We got soup twice a day, and one sixth of a loaf of bread with sausage or margarine."

Protocol No. 2385

Name: H. M. Gender: female. Date of birth: 1915. Ghetto: Ungvár:

"Three days later, on the 16th of May at 3.30 pm we arrived in Auschwitz. […] *On the railroad-sidings SS-henchmen were already waiting for us. After selections we were taken into the building of the baths, where they cut our hair, shaved us, gave us some bad, old clothes and took us into Camp A, where there were 1,500 of us in a block, 14 of us on a bunk. Our rations were the usual camp rations: little and bad food. We did not work in Auschwitz; we had to stand for roll calls almost all day long: between 4 and 8 at dawn, and later again for hours in the evening. At the end of June, I was selected for a transport of labourers and was taken to Hamburg. The journey lasted again for three days but there were now 50 of us in a car."*

Mettenheim

A subcamp of the Dachau Concentration Camp was located near the town of Mettenheim.

Protocol No. 1530
Name: F. L. Gender: male. Date of birth: 1903. Concentration: Békásmegyer:

> *"I was eager to get away from there and registered for every transport. Finally I managed to get in a transport of labourers and I was taken to Metenheim* [Mettenheim] *near Mühldorf, North Bavaria on 26th July. It was a totally new camp in the middle of a vast pine forest. An underground airplane factory was being built there. There were two camps for Jews: Alt-Lager and Wald-Lager I."*

Neusalz

Yet another subcamp of the Gross-Rosen Concentration Camp was located near the town of Neusalz.

Protocol No. 1607
1. Name: I. B. Gender: female. Date of birth: 1926. Ghetto: Aknaszlatina;
2. Name: I. R. Gender: female. Date of birth: 1927. Ghetto: Aknaszlatina:

> *"Three days later we arrived in Auschwitz. They separated me from my family; I remained together with my sister.* […] *At the beginning of September, they took us into Neusalz with a transport of labourers."*

Peterswaldau

Yet another subcamp of the Gross-Rosen Concentration Camp was located near the town of Peterswaldau.

Protocol No. 2336
1. Name: K. S. Gender: female. Date of birth: 1917;
2. Name: W. E. Gender: female. Date of birth: 1928:

> *"The 10th of June, we arrived in Auschwitz.* […] *We spent three weeks in Auschwitz before they selected us for a transport. We got clothes and shoes and travelled in carriages to a little village called Peterswaldau in Lower Silesia. 30 of us lived in the factory called Hansefabrik and we also worked there doing the job needed in a weaving mill."*

Mühldorf

Yet another subcamp of the Ravensbrück Concentration Camp was located near the town of Mühldorf.

Protocol No. 2476
Name: S. H. Gender: female. Date of birth: 1929. Ghetto: Munkács:

> *"Finally, we reached our destination, Auschwitz. We arrived at night.* […] *I stayed here for 2 months. One day suddenly they took away 350 people*

from our barrack, then again 150 – these were all people from Kassa and the destination was supposedly Hamburg. They selected another 200 people, amongst them also me. We had to give blood – for soldiers, as they claimed – and were taken into the baths and put on freight cars. We went to Mühldorf, where there were only few men left."

Protocol No. 1148 (D)

Name: L. P. Gender: female. Date of birth: 1928. Ghetto: Aknaszlatina:

"After three days, we arrived in Auschwitz. – Here followed the selection, on the part of the camp doctors of the Mengerle [sic]*, then the disinfection, and* [we] *were placed in barracks. –We were assigned to the so-called 'gypsy camp.' – There was no work, but we suffered horrible tortures from hunger.* […] *For 8 weeks, I was in Auschwitz, then there were selections, and those fit to work were transported to Mühldorf. –There we were assigned to construction work."*

Hessisch-Lichtenau

Another subcamp of the Buchenwald Concentration Camp was located near the town of Hessisch-Lichtenau.

Protocol No. 1828 (D)

Name: H. W. Gender: female. Date of birth: 1922. Ghetto: Sajószentpéter:

"On 15 May, we moved to the ghetto. […] *On 13 June, we arrived in Birkenau, and were immediately overtaken by the SS, and divided into different groups. Those who were able to work and those who were not. Men and women were separated in any case. Of my family, I was left all alone. We were disinfected and given torn clothes and wooden shoes, Krumpa. In the block, we slept on the ground, in the excrement. But even here, it was hard to snatch a spot. The first day, we received neither food nor water, which was dirty and rusty. We could not wash for seven weeks. It could not be called drinking. Three times there was a selection during the time we were there. We lived in constant fear. I was convinced that I would not leave Auschwitz alive. When we were selected for a transport, we were sent to the C camp. We were able to wash, were given decent clothes and shoes. Provided with some provisions, we waggoned* [boarded the train]*. Our final destination was the Lichtenau Camp near Kassel. It was a women's camp with 1,000 inmates."*

Protocol No. 2830

Name: S. R. Gender: female. Date of birth: 1922. Ghetto: Tab:

"The 3rd of July, we received the order to pack and the day after we already set off. We could carry 15 kilos of luggage. […] *The 7th of August, I was selected for a group meant to work in Lichtenau. The journey took us*

three days and we received sufficient bread and sausage for these days. We travelled 60 of us in a car and when we arrived to Lichtenau I was very glad we got into a relatively clean camp."

These witnesses generally spent between three days and a few weeks in Auschwitz, less frequently two to three months.

Gerlach and Aly cite the testimony of Fanny Kopolowitz, who in early June 1944 was deported from Uzhorod to Auschwitz, and a little later was transferred to Latvia (Gerlach/Aly, p. 381). Moric Katz and Abraham Berkovics were deported from the Iza Ghetto to Auschwitz at an unspecified date. After six weeks of quarantine in the Gypsy Camp, they were sent along with 300 other Jews to Brück, Silesia (*ibid.*, p. 382).

The destinations of these deportees were thus:

Krakow, Dörnhau, Kratzau, Augsburg, Warsaw, Riga, Wolfsberg, Geislingen, Markkleeberg, Görlitz, Gelsenkirchen, Gelsenberg, Reichenbach, Lippstadt, Salzwedel, Merzen, Weisswasser, Fallersleben, Erlenbusch, Bunzlau, Hamburg, Mettenheim, Neusalz, Peterswaldau, Mühldorf, Hessisch-Lichtenau, Brück.

The testimonies for 19 of these 27 locations are female, the remaining 8 are male. Many of the transports mentioned in these testimonies are documented.

Boizenburg (subcamp of Neuengamme Camp)

"Approximately 400 Hungarian Jewish women were incarcerated at Boizenburg in the second half of August 1944. They had been transported from Auschwitz to northern Germany. These women were expelled from their Hungarian hometowns in the spring of 1944, incarcerated in various Hungarian ghettos, and from there deported to the Auschwitz concentration camp. Most Jewish women in Auschwitz II Birkenau were held in Camp C, the so-called transit camp (Durchgangslager), where these women were selected for labor details in Boizenburg." (Megargee, p. 1085)

Bremen-Hindenburgkaserne (subcamp of Neuengamme Camp)

"Jewish women reached Bremen during the night of August 1 or 2, 1944. Most likely, this transport to Bremen [di 500 detenute] was composed exclusively of Hungarian women, who had been expelled from their homes in the spring of 1944, incarcerated in various ghettos in the country, and from there deported to Auschwitz. In Auschwitz II- Birkenau, many of them were held in Camp C, the so-called transit camp (Durchgangslager), where they were selected for work in Bremen." (*ibid.*, p. 1090)

Fallersleben

"Until July 5, 1944, the camp held 300 male Hungarian Jewish prisoners." (*ibid.*, p. 1107)

Gelsenberg

On 17 October 1944, 1,216 Jews deported from Hungary were transferred from Auschwitz to the Sömmerda Subcamp.[137]

Gelsenkirchen

A transport to Gelsenkirchen is documented by at least two inmate personnel cards of former Hungarian Jewish female inmates. Gabriella Schwartz (No. 12647) was admitted to Auschwitz on 21 May 1944, and was transferred "to Bu[chenwald Camp], labor unit Gelsenkirchen" on 4 July.[138] Iren Rosenfeld was admitted on 19 May 1944, and transferred to Gelsenkirchen on the same date.[139] A list from the political department in Weimar-Buchenwald, which concerns "New admissions of 4 October 1944, female inmates from Auschwitz CC to labor unit Essen (arrived at labor unit Gelsenkirchen on 24 Aug. 44)," contains the names of 518 people (the names of the two above-mentioned female inmates are not included).[140] Essen was an subcamp of the Buchenwald Camp that was opened precisely on 24 August 1944.[141]

It can be assumed that this was the transport from Auschwitz to Gelsenkirchen of 4 July 1944.

Gross-Rosen

On 12 September 1944, 250 Hungarian Jewesses were transferred from Birkenau Women's Camp to the Gross-Rosen Camp, Unit Ober-Hohenelbe.[142]

Görlitz

In a letter to the International Tracing Services in Arolsen dated 23 Dec. 1975, Dr. Alfred Konieczny wrote:[143]

> *"According to the current state of my research on the Görlitz Labor Camp, this camp was occupied by the first group of prisoners around 8 Aug. 1944. There were a total of 250 persons: a total of 225 Jewish prisoners from Hungary, Carpathian-Ukraine and Slovakia came from the Auschwitz-*

[143] ISD, Reference Code 150519.

Birkenau Camp, as well as 25 prisoners – probably inmate functionaries – who were assigned in Gross-Rosen. These were exclusively male inmates."

Dörnhau (subcamp of Gross-Rosen Camp)
An admissions list of the Gross-Rosen Camp, Unit Wüstigiersdorf – Lager Camp II Dörnhau, dated 9 June 1944, lists 250 inmates with the essential data (registration number, last and first name, date of birth, occupation), but without nationality or origin.[144] Among them were at least 42 Hungarian Jews, as can be inferred from the names.[145] The remaining first and last names are not inconsistent with Hungarian deportees, so it is likely that the 250 detainees were all Hungarian Jews.

Hamburg-Geilenberg (Dessauer Ufer, subcamp of Neuengamme Camp)

"On September 19, 1944, a subcamp for male inmates was created at a recently evacuated grain ware house on Dessauer Ufer in the port of Hamburg. Prior to the arrival of the inmates, the ware house had been used as a camp for over 1,000 Czech and Hungarian Jewish women who had been deported to Hamburg from Auschwitz II- Birkenau in July 1944 for forced labor."[146]

Hessisch-Lichtenau
On 19 September 1944, 1,000 Hungarian Jews from Auschwitz arrived at Buchenwald.[147] The witnesses mentioned earlier spoke of two transports of 4,000 inmates, each leaving Auschwitz in late May 1944.

Markkleeberg
500 Hungarian Jewesses were transferred on 31 August 1944 from the Birkenau Women's Camp to the subcamp Markkleeberg.[148] That they were Hungarian Jewesses is specified in a special addendum.[149] A "Registration

Häftlinge von KL. Auschwitz nach Außenkommando Hess. Lichtenau. (Jüdinnen). Politische Ungarinnen (Jüdinnen), pp. 47-67/495524-495540. Cf. Czech 1990, p. 712.

148 ISD, O.C.C. 2/27 (1-36) IC/6. Transportlisten nach Buchenwald (Frauen) 1944-1945, pp. 29-36/495506-495513. "Nachweis der 500 am 31.8.1944 vom Frauen-KL.-Birkenau nach dem Arb. - Kdo. Junkers, Markkleeberg bei Leipzig überstellten Juden." Cf. Czech 1990, p. 700.

149 ISD, *ibid.*, pp 37-41/495514-495518. "Nachtrag zur Ueberstellungsliste vom 31.8.44. der 500 weibl. Häftlinge (ungar. Jüdinnen aus Auschwitz)."

of female inmates according to the order of 16 Aug. 44" records 998 Hungarian Jewesses.[150]

On 5 October 1944, there was a further transfer from the Birkenau Woman's Camp of 200 Hungarian Jewesses registered there within the "A" series or registration numbers.[151]

Natzweiler

On 27 August 1944, 1,620 Hungarian Jewesses were transferred from the Birkenau Women's Camp to the Natzweiler Camp. On 6 September, they were sent to Labor Camp Frankfurt Main/airport.[152] This list is incomplete. These inmates were later transferred back to Frankfurt-Walldorf, and appear on another list of 1,660 inmates.[153]

The *Encyclopedia of Camps and Ghettos, 1933-1945* states on this:

> *"On August 22, 1944, 1,700 female prisoners arrived in Walldorf from the Auschwitz concentration camp. The majority of them were Hungarian Jews; many of the others came from Romania, Yugoslavia, and Czechoslovakia."* (Megargee, Part B, p. 1068)

Riga-Kaiserwald

> *"In addition to the Ostland ghettos, Kaiserwald received approximately 2,000 Hungarian Jewish women from Birkenau in June 1944."* (*ibid.*, p. 1231)

Salzwedel

> *"There were roughly 1,500 to 1,550 women in Salzwedel between October 1944 and March 1945. In the camp's early period, the late summer of 1944, there were 700 to 800 female Jewish Hungarians in the camp. These women had been transported from Auschwitz directly to Salzwedel."* (*ibid.*, p. 1170)

A "List of Hungarians who arrived in Bergen-Belsen from Salzwedel" ("*Nèvjegyzék a Salzwedelből Bergen-Belsenbe èrkezett magyarokról*"), compiled by the Hungarian Red Cross, lists the names of 234 Hungarian Jewesses.[154] Another list, which has the same heading, contains the names of 2,141 Hungarian Jewesses.[155] According to the accounts I have given earlier, these inmates were transferred from Auschwitz to Salzwedel in late August 1944.

Warsaw

> *"After mid-May 1944, transports of an estimated 4,000 to 5,000 Hungarian Jews replenished the inmate population, which was considerably depleted by then."* (Megargee, Part B, p. 1512)

Kaunas, Riga and Płaszów

The cases of Kaunas, Riga and Płaszów are more complex and need to be explored separately.

From Kaunas (for the Germans Kauen), the following Hungarian Jewesses arrived at Stutthof Camp:

– 54 (registration numbers 48947-49000) on 19 July in a transport of 1,097 Jewesss;[156]
– 588 on 4 August in a transport of 793 Jewesses, of whom the names of 743 are known,[156] hence in total 642 Jewesses.

It is noteworthy that on 15 May 1944, just as the deportations from Hungary began, a transport of 878 Jews, almost all of whom fit for work, left Drancy for Kaunas (Klarsfeld, pp. 13, 20; my pagination).

From Riga, the following Hungarian Jewesses arrived in Stutthof:

– 484 on 9 August with a transport of 6,382 Jewesses, of whom the names of 1,858 are known, with the percentage of Hungarian Jewesses among the known names amounting to 26%;[157]
– 15 on 1 October with a transport of 1,777 Hebrews, of whom the names of 817 are known,[158] hence in total 499 Jewesses.

The Stutthof Camp's Evidence Book No. 12159 records 468 Hungarian Jewesses relocated from Riga on 9 August; the data also includes the "residence," meaning the last residence, which in many cases is the ghetto from which these Jews were deported. The most frequent locations are Nagyvárad (82 persons), Kassa (45), Kolozsvár (38), Ungvár (34), Beszterce (29), Dés (16), Nagyszőllős (13), and Nyíregyháza (11). In all, a minimum of 1,141 Hungarian Jewesses came to Stutthof from Kaunas and Riga.

A letter from the "Baltic Petroleum Company Ltd" ("*Baltische Öl Gesellschaft m.b.H.*") dated 2 June 1944 "to Labor Deployment Office of the Plenipotentiary of Labor Deployment Kiviöli"[160] with the subject "Deployment of Hungarian Jews" sets out the following plan:[161]

> *"With reference to the oral statements submitted by our Messrs. Schlüter and Schreiber, we inform you of the following classification:*

---

[156] AMS, I-IIB-10.
[157] AMS, I-IIB-11 (Transportliste, fragments) and I-IIE-12 (Evidenzbuch).
[158] AMS, I-IIB-12.
[159] AMS, I-IIE-12.
[160] Kiviöli was a subcamp of the Vaivara Camp established in October 1943.
[161] ERA, R-187-1-33, p. 58.

Plant I 600 male Jews, 100 female Jews.
" III 770 " " , 80 " "
" VI 540 " " , 60 " "
Logging 400 " " , – " "
Mötsu

In all, 2310 male Jews, 240 female Jews.
The housing is in place, except for some minor structural changes and additions.
As far as the male forces are concerned, we ask to be referred primarily people who are fit for mine work. Furthermore, we are particularly interested in construction craftsmen of all kinds as well as metal workers."

The "Memo on meeting at the Labor Deployment Office of the Plenipotentiary for Labor Deployment in Kiviöli on 26 June 44," written on 27 June by "The Representative of the Plenipotentiary for Labor Deployment for the Reich Commissariat Ostland and the Economic Inspectorate North and Center – Baltöl Labor Deployment Office," states in a section headline "Jewish inmates":[162]

"An exchange of the existing inmates for PoWs is no longer an option. – Further inmates from Hungary have been rejected by the labor deployment office in telexes and reports to Plenipotentiary for Labor Deployment and Gebechem[163] *because of poor performance due to lack of supervision."*

This suggests that the project set forth in the letter of 2 June had been implemented. Gerlach and Aly observe in this regard (Gerlach/Aly, pp. 382f.):

"Thus, the Germans deported to the Baltic States apparently exclusively women, in several transports in June 1944 at least 4,000. Some of them had to work in the oil-shale mines of Kiviöli (Estonia), but some of them were quickly withdrawn and then forced to work in the forests."

Franziska Jahn writes that a transport of 2,300 to 3,500 Hungarian Jewesses departed Auschwitz between 5 and 7 June 1944. It was divided into two parts: 500 were sent directly to Kretinga (German Kröttingen), Lithuania, while the other 1,800 to 3,000 arrived at the Riga Main Camp on 9 June. 500 of these were transferred to Kiviöli on 11 June. The two parts of the transport met in Kaunas, then continued to Siauliai (Jahn, pp. 281-284).

The 1,141 Jewesses mentioned earlier were thus part of the transport from Auschwitz on 5-7 June 1944.

The Płaszów Camp was located on the outskirts of Krakow. According to reports by Polish historian Aleksander Bieberstein, SS *Standartenführer*

---

[162] ERA, R-187-1-33, p. 60.

[163] *Generalbevollmächtigter für Sonderfragen der chemischen Erzeugung* – Plenipotentiary for Speical Issues and Chemical Production.

Gerhard Maurer, head of Office DII (inmate labor deployment) of the SS WVHA, asked the commandant of this camp on 14 May 1944, whether he could take in 10,000 Hungarian Jewesses who were to be sent to work in armament industries (Bieberstein, p. 138).

In her "Płaszów Camp Calendar 1942-1945," Magdalena Kunicka-Wyrzykowska writes in reference to the months of May and June 1944 (p. 68):

> *"*[Arrival of] *Transports of Hungarian female inmates of Jewish origin, who came to Płaszów from Auschwitz Camp; they were assigned to work in labor sections in the camp area (among others in the Bauhofkommando – the construction section."*

She adds that 8,000 male inmates (więźniów) from Płaszów were transferred to Auschwitz on 6 August, and that the next day there was a "transport of about 4,000 to 5,000 female inmates (więźniarek) from KL Płaszów Camp (Hungarian citizens of Jewish origin) to Stutthof via Auschwitz" (*ibid.*, p. 69).

In reference to the Płaszów Camp, Artur Eisenbach states:

> *"To tell the truth, some transports of Jews from Hungary also arrived there in May 1944, from various smaller camps in the Krakow district, and even from Borysław and Drohobycz. However, already in the first half of 1944, a transport of 8,000 Jews was sent from Płaszów to Auschwitz, another transport of 6,000 to Mauthausen; also in July 1944, several thousand Jews were sent to the camps in Stutthof, Flossenbürg and others."* (Eisenbach 1961, p. 554)

For this Polish historian, these transports came directly from Hungary, but some witnesses claim that these were inmates transferred to Płaszów from Auschwitz, and then transferred back to this camp.

In her entry for 6 August 1944, Czech states that on that day "7,500 female Jews" arrived in Auschwitz from Płaszów Camp, who were housed in the Birkenau "transit camp" (Czech 1989, p. 842; the English edition does not mention the transit camp: 1990, p. 680). The source for this entry, not mentioned by Czech, is a 1945 or 1946 statement by former inmate Bronisława Krakauer, reported in a document collection published in 1946 by the Central Jewish Historical Commission. The witness stated (Blumental, p. 63):

> *"On 6 August 1944, 7,500 women went from the Płaszów Camp to Auschwitz and Birkenau. There they were shaved, clothed in the same clothes, without underwear, ordered to get up at 3 a.m., were forced into heavy labor, were beaten and starved. Many women died, while weak inmates received the coup de grace; they were poisoned with gas. There were fewer and fewer of them left."*

No documents exist in this regard. The trial against Amon Goeth, the former commandant of the KL Płaszów Camp, which was staged in Kraków from 27 August to 5 September 1946,[164] did not clarify the matter; on the contrary, it was convoluted with conflicting and fictional testimonies.

The indictment, drafted by prosecutor Tadeusz Cyprian on 30 July 1946, merely noted (Blumental *et al*., p. 32):

> *"In July 1944, therefore, transports amounting to several thousand people left for Auschwitz, Stutthof, Flossenbürg and Mauthausen."*

During the seventh session (3 Sept. 1946), Prosecutor Cyprian stated (*ibid.*, p. 407):

> *"People destined for Auschwitz were loaded onto a train. They were crammed into the railway cars, the floor had been sprinkled with quicklime; little by little, a layer of moisture formed that produced gas. These people perished; of 8,000 people loaded into the cars with destination Auschwitz, 400 arrived. For what purpose? For the gas chamber."*

The grounds for the judgment added further confusion (*ibid.*, p. 486):

> *"And so, for example, in August 1944, a transport of over* [sic] *2,000 to 4,000 people was sent from Płaszów to Stutthof via Auschwitz. This entire transport was to perish in the waves of the Baltic Sea. In early August 1944, a transport of Hungarian Jews departed from Płaszów for Auschwitz."*

No list of transports with progressive registration numbers exists for the Płaszów Camp, as has been preserved for Auschwitz and other concentration camps. Therefore, an attempt must be made to reconstruct the list, at least limited to the arrival at the camp and the transfer of the Hungarian Jewesses.

The point of departure is a list of names headlined "Daily list of Hungarian Jewesses deported from Płaszów Camp in the summer of 1944."[165] This document bears the letters of the alphabet in the right margin, in which the inmates are recorded whose last names begin with the respective letter. The total number of female inmates is 334. Their registration numbers, after the three isolated numbers 19539, 19885 and 19900, start from 20196 and go up to 21838. Here, many numbers are consecutive.[166]

The "Index of Names of Płaszów Camp Detainees," edited by the Central Commission of Inquiry into Hitler Crimes in Poland, contains 1,716

---

[164] The defendant was sentenced to death and executed in Krakow on 13 September 1946.

[165] "Spis skorowidz węgierskich żydówek wywiezionych z obozu w Płaszowie w sierpniu 1944," ISD, Ordner Nr. 3.

[166] For example the series 20766-20800; 21006-21025; 21028-21050; 21058-21079; 21701-21800, with five numbers missing.

names, but only for a portion of them is the registration number given.[167] Over 160 inmates arrived at the camp on 15, 16 and 17 March 1944, and received (almost consecutive) numbers from 12191 to 12371.

The list includes the names and registration numbers of Hungarian Jewesses from the list mentioned earlier, but with no indication of the date of arrival at the camp. It moreover contains few names of inmates who arrived later and received higher numbers:

Table 1.14: Hungarian Jewesses arriving late at Płaszów Camp

Page*	Last Name	First name	Reg. No.
201	Pierzchała	Jan	18407
209	Przewdziecki	Stanisław	18521
81	Goldberger	Helén	21902
262	Szeprőlgyi	Serolta	21903
170	Löbl	Alfred	22260
47	Dworczyk	Stanisław	22606
84	Góra	Lucjan	22608
142	Kowalski	Michael	22609
97	Halbreich	Eugenia	29700

* ISD Ordner Nr 6, see Note 167.

The first two female inmates listed were Hungarian Jewesses. Before the number 19539, only the two registration numbers given above are listed, assigned to two Poles: nos. 18407 and 18521.

According to the relevant lists of names, the transport from Drohobycz and Boryslaw to Płaszów on 14 April 1944 contained 777 men (registration numbers 12801-13574, plus 13821), and 245 women (13577-138171).[168]

Kunicka-Wyrzykowska informs us that inmates evacuated from the Jewish labor camp in Rzeszów (Force-Labor Camp for Jews at the aircraft-engine factory Reichshof) arrived at the camp on 24 July, and were transferred to Mauthausen after three days (Kunicka-Wyrzykowska, p. 69).

On 10 August 1944, Hans Maršálek recorded the arrival at Mauthausen of "4,589 [4,590] Jewish inmates from Plaszow-Krakow Camp."[169]

The following conclusions can be drawn from these documents:

1. The above-mentioned 4,590 inmates merely transited through Płaszów, and definitely kept the numbers they had received in the Rzeszów

[167] Główna Komisja Badania Zbrodni Hitlerowskich e Polsce, "Indeks imienny więźniów obozu w Płaszowie," ISD, Ordner Nr. 6.

[168] ISD, Ordner Nr. 1. There is some error in the numbering, because 214 numbers were assigned, while there are 245 names. As shown by the assigned registration numbers, the numbering was continuous and included both men and women.

[169] Maršálek, p. 126. The relevant registration numbers – 84251-88840 – correspond to 4,590 detainees.

Camp. Otherwise, the numbering (starting with the last known number assigned on 14 April 1944), 13821, would have arrived at (13821 + 4,590 =) 18,411 as early as 24 July, and the Hungarian Jewesses with numbers 19539, 19885 and 19900, 20196-21838, 21902-21903, would have arrived after that date, but the testimonies speak with certainty of transfers from Auschwitz to Płaszów as early as June. In particular, former inmate E. K., who was deported to Auschwitz from Dunkirk, stated that she was sent to Płaszów with a transport of 5,000 inmates around 24 June.[170] Sára Simon stated that she had been deported to Auschwitz from the Mátészalka Jet on 4 June 1944, thus had arrived camp on 7 or 8 June, and was transferred to Płaszów two days later. After three months (actually after two months), she was transferred back to Auschwitz with a transport of 4,500 Hungarian Jews.

2. The Hungarian Jewesses transferred from Auschwitz to Płaszów received numbers between 13800 and 22600 (not considering the isolated number 29700), so their number was about 8,800.
3. The "List of Jewish Transports" concerning the Birkenau Women's Camp (to which I will return later) has numerous entries between 8 and 12 August 1944, namely (see Appendix, Table 1.I):

Table 1.15: List of Jewish Transports arriving at the Birkenau Women's Camp between 8 and 12 August 1944

Date	# Inmates	Registration Numbers
8 August 1944	1,414	A-17141 – A-18554
10 August (2 entries)	2,446	A-18555 – A-20000
11 August (2 entries)	1,999	A-21001 – A-22000
12 August	1,020	A-23000 – A-24019
Total:	6,879	

Thus, if the figures of Holocaust historiography have any basis in facts, at least in the order of magnitude, then it must be concluded that a maximum of 6,879 Jewesses were transferred back to Auschwitz from Płaszów, probably in multiple transports beginning on 6, 7 or 8 August 1944. About 2,000 remained in Płaszów, and were later transferred to other camps.

However, the picture shown above is still rather limited regarding the displacement of Hungarian Jews. According to Szita Scabolcs's research, these deportees were eventually distributed to almost all German concen-

[170] According to the list of transports of Hungarian Jews that passed through Kassa Station, only one transport departed from Dunkirk on 16 June 1944. The transport arrived at Auschwitz most likely on 19 June. The witness stated that she was transferred to Płaszów five days after her arrival in Auschwitz, thus approximately 24 June 1944.

tration camps. The destinations of these transferred deportees are alphabetically sorted in the list below (Szabolcs 1989, pp. 281-287):

1. Altenburg (HASAG)
2. Arolsen Kommando, Buchenwald
3. Aschersleben Frauenlager, Junkers
4. KL Auschwitz I. Kommando Blechhammer
5. KL Auschwitz III. Monowitz, Kommando Golleschau (Goleszow)
6. Durchgangsbahnhof Glöwen, Plattenburg (railway line Berlin-Hamburg), KL-Außenlager Glöwen
7. Bad Salzungen Nebenlager Heinrich Kalb
8. Berga/Elster Nebenlager, Turingia
9. KL Bergen-Belsen and Nebenlager: Braunschweig, Fallersleben Blankenburg, Kommando Buchenwald, Kommando Dora
10. KL Buchenwald and Nebenlager: Allendorf, Altenburg (HASAG), Bochum (Eisen- und Hüttenwerke AG), Bochumer Verein, Essen, Gelsenkirchener Bergwerks AG, Gelsenkirchen-Horst, Hessisch-Lichtenau Dynamit-Nobel AG Hirschagen, Leipzig-Schönefeld (HASAG Frauen Außenlager), Leipzig-Schönau (HASAG), Lippstadt I. (Lippstädter Eisen-und Metallwerke GmbH, Westfalische Metall-Industrie AG), Lippstadt IL, Magdeburg (Polte-Werke), Markkleeberg bei Leipzig, Mühlhausen, Sömmerda, Taucha (Männer- und Frauenlager), Torgau, Wansleben
11. Calw Kommando Natzweiler
12. Colditz Kommando Buchenwald
13. KL Dachau and Nebenlager: Allach, Kaufering, Mettenheim M1
14. Danzig-Neufahrwasser (Gdansk) Kommando KL Stutthof,
15. Dernau/Ahr Kommando „Rebstock" Buchenwald Gollnow&Sohn, Koblenz
16. Dondangen (Dundaga) I. and II. Kommando Kaiserwald HASAG
17. KL Dora-Mittelbau
18. Dortmund-Hoerder-Hüttenverein Kommando Buchenwald (femminile)
19. Duderstadt, Polte Kommando Buchenwald (femminile)
20. Essen Humbold
21. Essen, Krupp AG Kommando Buchenwald
22. KL Flossenbürg and Nebenlager: Zschachwitz, Zschopau
23. Flößberg Kommando Buchenwald HASAG "Floessberger Metallwerke"
24. Gleiwitz II., Kommando Auschwitz
25. KL Gross-Rosen and Nebenlager: Breslau-Lissa, Eule (Mühlhausen), Friedland, Arbeitslager Fürsteinstein, Hochweiler, Lebau, Schlesiersee, Weisswasser

26. Halberstadt Junkerswerke (Malachit)
27. KL Krakau
28. Kurben (Latvia, unknown classification)[171]
29. Landsberg am Lech
30. Langenstein, Kommando Malachyt, Kommando Buchenwald
31. Langenstein Zwieberge, Kommando Buchenwald
32. KL Lebrechtsdorf-Potulitz
33. Libau (Liepaja) Ghetto
34. Lübberstedt, Lufthauptmunitionsanstalt, Kommando Neuengamme
35. KL Mauthausen and Nebenlager: Gusen, Lenzing, Ebensee
36. Meuselwitz (HASAG)
37. Mittelbau Salza, Kommando Dora
38. Mühlhausen Gerätebau GmbH
39. KL Natzweiler
40. KL Neuengamme
41. Neustadt bei Coburg (Kabel und Leitungswerk) Kommando Buchenwald
42. Niederorschel (Junkerswerke), Kommando Buchenwald
43. Ohrdruf SIII, Kommando Buchenwald
44. Oranienburg (Heinkelwerke)
45. Penig (Max-Gehrt Werke), Nebenlager KL Buchenwald
46. KL Plaszów
47. Plömnitz Nebenlager Leopard
48. Porta Westfalica, Kommando Neugamme
49. Raguhn, Nebenlager KL Buchenwald
50. KL Ravensbrück, Kommando Malchow
51. Reichenbach
52. Riga, Kommando Sachsenhausen, KL Riga-Kaiserwald, Riga-Spilwe, Kommando Kaiserwald
53. KL Sachsenhausen
54. Schlieben (Nebenlager KL Ravensbrück, HASAG)
55. Schönebeck (Nebenlager KL Buchenwald)
56. Sonneberg-West (Thüringer Zahnradwerke, Junkers)
57. Sömmerda Thüringen
58. KL Stutthof
59. Thekla, Kommando Buchenwald
60. Tröglitz/Rehmsdorf Kommando Buchenwald
61. Windau (Ventspils, Lettonia) Nebenlager Kaiserwald
62. Wolfrathausen Kommando Dachau.

[171] Kurben was a different name for Dondangen.

In the immediate aftermath of the war, the oft-mentioned DEGOB (*Deportáltakat Gondozó Országos Bizottság*, National Committee for Assistance to Deportees) sent its representatives to multiple former German concentration camps in search of surviving Hungarian Jews. The relevant lists were published in the newspaper *Hírek az elhurcoltakrór* (News about Deportees), the first issue of which was published on 5 July 1945.[172] It listed the names of former prisoners found in the camps of Homberg (near Kassel), Kammer-Schärfling, (Litzberg), Leipzig, Frielendorf (Kassel), Hillersleben (Magdeburg), Aurolzmünster (Ried, Upper Austria), Buchenwald, Sachsenhausen, Leipzig, "Dresden Hotel," Sondheim (Rhön-Grabfeld, Bavaria), Unter-Themenau (Nikolsburg), Görlitz, Wells (Wels, Mauthausen), Tröbitz (Bergen-Belsen).

Issue No. 2 of the periodical (17 July 1945) deals with "Auschwitz and Surroundings." A couple of thousand Hungarian Jews were present in the camps of Auschwitz, Katowice, Krakow, Częstochowa, Łódź, Warsaw, Blomberg, Lautenburg, Lublin and Chemnitz. In Auschwitz itself, only 48 Jews were still in that camp on 20 May, who were being treated by Soviet doctors. Hungarian Jews had been deported via Auschwitz to various camps in Silesia and the Sudentenland: Gross-Rosen, Parschnitz, Bernsdorf, Schatzler, Trautenau, Gabeldorf, Oberaltstadt, Troppau, etc. At Theresienstadt, 4,800 Hungarian Jews were found in early June 1945 (pp. 1f.). In Austria, repatriation had already begun; the first train had left Linz with 1,200 people. In Reich territory, DEGOB delegates visited camps in Leipzig, Buchenwald, Waldenburg, Nordhausen, Celle, Bergen, Braunschweig, Hannover, Salzwedel, Hamburg, where they found small groups of Hungarian Jews (p. 2). This is followed by lists of former deportees who were in Sweden, Theresienstadt (the list includes 48 children aged 1-14; pp. 3-5), Celle, Salzwedel (about 760 names; pp. 6-9), Altenberg, Buchenwald, Ziegenhain, near Kassel (over 860 names; pp. 9-16), Bergen-Belsen (over 1,800 names, mostly women; pp. 16-24).

Issue No. 3 (14 August 1945) contains lists of survivors who were in Garmisch-Partenkirchen (Bavaria), Dornach (about 1,800 names) coming from Wels (near Linz) and Lambach (near Wels; pp. 3-9). In Dornach and other locations on the Danube, there were still about 2,200 Hungarian Jews at the beginning of August 1945 (p. 3). The Soviets rounded up 850 Jews from Monowitz and other camps in Częstochowa, and deported them to Sluck, Belarus; the relevant list contains over 800 names (pp. 10-13). Another list, concerning Feldafing (south of Munich) contains over 650 names (pp. 14-16).

---

[172] *Hírek az elhurcoltakrór*. Budapest, 5 July 1945, pp. 1-16; dates and page numbers in text refer to this, unless stated otherwise.

Issue No. 4 (7 Sept. 1945) is devoted to Hungarian PoWs who were in Siberia, the Ural region, Germany and Austria.

Issue No. 5 (20 Oct. 1945) gives lists of Hungarian Jews who were in Italy and Switzerland (pp. 3-5), who had been transferred to Sweden (pp. 6-11). It also contains a geographic table with an indication of the places where Hungarian Jews had been deported or were found (pp. 14f.), to which I will return in Chapter 1.10.

Here, however, only direct transfers from Auschwitz to other camps and for a limited period of time are of interest, as I will explain later. In addition to those mentioned earlier, there are many other documented transports, only some of which are mentioned by Czech in her *Auschwitz Chronicle*.[173]

I summarize all available data in the following table. It is divided into two parts: the first covers the period from 17 May to 14 July, during which 45,160 Hungarian Jews were transferred away from Birkenau, as indicated by documents. The second part runs from 15 July to 21 August, the day for which the strength of the Auschwitz-Birkenau Camp is known. The choice of these two dates will be explained later.

Table 1.16: Transfers of Hungarian Jews away from Auschwitz, 17 May through 14 July 1944

Date [d/m/y]	#	Hungarian	Destination	Source
17/5/1944	1,500	Jews	KL Gross-Rosen	[174]
25/5/1944	1,004	Jews	KL Buchenwald	[175]
24/5/1944	3,000	Jews	KL Gross-Rosen	[176]
24/5/1944	189	Jews	KL Gross-Rosen	[177]
28/5/1944	2,000	Jews	KL Mauthausen	[178]
end of May	4,000	Jews	Warsaw	[179]
end of May	1,000	Jews	Mittelbau-Dora	[180]
2/6/1944	1,013	Jews	KL Buchenwald	[181]

[173] In Table 16, I have given Czech's *Auschwitz Chronicle* as a source only in cases where she refers to ISD transport lists, which I was unable to verify (1, 10, 13 July).

A few remarks are pertinent here.

1. According to the report of the head of the inmate clothing department quoted earlier, 45,132 detainees were transferred from Birkenau in 48 transports during the period from 15 May to 14 July 1944; this list shows 27 entries, which evidently should be understood cumulatively (individual entries may refer to two or more transports).
2. The list shown above contains all deportees transferred from Birkenau; the (45,160 – 45,132 =) 28 extra transferees result from rounded figures assumed for transports whose original lists are unknown.
3. Up to 21 August 1944, 61,160 Hungarian Jews were transferred, of which 24,550 were women, and 36,610 men.
4. To the above figures must be added the approximately 2,000 Hungarian Jews sent to Płaszów in May-June 1944 who were not transferred back to Auschwitz; moreover the 518 Hungarian Jews who were sent to Gelsenkirchen on 4 July, as I explained earlier.

Therefore, in the period indicated, the transfer away from Auschwitz of (24,550 + 2,000 + 510 =) about 27,100 women and about 36,600 men, in total about 63,700 Jews from Hungary, can be considered documented.

1.7. Leo Glaser's List of Transports with Jewish Men

On 5 August 1945, Leo Glaser wrote a letter "to the military government in Linz," to which he attached a transport list, and also explained its origin:[216]

> *"Subject: SS Hauptsturmfuehrer Kramer of Bergen-Belsen Concentration Camp.*
>
> *Through the press and radio I have learned that SS Hauptsturmfuehrer Kramer, the camp commandant of the Bergen-Belsen Concentration Camp, has been charged with the murder of 27,000 Jews. Kramer was the camp commandant of Auschwitz II (Birkenau) Concentration Camp in 1944. In the period from May to 20 September 1944, about 650,000 Jews (men, women and children) were killed by poison gas and burned in the crematoria of the Auschwitz II (Birkenau) Camp under his direction. This is the biggest mass murder of all times. In the aforementioned period, about 825,00[0] Jews came to Auschwitz from all the countries of the world, about 20% of the total number (men and women) were sent to the camp, the rest were exterminated.*

[216] YVA, O.18-240.

I have enclosed a detailed list of the male transports that arrived in Birkenau during the above-mentioned period. The number of female transports during the same period is approximately the same, if not higher.
I was detained for seven years in various concentration camps as a political prisoner until my liberation on 6 May of this year, and was in Auschwitz-Birkenau from October 1942 until 8 January 1945. I was an eyewitness to the above-mentioned atrocities, and had the opportunity to keep records of all incoming transports. I carried these records with me at constant risk to my life, until my liberation.
The special representative appointed by Adolf Hitler for this 'Hungarian Jewish Action' was SS Obersturmbannfuehrer Hess [sic], *who was notorious for his brutality and special cruelty; the camp commandant was SS Hauptsturmfuehrer Kramer, and the first Schutzhaftlagerfuehrer leader of the protective custody camp was SS Hauptsturmfuehrer Schwarzhuber. SS Hauptscharfuehrer Moll was particularly cruel and bestial in his bloody work. He was responsible for the supervision and organization of the 4 crematoria.*
I request the American Military Government to forward this letter to the appropriate authority in the event that my information should be of interest. I am prepared to swear to my statements at any time.
Sgd. Leo Glaser
Director of the Insurance Institute of the Austrian Federal States, Vienna.
Presently: Vienna 1, Elisabethstrasse 24
Enclosure: 1 detailed List."

This letter, and presumably the attached list (see Doc. 3), was classified by the Americans as document PS-3686, but it remained buried in the archives, and was never used in any trial, nor was Glaser ever called to testify, despite the obvious importance of the document.

According to the ARC website article mentioned earlier, Leo Glaser had been Kapo der head of the Birkenau inmate clothing department. However, this is not supported by documents, but only by testimony. One of the earliest dates from the immediate postwar period. Former inmate Zygmunt Janiak was interned at Auschwitz in March 1943, and remained there until the day of his escape on 17 April 1944. On 28 August 1947, he made a statement in which he stated:[217]

"Throughout my stay in Auschwitz, I worked at the clothing department, with the exception of the last five days of my stay, when I was assigned to the external unit railway detachment. This detachment built the railway from Auschwitz Station to the Birkenau crematorium. I was able to escape precisely because of my work in this unit. My boss at the clothing-department warehouse was SS Unterscharführer Markmann, the head of

[217] AGK, NTN, 139, Vol. 56, p. 169.

the overall department was SS Scharführer Reichenbach. I performed the duties of messenger and aide, first to Schelsinger, then to chief foreman Glaser."

According to the Auschwitz Museum's database, Glaser was registered under number 70284, from which it can be inferred that he arrived in Auschwitz on 25 October 1942 by transport from Sachsenhausen Camp, which confirms his claim that he was interned in Auschwitz "from October 1942."

Leo Glaser's inmate personnel card indicates that he was born on 12 July 1893, lived in Vienna, was arrested on 24 April 1938, and was sent to Ravensbrück on 27 March 1942. Under the heading "transferred," it states that he was transferred on 20 September 1942 to "Sac.," evidently Sachsenhausen, and on 5 October 1943 [meaning 1942] to "Ausch.," Auschwitz. The inmate personnel card in question is not from Auschwitz, however, because it bears the registration number "6751 DR Sch,"[218] which belonged neither to this camp nor to Sachsenhausen.

On 3 April 1963, Glaser was interrogated in Vienna as part of the criminal investigation against Bruno Albrecht and others. He deposited a five-page statement, but page 3 is unfortunately missing in the digitization of the volume. On the first page we read:[219]

"I came from Sachsenhausen to Auschwitz in September 1942 as a political prisoner. I was given prisoner number 70,284. I was immediately sent to Birkenau, and remained there until the evacuation to Mauthausen. At first, I was assigned to various work units, was a block clerk in various blocks, and in about the spring of 1944, I became foreman at the inmate clothing department, and remained so until the evacuation. As foreman of the clothing department, I repeatedly came to the ramp. The selections were carried out at the ramp by the camp doctors in the presence of the block and rapport leaders."

He then briefly returned to his assignment, stating about it:[220]

"As Kapo foreman of the clothing department, I had free access to all sections of the Birkenau Camp."

Then Glaser listed the SS men he remembered, including:[221]

"4.) The paramedic Klehr, who was generally known as gas master. On my way to the clothing storage, I repeatedly passed by Crematoria 3 and 4,

[220] *ibid.*, p. 15736.

[221] *ibid.*, p. 15738.

> *and saw Klehr several times, controlling the gassing and venting of the gas chamber."*

Glaser's name does not appear in any of the major studies on the history of the camp (Długoborski/Piper 1999 & 2000) and the activities of the inmates (Garliński 1974; Langbein 1987), but this does not carry decisive weight regarding the compilation of the list.

During the Auschwitz Trial in Frankfurt (20 December 1963 to 20 August 1965), Leo Glaser was mentioned by two witnesses, but only in passing. Otto Wolken stated that, in the clothing warehouse "a Viennese, a certain Glaser, was Kapo".[222] Kurt Knuth-Siebenlist stated:[223]

> *"As a further witness to* [Pery] *Broad's behavior and activity, I would like to mention: General Manager Leo Glaser, former Kapo of the inmate clothing department in Birkenau, now living in Vienna."*

Before going into detail, a brief comment on the letter's numerical data is necessary. Glaser states that "In the period from May to 20 September 1944," 650,000 Jews were gassed at Birkenau, that 825,000 arrived during the same period, and that only 20 percent of these were admitted to the camp. This number should therefore correspond to (825,000 – 650,000 =) 175,000, but 20 percent of 825,000 is 165,000. In the general summary of his list, Glaser gives the figure of 82,435 admitted Jews (men only); the number of female inmates, according to Glaser, was the same, "if not higher," which explains the total number of internees (men and women) of 165,000.

The figure of deportees (825,000) is greatly exaggerated. According to F. Piper, about 563,000 Jews arrived at Auschwitz from May to September 1944.[224] Hence, if 165,000 were admitted to the camp, the percentage would not be 20%, but (165,000 ÷ 563,000 × 100 =) 29.3%.

One could chalk this off as an inevitably part of the anti-German hysteria that raged in 1945. The question that needs to be clarified is another: what was the inmate clothing department, and why could a list of new arrivals to the camp be compiled there?

A book from the Auschwitz Museum devoted specifically to Birkenau's main disinfestation facility, the so-called Zentralsauna (to which the inmate clothing department was closely connected), which is accompanied by numerous testimonies, makes it possible to answer these questions. The book in question presents a detailed description of the Zentralsauna and a "Plan

[225] The transfer-protocol documents ("*Übergabeverhandlung*") for the Zentralsauna of 22 January 1944 include the following "building description":

> *"Kellergeschoß: 1 Heizraum, 1 Brennstoffraum, 3 Heizgruben.*
>
> *Erdgeschoß: 1 Ausgaberaum, 1 Ankleideraum, 1 Auskleideraum, 3 Aborte, 1 Kleiderausgaberaum, 1 Wertsachenraum, 2 Durchgänge rein u. unrein, 4 Entwesungs-Heißluftkammern, 3 Entwesungsöfen, 2 Magazine, 1 Scherraum, 1 Untersuchungsraum, 1 Arztzimmer, 1 Flur, 1 Waschraum, 1 Brauseraum, 1 Boilerraum, 1 Handtuchausgaberaum, 1 Aufsichtsraum, 1 Trockenraum."* RGVA, 502-1-335, p. 1a.

27/1-4: Disinfestation chambers 1-4.
The new arrivals were admitted to the facility trough the entrance (1), and entered the waiting and undressing room (2), where they undressed and handed over their valuables (4), then were registered (admission, 5) and went through the unclean-side (6) corridor to the shearing room (7), where they were shaved. In the next room, they were medically examined (examination room, 8), after which they went to the shower room (13). From there, they passed to dry themselves in the drying room (14), where they were given towels (16). From there, crossed to the clean side (17) and entered the waiting and dressing room (19). There, they received clean clothing either from the local clothes issue room (18), if they were female detainees; or from the local clothes storage and issue room (21), if they were male inmates. Once clothed, new arrivals would leave the facility through the exit (23).

A number of testimonies report useful facts about the treatment of inmates in the Zentralsauna and their registration, from which the Glaser list is evidently derived.

Władysław Szydłowski, who worked at the Zentralsauna from May to December 1944, stated (Świebocka, pp. 100-102):

> *"After establishing the number of prisoners, the commander of the escort turned the new column over to the SS garrison Kommandoführer* [unit leader] *on duty in the sauna, who was responsible for them from then on. During the intake of a transport of prisoners at the camp, there were six or seven SS men on duty in the sauna, under the command of the Kommandoführer whom I have mentioned. When there was no incoming transport, a single SS man was on duty in the sauna. At times of peak operations, there was an intake of three transports a day – that is about 6,000 people.*
>
> *The intake of a new transport of prisoners into the camp had more or less the following character:*
>
> *After being carefully counted, the people were herded into the so-called dirty room* [the unclean side…]. *They undressed there and had to give their civilian clothing to prisoners on detachment from the Effektenkammer (storage for prisoners' personal effects).* […]
>
> *Along the wall next to the door leading from the 'dirty room' to the corridor stood tables. Reception department scribes (Aufnahmeschreiber) sat there and wrote down the personal data of the people on the appropriate file cards for the registration of new prisoners. The cards also had a place to note what the prisoners had placed on deposit. Then the prisoner obtained the number that he or she would be required to use in the camp from then on.* […]

> *After taking showers and having their entire bodies disinfected by a prisoner from the sauna staff who wiped them with cotton-wool soaked in a disinfectant solution, the newly registered prisoners entered the 'clean side' of the Sauna and obtained striped uniforms passed out by one of the prisoners from the Bekleidungskammer* [clothing department] *detail.*
> *At first, transports of men and women alike were received by a crew made up exclusively of men prisoners. Later, the situation changed. A women's Bekleidungskammer detail, made up of a dozen or more Jewish women prisoners, was set up in May 1944.*
> *The men's Bekleidungskammer detail, where I worked, occupied a room (...) where there were shelves holding the various items that made up a prisoner's standard-issue "kit." On these shelves, standing parallel to the entrance, were boots, blouses, trousers, and so on.* […] *After the completion in the sauna of all the tasks connected with the reception of a transport in camp, the prisoners left the sauna building. They were clothed in striped camp uniforms, shaves, and marked with numbers tattooed on their forearms. In the square in front of the sauna, they were again formed up into columns and counted. The number of prisoners received by the sauna Kommandoführer had to tally with the number of prisoners ready to march into the camp."*

The above-mentioned book also contains an extensive excerpt from Jerzy Skotnicki's deposition at the Höss Trial (*ibid.*, pp. 105f.), but it has serious omissions, so I translate from the original text.

Skotnicki, who testified during the eighth session of the Höss Trial (19 March 1947), made important statements about the arrival of the deportees at Birkenau in the summer of 1944 and the role of the Zentralsauna (which he called the "new sauna") within the reception procedure at the camp:[226]

> *"From the weaving section I was assigned to the effects unit. Then a new sauna was built at Birkenau, a new bathing facility.* […]
> *It was a large building, divided into a dirty and a clean part. On one side were received transports of arriving inmates. These transports underwent haircuts, were shaved, went to the toilet, then were sent to the camp. Only those who were destined for work at the camp or in other camps went there; in addition inmates who came from other camps to Auschwitz, which served as a transit camp for them."*
> *"In May 1944, the first Hungarian transports began* [to arrive]. *The first transport arrived in mid-May. Six hundred ten or twenty women from Budapest.* […] *After two weeks, the first Hungarian transports began to arrive, at first from Subcarpathian Russia, from Rachów* [?] *and Mukac* [Munkács], *then from other regions except Budapest. We tried to establish*

[226] Höss Trial, 8th Session, 19 March 1947, Deposition of J. Skotnicki, p. 815; page numbers in text from there, unless stated otherwise.

> *the number of those arriving by transports. We didn't think they could survive, but some were under the illusion that they would survive and that it could be talked about. We did the calculation in this way: at the Effektenkammer* [inmate-effects department], *a book was kept of the arrival of inmates at the bathing facility* [=Zentralsauna]. *There were the following columns: Date of arrival, time, origin, type of transport, and from where these people were deported. Date and time were clear things; as for the kind of transport, there were the following types: If* [there was indicated] *Reich Main Security Office* [RSHA], *they were mainly Jews, then [also] political detainees, if other camps, they were only detainees."* (p. 817)

The percentage of Hungarian Jews admitted to the camp was about 20 percent. The witness stated (p. 818)

> *"At first, these transports were not very numerous, 2 to 5 arriving per day, up to 15 to 20,000* [people] *per day. As time went on, they began to increase. At the end of June, in the middle of July 1944, there was a day when 7,000* [people] *a day* [sic] *passed through the inmate-effects department, which means that about 35,000* [people] *were sent to the camp, that means that 28,000 probably perished that day."*

Skotnicki moreover stated that, "if on average each transport amounted to 3,000 to 5,000 people, 600,000 arrived at the camp" (*ibid.*), but it is unclear how these figures can reconcile with the period of deportation: mid-May to mid-July, about 60 days, hence (600,000 ÷ 60 =) 10,000 per day.

It is also unclear why Skotnicki introduced the figure of 35,000, which, in reference to a single day, would mean that five times 7,000 deportees would have passed through the inmate-effects department. The resulting killing of 28,000 implies the arrival in a single day of (35,000 + 28,000 =) 63,000 people, of whom, surprisingly, 55.5% would have been left alive, and only 45.5% killed.

Moreover, in "Mexico" (Construction Section III), as mentioned earlier, there were "30,000 Hungarian and Slovakian Jewesses" (p. 821). The Slovak Jews came from the southern part of Slovakia that the Treaty of Trianon had assigned to Hungary.

In cross-examination by lawyer Umbreit, the witness reported other remarkable things (p. 828):

> *"As stated before, the book containing the registration data of deportees who went to the bathing facility* [Zentralsauna] *gave us the possibility to reconstruct the presumable number of arrivals at the camp. So, I remember that every month the numbers of those who arrived and those who were sent to the bathing facility were added up. We did these sums in the break period, that is, in the first ten days of July 1944. The figure – to the best of my recollection – amounted to about 130,000 people. That means that 130,000 people went to the bath, to the Birkenau sauna, from the beginning*

of June to the first ten days of July. Calculating the 10 percent in other transports that arrived during this period, we get the figure of 120,000 people, since the average figure of those who arrived at the camp in relation to the total figure amounts, as I said, to about 20 percent during this period.[227] *That brings the figure to about 100,000, that is, the figure of those gassed amounts to about 480,000.*[228]

Attorney Umbreit: How did the witness establish the figure of 30,000 women in 'Mexico'?

Witness: We learned this from the reports."

A small digression is necessary here. On 15 May 1944, the headquarters of Auschwitz III Camp (Monowitz and subcamps) drafted the following "Certificate (to be presented to the Economic Office)"[229]

"The Deutsche Gasrusswerke Ltd Gleiwitz, Plesserstrasse 206, is hereby certified that the forced-labor camp there was taken over in concentration on 3 May 1944, with 245 women and 261 men. The Rapportführer appointed by us is fully responsible for the daily occupancy report, and gives a copy to the company. On the basis of this occupancy report, the contingent certificates are to be applied for at the responsible economic office."

On the same day, the "Garrison Administration Auschwitz – Provisioning Dept." in turn drew up the following "certificate:[230]

"The SS Auschwitz garrison administration certifies that 600 prisoners will be fed by the 'Deutsche Gasrusswerke, Gleiwitz' as of 4 May 1944. It is requested that the necessary ration coupons for this number be issued."

Since the transit camp's unregistered inmates also had to eat, they too had to be subject to a "daily occupancy report," so the Auschwitz headquarters knew their exact numbers every day. Consequently, even inmates with administrative duties could learn from these reports the number of people in the transit camp.

In an earlier interrogation of 5 December 1945, Skotnicki had stated:[231]

"Then I was transferred to the bath-sauna at Birkenau (BIIg), Effektenlager,[232] *which was recently built but not* [yet] *in operation. This job made it possible for me to have contact with inmates from a wide variety of*

---

227 Apparently, 120,000 represents 20% of the alleged 600,000 deportees.

228 This number results from 600,000 – 120,000; however, it is unclear how the witness arrives at 100,000. According to logic, he subtracted from the above-mentioned 130,000 the 30,000 Jews from "Mexico," whom he considered to have all been exterminated subsequently, so that they figured both in the *Zentralsauna* register and also in the tally of those allegedly gassed.

229 ISD, 82347179.

231 AGK, NTN, 89, Vol. 7, p. 209. Protokoł przesłuchania świadka, Jerzy Skotnicki, 5 December 1945.

232 The camp section where property seized from deportees was stored, which consisted of 30 barracks

> *camps, as well as with people who had arrived from freedom* [from outside the camp], *the so-called Zugangi* [*Zugänge*, admissions]. *My work consisted of serving at a disinfection boiler* [autoclave], *which stood next to the little table in which the register of those who entered and left the bathhouse was kept by the Schreiber scribe. In this register were the following columns: date of arrival of the transport, location from which it had arrived, number, gender* [of the deportees], *date the bath was taken, and departure from the sauna for the camp or elsewhere, remarks. The remarks section noted the reasons why the sum of those who arrived at the sauna did not agree with the sum of those who left for the camp. This was the case when some sort of additional selection was made at the sauna, in which case people who were disabled, who had abscesses,* [women] *who were pregnant, indicated by the doctor or his substitute paramedic. Those selected were sent directly to the crematorium."*

Dymitr Wasilewski was assigned to the Zentralsauna as a doctor on 19 June 1944. He reported:

> *"The sauna was located in sector BIIg, and from the name of the building the whole sector was commonly referred to as the 'sauna' or 'Effektenlager'."*

1,400 female inmates worked at the inmate-effects department (*Effektenkammer*), and

> *"from 250 to 400 men worked in the sauna, depending on the arrival of 'zugangs'* [Zugänge]. *The men's detail was also divided, like the women's, into 'Kanada,'*[233] *the sauna, and the Effektenkammer."* (Świebocka, p. 107)

Józef Wenland was employed at the *Zentralsauna* as admission scribe from January to December 1944 with a group of 60 inmates. He recounted (*ibid.*, p. 108):

> *"We wrote out files on new prisoners, and on ad hoc basis we sorted the baggage that they brought with them.* […]
>
> *The kapo* [foreman] *of the Schreibstube* [typing office] *was Dr. Eisenschimmel, a Viennese. Others working in the detail I am speaking about included Dr. Wacław Lietz, Wasilewski from the Wilno region, Zygmunt Staniszewski, Stanisław Ryś, Jan Pawliczak, and Leon Zabieski."*

Krystyna Żywulska also provided useful information (Żywulska, pp. 122f.):

> *"The Birkenau sauna had been built with special care, a solid brick building. Inside, there were the showers and the clothing room, where the arriving inmates had their striped 'clothes' thrown at them, as well as the chambers for disinfecting the clothes. Day and night hot running water.* […] *We lined up in rows of five. Our chief had lined up in front of us. He*

[233] Campo jargon for the *Effektenlager*.

explained that a transport had arrived from Majdanek. About a thousand people. We had to record the arrivals 'card-wise,' i.e., enter the personal data of each arrival on the personnel sheet."

Describing the various sectors of the Birkenau Camp, Otto Wolken stated:[234]

"[Camp Section] *BIIg* [was the] *inmate-effects department* [and consisted of] *30 blocks. Here was also built the bathing facility, the so-called 'sauna,' with hot-air disinfection for clothes and linen, clothing room for men and women, and rooms for the barbers."*

On 25 July 1945, former inmate Stanisława Rachwałowa made a statement, in which she provided important information about the admission of female inmates to the camp:[235]

"I was assigned to the political office, whose official name was 'Political Department, admissions.' This office was located in the sauna building in a single room. Twenty female inmates worked there, under the supervision of an SS man. Our work consisted of filling out printed forms that contained the inmate's personal and penal data. Each transport of female inmates was recorded in alphabetical order, then tattooed, then the last name, first name, nationality and type of triangle of a given inmate were noted in the so-called Numbers Book, and finally the deportees were passed to the political office for registration in the forms, the so-called sheet, which I mentioned earlier. I state that each transport of female detainees, before being admitted to the political office, was received in the sauna, where the women stripped naked, were shaved, and, after bathing, dressed in striped uniforms, and with this clothing were led to the political office. The inmate was given a serial number in the political office which was entered in the Numbers Book; in the sauna, the inmate was given a numbered tag. The inmates' belongings were deposited in the inmate-effects department. […] *Only the Numbers Book and the 'admissions list' were kept at the women's political office, while the forms, so-called sheets and documents, were sent the same day by the head of the women's political office to the central political office in Auschwitz. Based on the sheets and the documents that came from those arrested and were called Unterlagen* [documents], *or reasons for arrest, so-called 'admissions list' were typed at the central political office in Auschwitz. These lists noted the detainee's number, citizenship and type of triangle, first and last name, full date of birth, place of birth and occupation. This register was the basis for ascertaining a detainee's identity. Copies of the admissions lists were sent to the women's or men's political section, camp headquarters, inmate-effects department, typing room, and clothing department.* […]

---

[234] AGK, NTN, 88 (Höss Trial, Vol. 6), p. 190.

[235] AGK, NTN, 84 (Höss Trial, Vol. 3), pp. 99-102.

> *In June and July 1944, mass transports of Hungarian Jews arrived at Auschwitz, of which about 70,000 women were received in the women's camp area and placed in the camp section called Mexico. These Jews did not receive numbers or tattoos, nor were they included in the aforementioned register. In the fall of 1944, they were sent en masse, several thousand a day, to work in factories in Reich territory. Our office typed up the list, which contained only first and last name, and date of birth. Transports went to the designated work place."*

The inmate clothing department or simply clothing department was part of Department IV of the administration of the Auschwitz Camp. Aleksander Lasik described it as follows:

> *"The clothing section of Department IV in Auschwitz concentration camp was run by a non-commissioned SS officer (Leiter der Bekleidungskammer or Chef der Bekleidungskammer), who was in charge of directors for prisoners' clothing (Leiter der SS-Bekleidungskammer). The section was centrally located in the main camp, and its only branches were in the Birkenau and Monowitz camps. Each was headed by a non-commissioned SS officer, who supervised the SS men or prisoners employed there at a given moment. The section for supplying clothing to women prisoners in Birkenau was organized in a similar way."* (Długoborski/Piper 2000, Vol. I, p. 236)

The inmate clothing department therefore carried out "card-wise" the registration of new arrivals (this was the specific task of the typing room in the admissions room, where the admission scribes worked), collected and catalogued the clothing brought along, and supplied clean inmate clothing (clothes issue room).

The letter from the head of the inmate clothing department of 26 June 1944 quoted earlier confirms this procedure. It informs us that SS *Unterscharführer* Olexius "issues a receipt for the clothing with which the inmates are clothed. This receipt shows which clothing the inmates are provided with. This receipt is presented for inspection."

This procedure also applied to the Women's Camp, as is attested by a document I transcribe:[236]

> *"Women's Camp, CC AU II*
>
> *Birkenau, 20 Oct. 1944.*
>
> *Certificate.*
> *Today the transport* [of] *…1,000… female inmates were fully clothed with:*
> *Dress, shirt, pants, coat, shoes and socks handed over for transport to Hochweiler.*
> *Properly taken over: The camp leader:*
> *(illegible signature) (illegible signature)*
> *The transport leader Head Supervisor."*

[236] ISD, 82346497.

Three pages of the 1940 clothing department's register are known. It is a handwritten list divided into 14 columns, with the heading "Clothing certificate for inmates transferred on 10 Dec. 1940 to Dachau"; the first three columns concern the inmates' personal data ("Last name", "First Name" and "Inmate No. "), the other ten show the clothing items issued to them ("linen jacket," "linen trousers," etc.).[237] This register, which recorded outgoing inmates, was different from the one compiled in the *Zentralsauna*, in which incoming inmates were noted.

Picking up the thread of the discourse interrupted by this digression, new arrivals were counted before entering the *Zentralsauna*, inside it and after leaving it, after which some inmates were tattooed and registered, while others were sent to the transit camp (but no witnesses speak of this, or rather no reference to it appears in the excerpts of the testimonies presented by Teresa Świebocka).

Therefore, if Leo Glaser worked as a foreman at the clothing department (but he was not named by any of the above-mentioned inmates who worked there), the figures on his list came from the registrations made in the typing room. It can be ruled out that he had taken "these records" on his own initiative. It is possible that he merely copied clandestinely the figures noted in the book that "was kept of the arrival of inmates at the bathing facility," which must have been an "admissions books," as did the compilers of the transport lists already known, which I will deal with immediately.

It is also possible that the compiler of the list was Hans Eisenschimmel, who according to the witness Józef Wenland was foreman of the typing room in 1944.[238] He was from Vienna, and may have handed the list to Leo Glaser, who in August 1945 was living precisely in Vienna.

There remains no doubt, however, that the list could only have come from the typing room, and this is a guarantee of authenticity. The fact that it records only male transports can be explained by the fact that, as Władysław Szydłowski reported, a female clothing room run by female inmates was established in May 1944, which evidently had a different record than the male one.

In a protocol dated Krakow, 16 December 1946, Investigating Judge Jan Sehn transcribed and analyzed the following lists of transports and registration numbers, which were later used by Czech in compiling her *Auschwitz Chronicle*:

---

[237] A barely legible reproduction of the document appeared in *Auschwitz Studies*, No. 28. Auschwitz-Birkenau State Museum, Auschwitz, 2018, pp. 242-245.

[238] Hermann Langbein confirmed that "Eisenschimmel was employed in the inmate-effects department." Langbein, p. 44.

a. 2,377 male transports from 20 May 1940 to 18 September 1944 with the associated assignment of registration numbers 1-199531;
b. 1,046 female transports from 26 February 1942 to 26 March 1944 with the related assignment of registration numbers 1-75697;[239]
c. 78 RSHA[240] male Jewish transports from 13 May to 24 August 1944 with the related assignment of registration numbers A-1/A-20,000;
d. 60 RSHA male Jewish transports from 31 July to 21 September 1944 with the related assignment of registration numbers B-1/B-10481;
e. 90 RSHA female Jewish transports from 15 May to 20 September 1944 with the related assignment of registration numbers A-1/A-25378;
f. 171 transports of educational inmates (inmates sent to the camp for "reeducation") from 21 October 1941 to 10 September 1944 with the corresponding assignment of matriculation numbers E-1/E-9,339.[241]

Lists a) and b) are the "Transport Lists," which were in the records of the Political Department. They were clandestinely copied in a summarizing format by inmates of that office under the direction of Kazimierz Smoleń.

Lists (c) and (d) together constitute the "Lists of Transports of Jews." They were similarly copied clandestinely and in a summarizing format from records of the Political Department, although it is not known by whom and under what circumstances.

Another important document is the "Quarantine List" of Camp Section BIIa, clandestinely compiled by inmate Otto Wolken.[242]

Added to these lists is the Glaser List. As for its veracity, it should first be noted that the starting and ending dates of the transports coincide exactly with those of the women's "Lists of Transports of Jews" (15 May to 20 September 1944),[243] and almost exactly with those of the men's list (13 May to 21 September),[244] which can hardly be accidental. Comparison of the Glaser List on the one hand, the "Quarantine List," the "Lists of Transports of Jews," and the "Transport Lists" on the other, shows that in many cases the figures recorded are perfectly equal. In the following table, I report the most significant coincidences.

---

[239] These lists were forwarded by K. Smoleń on 16 December 1947 to the U.S. Counsel for War Crimes, and became the document NOKW-2824.
[240] Transports of Jews organized by the *Reichssicherheitshauptamt*.

[244] *ibid.*, pp. 20-22.

Table 1.17: Comparison of Glaser List with other Similar Lists

Glaser List			Quarantine List[245] List of Transports of Jews Transport Lists (Smoleń's List)		
d/m/44	#	Nationality	d/m/44	#	Reg. Nos.
20/5	19	Poles	20/5	19	188041–188059[246]
24/5	288	Russians	24/5	288	188089–188376
1/6	277	Russians	2/6	277	188589–188865
16/6	9	Italian Jews	16/6	9	A-14298–14306
16/6	12	German Jews	16/6	12	A-14307–14318
30/6	180	Italian Jews	1/7	180	A-15677–15856
7/7	44	Russian PoWs	7/7	44	R-11574–11617
28/7	463	Polish Jews	28/7	463	A-17954–18416
30/7	1,298	Polish Jews	30/7	1,298	A-18647–19944[247]
3/8	398	French Jews	3/8	398	B-3673–3963[248]
1/8	129	Polish Jews (children)	1/8	129	B-2774–2902
11/8	16	Polish Jews	11/8	16	B-5676–5689
16/8	346	Greek Jews	17/8	346	B-7159–7504
17/8	8	Croatian Jews from Lodz	17/8	8	B-7505–7512
17/8	10	Polish Jews from Kattowitz	17/8	10	B-7517–7521, 192897
5/9	258	Dutch Jews from Amsterdam	5/9	258	B-9108–9385[249]

In one case, the numerical difference is only one inmate. This is the transport of Polish Jews from Bliżyn, for which the Glaser List gives 1,616 deportees, while the Quarantine List has 1,615, with registration numbers B-1160 through 2773.

In one case, the Glaser List is more precise than the Quarantine List. On 3 August 1944, the former lists has "6 It.[alian] Jews" and "10 various Jews" as separate entries, while the second presents the total number of 16 with the indication "various It.[alian] Triest" and registration numbers 190708 through 190713, plus A-19952 through 19961.

These matches show that the Glaser List was compiled on the basis of official camp records, so it must be considered reliable. It contains various records of registered detainees, but also many records that do not appear in

[245] Data without reference were taken from the Quarantine List.
[246] Smoleń List, Männer, p. 9. *Sammeltransport*.
[247] *Liste der Judentransporte*, Männer, p. 17. The transport's origin was "Radom."
[248] *ibid.*, p. 18. The origin was "Fr.[ance],".
[249] *ibid.*, p. 19. The origin was "Holl.[and]."

the three aforementioned lists, all of which refer to registered detainees. It follows that the Glaser list, as a whole, covers, cumulatively, both matriculated inmates and those who were sent to the Birkenau without having been previously registered. However, there is one important exception, which will be set out later. With regard to the completeness of the data, it should be considered that, in the spring-summer of 1944, during the period of the greatest influx of deportees within 1944, the men admitted to the camp were made to pass not only through the *Zentralsauna*, but also through the disinfestation facility of the Gypsy Camp, which also had its own clothing department (State Museum..., Vol. 2, pp. 1576f.). The inmates then remained there for some time. This is evident from various testimonies. In particular, Jenó Vamosi stated (Piper 2019, p. 174):

> *"I came to Auschwitz in the second transport from the [ghetto in — F. P.] Kecskemet. We departed on Sunday, and on Thursday (around June 29, 1944) our transport reached Konzentrationslager Auschwitz-Birkenau. ... They took us from the unloading ramp in the Birkenau camp to the former Gypsy camp. There, we were registered. I got camp number A-17193, which was tattooed on me… . I was at the Gypsy camp briefly."*

It cannot be ruled out that inmates who were not registered also passed through this facility. This can be inferred from Alfred Galewski's account (*ibid.*, p. 140):

> *"As early as May 1944, Hungarian Jews came to the Gypsy camp, and in such numbers that there was nowhere for them to sleep and they had to sleep on the floor. More than 1,000 Hungarians lived in one block. Only after the liquidation of the Gypsy camp, that is, on August 2, 1944, was there more room. These Hungarians were only in the camp temporarily, however, because after a short stay they were sent to Hungary for labor, or were used for the coal mines in Silesia. Only those Hungarian Jews fit for work were placed in the Gypsy camp."*

Kazimierz Smoleń confirmed this fact, albeit misrepresenting it childishly (*ibid.*, p. 94):

> *"It happened more than once that the gas chambers were so full that no more people could be poisoned. Then male Hungarian Jews were sent to the Gypsy camp, while women marked for the gas were placed in a special camp segment that was completely unfinished, that is segment III (Bauabschnitt III). We called this segment Meksyk* [Mexico], *and the women there were not registered at all or designated with numbers."*

The figures for unregistered inmates admitted to the camp are considerable, and contrast starkly with the propaganda of the immediate postwar period, which claimed that Jews deported from Hungary to Auschwitz were for the most part exterminated. As outlined earlier, this propaganda was still in vogue in 1964, since D. Czech then considered all Hungarian Jewish in-

mates who had been sent without registration to the Transit Camp to have been "gassed." Georges Wellers had inferred from this fact that the Hungarian Jews allegedly gassed at Auschwitz numbered nearly 410,000.

In the following table, I compare the data from the List of Transports of Jews (registered inmates; 148 entries) with those from the Glaser List (142 entries).

Table 1.18: Comparison of the Transports of Jews with the Glaser List

Totals:	12,549	in 148 entries	51,829 (142 entries)

If the Glaser List recorded all Jews admitted to the camp, it should always contain figures equal or greater than those containing only registered inmates. For example, on 17 May, this list shows 247 inmates admitted to the camp, while the list of registered inmates has only 19, so (247 – 19 =) 228 inmates were sent to the Transit Camp, and precisely 19 were matriculated. However, the Glaser List has conspicuous anomalies that cast doubt on this interpretation: in seven cases (in bold in Table 18) the number of registered inmates is higher than the number of those admitted to the camp, as shown in the following table:

Table 1.19: Anomalies in the Glaser List			
Date	Registered	Glaser List	Missing
22 May	2,007	1,901	106
29 May	2,000	0	2,000
31 May	1,000		
7 June	2,004	1,417	587
15 June	203	172	31
17 June	320	190	130
3 July	674	0	674
5 July	17	0	17
Totals:	7,225	3,680	3,545

Therefore, of 7,225 registered inmates, the Glaser List contains only 3,680, while 3,545 were not included. From this fact, it can be inferred that the Glaser List refers exclusively to inmates sent to the Transit Camp, which implies that the Hungarian Jews admitted to the camp were altogether at least (12,549 + 51,829 =) 64,378. This is confirmed by the verification I present in the next chapter.

1.8. An External Verification of the Glaser List

On 22 August 1944, a member of the underground resistance movement at Auschwitz, operating under the pseudonym "Urban," compiled detailed statistics of the camp's occupancy relating to the situation on the 21st. In the relevant table, the occupancy is given by camp and by inmate category. The total number of inmates was 104,891, broken down as follows:[250]

Auschwitz I: 15,974[251]
Auschwitz II: 19,424
Auschwitz III: 30,539
FKL (= *Frauenkonzentrationslager*, Women's Camp): 38,954.[252]

These figures can be considered reliable, as they are reflected in the only possible documentary verification: according to the statistical report "Labor Deployment" of 21 August 1944, the occupancy of the Birkenau Camp was 19,468 inmates,[253] a figure virtually identical to the one given above.

[250] AGK, NTN, 155, p. 115.
[251] "15971" in the original due to an addition error.
[252] "39234" in the original due to an addition error.
[253] APMO, D-AuII-3a/39, p. 71.

"Urban" mentions the presence in the Auschwitz complex of 11,821 registered Hungarian male Jews (3,881 at Auschwitz I and 7,940 at Auschwitz III), and another 16,187 Hungarian female Jews registered in the Women's Camp at Auschwitz II (Birkenau). In total, therefore, there were 28,008 registered Hungarian Jews (male and female) in Auschwitz on 21 August 1944.

From the "List of Transports of Jews" (see Attachment 1),[254] which contains only the records for the number series "A" and "B," it appears that up to 21 August 1944, 13,374 male and 15,127 female Hungarian Jews were registered, a total of 28,501 persons. However, Hungarian Jews were also registered in the ordinary number series. In fact, from the two transports of Jews that left Hungary on 29 April 1944, 486 men (186645-187130) and 616 women (76385-76459 and 80000-80540) were registered at Auschwitz on 2 May, but these inmates were transferred "to work places in Upper Silesia" (Gerlach/Aly, p. 274), some of them also to Gross-Rosen Camp.[255] Therefore, on 21 August 1944, they were not part of the Hungarian Jewish inmate force, and "Urban's" total figure of 28,008 in his report is reliable.

"Urban's" report adds:[256]

> *"In Birkenau, in addition to the* [detainees] *mentioned above, there are currently about 30,000 unregistered Hungarian Jews destined for gassing. This figure is variable.* […]
> *To this must be added the variable figure of 'passing-through' inmates, at this time 30,000 Hungarian Jews."*

The data set forth above make it possible to establish the following situation regarding Hungarian Jews/Jewesses on 21 August 1944:

– present in the camp:	~ 28,000
– transferred to other camps by 21 August 1944:	~ 63,700
– unregistered, present in the Transit Camp:	~ 30,000
Total:	121,700

[254] APMO, D-RO/123.

[255] A list of inmates transferred from Wüstegiersdorf, a Gross-Rosen subcamp, compiled after the war, also contains the heading "Admission date at Gross-Rosen Camp." This list contains the names and registration numbers of 25 Hungarian Jews who were transferred to this camp "early May 1944". In three cases (inmate nos. 33691, 33789 and 34384) it is specified that the inmate had arrived "on 1 May 1944 at Auschwitz-Birkenau Camp." ISD, 150809-150822.

[256] AGK, NTN, 155, pp. 95f. Right after the war, former inmate Seweryna Szmaglewska wrote: "In July [1944], the maximum number [of Jews] in Sector 'c' and Mexico amounted to 42,000" (Szmaglewska, p. 234).

Total inmates present in the camp and transferred (28,000 + 63,700), including (11,821 + 36,600 ≈) 48,400 men and (16,187 + 27,100 ≈) 43,300 women.

As for female inmates, on 21 August 1944, there were 16,187 registered Hungarian Jewesses in the Auschwitz-Birkenau complex; up to 21 August, some 27,100 had been transferred to other camps. On 2 October, 17,202 "transit Jews,"[257] undoubtedly Hungarian Jewesses,[258] were registered, but this does not mean that the "Transit Camp" was abolished or even merely emptied. The series of occupancy reports of the Women's Camp[259] and "Labor Deployment of the Birkenau Women's Camp" continue to carry the section "transit Jews" (and related changes in occupancy) even after 2 October 1944.[260] In particular, on 24 October, the "Occupancy Report" recorded the admission of 1,765 "transferred transit Jews,"[261] and so did the next day's report of the "Labor Deployment of the Birkenau Women's Camp" ("Transit Jews – admissions 1,765").[262]

Danuta Czech attempted to explain this set of registrations by assuming the arrival of a transport from Płaszów that never existed, as I documented in another study (Mattogno 2022, pp. 272f.). On the other hand, by the end of October 1944, the exceptional situation that had prompted the camp authorities to establish the transit camp no longer existed, so the most reasonable explanation is that the admission of "transit Jews" after 2 October originated in the registration of Jews that had been lodged without registration in the for quite some time, which explains, even bureaucratically, their qualification as "transit Jews."

This explanation is corroborated by the fact that, even in November 1944, the camp still contained unregistered detainees, as reflected in various documents:

– An untattooed Hungarian Jewish female inmate (*untät.*).[263]
– An untattooed Polish Jewish female inmate (*untät.*).[264]
– One untattooed Polish Jewish female inmate (*untät.*): Robiczek Maria.[265]

---

[257] APMO, Stärkemeldung AuII-FKL, sygn. D-AII-3a, p. 53a.
[258] In addition to the Hungarian Jewesses, Jewesses from the Łódź Ghetto were also sent to the transit camp. See Chapters 2.8 and 2.11 of Part Two.

[263] Frauen-Lager, KL. Au. II Abteilung III/a. Birkenau, den 20.11.44. Transportliste. Überstellung nach KL. Buchenwald AL. Gerätebau GmbH Mühlhausen/Thür. ISD, 5289149.
[264] *Idem*., Transportliste. Überstellungen nach KL. Flossenbürg, AL Metallwerke Holleichen. ISD, 129637271.

– Three untattooed (*untät.*) Hungarian Jewish female inmates.[266]
– Most female inmates with series "A" numbers (273 inmates), 23 female inmates with ordinary series numbers, and four untattooed (*untätow*.) Hungarian Jewish female inmates.[267]
– 23 female inmates have ordinary series numbers, 277 A-series numbers, and four have no numbers (*untätow.*").[268]

It can also be added that, among the Hungarian Jewish female inmates who remained in Auschwitz, at least 21, who had arrived in Auschwitz between May and July 1944, were registered after 19 October,[269] so they necessarily came from the transit camp.

In this regard, one can add the testimony of the aforementioned Gábor Hirsch, who was deported from Békéscsaba on 26 June 1944, and arrived in Auschwitz on the 29th. After passing the "selection," he was sent to the *Zentralsauna* along with other Hungarian Jews (Hirsch, pp. 31f., 43):

> *"The majority of the deportees were not tattooed upon arrival at the camp. Only the ones selected for the work Kommando or sent to a sub-camp belonging to the Auschwitz complex were tattooed, the rest were registered later in the camp and had a linen patch with their number sewn on to their pants and jackets. The untattooed prisoners were held in camp as so-called depot prisoners and served as a reserve workforce for other concentration camps. The unregistered and untattooed prisoners, including myself, were distributed into sub-camps at Birkenau, the younger ones, doctors, and some well-educated prisoners were sent to the Gypsy-family-camp.* […] *Because of the large number of new arrivals, the Hungarian youth was also quartered in this sub-camp. It became my place of residence for a long time."*

He stayed for five months in the Gypsy Camp, meaning Camp Sections BIIa and BIId, then became ill and was admitted to the hospital camp (BIIf), where he was finally tattooed with the number B-14781.

Between 22 August and 2 October, at least the following Hungarian Jewesses were transferred away from Auschwitz:

How many of these were from the transit camp?

Another message from the Auschwitz resistance gives the "Camp occupancy of 2 September 1944."[281] It lists the occupancy in detail by camp (Auschwitz I, II, III, FKL) and by nationality, with the distinction between Jews and non-Jews. There were 11,725 Hungarian male and 16,169 female Jews, or 18 fewer than on 21 August. Consequently, the transfers of Hungarian Jews from 22 August to 1 September – a total of 3,820 inmates – could only have come from the transit camp. Assuming this figure, the number of Hungarian female Jews admitted to the camp was: 16,187 + 27,100 + 17,200 + 3,820 = approximately 64,300.

From this, it can be deduced that the 30,000 Hungarian Jews lodged in the transit camp on 22 August 1944 were about (17,200 + 3,820 =) 21,000 women and about 9,000 men.

The above figure (64,300) is fully congruent with that of the male list, 64,378 inmates.

This result is supported by four pieces of evidence:

1. In the telegram of 24 May 1944 mentioned earlier, Pohl communicated to Himmler:

> *"The first transports of Jews from Hungary indicate that women account for about 50 percent of the working Jews."*

The compilation presented here resulted in about 128,700 Jews admitted to the camp, of whom precisely 50 percent were men and 50 percent women.

2. The order of magnitude of the total number is confirmed by Jerzy Skotnicki's statement that up to the first ten days of July,[282] when the deportation of Jews from Hungary had ended, about 130,000 inmates had passed through the *Zentralsauna*, hence precisely Hungarian Jews.

3. The order of magnitude of the number of inmates is also confirmed by S. Rachwałowa's statement mentioned earlier, according to which 70,000 Jews were received in Camp Section III nicknamed "Mexico" (i.e., in the Birkenau Transit Camp).

4. The total figure corresponds to 30 to 33% of deportees fit for work.

I quoted von Thadden's report of 25 May 1944 earlier, which mentions a percentage of about 33 percent. The next day, he prepared another report, in which he noted:[283]

> *"According to the findings so far, about 1/3 of the deported Jews are fit for work. Immediately after arriving at the Auschwitz collection camp, they are distributed among the offices of Gauleiter Sauckel, the OT, etc."*

---

[281] AGK, NTN, 155, p. 133.

[282] He mistakenly mentioned early June instead of mid-May as the starting point for the deportations.

[283] Nuremberg Document NG-2190.

The proportion of 1/3 deportees fit for work mentioned by von Thadden is confirmed by Kaltenbrunner's letter to SS *Brigadeführer* Blaschke dated 30 June 1944 regarding Hungarian Jews deported to Strasshof, Austria. Kaltenbrunner wrote:[284]

> *"According to previous experience, it is estimated that about 30% (in the present case about 3,600) of these transports will be Jews fit for work,* […]*."*

Rudolf Höss also stated during his trial that the percentage of Hungarian Jews fit for work at Auschwitz was 30 percent (Mattogno 2020b, p. 305).

The total figure of those admitted to the camp is precisely equivalent to (128,700 ÷ 410,993 =) 31.3% of the total number of deportees sent to Auschwitz.

The total calculated above (121,700 admitted to the camp) represents 94.5% of the latter number (128,700), so, overall, the two figures corroborate each other; the difference of 7,000 people is attributable to transports from Auschwitz that are not included in the list set out earlier, which is inevitably incomplete.

* * *

It is obvious that the Glaser List, from the orthodox perspective, is central to the calculation of the alleged gassing victims among the Hungarian Jews, but also among those deported from the Litzmannstadt (Łódź) Ghetto, as I will show in Part Two.

Rudolf Höss claimed in his very first "confession" – the handwritten statement of 14 March 1946 – that 400,000 Hungarian Jews had been exterminated in Auschwitz (Mattogno 2020b, pp. 33, 303). He maintained this figure in all subsequent interrogations until his trial. He gave very questionable statistics of Jews allegedly exterminated, listing victim numbers by country of origin. These numbers are best known from his "Notes" written while in a prison in Krakow, resulting in a total of 1,130,000 Auschwitz victims (Broszat, p. 167). Significant in this regard is the fact that Franciszek Piper, in his 1993 study of the number of Auschwitz victims, carefully avoided giving figures by nationality.

Braham wrote in this regard (1981, Vol. 2, p. 676):

> *"As a result of this application of science and technology, about 400,000 Hungarian Jews were killed by this conveyor-belt system of mass murder in Auschwitz during the summer of 1944."*

From the orthodox Holocaust perspective, the number of alleged gassing victims among the Jews deported from Hungary would instead be (408,347 – 128,700 ≈) about 279,650.

---

[284] IMT Document PS-3803.

No longer able to cover up the existence of the Glaser List, the Auschwitz Museum finally decided in 2022 to mention the it in passing. In an article on the Museum's official website, Piotr Setkiewicz mentioned it as follows with obvious embarrassment (Setkiewicz 2022):

> *"From recently discovered documents (the notes of a Kapo from the Birkenau clothing warehouse) we also know that as a result of the selections of transports from Hungary the SS sent 52,000 Jewish men to the camp, and it might be presumed that a similar number of Jewish women were also sent to the camp. This would mean that some 325- to 330,000 Hungarian Jews were killed in the gas chambers directly after their arrival at Auschwitz. Of those who remained, 25- to 30,000 were registered in the camp and given prisoner numbers, some 25,000 (primarily women) died in the transit camps or became victims of so-called 'secondary selections', and some 45- to 50,000 were transported to camps in Germany."* (Emphases added)

In fact, however, the "recently discovered documents" were discovered in 2002, hence twenty years earlier. Furthermore, the alleged 25,000 victims of the Transit Camp due to "secondary selection" are mere figments of Setkiewicz's imagination, while the figure of those transferred from Auschwitz is much higher, as I documented earlier.

1.9. Selection Criteria for Deportees Fit for Work

In Auschwitz, the criteria for selecting those fit for work were very elastic. On 14 August 1944, 300 Hungarian Jews were registered from the Birkenau Transit Camp with numbers B-5860 through B-6159, and were sent to work in the Trzebinia oil refinery.[285] Another 101 Hungarian Jews were registered on 15 September with numbers B-10072 through B-10172, and sent to the same refinery.[286]

These inmates belonged to the following age groups:

[285] AGK, NTN, 145, pp. 82-92 (list of names).
[286] *ibid.*, pp. 92-95. See Appendix, Table 1.III.

Table 1.20: Ages of Deportees "Fit for Work"		
Age	14 August	15 September
14 (born 1930)	9	0
15 (born 1929)	106	7
16 (born 1928)	84	8
17 (born 1927)	29	4
18 – 20	22	7
21 – 30	14	9
31 – 40	24	20
41 – 50	7	32
51 – 60	3	12
61 – 68	2	2
Totals:	300	101

On 3 July, 174 Hungarian Jews from the Transit Cap were registered (reg. nos. A-15857 through A-16030); the relevant list of names contains two children aged 11 and 8: Leszlo Leszlauer, born in Budapest on 2 March 1933, registration number A-15952, and Isnac Herskowitz, born in Czanahosz on 4 February 1936, registration number A-15922.[287]

The report dated 26 June 1944, cited earlier, mentions for 1 July 1944 the transfer of 450 Hungarian boys from Camp Section BIId to the Quarantine Camp (Section BIIa). The boys sent to Trzebinia were probably part of this group.

Finally, the 578 Hungarian Jews who were in Auschwitz when the Soviets arrived were distributed as listed among the following age groups:[288]

1 to 10 years old: 29
11 to 14 years old: 52
15 to 49 years old: 433
50 to 60 years old: 50
61 to 70 years old: 9
71 to 79 years old: 3
unknown age: 2

Unlike the adults, the children were mostly twins.[289]

[287] ROD, c(21.23)31, list nos. 1866 and 1836.
[288] GARF, 7021-108-26, pp. 1-16; 108-22/23.
[289] See in this regard the interesting article by Jean-Marie Boisdefeu "À propos des jumeux d'Auschwitz" (*Études Révisionnistes*, vol. 1, pp. 257-267), in which the author, on the basis of an original method of calculation-but carried out in my opinion with insufficient data, comes to the conclusion that about 118,500 Hungarian Jews were deported to Auschwitz.

Historian Szita Szabolcs, among other things the author of a detailed study on the Hungarian Jews deported to Strasshof, gives the following age groups of 16,600 deported to this Austrian camp (Szabolcs 1991, p. 97):

Table 1.21: Age-Group Distribution of Hungarian Jews deported to Strasshof

Age Group	Male	Female
0-2 years	200	250
3-6 years	500	500
7-12 years	900	900
13-14 years	400	350
15-20 years	800	1,300
> 31 years [*sic*]	4,500	6,000
Totals:	7,300	9,300

There is no doubt that Strasshof is a case in point. What is important to note, however, is the fact that inmates in Austria who were theoretically unfit for work were also assigned to labor employment. The author publishes a letter from the "Technical emergency assistance. Office Bad Vöslau" to the "BdS and Security Service, Special Deployment Unit for Hungarian Jews, External Unit Vienna II." It contains a list of 42 Hungarian Jews employed "in the construction of a foundation (tunnel) for the SS infirmary since 1 October 1944." The information continues as follows (*ibid.*, p. 93):

> *"These Jews came from the Strasshof Camp and have worked in Klein-Mariazell and Bernhof after the storm disaster and in the construction of makeshift homes."*

These were therefore actual workers. The list includes 13 Jews over the age of 70, one of 15, one of 13, on of 10, one of 8, and one of 4 years of age. The oldest, Arnold Singer, born 28 March 1868, was 76 years old; the youngest, Agnes Anisfeld, born 31 August 1940, was 4 years old.

Although at Auschwitz the unregistered Hungarian Jews were housed in the Transit Camp under primitive conditions – because the camp administration was unprepared to accommodate such a mass of people – the SS not only did not "gas" sick deportees, but treated them, even with surgery. The 28 June 1944 report cited earlier contains the following list of the medical treatment of these Hungarian Jews:[290]

> *"Treatment of the sick:*
>
> *During the reporting period, 3138 inmates treated in the outpatient clinic. Of which:*

[290] GARF, 7021-108-32, p. 76. See Doc. 2a.

Surgical cases	*1426*	*Scabies*	*62*	*Infectious diseases:*	
Diarrhea	*327*	*Pneumonia*	*75*	*Scarlet fever*	*5*
Constipation	*253*	*Influenza*	*136*	*Mumps*	*16*
Angina	*79*	*Intertrigo*	*268*	*measles*	*5*
Diabetes mellitus	*4*	*various*		*erysipelas*	*5*
Heart failure	*25*	*other*	*449"*		

1.10. The Impossible Extermination of Hungarian Jews Unfit for Work

With the present state of knowledge, it cannot be established with documents, and thus with certainty, what the fate of the Hungarian Jews was who were deemed unfit for work. However, based on the actual capacity of the Birkenau cremation facilities (Mattogno/Deana; Mattogno 2020a) and on U.S. and British air-force aerial photographs from the spring and summer of 1944, I have demonstrated in various studies that Hungarian Jews unfit for work were not – and could not have been – "gassed" and cremated upon arrival (Rudolf/Mattogno, pp. 174-179; Mattogno 2016a & b). This is therefore a certain and documented fact. It is furthermore confirmed by the photographs collected in the *Auschwitz Album* (Freyer/Pressac), which were taken by SS photographers Bernhard Walter and Ernst Hofmann on 26 May 1944.

This issue is of great importance and requires proper investigation, not least because these photographs have been commented on in detail by Stefan Hördler, Christoph Kreutzmüller and Tal Bruttmann in their book mentioned earlier.

First, several photographs show that, while deportees fit for work left all their luggage on the platform, those deemed unfit kept a light luggage consisting of backpacks, bags and various containers. Particularly telling are photographs 6 on p. 51, 163 on p. 185 (where those unfit for work, mostly children, even carry two large pots and pans), 165 on p. 187, 169 on p. 191, and 171 on p. 191 (see Photos 1-5). The photographs also show that those categorized as unfit for work stopped in the grove by the pond located east of Crematorium IV (the "birch forest"). Photograph 174 on p. 194 shows in the foreground an elderly man about to descend the small slope of the pond's bank to draw water from it with a metal container (see Photo 6).

Why were those unfit for work sent to the "gas chambers" with bags, backpacks, pots and pans?

Hördler *et al*. report these photographs,[291] but without even asking this simple question.

It is clear from the photographs that those selected as unfit for work walked along the camp's main road ("*Lagerstrasse*") that lined the railway tracks all the way to the end, past Crematoria II and III, then turned right along "Ring Road" ("*Ringstrasse*"), passed between the central disinfestation plant (*Zentralsauna*) and the inmate-effects storage area (*Effektenlager*), passed the west side of Crematorium IV, turned right and reached the grove by the pond.

Particularly important in this regard are photos 152 and 153 on p. 176 and 177 (see Photos 7f.), in which a group of women and children is portrayed. In the background of photo 152, the east wing of Crematorium III appears, and in photo 153 the courtyard gate and part of the western fence of the same crematorium. From this it can be inferred that photo 153 chronologically precedes 152, since the people were proceeding from east to west, and in photo 152 they were 25-30 meters further along the road.

Hördler *et al*. report these two photos equally in reverse and comment on them in a rather fanciful way. According to them, the women with children portrayed in them

> *"had been on their way to Crematorium II and were now diverted. Probably they were supposed to wait there. Perhaps a work detail or a truck had to pass, or the gas chamber still had to be prepared. Many people had stood here before them. The grass had long since been trampled."* (*ibid.*, p. 269; the two photos are numbered 148 and 134.)

These are mere conjectures unsupported by any evidence. The people in question were not "on their way to Crematorium II," but toward the aforementioned grove. There is nothing to suggest that they were stopping in "in a small free area" (*ibid.*; which, after all, did not exist[292]), waiting for "a work detail or a truck" to pass. At most, they had stopped for a moment on the photographer's orders. The claim that "Many people had stood here before them" is also completely unfounded, while the final sentence, "The grass had long since been trampled," is inexplicable, since in neither photo is the ground visible.

And here is the specific commentary on the second photograph (Hördler *et al*. 2020, p. 270):

---

[291] Hördler *et al.* 2020, pp. 143, 147, 211, Photo 16; p. 150, Photo 19; p. 154, Photo 4; p. 212, Photo 4 and 17; p. 122, Photo 129, 130 and 131.

[292] According to the two air photos taken on 31 May 1944, the *Lagerstrasse*, about 10 meters wide, ran along the fence of Crematorium II at a distance of about 5 meters. From its northern limit to about 5 meters from the fence of Crematorium III was a wide strip of land about 50 meters wide. The distance between the two crematorium gates was about 70 meters.

> *"Hofmann stood in direct view of Crematorium III, directly in front of the quasi-identical Crematorium II, where the women would very soon be murdered (photo 134)."*

Therefore, the women and children who appear in the two photos were purportedly gassed shortly thereafter in Crematorium III! An astonishing deduction, considering that the courtyard gates of Crematorium II and III were opposite each other, but in photo 152 (148 for the three authors), the gate of Crematorium III is visible in the right margin of the picture, so that the deportees photographed had already *passed* the gate of Crematorium II, rather than walked through it.

By this puerile subterfuge, Hördler and colleagues attempt to explain a fact inexplicable from an orthodox viewpoint: granted that many photos show those selected as unfit for work standing in the grove by Crematoria IV and V, but none (except the two mentioned above) depict them in correlation with Crematoria II and III (and less so in the area of the "Bunker 2"). From this, one must conclude that they were intended for gassing inside Crematoria IV and V. But these notoriously had a (presumed) extermination and (real) cremation capacity far lower than that of Crematoria II and III. If that was so, then why, at a time of a very large influx of people (allegedly) destined for the "gas chambers," were Crematoria II and III not used?

This issue is closely related to the fundamental issue of the activity of the crematoria and the alleged incineration pits. Photos in the *Auschwitz Album* show all the chimneys of the crematoria (Crematoria II-III: Photo 6 on p. 51, 7 on p. 53 [see Photo 9], 17 on p. 63; Crematoria IV-V: Photo 99 on p. 131, 125 on p. 155 [see Photo 10]). None of them were smoking. They were therefore inactive. In the orthodox perspective, as expressed by Honey/Baxter, 10,745 Jews had been gassed the day before, on 25 May.[293] Even if one were to take seriously the "official" cremation capacity of 4,416 bodies within 24 hours for the four crematoria at Birkenau (Crematoria II-III: 1,440 each; IV-V: 768 each; *ibid.*, p. 30) – but this claimed capacity was four times the actual capacity – then they would have had to operate continuously for more than 58 hours, hence for two days and 10 hours. This would have made it essential to use the alleged incineration pits (to which I will return later). This in turn means that, within 24 hours, 4,416 bodies would have been cremated in the crematoria, and 6,329 in the incineration pits.

---

[293] The Auschwitz arrival dates given for the transport from Užhorod are 25 and 26 May 1944; the first date is in accordance with the Glaser List, based on which the alleged 2,264 gassing victims are also calculated; the other date is based on testimonies.

Why then does none of the crematorium chimneys emit smoke in the photographs published in the *Auschwitz Album*?

Hördler *et al*. do not answer this question either. In particular, regarding the photo with the best resolution, showing in the background the chimneys of Crematoria II and III – not smoking, but with the top edge blackened by soot – their only concern is to show "that the ramp was not part of the protective-custody camp as such," and to highlight this, they diligently circle five details, but ignore the chimneys of the crematoria, which are exactly above two of the encircled details! (*ibid.*, p. 154, Photo 4)

Yet already in 1989, Danuta Czech had written in her entry for 16 May 1944 (Czech 1989, p. 776; here from 1990, p. 627; emphasis added):

> *"The first long block arrest for prisoners is ordered in Auschwitz II. Three freight trains arrive on the track connection; they are the first RSHA transports of Hungarian Jews. The arriving Jews are ordered to unload their luggage; thereafter they are to stand in rows of five and are led in the direction of the crematoriums. From this night on the chimneys of the crematoriums begin to smoke."*

This annotation, based on witness accounts, practically summarizes the statements made by Wanda Szaynoka on 12 September 1945; in particular, the witness asserted:[294]

> *"I am convinced that the majority of them were gassed and then cremated, because from that night on, all the crematorium chimneys began to smoke almost nonstop."*

Another source mentioned by Czech is Otto Wolken's statement that "Day and night, the 4 chimneys of the crematoria smoked" (see below).

As mentioned earlier, this issue is closely related to that of the incineration pits, which, in the orthodox perspective, must necessarily appear in air photos of Birkenau, and must necessarily be adequate in size and number to the number of bodies purportedly cremated.

Hördler *et al*. publish a "air photo of the South-African Air Force of Auschwitz Il (Birkenau), 31 May 1944"[295] on which they labelled various installations (within the camp: Crematoria II and III, "Kanada II" (*Effektenlager*). *Zentralsauna*, Crematoria IV and V), with the exception of "Bunker 2." The corresponding caption states (Hördler *et al*. 2020, p. 24 [photo] and 25 [comment]):

> *"The murder facilities extended along the entire western length, and are visible on the air photo to the left of the construction sections mentioned*

[294] AGK, NTN, 87, Vol. 5, p. 94.

[295] Correct reference: National Archives, Washington, Mission 60 PRS/462 60 SQ, Exposure 3056. There is also another photo (Exposure 3055) that includes a larger section of land to the west of the camp. In this image, the area of the alleged "Bunker 2" is well centered (in the other, it appears in the upper [west] margin).

> *above. The two largest gas chambers (Crematorium II and IIl) were directly connected to the new ramp, while the two smaller ones (IV and V) were located in a grove about one kilometer away from Crematorium IIl. Behind Crematorium V, the SS had dug several incineration pits for the 'Hungary Program.' The smoke rising there is visible in the air photo.*
> *Adjacent to Crematoria IV and V was the effects camp 'Canada II' with 30 barracks, and the so-called Zentralsauna. New concentration camp prisoners were registered there. Outside the barbed wire fence, 200 meters west of the 'Zentralsauna', was 'Bunker II.' The converted former farmhouse was one of Birkenau's first two gas chambers, and was used again for the 'Hungary Program.' Incineration pits are also visible as dark spots in its perimeter. Those cremation pits can also be seen in two of the four photos that Alberto Errera had secretly taken in the crematorium area a few weeks earlier. NARA, RG 373, Records of the Defense Intelligence Agency, 1920-2006, National Archives Identifier 305987."*

The reference to alleged "several incineration pits" behind Crematorium V is purely imaginary: in the two photos of 31 May 1944, only one smoldering site ("The smoke rising there") is seen, to whose surface area I will return later.

The claim that in the area of the alleged "Bunker 2" "Incineration pits are also visible as dark spots in its perimeter" is so flimsy that the authors thought it appropriate not to point out to the inexperienced reader the location of "Bunker 2," which, in the photograph they reproduce, is also indistinct.

Hördler *et al*. mention the four crematoria at Birkenau, but are careful not to point out that none of their chimneys smoke.

Before ascertaining what is actually seen in the two air photos of 31 May 1944, it is necessary to establish what should be seen there from the orthodox Holocaust perspective.

In this regard, it is essential to remember that, in the orthodox perspective, the "incineration pits" were prepared specifically for the cremation of the allegedly gassed Hungarian Jews, that is, for the surplus of bodies that could not be cremated in the crematoria. Since the Auschwitz commandant knew the overall deportation plan, and knew that the crematoria could not cope with the influx of deportees, the "incineration pits" had to be ready in adequate quantity and size from the arrival of the first transport on 16 May 1944.

For this reason, they form the fundamental and indispensable basis of the Holocaust narrative, without which it would fatally collapse.

In the immediate postwar period, the story of the immense open-air cremations was described in grossly hyperbolic terms. Worthy of note, as

significant examples, are three eloquent testimonies. In 1946, Miklós Nyiszli wrote the following in his memoir "I Was Dr. Mengele's Medical Anatomist at the Auschwitz Crematorium" (Nyiszli 1946, p. 59; translation in Mattogno 2020c, p. 57):

> *"We start off in the direction of the thickly billowing, dense, black column of smoke. Everyone whom misfortune has brought to this place sees this column of smoke. It is visible from every part of the camp. The terrified gaze of all who descend from the wagons and line up for selection immediately falls upon it. It was visible every hour of the day and night. During the day it covered the sky above the Birkenau woods like a dense cloud; at night it lit up the surroundings as if it were the flames of hell."*

A former Russian prisoner of war, Pavel Lukich Gavrish, who escaped from Auschwitz on 6 May 1944, stated in a "SMERSH" Report of 8 September 1944:[296]

> *"The pyres* [*костры: kostry*] *burned day and night, day and night the smoke and stench of burning human bodies burdened the camp."*

Otto Wolken drafted, among other things, a short report whose titles translates to "Camp Images," which contains the paragraph "The Fate of the Hungarian Jews." Here he wrote:[297]

> *"At the end of May 1944, the first transports of Hungarian Jews arrived.* […] *Soon it turned out that the capacity of the crematoria and gas chambers was not sufficient to process the material.* […] *Pits were dug and covered with tarpaulins to serve as temporary gas chambers, and 2 huge pits were dug to burn the corpses in the open air. Day and night, the 4 chimneys*[298] *of the crematoria smoked, day and night, a thick smoke from the incineration pits lay over the camp, and at night, the sky was colored glowing red for miles around."*

When Holocaust historiography was confronted with the question of incineration pits beyond this crass propaganda, it realized the insurmountable difficulties involved: all the details concerning these pits came in fact from "eyewitnesses." However, they blatantly contradicted one other on the

---

[296] Архив Управлении ФСБ России по Омской области (Arkhiv Upravlenii FSB Rossii po Omskoj oblasti, Archives of the General Security Service of the Omsk Region). Scans of the original document published without indication of the background online at: http://www.fsb.ru/fsb/history/archival_material/Gavrish.htm. SMERSH is an acronym for *smert shpionam*, death to spies; the Soviet counterintelligence organization.

[297] AGK, NTN, 88 (Vol. 6 of the Trial against Members of the Auschwitz Camp administration), p. 45,

[298] The four crematoria at Birkenau notoriously had six chimneys altogether, because Crematoria IV and V each had two.

number, location, size and cremation capacity of the claimed incineration pits.[299]

For this reason, no historian has ever dared to undertake a serious study of this burning issue, including the Auschwitz Museum. The consequence of this is that, even in the specialized Holocaust literature, this fundamental topic is treated with bewildering superficiality. Even Franciszek Piper is extremely guarded in this regard in the Auschwitz Museum's *opus magnum*. He was careful not to say anything specific in it (Długoborski/Piper 2000, Vol. 3, p. 143):

> *"In May 1944, during the killing of the Hungarian Jews, it* [Bunker 2] *was put back into operation. Several new burning pits were dug and a new barracks for undressing constructed at that time."*
>
> *"*[…] *Crematorium V, where corpses were also burned in the open air"* (*ibid.*, p. 164)
>
> *"These* [doors of Crematorium V] *served for airing out the gas chambers and for removing bodies that were to be burned in open-air pits."* (*ibid.*, p. 168)

Hördler *et al.* mention incineration pits many times, but they are equally cautious. In the photo caption cited earlier, they merely mention "several incineration pits" (Crematorium V) and "incineration pits" ("Bunker 2"). Even in the book's main text, they avoid giving any details.

It is worthwhile noting how they were described over the years by historians of the Auschwitz Museum. A 1971 publication devoted to the manuscripts of the men of the *Sonderkommando* shows Birkenau Plan No. 1991 dated 17 February 1943, in which the major sites are indicated by numbers. In the north courtyard of Crematorium V, "the area of the cremation pits" (*teren dolów spaleniskowych*) is indicated by a strip about 170 meters long and about 12 meters wide, with two extensions at either end of about 35 meters in the direction of the crematorium, marked No. 12.[300] In another German-language book from 1997 about the "confessions" of Rudolf Höss, Pery Broad and Johann Paul Kremer, the same map appears with the same numerical indications, but here No. 12, indicating "area with incineration pits," is at the northwestern corner of the aforementioned courtyard, and the previous strip has disappeared.[301]

[299] Mattogno 2016a, Chapter 4, "Testimonies Concerning the Incineration Trenches," pp. 17-28, where I examine and compare the relative statements by (self-proclaimed) former members of the "Sonderkommando" H. Tauber, H. Mandelbaum, S. Jankowski, S. Dragon, S. Bendel, M. Nyiszli, D. Paisikovic, J. Rosenblum, F. Müller, J. Sackar, S. Chasan, J. Gabai, S. Venezia.

[300] Bezwińska/Czech 1971, insert between pages 64 and 65. The same map is also included in Bezwińska/Czech 1974, insert between pages 128 and 129. See Doc. 5.

[301] Bezwińska/Czech 1997, insert between pages 96 and 97; the map is not included in the 1984 English edition.

Volume 3 of the Auschwitz Museum's 5-volume series on the general history of Auschwitz, which was written entirely by Franciszek Piper and is devoted to the alleged exterminations, neither contains an air photo of Birkenau from 1944, nor any map showing the various sites of the camp. However, it does contain a reproduction of one of the two clandestinely taken ground photos mentioned earlier by Hördler *et al*,. presumably depicting "The burning of corpses in the open air near Crematorium V."[302]

In 2011, in an impressive mental and historiographical regression, Piotr Setkiewicz reverted to the conception of the 1970s. In fact, in a work devoted specifically to the crematoria and alleged gas chambers at Auschwitz, he presented a plan of the Birkenau Camp in which the "Places where the corpses of the victims were burned in the open air" are represented by a long rectangular strip running at right angles parallel to the entire north and west sides of Crematorium V!

In addition, two rectangular areas in the vicinity of the "little white house" (C2: "Bunker 2"; Setkiewicz 2011, p. 25) indicate several incineration pits, but these are two of the three cleared and flattened areas that I have labeled with Nos. 2, 3, and 4 in Photo 12a, on two of which (Nos. 3 and 4) two barracks can be seen in air photos of 26 June and later![303]

In the text, aimed at disproportionately inflating the cremation capacity of the Birkenau crematoria, incineration pits are an utterly marginal topic. The Polish historian writes in this regard (Setkiewicz 2011, p. 21):

> *"On the other hand, during periods when very high numbers of transports were arriving (for instance from the Dąbrowa Basin, Łódź, or Hungary), significant numbers of corpses were burned in pits that had, in practical terms, unlimited capacity – that is, the SS could order new pits to be dug as needed.* […] *Expense and reliability notwithstanding, the crematoria in Auschwitz and Birkenau turned out to be an effective means of burning the remains of almost a million victims.*[304] *More than the burning pits, they*

---

[302] Długoborski/Piper 2000, Vol. 3, insert between pp. 112 and 113.

[303] Mattogno 2016b, Subchapter 9.3, "'The undressing Barracks' of 'Bunker 2'," pp. 192-194.

[304] This is pure technical nonsense. The refractory masonry of the Topf cremation furnaces could endure a maximum of about 2,000 cremations, after which it had to be completely replaced. However, the documentation of the Central Construction Office in Auschwitz, which makes it possible to reconstruct all the orders it placed with the Topf Company, categorically rules out the replacement of the refractory masonry of even one of the 46 muffles in the crematoria at Birkenau. It follows that these could have supported a maximum of about (46 × 2,000 =) 92,000 cremations, and that 1,000,000 cremations would have required the total replacement of the refractory masonry of all muffles (1,000,000 ÷ 92,000 =) ten to eleven times! my previously cited article "An Accountant Poses as Cremation Expert," in: Rudolf/Mattogno, pp. 145-150; Mattogno 2019, pp. 268-270; Mattogno 2020a, pp. 168-171; Mattogno/Deana, pp. 348-350.

> *have also become the symbol of the tragedy of the Holocaust, the greatest tragedy that humanity has so far experienced."*

This is also a convenient excuse for not dealing seriously with the incineration pits.

In 2019, F. Piper published the same map, with identical indication regarding Crematorium V, but here, the two "burning pits" of "Bunker 2" have disappeared (Piper 2019, p. 55). In the text, on the other hand, any reference to pits near Crematorium V has disappeared. F. Piper writes in this regard (*ibid.*, p. 28):

> *"Sometimes, during peak periods of arriving transports, up to 8,000 corpses per day were burned in these crematoria. In order to achieve such a capacity, the cremation process was abbreviated and unburned bones were removed from the furnaces to be mechanically ground into powder.*[305] *This was done, for example, during the liquidation of the ghettos of Sosnowiec, Bedzin, and Łódź and at the time of the annihilation of Hungarian Jews."*

He also reproduced the air photo of 31 May 1944 (Exposure 3056) and a photo from the Auschwitz Album (No. 6, my Photo 1), but without the slightest reference to the smokeless crematorium chimneys or even the tiny smoking area near Crematorium V (*ibid.*, pp. 387, 389).

It is clear that the Auschwitz Museum is not the least bit interested in these basic aspects of the alleged Jewish extermination. On the contrary, it intentionally omits everything that is at odds with its historiographical dogmas, beginning with the very testimonies it invokes, as the following example shows.

Piper refers to a "Deposition by former SS man Erich Mussfeldt, supervisor of crematoria in the camp, on the functioning and operation of the gas chambers and crematoria in Birkenau" (*ibid.*, pp. 114f.) which contains excerpts from the interrogation protocol of former SS *Oberscharführer* Erich Mussfeld dated 19 August 1947. In 1944, he was transferred back from Lublin-Majdanek to Auschwitz, where he served from the end of May to mid-August and, for 14 days, directed cremations in Crematoria II and III (which he called I and II). Piper quotes his "confessions" about the alleged gassing of Hungarian Jews (Mussfeldt, like Höss, also fully adopted the "truth" of Polish propaganda), but omits an essential part of the in-

---

[305] This alleged procedure is technical nonsense. In the Topf furnaces, the main combustion took place in the muffle; when it was sufficiently advanced, the remnants (the "unburnt bones") fell through openings of the muffle grate into the ash chamber below, where they continued to burn. In the meantime, another body could be introduced into the muffle that had thus been freed. It is obvious that the extraction of "unburnt bones" from the ash chamber would in no way have shortened the duration of the main combustion and thus the cremation process.

terrogation. After "It was therefore a matter of saving Zykon." (end of p. 114), the text continues as follows:[306]

> *"During these 14 days in Crematoria I and II, 4 gassings were carried out* [*W czasie tych 14 dni przeprowadzono w krematoriach I i II 4 gazowania*]. *These gassings were carried out at night, when I was in the barracks; the two front halves of the gas chambers*[307] *were full only twice. The cremation of the contents of such a* [front] *half of a chamber took about a day and a half* [*półtora dnia*]. *I believe that altogether during my service there, in Crematories I and II, 10,000 to 12,000 corpses were cremated* [*spalono 10 – 12 tysięcy zwłok*]*."*

Therefore, during a period of eight weeks (from 16 May to 11 July 1944), when some 313,800 Hungarian Jews were allegedly gassed and cremated (according to Honey/Baxter), Mussfeldt claimed that within two of those weeks only 10,000 to 12,000 bodies were cremated in Crematoria II and III![308]

Piper claims that the alleged gas chambers in Crematoria II and III could each hold 2,000 people (Długoborski/Piper 2000, Vol. 3, p. 169); Mussfeld stated that the cremation of 1,000 bodies (those in the "front half") took one and a half days, so the capacity of these crematoria was (1,000 ÷ 1.5 =) less than 700 bodies per day.

Therefore, Mussfeld downgraded the claimed mass extermination of the Hungarian Jews to a relatively small affair, or to express it with the words of Robert Faurisson – coined in 1989 to describe Jean-Claude Pressac's down-sized extermination theses – to "*bricolage et 'gazouillages.*"[309] This is the obvious reason why Piper omitted this passage.

For the analysis of the air photos, the accounts of two important "eye-witnesses," the self-proclaimed former *Sonderkommando* members Filip Müller and Dov Paisikovic, can be taken as a testimonial point of reference. I have dealt with both in great detail in another study, in which I extensively quoted and analyzed their statements (Mattogno 2021a, esp. pp. 115-131, 144-146). Here, I merely summarize my conclusions.

---

[306] AGK, NTN, 144, pp. 86f.

[307] Erich Mussfeld had accepted witness accounts claiming a subdivision of the alleged gas chambers into two parts.

[308] Mussfeldt did not know the term "Bunker 2" (or of "Bunker V" or "5": see below). For him, there was only a cottage (*chałupa*) where transports that arrived during the day were gassed and cremated in pits (*przy doałch* [*dołach*]). This was also the case for Crematoria IV and V, where cremation was also carried out "in open pits" (*w otwartych dołach*); AGK, NTN, 144, pp. 83f. It is clear that in this regard he knew nothing, and only echoed the tenets of black Jewish-Polish propaganda.

[309] The French expression, invented by J.-C. Pressac, denotes grossly improvised small-scale gassings. See Faurisson 1991, 2020.

In his 1979 book, Filip Müller wrote that, at the beginning of May 1944, SS *Hauptscharführer* Otto Moll "ordered the excavation of five pits behind crematorium 5" and an unspecified number near "Bunker V."[310] The first two measured 40-50 m × 8 m and 2 m deep. Around the middle of the month, the remaining three were dug, the dimensions of which Müller did not indicate. However, in an interview granted to Claude Lanzmann in 2010, he claimed that the five pits near Crematorium V measured about 40 by 8 meters and were more than 2.5 meters deep. They were located 10-20 meters from the building, and each one could cremate 1,200 to 1,400 corpses within 24 hours. Therefore, there were five pits near Crematorium V with minimum dimensions of 40 by 8 meters.

Müller further stated that at "Bunker V" "an additional four cremation pits were dug" (1979, p. 133). He told Lanzmann that 1,400 corpses could be cremated in each pit within 24 hours, from which it can be inferred that they were similar in size to those at Crematorium V.

Dov Paisikovic made two statements in this regard, one given in Vienna on 17 October 1963, the other on 10 August 1964 to the Auschwitz Museum. In them, he recounted that he had worked at "Bunker V" or "Bunker 5" for eight days, or, according to another statement, for two weeks, thus from 21 May to 28 May or 3 June. Hence, the alleged events he describes refer to exactly the same period as indicated by Müller.

According to Paisikovic, two incineration pits existed near the "Bunker," 30 m long and either 6 or 10 m wide, one of which was burning.

For Müller, however, there were four incineration pits near "Bunker 2," with minimum dimensions of 40 m × 8 m, hence a surface area of 320 square meters each. Their total surface area would have amounted to at least 1,280 square meters. Hence, although both witnesses referred to the same period of time, their claims blatantly contradict each other.

As far as historians are concerned, a typical example is given by German authors Eric Friedler, Barbara Siebert and Andreas Kilian. In a book on the *Sonderkommando*, they list the precise number, location and size of the alleged incineration pits near Crematorium V. On a map of Birkenau they drew, they show three of them (Friedler *et al*., pp. 414f.; see Doc. 6). In the text of the book, they state with regard to the alleged extermination of the Jews deported from Hungary (*ibid.*, p. 184):

[310] "Bunker V" or "Bunker 5" was allegedly another name for "Bunker 2" in 1944. No witness or historian has ever explained why the original designation was changed and why the illogical and incomprehensible number "V" (or 5) was adopted. It is in fact derived from another strand of Auschwitz black propaganda, according to which each of Crematoria IV and V possessed four gas chambers named "Bunker I," "Bunker II," "Bunker III" and "Bunker IV." Continuing the numbering from there leads to "Bunker V." See Mattogno 2021b, pp. 363-366.

> *"Since it was clear from the outset that the capacity of the cremation furnaces would not suffice for the expected quantity of corpses, Moll ordered the Sonderkommando inmates to dig two large cremation pits on the grounds of Crematorium IV* [= V]. […] *Within a very short time, the inmates – among them Filip Müller – dug two pits about fifty meters long, eight meters wide and two meters deep.* […] *A few weeks later – the mass extermination of the Hungarian Jews had already begun – the Sonderkommando inmates had to dig three more, smaller pits, each two meters deep, behind Crematorium IV. Two of these pits were about 10 meters long and 4 meters wide, the third measured thirty by five meters."*

Hence, the following incineration pits existed:

1. 50 m × 8 m = 400 m²
2. 50 m × 8 m = 400 m²
3. 10 m × 4 m = 40 m²
4. 10 m × 4 m = 40 m²
5. 30 m × 5 m = 150 m²

in total 1,030 square meters.

However, on the above-mentioned map, only three of these pits are drawn, and quite clumsily, because compared to the size of Crematorium V (67.5 m × 12.85 m), their dimensions do not correspond to any of those listed above. Their Pit No. 1 measures about 30 m × 10 m, No. 2 some 40 m × 10 m, and No. 3 some 35 m × 10 m.

Friedler *et al*. rely on Filip Müller's testimony and air photos of Birkenau, but these radically contradict Müller's claims. Indifferent to this obvious fact, they created a collage, in which they put together:

– a distorted version of Müller's testimony, because they included Müller's first two incineration pits (with maximum dimensions 50 m × 8 m), but omit the other three (of at least 40 m × 8 m);
– two smoking areas from air photos with realistic sizes (10 m × 4 m), although these two areas never appear simultaneously in the same photos;
– finally, they added a pit of 30 m × 5 m, the source of which is unknown.

Following Müller, they also claim that four incineration pits were excavated near "Bunker V" (*ibid.*), but they did not include them on their map.

In contrast to this, as I will clarify later, Polish historians Igor Bartosik and Łukasz Martyniak claimed to have identified in the same area two incineration pits.

That said, it must be determined what can actually be seen in the air photos. Photo 11 (Exposure 3056) shows the western part of the Birkenau Camp, where the area of the alleged "Bunker 2" and that of Crematorium V (which I have circled in Photo 11a) are clearly visible.

Photo 12 is an enlargement of the area of the alleged "Bunker 2." The labels added to Photo 12a denote:

ZS = *Zentralsauna*
Z = *Zaun*, the camp's fence
1 = access road to the "Bunker 2" area from the Birkenau Camp.
2 = area cleared of plant life and flattened
3 = area cleared of plant life and flattened
4 = area cleared of plant life and flattened

Two buildings were later erected in areas 2 and 3.

Z = fence southwest of the area of "Bunker 2."
B = alleged "Bunker 2," a house with sides measuring 12 × 10 meters.
5 & 6: 2 alleged incineration pits.[311] No. 5 measures about 15 × 5 meters, No. 6 about 20 × 5 meters.

In the area of "Bunker 2" and along the road, there is no sign of human activity; no trucks or columns of people can be seen. Access to the area is prevented by a thick hedge (Z) blocking the road. The alleged incineration pits do not smoke. They do not even have sharp contours, and do not correspond to defined geometric objects, so there is nothing to indicate that they are man-made artifacts.

Finally, the alleged undressing buildings are missing. In this regard, Müller wrote, again with reference to May 1944 (1979, p. 133):

> *"The changing rooms were located in three wooden barracks* […]*"*

Paisikovic knew nothing about this, because he claimed that

> *"the SS led people into the rooms of the little house. 300 people entered at a time, and for this reason there were about 8-10 SS* [men]*."*

The rest of the transport waited 700 meters away from the "Bunker," to prevent them from hearing the screams of those being gassed.[312] This is a further contradiction to Müller's narrative.

We must now examine the area of Crematorium V.

Photo 13 is an enlargement of this area of Exposure 3056. In Photo 13a, I have added labels to important objects. Crematorium V measured about 13 × 67.5 meters. Based on its length, it can be calculated that the area from which smoke rises, which was at the edge of the drainage ditch (G), was about 7 meters wide. The drainage ditch, about 5 meters wide, is clearly visible in a 1945 Polish photo (see Photo 15). The distance from the north side of the crematorium to the fence was about 30 meters, divided as follows:

---

[311] According to the commentary on an air photo of the area around "Bunker 2" that appears in Bartosik/Martyniak, p. 26.
[312] Deposition of 10 August 1964. APMO, *Zespół Oświadczenia*, Vol. 44, pp. 89f.

– at 17 meters: beginning of the smoking area;
– at 24 meters: end of the smoking area and beginning of the drainage ditch;
– at 29 meters: end of the drainage ditch;
– In front of the fence was a strip of land about 1 meter wide.

Photo 14 is an enlargement of Exposure 3055. In it, the smoking area is well demarcated by a square of about 7 x 7 meters (Photograph 14a).

The only witness who marked the location of the alleged incineration pits on a map is Stanisław Jankowski, in a report for the Auschwitz Museum compiled in 1985. According to Jankowski, there were two pits, each measured 20 × 2 meters, and located east of Crematorium V,[313] in a place where no air photo ever shows any smoke (see Document 7). The number and size of the pits are furthermore in blatant contradiction to Müller's related statements.

In conclusion, the two air photos of 31 May 1944 clearly refute the contradictory testimonies of Müller, Paisikovic and Jankowski, but also the claims of historians, beginning with Friedler, Siebert and Kilian.

The claimed orthodox scenario can be gleaned from the list of gassing victims compiled by Honey and Baxter. According to this, some 126,700 Jews were killed in Birkenau between 16 to 30 May 1944, hence within 15 days. Even if assuming the insane cremation capacity of 4,416 bodies within 24 hours for the four Birkenau crematoria (and assuming that all four were in operation), these facilities could have incinerated only (4,416 × 15 =) 66,240 bodies. The remaining (126.700 – 66.240 =) 60,460 bodies would have had to be disposed of in incineration pits, averaging (60,460 ÷ 15 =) about 4,030 per day.

But in the two air photos taken on 31 May 1944, the only smoking area on the ground measures about 50 square meters. In terms of surface area, this is (2,280 ÷ 50 =) about 57 times less than claimed by "eyewitness" Filip Müller. If we stick to the cremation capacity he indicated (1,200 to 1,400 bodies per pit), cremation of the (fictitious) surplus of 4,030 bodies per day would have required three incineration pits each measuring 40 × 8 meters.

In real terms, the cremation capacity of all Birkenau furnaces was about 1,120 bodies per day (given the hypothetical presence of children's bodies and a minimum daily maintenance break of three hours for cleaning the hearth grates; see Mattogno 2020a, esp. Chapter 11, pp. 82-100). However, in 1944, the furnaces of Crematorium IV were out of operation, which would have lowered the theoretical capacity to about 930 corpses per day.

[313] APMO, Zespół Oświadczenia, Vol. 113. Sygn. Oświadczenia/Fajnzylberg/2613, p. 6. See Doc. 7.

Therefore, these facilities could have cremated only some (930 × 15 =) 13,950 bodies within 15 days. Hence, the surplus that had to be processed by the incineration pits would have been (126,700 – 13,950 =) 112.750 bodies, averaging over 7,500 per day. This means that, on the two air photos of 31 May 1944, we should see at least five incineration pits measuring 40 × 8 meters in full action, meaning five times 320 square meters of burning and smoking surfaces. Instead, we find only one tiny surface of some 50 square meters that emits some smoke.

This is the final confirmation of the legendary character of the incineration pits, thus also and the immense extermination associated with them.

All that remains, therefore, is to apply Sherlock Holmes's famous maxim:

> *"Once you eliminate the impossible, whatever remains, no matter how improbable, must be the truth."*

The case of the Hungarian Jews deported to Strasshof can perhaps give an idea of how they were accommodated. In the Lower-Danube District (*Gau Niederdonau*), these Jews were in fact scattered out among at least 175 settlements, in which those unfit for work were also placed, and which were called "Family Camps" ("*Familienlager*"; Szabolcs 1991, p. 279). And at least until 22 June 1944, the front line in the northern sector of the Eastern Front was still east of the Narva-Opocka-Vitebsk-Bobrujsk line. Hence, much of the eastern territories, immensely larger than the Lower-Danube District, were still in the hands of the Germans.

We need to keep in mind, however, that the Hungarian Jews were sent to many more locations. The aforementioned periodical *Hírek az elhurcoltakrór*, listed 322 of them in alphabetical order in its Issue No. 5 of 20 October 1945 (pp. 14f.):

This is undoubtedly also where those unfit for work might have been sent, not excluding the still-occupied territories outside the Greater German Reich.

Conclusions

The deportation of Jews from Hungary to Auschwitz in May-July 1944 had the primary purpose of procuring a slave-labor force for the German armaments industry, particularly for the "Fighter Plane Construction Program."

The initial agreement between the Third Reich and the Hungarian governments was to send 100,000 Jewish workers to Germany, who were then deported to Auschwitz together with their families. Of the more than 430,000 deportees, about one-third turned out to be fit for work, so that at least 128,700 male and female Jews from Hungary were interned at the camp, and then transferred to a myriad of camps in Greater Germany to contribute to the German war effort. Therefore, the Auschwitz Camp served as a sorting center for Jewish labor, and this also applied to the Jews deported from the Łódź Ghetto.

The documents contain no hint as to the fate of the deportees unfit for work. They moreover contain not even a veiled allusion to their alleged extermination. Instead, they show that the policy of the German government constantly and tenaciously aimed at seizing an increasing number of Jews who were fit for work, and that German officials made no effort to get their hands on as many Jews unfit for work as possible in order to kill them in the alleged "gas chambers" of Auschwitz.

The photographs in the *Auschwitz Album* and the aerial photographs taken by the U.S.-American Air Force in May 1944 constitute convincing and irrefutable proof of the fictitious nature of the claimed immense exterminations of Hungarian Jews at Auschwitz.

Part Two:
The Evacuation of the Łódź Ghetto and the Deportations to Auschwitz (August 1944)

Introduction

The Glaser List also provides detailed data regarding the admission to the Auschwitz Camp of Jews evacuated from the Łódź Ghetto in August 1944. The most accurate study on this subject is a 2005 book by Andrzej Strzelecki, historian of the Auschwitz Museum. It is titled The Deportation of Jews from the Łódź Ghetto to KL Auschwitz and Their Extermination. In the Introduction to the present work, I wrote that the Auschwitz Museum has deliberately ignored the Glaser List for 20 years. This is clear from the following observation by Strzelecki (2005, p. 9, footnotes 5):

> *"In their book entitled* Das letzte Kapitel: Realpolitik Ideologie und der Mord an den ungarischen Juden 1944/1945 *(Stuttgart-München, 2002) Christian Gerlach and Götz Aly concentrate chiefly on the background and execution of the deportation of Jews from Hungary to KL Auschwitz, but they do not examine in such detail the fate of those Hungarian Jews who were 'deposited' in the so-called 'transit camp' of KL Auschwitz. This subject requires further research."*

He learned from this book that the Yad Vashem Institute has a "Compilation of the transports /men/ arriving in Concentration Camp Auschwitz II Birkenau in the period from 16 May to 20 Sept. 1944, Lambach, 5 August 1945. For the correctness: sgd. Leo Glaser, Director of the Insurance Institute of the Austrian Federal States, Vienna." Can we believe that he did not even have the curiosity to glance at a document with such a sensational title? Especially since he himself stated that the issue of the Birkenau Transit Camp "requires further research"?

Strzelecki tried to fill this gap-or rather, omission-by analyzing the transports of Jews from the Łódź Ghetto who were directed from this Transit Camp to other camps or subcamps.

Seven years later, in 2012, Strzelecki mentioned the Glaser List in passing in No. 27 of the *Zeszyty Oświęcimskie* (*Auschwitz Notebooks*). Here, in the context of a 2011 review of a book by Gábor Hirsch, in which Strzelecki listed the evidence adduced by this former Hungarian deportee, he mentioned,

> *"a transport list of male inmates of various nationalities who arrived at Auschwitz in the period from 16 May to 20 September 1944 (more precisely, a list of men interned at the camp as registered inmates by name or as inmates in storage*[314]*) compiled in 1945 in Austria by former inmate Leo*

[314] "*więźniów depozytowych*," term derived from the German term "*Depot-Juden*."

> *Glaser on the basis of notes illegally made at the Auschwitz Camp. Discounting internet sources, this document was first published in G. Hirsch's book (with the permission of the Yad Vashem Institute in Jerusalem, where it is preserved).''* (Stzrelecki 2012, p. 323)

As noted in Part One, the Glaser List was later published again by G. Hirsch, and then by I. Baxter (2022). By then, the Auschwitz Museum could no longer ignore it. Hence, in 2022, Piotr Setkiewicz was forced to mention it in the condescending way set out earlier, a mere reference without any hint of critical analysis.

Before examining Strzelecki's theses in the above-mentioned book, a brief historical background of the problem is necessary.

2.1. The Łódź Ghetto

The Łódź Ghetto (German: Litzmannstadt), second in importance after Warsaw, was established in February 1940. In the course of that year, it came to contain more than 160,000 Jews. Because of its huge production of items of all kinds, especially textiles, it soon became a vital economic center for the German economy. The percentage of Jews employed in labor was always very high. For example, in the period from 6 to 12 October 1942, 74,735 Jews (32,571 men and 42,164 women)[315] were working in the ghetto in 137 labor departments. This was almost 84 percent of a total population of about 89,200.[316] In July 1944, this percentage exceeded 88 percent (see below, Chapter 2.3).

Precisely because of its great economic importance, the Łódź Ghetto survived until 1944. It was evacuated only during the summer of that year due to the danger of the Soviet advance.

A report prepared on 22 January 1944 by Max Horn, the CEO of Ostindustrie Ltd, describes the situation in the ghetto as follows. As of 11 January 1944, it contained "80,062 Jews, 5,365 of them children under the age of 10." The report continues:[317]

> *"There are 99 factories in the Litzmannstadt Ghetto, in which 60,200 Jews* [are working], *namely.*

---

[315] APŁ, PSZ, 180, pp. 75-78.

[316] The population of the ghetto during the aforementioned period ranged from 89,279 (7 Oct. 1942) to 89,163 (12 Oct. 1942) people. Dąbrowska/Dobroszycki, Vol. 2, pp. 485, 491.

[317] ISD, Ordner Nr. 455. "Tgb.Nr. 16/44 g. 22. Januar 1944. Die Betriebe des Ghettos Litzmannstadt und die Ostindustrie GmbH."

5317 ... in the iron sector
4463 ... in the wood sector
11570 ... in the leather sector
28754 ... in the textile sector
10096 ... in other establishments.
The number of workers in the factories varies between 5 and 1975, averaging around 600. The remaining Jews are accounted for by:
(a) internal ghetto needs (fire department, order service, etc.) as well as preparation and construction of new workshops 13943
b) children under 10 ……5305[318]
(c) temporary non-employees …….. 614. […]
The greater part of the enterprises is labor-intensive: only some factories, for example weaving, are machine-intensive."

A report by the head of the statistical department dated 11 January 1944 confirms the presence of 5,305 "children below 10 years of age" and 74,758 adults. Therefore, the ghetto's total population was 80,062 people.[319]

The last detailed figure regarding the ghetto's population was dated 1 March 1944. This is a "List of the ghetto population as of 1 March 1944, with approximate years of birth." which is stamped "The Eldest of the Jews. Przełożony Starszenstwa Żydów w Litzmannstadt [The Chief of the Jewish Eldest in Lodz]. Ch.[aim] Rumkowski."[320] The original document gives a yearly breakdown of the birth year of men and women, plus the total, from 1858 to 1944. (See Table 2.I in the Appendix.) In the following table, the data is grouped into 10 age brackets.

Table 2.1: Age Distribution of the Lodz Ghetto's Population

Age Bracket	Men	Women	Total
Up to 8 Years	2,248	2,247	4,495
From 9 to 14 Years	3,371	3,315	6,686
From 15 to 20 Years	5,670	6,308	11,978
From 21 to 30 Years	5,501	11,181	16,682
From 31 to 40 Years	7,988	10,739	18,727
From 41 to 50 Years	5,153	6,746	11,899
From 51 to 60 Years	2,663	3,705	6,368
From 61 to 70 Years	881	1,530	2,411
From 71 to 80 Years	127	242	469
From 81 to 86 Years	5	18	23
Totals:	33,607	46,031	79,638

[318] I will address the age group of children later.
[319] APŁ, Mikrofilm Nr. 20013, sygn. 1396, p. 405.
[320] APŁ, Mikrofilm Nr. 21344, sygn. 29260, p. 392.

The report of the head of the statistical department of 2 March 1944 mentions for the previous day the same occupancy: 79,638 people, including 75,012 adults and 4,626 children.[321] On March 29, the total population was 77,727, including 73,179 adults and 4,548 Children.[322]

By May 1944, there were 96 departments of all kinds in the ghetto.[323] The organizational structure of the ghetto was highly organized. At the top stood the "head of the ghetto administration," to whom were directly subordinate a deputy "responsible for the comprehensive labor deployment and material utilization," and a deputy "responsible for overall acquisition and finances." To them, either directly or through four subordinate offices (Labor procurement and material utilization / Financial management and central purchasing) were 21 departments:

1) Head of Texile Department, 2) Wehrmacht procurement, 3) metal-goods fabrication, 4) sheet-metal-goods fabrication, 5) leather processing and saddlery manufacturing, 6) bookbinding, 7) cork processing, 8) broom-brush fabrication, 9) woodworking, 10) upholstery; in addition, directly subordinate, 12) management of transshipment Bluter Ring, 13) management of the department of transport insurance, 14), personnel office, 15) goods utilization, 15a) textile manufacturing, 16) central accounting, 17) accounting department, 18) management of purchasing department food, 19) management of purchasing department additional commodities, 20) main registry, 21) management of transshipment Baluter Ring.

Numerous subsections depended on these departments.

According to orthodox Holocaust historiography, the evacuation of the Łódź Ghetto had two specific destinations: first the alleged extermination camp at Chełmno (German Kulmhof), where more than 7,000 Jews were presumably gassed, then the alleged extermination camp at Auschwitz, to which the rest of the Jews still present in the ghetto were sent, most of whom were allegedly likewise gassed.

2.2. Judicial and Historiographic Background

However, this version is the result of a historiographical development that began in the immediate postwar period. At least until the years 1946-1947,

---

Poles knew practically nothing about the deportation of Jews from the Łódź Ghetto to Auschwitz in August 1944.

From 21 June to 9 July 1946, they staged a trial in Poznań against Artur Greiser, the former German district leader (*Gauleiter*) and Reich governor (*Reichsstatthalter*) of the Warthegau (Główna... 1946). In Section III/2, the indictment noted the defendant's responsibility regarding the Łódź Ghetto, "from where [Jews] were gradually deported and killed – mostly in the gas chambers at the nearby execution camp Chełmno on Ner" (*ibid.*, p. 13). In a chapter titled "The Extermination of the Jewish Population," the relevant explanatory statement contains the following fleeting reference (*ibid.*, p. 38):

> *"The final liquidation of the Łódź Ghetto follows in the summer of 1944. Transports are directed to the Auschwitz Camp for killing at Birkenau."*

During the fourth session (24 June 1944) the case "The Łódź Ghetto and Greiser's Responsibility" was dealt with (*ibid.*, pp. 126-129), but without any reference to the August 1944 evacuation.

During the eleventh session (2 July 1947), Hans Biebow, who had been head of the ghetto administration of the Litzmannstadt Ghetto, testified as a witness for the prosecution, but the questioning never touched on the above-mentioned topic.

In the trial verdict (9 July 1946), the tribunal copied verbatim the short sentence from the indictment I quoted above (*ibid.*, p. 405). In the grounds for the judgment, the judges considered eleven counts as established, among them (*ibid.*, p. 415):

> *"X. The total extermination of the Jewish population.*
> *XI. The atrocious execution camp for Jews at Chełmno on the Ner (Krematorium)* [sic]*."*

Bibow had been arrested by the British. The extradition request by the Poles contained the following charge:

> *"Chief of the administration of Ghetto in Lodz (took active part in murdering 200000 Jews in annihilation camp in Kulmhof)."*[324]

During the trial against Hans Biebow, which was staged in Łódź from 23-30 April 1947, the Polish judiciary knew virtually nothing about an alleged extermination of ghetto Jews at Auschwitz in August 1944. No witnesses provided useful details about the evacuation of these Jews to Auschwitz. The prosecution's expert witness, prosecutor Władysław Bednarek, expounded a lengthy report on the Chełmno Camp, which was considered the center of the alleged extermination of the Jews of Łódź (Główna... 1947, pp 162-172). He also added an enigmatic reference to Auschwitz, asserting

---

[324] Polish War Crimes Commission, Bad Oyenhaussen, 17.4.1946. Subject: Biebow a. Jaeger. TNA, WO 309-1431, p. 22.

that "there was still a considerable number of Jews in the ghetto, however, only the last 50-60,000 were transported to Auschwitz" (*ibid.*, p. 172). There was also a witness, Izrael Szpiegelman, who claimed – with a shameless lie – to have "seen" Biebow at Auschwitz (*ibid.*, p. 114), but the Tribunal disregarded these vague hints.

In the verdict of 30 April 1947 that sentenced Biebow to death, the Auschwitz Camp is not even mentioned. He was accused of morally and physically participating in the transport "of about 300,000 Jews to the death camp Chełmno on the Ner and other German death camps" (*ibid.*, p. 204).

The grounds for the verdict stated that, upon Biebow's call for volunteers for the transfer from the ghetto, "more than 55,000 people showed up, who were taken to Chełmno and murdered there" (*ibid.*, p. 209).

The only statement on the liquidation of the ghetto was made by Biebow himself (*ibid.*, p. 63):

> *"As the eastern front approached, rumors circulated that the ghetto would be completely relocated. Since this seemed [logistically] impossible, because it would have involved some 70,000 people, it was said that we should move individual factories to individual places in the Reich and Czechoslovakia."*

The evacuation of the Łódź Ghetto in August 1944 was mentioned neither during the trial against Rudolf Höss (Warsaw Trial, 11-29 March 1947) nor during the trial against former members of the Auschwitz camp garrison (Krakow Trial, 25 November through 16 December 1947).

Indeed, the legend of the immense extermination of the Łódź Ghetto Jews was born among non-Polish witnesses. As early as October 1945, Charles Sigismund Bendel had been ranting about this during the Belsen Trial:[325]

> *"When was the first occasion that you actually worked or went into one of the crematoria?*
>
> *A. In the month of August 1944* […]
>
> *Who was being gassed at that time?*
>
> *A. On that occasion it was the Ghetto of Lodz. 80,000 people were gassed."*

The *Daily News Bulletin* of the Jewish Telegraphic Agency reported the news as follows:[326]

> *"80,000 LODZ JEWS KILLED IN ONE NIGHT AT OSWIECIM, JEWISH DOCTOR TESTIFIES*

---

[325] Proceedings of a Military Court for the Trial War Criminals held at Luneburg, Germany, on Monday, 1 October, 1945 upon the Trial of Josef Kramer and 44 Others. Thirteenth Day. Transcript of the Official Shorthand Notes, pp. 2f. United Nations Archives. Security Microfilm Programm, 1988, Reel No. 51.

[326] *JTA Daily News Bulletin*, Vol. XII, No. 224 (27th year), 2 October 1945, p. 6.

> *Lueneburg, Oct. 1 (JTA) – Eight-thousand Jews from Lodz were gassed and burned to death in one night at Oswiecim, Dr. Sigismund Bendell* [sic]*, a Jewish physician who was forced to work among the internees, testified today before the British military court trying 45 former guards at Oswiecim and Belsen."*

And in 1946, Miklós Nyiszli raved (Mattogno 2020c, p. 105):

> *"The arrival of the Litzmannstadt ghetto has been announced. One should know about this ghetto that the Germans established it in the winter of 1939. The number of its inhabitants at the beginning was 500,000 souls. The ghetto's inhabitants worked in enormous war factories. In payment for their work they received ghetto marks, but they could exchange this currency only for extremely narrowly defined rations. It follows of itself that the disproportion between superhuman work performance and nutrition brought about their destruction en masse. Frequent epidemics also decimated them. In this way, the 500,000 souls melted away to 70,000 by the autumn of 1944.*
>
> *Now the end has come for these as well. Each day they arrive at the Jews' ramp of K.Z. Auschwitz in groups of ten thousand. The selection sent ninety-five percent to the left, five percent to the right."*

The West-German postwar judiciary tried to be a little more serious. In the indictment for the trial against Günter Fuchs, former Gestapo detective in Łódź, and Otto Bradfisch, former Gestapo head and Fuchs's superior, which took place in Hannover in 1962-1963, the two defendants were questioned several times. In the interrogation of 5 May 1960, Fuchs stated:[327]

> *"One day in July 1944, Bradfisch summoned me to his office at the city administration. He told me that the Lodz Ghetto with all the armaments factories was to be evacuated to the Reich territory in view of the front situation. He charged me with the task of supervising this evacuation by the security police. The situation was also tense at the time because the Polish uprising had broken out in Warsaw. It was therefore feared that there would also be uprisings in Litzmannstadt. As far as I know, the ghetto was transported in stages from the Radegast Station in the course of August 1944 in individual rail transports. According to Bradfisch's statement, I assumed that the transports went to the Reich territory. There was talk at the ghetto administration that the factories would be moved to Saxony. I have also seen sketches in which the department heads of the ghetto administration had entered the destinations in Saxony."*

[327] Landeskriminalamt Baden-Württemberg, interrogation protocol of G. Fuchs. YVA, TR.19-60, p. 45.

During an interrogation on 6 June 1962, Fuchs provided additional details about the evacuation of the ghetto:[328]

> *"In 1944, the resettlement was initially carried out on an operational basis. Machines were also added to the transports. The Jews also took their luggage with them. I also know that the Jews were given plenty of rations by the ghetto administration. A circumstance that moreover brought Biebow and us reproaches from the general public. In contrast to the transports of 1942, which were mainly carried out in passenger cars, only freight trains were available in 1944. When the individual cars could no longer be sufficiently filled by the factories, the ghetto was evacuated street by street, and in each case individual parts of the ghetto were completely cleared.* […]
>
> *I know that a residual detachment of Jews stayed behind to do the clean-up work. At that time, a transport of about 1,200 to 1,500 people left every day."*

On 12 February 1963, Fuchs returned to the matter as follows:[329]

> *"The Jews were to be deported. At that time, I was of the opinion that the Jews were coming to the Reich for armament work. The dissolution of the ghetto lasted about 3 weeks. During this period, I was assigned by my superior Otto Bratfisch* [sic]*, at the request of the Jewish elder of the ghetto, to supervise the transports, and to ensure the security of the ghetto area.* […]
>
> *In the case of transports out of the ghetto, things went as follows: The Jewish administration of the ghetto arranged the transports, in each case by order of the head of the service. The Jewish Order Service led the transports to the ghetto train station, and handed them over to the police's transport escort squad there. I was occasionally present at such departures from the ghetto. In every case, one of my officers was present."*

He then added:[330]

> *"During the time of my work, about 50,000 Jews were transported from the ghetto. I do not know how many had already been transported before that. The entire transport was carried out in freight cars. My supervisor Bradfisch had given the destination as 'Reich territory.' He said that the Ghetto armaments factory was to be relocated to Central Germany because of the front-line situation. It is certain that the transports were taken to the Reich border. Where they actually went, I did not know at that time. Today I have been told that the transports were all sent to the Auschwitz Concentration*

[330] *ibid.*, p. 107. Warthebrücken was the district (Landkreis) where the Chełmno Camp was located.

Camp. I never heard anything about the fact that transports also went to the Warthebrücken district."

Otto Bradfisch made extensive statements about the evacuation of the Łódź Ghetto during an interrogation on 17 January 1961:[331]

"In August 1944, the ghetto as a whole was evacuated as an armament factory. However, I do not remember the exact date. This happened at the intervention of the Minister of Armaments, Speer. Since the front was approaching, the people in the ghetto and the machines were to be transported to a safe place where work would continue. This armament should not and could not be dispensed with, as was ordered from above. Some Jews who were not employed in the armament factory remained behind in the ghetto. I cannot give the number. I was not aware that the Jews were to be taken to Auschwitz. I emphasize once again that the sole purpose of this evacuation was the preservation of the armament industry, which was necessary for the continuation of the war, and that I could therefore by no means assume that, contrary to these accounts, a killing of the Jews elsewhere was intended."

2.3. The Ghetto's Evacuation

The certain starting fact is that Himmler ordered the evacuation of the ghetto in early June 1944.[332] Regarding the subsequent events, orthodox Holocaust historiography shows embarrassing inconsistencies, because it claims that the first 10 transports with altogether 7,171 evacuees, leaving between 23 June to 14 July, were sent to Chełmno for total extermination, while the remainder, starting in early August, had Auschwitz as their destination, where a portion of the evacuees were admitted to the camp as slave laborers.

According to the most extreme theses, such as that of Shmuel Krakowski, all the Jews of the Łódź Ghetto were to be exterminated (Kogon *et al*., S. 142 p. 99):

"In August 1944 the Lodz ghetto was liquidated within three weeks. The seventy thousand Jews who were in the ghetto at the time were deported to Auschwitz-Birkenau to be gassed. The possibilities offered by Kulmhof

[331] Staatsanwaltschaft bei dem Landgericht Hannover. Interrogation of O. Bradfisch, Munich, 17 January 1961. YVA, TR.19-60, p. 118.

[332] This order is inferred from the beginning of Greiser's letter to Himmler dated 9 June 1944: "Reichsführer, against the evacuation of the ghetto in Litzmannstadt ordered by you […]." Eisenbach 1961, reproduction of the document in the unpaginated documents appendix.

would not have been sufficient to murder tens of thousands of people within a short span of time."

This explanation presupposes that Himmler and his subordinates were incurably demented men who first sent over 7,000 Jews to die in the phantom "gas vans" at Chełmno, and only after this alleged extermination was over did they realize that this camp could not eliminate another 70,000 "within a short space of time"!

In Himmler's defense, it must be said that he was not the originator of such nonsense. During the trial of "United States of America vs. Ulrich Greifelt, et al (Case 8),"[333] the so-called "RuSHA Case" (the trial against the Race and Settlement Main Office), which was staged at Nuremberg from 1 July 1947 to 12 February 1949, the "Opening Statement of the Prosecution" made the following accusation regarding the Łódź Ghetto (*NMT*, Vol. 4, p. 673):

"The Jews in the Litzmannstadt Ghetto were apparently able to survive as late as 1944, because they were used to produce goods manufactured in plants within the ghetto. But in the summer of 1944 it was decided that the Litzmannstadt Jews were to be exterminated and the ghetto destroyed. Greifelt was advised of this decision by Greiser, the gauleiter of the Warthegau, and the Staff Main Office was assigned the task of demolishing the ghetto and confiscating the property of the Jews. Greifelt directed the defendants Schwarzenberger, Meyer-Hetling, and Huebner to work out the necessary details. In August 1944, 60,000 Jews were sent from Litzmannstadt to the 'concentration camps for execution."

Strzelecki's argument is more reasoned, but no less fallacious (Strzelecki 2005, pp. 25-27):

"As a consequence of Himmler's order from 23rd June to 14 July 1944, a total of 7,196 people were transported out of the Łódź Ghetto, officially to work in the German interior, but in fact to be exterminated at Chełmno. On 14th July, these deportations were suddenly stopped although they were supposed to have lasted approximately another six weeks. […]

The German authorities began the final shutting down of the Łódź Ghetto in August 1944, clearly as a reaction to the Uprising in nearby Warsaw. This time the "deportation" transports of Jews were bound for KL Auschwitz. No extant documentation has been found explaining how this change of course, from Chełmno to Auschwitz, came about. Presumably it was the work of Speer, who managed to convince Hitler that it was essential to keep alive for some time longer at least some of the Ghetto's inhabitants who were qualified slave-workers. […]

---

[333] Ulrich Greifelt, chief of the main office of the Reichskommissar für die Festigung des deutschen Volkstums/Reich Commissioner for the Consolidation of German Ethnicity.

It was because of the labour shortage affecting the German war economy that in the spring of 1944 the Konzentrationslager in Deutschland judenfrei *principle was waived.*[334] *This was a principle, introduced in 1942, by which all Jewish prisoners were removed from concentration camps situated within Germany proper and sent chiefly to the Auschwitz or Majdanek concentration camps. In May and June 1944, large transports of Jews from concentration camps in occupied Poland, above all Auschwitz, started being sent to the German interior. The Jews were mainly those from Hungary who at Auschwitz had not been selected for immediate annihilation. In April 1944, Hitler agreed to have some 100,000 Hungarian Jews employed in the Reich as part of the so-called Jägerprogramm – a vast building project aimed at moving the production of aircraft into bunkers and tunnels. Then in May 1944, Himmler decided that Jewish women would also be sent en masse to work in the armaments industry. Within a very short space of time all sorts of industrial building sites and certain factory production halls deep within the Reich were filled with tens of thousands of Jewish slaves. In the light of these circumstances it would appear that the sending of over seven thousand Jews from the Łódź Ghetto at the end of June and in July 1944, must have resulted from an oversight in Berlin. This mistake must have been eventually noticed and then the rest of the Ghetto's inhabitants were sent to Auschwitz, where some could be temporarily spared the fate of mass extermination."*

The last assertion is bafflingly insulting: according to this, the Berlin authorities, who had been sending Hungarian Jewish manpower for the sake of slave labor to Auschwitz already since mid-May, had supposedly forgotten by June their desperate necessity of this manpower for the German war economy. Instead, they supposedly sent the first ten transports of Jews from Łódź to Chełmno for wholesale slaughter, and only later, in August, did they allegedly notice their "mistake," and directed the remaining Jews to Auschwitz!

On the other hand, it is an incontrovertible fact that, at the beginning of 1944, the Reich authorities were in desperate need of manpower, as I have extensively documented in Chapter 1.2.

---

[334] On 6 November 1942, SS *Gruppenführer* Heinrich Müller sent the following telegram to all commandants, commanders and commissioned officers of the State Police and the SD with the subject "Incarceration of Jewish inmates in the concentration camps" (PS-1063):

"The Reichsführer SS and Chief of the German Police has ordered that all concentration camps in the Reich be made free of Jews, and that all Jews be transferred to Auschwitz Camp and the prison camp Lublin. The Inspector of Concentration Camps has already issued the corresponding transfer orders. The respective Concentration Camps will report about the transfers of such inmates."

The contradiction resulting from the orthodox thesis has no logical solution, because the problem is badly set up. Indeed, here we start from the unproven assumption that the first ten transports were sent to Chełmno for the purpose of extermination. But on what is this assumption based?

Clarification of this question is crucial, because from the orthodox perspective, the alleged extermination at Chełmno validates the alleged extermination at Auschwitz. However, if the former is false, there is no reason to assume the latter to be true.

2.4. Alleged Transports to Chełmno

An official publication of the State Museum in Łódź from 1999 states that from 23 June to 14 July 1944, ten transports were sent to Chełmno, and 7,196 Jews from the Łódź Ghetto were killed there.[335] However, the source of these deportations is not given. Page 97 of Baranowski's book contains reproductions of the top part of the first page and the bottom part of the last page of the transport list of 23 June 1944, again without giving any source.

Two types of name lists concerning these ten transports are preserved in the Łódź State Archives: the first groups the names in alphabetical order on individual sheets for each letter (e.g., for the 23-June transport, last names beginning with the letter A are listed on pages 1 and 2, those beginning with B on p. 3, etc.).[336] The second group consists of normal name lists with last names in consecutive alphabetical order.[337] I transcribe the relevant data in the following table, adding the composition of some transports resulting from the partial set of documents titled "List of the I [/II/III/IV/VII] transport"[338] and from the "Daily Report" of 5 July 1944 (transports No. V and VI, number of men and women, without mentioning children).[339] The number of deportees appearing in the "Daily Reports"[340] of the days when the transports left (see last column) is slightly different than those on the Transport List only in two cases:

---

[335] Baranowski, pp. 94, 99-101; the claimed number of victims is wrong, as I explain later.
[336] APŁ, PSZ, 1309.
[337] APŁ, Mikrofilm Nr. 19491, syg. 870.
[338] GFHA, Catalog No. 342.
[339] APŁ, Mikrofilm Nr. 19704, syg. 1087, p. 383.
[340] *ibid.*, pp. 359-398.

Table 2.2: Initial Ten Evacuation Transports from the Łódź Ghetto

#	d/m	Deportees acc. to Transport Lists	Adults		Children		Deportees acc. to Daily Reports
			M	F	M	F	
1	23/6	561	270	290	1	/	561 (562)[341]
2	26/6	912	360	552	/	/	912
3	28/6	799	257	546	/	/	803
4	30/6	700	203	497	/	/	700
5	3/7	700	*182*	*518*	/	/	700
6	5/7	700	*212*	*488*	/	/	700
7	7/7	700	243	457	/	/	700
8	10/7	700					700
9	12/7	700					700
10	14/7	699					700
Totals:		7,171					7,176

The "Daily Report" of 30 June summarizes the strength of the transports of 23, 26, 28 and 30 June, that of July 5 the strength of the transports of 3 and 5 July, and that of 14 July gives the total figure of 7,196 deportees,[342] but this is a typographical error, because adding up the number of deportees of the individual transports yields a total of 7,176. The erroneous figure of 7,196 appears in virtually all texts of orthodox Holocaust historians dealing with this issue, which is striking evidence of their carelessness. This is even true for Patrick Montague's book on the Chełmno Camp. In his summary of the deportations to that camp, he lists the ten transports mentioned earlier, but does not escape the orthodox fixation on this number, although he erroneously attributes to the sixth transport (5 July 1944) 709 deportees (rather than 700), which brings his actual total to 7,186.[343]

The decisive question to ask here is: what documentary evidence exists that these ten transports were actually sent to this camp? The answer is simple: None.

This is so true that Polish-Jewish historian Artur Eisenbach wrote in his well-known documentary collection on the Łódź Ghetto in 1946, with reference to the evacuation of the ghetto (Eisenbach 1946, p. 265):

> *"At that time, the Chełmno Camp had already been liquidated, so the Jews were sent to Auschwitz and other camps."*

In this context, he mentioned the first three transports in the table set forth above (*ibid.*). It is thus clear that he, who had studied the documentation in

[341] The "Daily Report of 23 June has 562 (*ibid.*, p. 359), which is later corrected to 561 (see below).

[342] *ibid.*, pp. 374, 383, 398.

[343] Montague, p. 187. The author mentions the figure 7,196 on p. 185 and again on p. 187 as "Total for 1944."

the possession of the Central Jewish Historical Commission, did not have even the slightest hint that the above-mentioned ten Jewish transports went to Chełmno.

Even if one assumed that the ten transports in question had contained Jews unfit for work (which they did not, as I will show later), then the same insoluble problem would still remain: why were these allegedly unfit people sent to Chełmno? And why was another sizeable portion of deportees unfit for work diverted to Auschwitz?

The Bonn Jury Court that had tried 13 former members of the SS *Sonderkommando* operating at Chełmno, stated in its grounds for the judgment of 30 March 1963 (Rückerl, p. 293):

> *"Although it is true that it is not expressly stated in the statistical lists that these transports went to Chelmno and not to Auschwitz, as had been the case since August 1944. However, this follows from the credible testimony of witness Z., who himself came to Chelmno with the 7th or 8th transport, and stated that the total number of all transports to Chelmno was ten to twelve. The jury court is therefore convinced that the above-mentioned ten transports went to Chelmno, and that therefore at least 7,000 Jewish people were killed in Chelmno during the second camp period."*

The witness "Z." was Mordechai or Mordka or Mieczysław Żurawski, who claims to have been deported to Chełmno. The name Zorawski Mordka does indeed appear on the seventh labor-evacuation list from the Łódź Ghetto, which bears the date 7 July 1944,[344] but this does not mean that the transport in question was sent to Chełmno, and that its deportees were exterminated there. It all depends on whether one is inclined to believe a simple testimony from 1945.[345] In fact, there is no document supporting this, and the transport lists only state that the deportees have "traveled away from the Litzmannstadt Ghetto for work."

Already earlier, other Jews had been transferred "for work outside the [Lodz] ghetto": 750 on 4 March, and 850 on 10 March 1944.[346] As Artur

[344] "Zur Arbeit aus Litzmannstadt-Getto am 7.7.1944 ausgereist." APŁ, PSZ, 1309, p. 250. Mikrofilm 19061, sygn. 442, p. 84 (list of names). In both lists Zorawski is the last one, No. 700. The relevant date of birth is 1910, and Żurawski was born on 11 June 1910 (Pawlicka-Nowak, p. 131), so they are undoubtedly the same person.

[345] This witness was dealt with by Mattogno 2017, pp. 62f. Polish-Jewish black propaganda had set in motion as early as January 1942, and developed considerably in the following years (see Sakowska, in particular pp. 23-25; and Tyszkowa). By 1945, the "eyewitness" Żurawski could draw on an extensive propaganda resources for his accounts of that camp.

[346] APŁ, PSZ, 1223, pp. 60-73, 12-59 (name lists of those transferred). The second list is titled "To work on 16 [sic] March 1944 from Litzmannstadt Ghetto," but it is accompanied by a note addressed "To the Office for Resettlers," which reads: "The Central Prison sends in the enclosure a list of names of persons who left the Z.G. for work outside the ghetto on 10 March 1944." *ibid.*, pp. 12f. The "Daily Report" of 4 March 1944 lists

Eisenbach informs us on the basis of documents kept in the archives of the Jewish Historical Institute in Warsaw, these 1,600 Jews were sent to the armament factories in Skarżysko-Kamienna, a locality located about 45 km southwest of Radom (Eisenbach 1961, p. 568). It appears from the Transport Lists that the deportees, for the most part, belonged to the age bracket spanning from 18 to 45 years of age.

The notes headlined "File memo: number of Jewish inhabitants in the Ghetto," which report the daily change in population (according to the pattern population /admission /departure/ population of the next day) broken down by "adults" and "children."[347] These notes list a "departure" of 750 "adults" on 3 March as "traveled away (deployed for work outside of ghetto),"[348] and one of 850 more on 9 March with the reason "transport away to external work places."[349] These documents confirm that the above two transports did not include any "child."

The "Daily Report" of 8 February 1944 reported the following "file memo":[350]

> *"Subject: Sending 1,500 workers outside the ghetto.*
> *1,500 healthy workers are to be sent outside the ghetto. They should be physically and mentally fit, so that they can be trained and educated for special purposes. No large luggage is to be taken along; the workers are to be equipped only with sound footwear and winter clothing. The transport should probably go in two groups of 750 workers each."*

The "Activity Report March 1944" contains a detailed statistical analysis of the activities in the ghetto during this month. The "Reporting month March 1944" of the "Department Registry and Vital Statistics" informs us that during this month there was a "departure for work outside the ghetto" of 1,670 people (1,320 men and 350 women),[351] which included the 1,600 deportees mentioned earlier. The "Reporting month March 1944" of the "Department Labor Exchange" reports the following:[352]

> *"As of 1 March 1944,..... 7,004 workers were employed outside the ghetto.*
> *In the course of March 1944 ..... 1,670 workers*

---

as "Expulsions": "750 men for work outside the ghetto"; and that of 10 March: "850 /men and women for work outside the ghetto/." APŁ, Mikrofilm Nr. 19704, syg. 1087, pp. 158, 175. However, the "departure" of these deportees was recorded on 3 and 9 March. See below.

[347] Here, "children" were children 8 years old and under (birth years of 1936-1944), as I will explain later.

[348] APŁ, Mikrofilm Nr. 21322, sygn. 29238, p. 647.

[349] *ibid.*, p. 642.

[350] APŁ, Mikrofilm Nr. 19704, syg. 1087, pp. 98-99.

[351] APŁ, Mikrofilm Nr. 21289, sygn. 29205, p. 67.

[352] *ibid.*, p. 72.

went to work outside the ghetto.
Together..... 8,674 workers
During the month of this report, no workers were reported to have died or to have returned to the ghetto.
Thus, the number of workers outside the ghetto as of 31 March 1944 ..... 8,674 workers"

This demonstrates that the phrase "went to work outside the ghetto" had a literal meaning. It is therefore completely abusive and unjustified to consider the equivalent phrase "traveled away from the Litzmannstadt Ghetto for work" as a kind of "code language" hiding the claimed fact that they were sent to their extermination instead.

The documentation of the administrative office of the Litzmannstadt Ghetto that has been preserved contains various information about this type of deportation.

25 February 1944[353]

"Subject: Litzmannstadt Ghetto.
With NL 9059 dated 10 Feb. 44 it was reported that a transfer of Jews from the Litzmannstadt Ghetto for use in the armaments industry was planned. In particular, unskilled laborers were to be selected.
In addition, the Research Center was able to learn from the local State-Police office that Jews from the Litzmannstadt Ghetto were to be employed in armaments factories in Czestochowa and near Sosnowitz. About 1,500 Jews were planned to be deployed."

14 July 1944[354]

"Subject: Administrative Office Ghetto Litzmannstadt (Eldest of Jews)
File: NL 9834 of 10 July 1944.
When the above report was handed over, RR [*Regierungsrat*, government councilor] *Kucke informed Dv. Seemann that not only transports would be composed of Jewish prison inmates, but that other inhabitants of the ghetto would also be pulled out. RR Kucke added that Jews had been requested from the Generalgouvernement, who were probably to be used for the construction of fortifications. However, one ought to resort to prison inmates in order to spare the ghetto workers, who mainly worked for the Wehrmacht."*

24 July 1944[355]

"Subject: Dissolution of the Litzmannstadt Ghetto.

[353] Litzmannstadt, den 25. Februar 1944. MzA Litzmannstadt Nr. 491. YVA, O.51-13, p. 280. MzA = *Meldung zu Auswertefragen*, report on evaluation questions.
[354] Litzmannstadt, den 14. Juli 1944. MzA Litzmannstadt Nr. 546. YVA, O.51-13, p. 274.
[355] 24. Juli 1944. MzA-Litzmannstadt Nr. 552. O.51-13, p. 317.

> *Government Councilor Kucke of the Litzmannstadt State Police informed Fstl. Nau on 22 July that, during a meeting held a few days ago, it had been decided to dissolve the Litzmannstadt Ghetto, and to begin the removal of the Jews to the Old Reich this week. Government Councilor Kucke added that the Jews, in their majority, posed too great a danger to the German population of Litzmannstadt in the event of unrest."*

This makes Strzelecki's above-mentioned explanation even more nonsensical, because the Reich authorities transferred Jewish workers from the ghetto for the "armaments industry" already in March 1944, then forgot about this need for workers, and in June-July had the Jewish workers from the ghetto gassed in Chełmno, but then realized this "mistake," since Chełmno had been shut down in 1943, hence they then sent the Jewish workers to Auschwitz!

Returning to the 7,171 ghetto dwellers transferred between 23 June and 14 July 1944, the name lists are of crucial importance in understanding whether these Jews were really deported "for work." Indeed, for 6,781 people on these lists, birth dates ranging from 6 to 70 years of age are given. However, the extreme dates are exceptions: there are only three children aged 6; four 7-year-olds; seven 8-year-olds; and eight 9- and 10-year-olds each. Likewise, the lists contain only one elderly person aged 70, 69 and 66; two aged 65; six aged 64; two aged 63; seven aged 62; four aged 61; and 17 aged 60. The age distribution of deportees is illustrated in the following table.

Table 2.3: Age Distribution of Deportees on First Ten Transports

Age Bracket	Deportees
Up to 8 Years	14
From 9 to 14 Years	181
From 15 to 20 Years	1,662
From 21 to 30 Years	2,300
From 31 to 40 Years	1,341
From 41 to 50 Years	917
From 51 to 60 Years	342
From 61 to 70 Years	24
Total:	6,781

The deportees were taken from all of the ghetto's departments. On the day of the deportation each department received a notice saying:

> *"Please remove the following persons from your records with immediate effect, as they have left today for work outside the ghetto:"*

This was followed by a list with "Serial Number," "Reg. No.," "Last and First Name" and "Address" of the deportees.[356] 84 notices in my possession, sent to as many departments, contain the names of 682 deportees. The deportees taken from each department ranged from one to a maximum of 45. The breakdown results from the following table:

Table 2.4: Notices to Ghetto Departments, Grouped by Number of Workers Withdrawn

# of Notices	# of Names	# of Notices	# of Names
12	1	2	15
7	2	2	16
10	3	2	17
7	4	1	18
4	5	1	19
6	6	1	21
4	7	2	22
8	8	1	24
4	9	1	25
3	10	1	40
2	12	1	45
2	14		

These were therefore people who were already working in their respective department, so they were evidently skilled at their work.

The State Archives in Łódź also has a folder titled "Eldest of Jews in the Łódź Ghetto. Statistics of youth employed in wards and sectors. Gender, age, position, length of employment,"[357] which contains 96 forms sent monthly "to the statistics department Kirchplatz 4," from each enterprise, department, or productive and administrative sector in the ghetto. The cards concern the "Balance of young people at the last day of the month" (the month is May 1944). Each card has three pre-printed forms. The first ("Number of young people by birth year") is broken down by age group – usually 1927 to 1935 – and by gender ("male" and "female"), with their respective totals. The second, bearing the same title, shows "type of employment," "type der remuneration" and "work duration," and is similarly broken down by gender. The third shows "monthly changes."

The enterprise completing the form is usually indicated by a stamp in the upper left corner of the form. Adding it up, it appears that there was a

[356] APŁ, Mikrofilm Nr. 19919, syg. 1302. See Doc. 8 and Table 2.II in the Appendix.

[357] "Przełożony Starszeństwa Żydów w getcie łodzkim. Statystyka zatrudnionych młodocianych w wydziałach i resortach. Płeć, wiek, funkcje, długość trwania pracy," APŁ, Mikrofilm Nr. 19506, syg. 885.

total of 4,996 young people in the age group of 9 to 14 (birth years 1935 to 1930). I give the respective numbers in the following table:

Table 2.5: Children Doing Child Labor in the Łódź Ghetto

Birth Year	Age	#
1930	14 years	975
1931	13 years	864
1932	12 years	1,244
1933	11 years	792
1934	10 years	432
1935	9 years	689
	Total:	4,996

In some departments, 9- and 10-year-olds were particularly numerous (see Documents 9-12). However, in the transports between 23 June and 14 July 1944, as shown in Table 2.3, there were only 181 9- to 14-year-olds, 3.67 percent of the total number of deportees.

In the following table, I transcribe the data given in the series of reports already mentioned "File memo: number of Jewish inhabitants in the Ghetto," for the period 23 June to 19 July 1944 (the last report).

Table 2.6: Number of Jewish Inhabitants in the Łódź Ghetto, 23 June through 19 July 1944

Date [d/m/44]	Adults	Children	Total	Page[358]
23/6	71,738	4,641	76,379	360
24/6	71,672	4,639	76,311	360
25/6	71,672	4,640	76,312	360

15/7	66,971	4,635	71,606	346
16/7	66,971	4,635	71,607	345
17/7	66,235	4,633	70,868	345
18/7	66,213	4,633	70,846	343
19/7	66,194	4,633	70,829	344

The *Ordnungsdienst* (Jewish Ghetto Police) also prepared a daily report on changes of the ghetto population, which recorded the total in the morning, admissions, departures and the total for the morning of the next day. It was divided into the headings set out below.

In the following table, I summarize the data from the report dated 24 June 1944, which accounts for the changes of the day before:[359]

Table 2.7: Daily Report on Changes of the Łódź Ghetto Population, Jewish Ghetto Police, 24 June 1944

	Adults		Children		Together		Total
	M	F	M	F	M	F	
23 June 44	29,010	42,728	2,323	2,318	31,333	45,046	76,379
Deduction Death Cases	11	5	1	1	12	6	18
Deduction Departed	50	0	0	0	50	0	50
Deduction Departed	270	290	1	0	271	290	561
24 June 44	28,679	42,433	2,321	2,317	31,000	44,750	75,750

For both groups registered as departures (of 50 and 561 people), the same phrase is given: “Traveled away for work outside the Ghetto on 23 June 1944.”

The total ghetto population on 24 June (75,750 people) results from deducting the two departed groups from the previous total. The figure that appears in Table 2.6 (76,311 people) does not take into account the second

[359] APŁ, Mikrofilm Nr. 18958, syg. 339, p. 38.

departed group, in deference to a specific order that the head of the Ghetto Police communicated to the "6th Police District" in these terms:

> *"On the instructions of the Getto administration, evacuation transports are to be included in the report on changes of the population only after 10 days in each case."*

The above-mentioned report was therefore withdrawn and replaced by another, in which the departure of the first transport were not recorded,[360] which explains the difference in the above two totals.

In the variations of Table 2.6, the departures concerning the deportees of the 10 transports of June-July 1944 is only partially indicated and, curiously, after nine days, instead of the prescribed ten. Only the first four transports, of 23, 26, 28 and 30 June, are recorded there in the variations of 2, 5, 7 and 9 July.

The "List of employees, cut-off date: 22 July 1944" /based on the reports of the following work sites" gives a very detailed account of those employed in the 143 ghetto departments: 63,856 people, including 26,273 men and 37,583 women.[361]

The total of 63,856 people, which is 2,338 lower than on 19 July (66,194), evidently includes the departure of at least three other transports.

During the period of the first wave of deportations, the number of children did not change significantly. It dropped very slightly from 4,641 on 23 June to 4,633 on 19 July.

The 24-July report mentioned above (Table 2.7) specifies that there were 2,323 male and 2,318 female children.

There is also an "List of children in the ghetto under approximate indication of years of birth; cut-off date: morning of 15 July 1944."[362] which gives detailed statistics of the boys and girls born from 1935 to 1944, as shown in the following table. In the last column, I add for comparison the data from the 1 March 1944 statistics.

---

Table 2.8: Children in the Łódź Ghetto by Birth Year, 15 July 1944				
Birth Year	Boys	Girls	Together	1 March 1944
1944	155	153	308	94
1943	105	83	188	190
1942	87	104	191	192
1941	106	84	190	196
1940	220	239	459	465
1929	382	375	757	769
1938	463	445	908	923
1937	470	492	962	980
1936	329	343	672	686
1935	414	366	780	792
Totals:	2,731	2,684	5,415	5,287

Two important facts can be inferred from this table. The first is the age definition of "children." On 15 July, as the above table shows, there were 4,635 "children" in the ghetto, but on the same day the sum of "boys" and "girls" was 5,415. Subtracting from this figure the total number of those born in 1935 (780) gives, precisely, 4,635, so the "children" listed in the "file memo" statistics were those born from 1936 to 1944, that is, those 8 years old and under. The second figure is that the total number of "children," increased from (5,287 – 792 =) 4,495[363] to 4,635. The largest increase was in new births, which had a positive balance of (308 – 94 =) 214 new births in 1944.

All this categorically rules out a policy of evacuating those unfit for work for the purpose of extermination, beginning with children.

The presence of the above-mentioned few children in the June-July 1944 transports can be explained in this way: the deportees were not only selected by departments, but also by family, as is evident not only from the last names and addresses of the deportees, but also from the documents mentioned below.

For example, one of the three 6-year-old children, Johanna Dahl, born in 1938, was deported with the third transport together with Greta Dahl, born in 1912, evidently her mother. Both lived at the same address: Kräuter[strasse] 25.[364] The second child born in 1938, Dora Gerstel, was deported with the second transport together with Edith Gerstel, born in

[363] The statistics "*Gettobevölkerung nach Berufs- bewz. Beschäftigungsgruppen. Per 1. März 1944*," broken down by men and women, lists in alphabetical order about 60 activities; at the end, the number of "children," a total of 4,495 is given (2,448 boys and 2,247 girls). APŁ, Mikrofilm Nr. 21344, sygn. 29260, pp. 12f.

[364] APŁ, PSZ, 1309, p. 58, numbers 136 and 137 of the list.

1904. Both lived at Siegfried[strasse] 14.[365] The third 6-year-old child, Moniek Sztycki, was deported with the fourth transport together with Gela Sztycka, born in 1900. Both lived in Hohensteiner [Strasse] 13.[366]

In conclusion, the ten transports of Jews mentioned earlier were not sent to Chełmno to be gassed, but really to concentration camps "for work."

In this regard, the "Announcement No. 416" of 16 June 1944 leaves no doubt:[367]

> *"Attention.*
> *Subject: Voluntary registration for work outside the ghetto.*
> *I hereby announce that men and women (including married couples) may register for work outside the ghetto. As far as families with children of an age fit for work are concerned, these children can also be registered for work outside the ghetto together with their parents.*
> *– These persons will receive full equipment such as: clothes, underwear and socks. Luggage can be taken in the weight of 15 kg per person.*
> *I would like to make special note of the fact that postal service has been opened for these workers, so there is a possibility to write.*
> *Furthermore, it is expressly stated that those persons who register for work outside the ghetto will be given the opportunity to immediately take the rations to which they are entitled, out of sequence.*
> *The aforementioned registrations will be made at the Ghetto Labor Office, Hamburgerstrasse 13, beginning Friday, 16 June 1944, daily from 8 a.m. to 9 p.m.*
> *Ghetto Litzmannstadt, 16 June 1944. (-) Ch. Rumkowski The Eldest of the Jews in Litzmannstadt."*

In the orthodox perspective, the premise of these deportations, as Andrea Löw explicitly states, was this (Löw, p. 163):

> *"The ghetto resident 'unfit for work' were to be murdered immediately in any case."*

However, the above-quoted "Announcement" was aimed at volunteers who could take children with them, as long as they were of an age "fit for work"!

The "Daily Report" of 23 June 1944 describes the departure of the first transport as follows:[368]

> *"To work outside the ghetto. This morning 1st transport.*
> *The 1st transport of 562 people left Radegast Station today at 8 o'clock in the morning. Before the transport departed, Gestapo Commissar Fuchs spoke a few reassuring words to the departing persons. He explained that*

[365] *ibid.*, p. 70, numbers 223 and 224 of the list.
[366] *ibid.*, p. 201, numbers 589 and 590 of the list.
[367] GFHA, Catalog No. 5812.
[368] APŁ, Mikrofilm 19704, syg. 1087, p. 359.

> *they were now going to work in the Reich, and that decent rations would be provided. Due to the lack of passenger cars, the loading was now done in a freight train, but a reloading into passenger cars is planned on the way. Let no one be alarmed.*
> *Of course, this speech spread like wildfire through the ghetto, and had a somewhat calming effect.*
> *The loading took place smoothly, without any incidents. Families were not separated. The* [floors of the] *freight cars were covered with straw.*
> *One man who was particularly desperate was returned to the central prison by Commissar Fuchs.*
> *The departing persons did not have to carry their luggage. Everything was brought to the station on trolleys. Everyone received their hand luggage at the station, while the larger luggage was stowed in separate freight cars. Everything was neatly marked with numbers. The treatment of the people at the station was decent."*

The pre-printed form "Departure Request" for July 1944 stated:[369]

> *"Luggage allowance is 15-20 kg per person. It must include a small pillow and a blanket. The luggage should be packed in the best possible manner. Food is to be brought along.*
> *Family members may join those asked to depart. All ration cards are to be brought along."*

I pointed out earlier that children under the age of 9, hence those unfit for work par excellence, were virtually untouched by the deportations.

The documents also show that the deported Jews were not only fit for work, but, as it were, they were *the fittest* at work.

The "Application for allocation of allowance cards for long-hours, long-distance and nighttime workers" records the weekly presence in the ghetto of all employees and workers, who fell into these three categories. In the following table, I summarize the data concerning the employees for the period from 20 April to 16 July 1944.

[369] GFHA, Catalog No. 436.

Table 2.9: Number and Types of Employees in the Łódź Ghetto

Week [d/m/44]	Employees	Long-Hour	Heavy-Duty	Nighttime	Page
24-30/4	72,438	2,884	24,124	2,223	165*

* APŁ, 22104/30013; † APŁ, 22102/30011; ‡ APŁ, 22101/30010

From 23 June to 14 July 1944, 7,171 Jews were deported from the ghetto. Before that, the ghetto had 71,556 employed Jews, afterwards there were 64,366, a decrease of 7,190. This shows that all deportees had been employed, so none of them was unfit for work.[370] The categories of "long-hour, heavy-duty and nighttime workers" included the quintessential able-bodied people, since they had to do the most strenuous work. In the week of 12-18 June 1944, they totaled 29,587; in the week of 10-17 July, this number went down to 21,539. Hence, they decreased by 8,049 workers. In practice, workers par excellence were deported from the ghetto.

Therefore, the statement appearing in the "Daily Report" of 26 June 1944 that the second transport, in addition to numerous young people, "among them numerous volunteers,"[371] included "also quite a lot of weak and sickly people,"[372] cannot be true.

As a rule, in fact, sick persons were not deported. They were allowed to submit a request, accompanied by a doctor's certificate,[373] to the Interdepartmental Committee, which sent it to the health-care department, with a

[370] The ghetto population during the weeks of 16 June to 2 July, 3-9 July and 10-16 July was 72,433, 74,812 and 76,243, respectively, figures from which the following percentages of employment are derived: 88,8%, 88,7% and 89,9%.

[371] Volunteers reported to the ghetto's labor office, which drew up lists that it sent to the Interdeparmental Committee. Various lists from 28 June to 3 July, 8, 9 and 13 July 1944 can be found at the beginning of the file APŁ, Mikrofilm Nr. 19917, syg. 1300.

[372] APŁ, Mikrofilm Nr. 19704, syg. 1087, p. 367.

[373] Many medical diagnoses are collected in the file APŁ, Mikrofilm Nr. 19916, syg. 1299.

request to examine each case. These communications ended with the phrase:[374]

> *"We request that the cases be examined by a medical commission, and that the findings be sent to us as soon as possible."*

The decision of the health-care department was then communicated to the Central Prison, which, if so ordered, removed the names of certified sick persons from the transport lists. The Interdepartmental Committee also informed of the decision the department in which the person worked who had submitted the request. For this, there was a pre-printed form for granting, and one for denying the request. They contained the same items, concerning the applicant's position, and differed in the final phrase: "The request … was granted," and "The request … was denied." A file containing a portion of these documents contains about 50 forms of the first type ("granted") and nearly 550 of the second ("denied").[375] Probably many diagnoses had been drawn up by complacent physicians, and had not passed the health-care department's most rigorous scrutiny. There are many communications from the Interdepartmental Committee to the Central Prison with lists of persons exempted from deportation. Some were published by Strzelecki.

A communication dated 6 July 1944 contains four names. The Polish historian comments (Strzelecki 2005, p. 200):

> *"According to extant KL Auschwitz document, Paul Ascherman and Chaim Unikowski*[376] *(both from Prague) were in fact deported."*

Another communication presents a list of 23 names, and is dated 12 July 1944. Strzelecki states (*ibid.*, pp. 201f.):

> *"According to extant KL Auschwitz documents, Ruchla Gombińska and Szek Ajzyk were eventually deported to the camp."*

He makes a similar comment about another list also dated 12 July (*ibid.*, p. 203):

> *"According to extant concentration camp Auschwitz documents, Michał Poncz was sent to KL Auschwitz."*

However, it must be considered that, from his point of view, the essential question to ask is whether Jews exempted from deportation to Chełmno for the purpose of extermination because they were sick, were deported there anyway despite the health-care department's decision to the contrary. To ascertain this, it is sufficient to check whether these names appear on the

---

[374] APŁ, Mikrofilm Nr. 19919, syg. 1302, p. 3. This file contains numerous documents of this type.

[375] APŁ, Mikrofilm Nr. 19921, syg. 1304.

[376] A handwritten note in Polish states that "Unikowski Chaim – Mühl. 91 – is on the list of colonial goods of 6 July 1944, number 96." APŁ, Mikrofilm Nr. 19917-1300, p. 113.

transport lists after the date of the communication. It is a fact that none of these names appear there.

It follows from this that sick people were exempted from extermination!

Unable to accept this absurdity, Strzelecki mischievously suggests that in any case these people were eventually deported to Auschwitz. However, again in his perspective, all *but* about 1,400 of the ghetto inhabitants were deported to Auschwitz. Hence, his comments about the alleged transport lists to Chełmno are patently captious.

In conclusion, mostly experienced workers fit for labor were deported to Chełmno, excluding children under 9 years of age, the old and the sick! It is thus clear that the above-mentioned ten transports were not sent to Chełmno, but to labor camps.

Therefore, Strzelecki's false problem of the "change of course, from Chełmno to Auschwitz" also vanishes: both sets of deportations – those of June-July 1944 as well as those of August – had labor as their only purpose.

It should not be forgotten that other small transports, in which orthodox Holocaust historians have never shown any interest, also departed "for work outside the ghetto" during this period. One of them with 50 men is the one dealt with in the report I have summarized in Table 2.7. It left the ghetto on 23 June 1944, and the relevant list of names shows that those transferred were between 18 and 45 years old.[377]

Where were these workers sent?

Regarding the 1941 deportations, I quote a report that appeared in 21 July 1944 in the well-informed German-language Jewish magazine *Aufbau*, published in New York (p. 10):

> *"Baranovichi – Green 'life cards.'*
> *In 1941, the Germans deported thousands of Jews from Lodz to Baranovichi – southwest of Minsk. 12,000 people were locked in a ghetto. Although they had to work for the Germans, they were not otherwise harassed until March 1942. Then, however, the Nazis began to issue green cards. These were work cards distributed to those capable of work. Those who did not receive one were, so to speak, condemned to death. From 6 o'clock in the evening until 1 o'clock in the morning, the Nazis called out the names of the lucky ones who were allowed to stay alive. Twelve thousand desperate people tried with claws and teeth to make their way into the house where the distribution point was. Women and children were trampled on, and those who had passed over tried to snatch cards from those who had received them."*

[377] APŁ, Mikrofilm Nr.19061, sygn. 442, pp. 2f.

According to Montague (2012, pp. 185f.), about 17,000 Jews had been deported to Chełmno from the Łódź Ghetto up to the end of February 1942 – 12,000 of whom had evidently ended up in Baranovichi, not in the phantom "gas vans"!

2.5. Transports to Auschwitz

The orthodoxy insists that the second and largest set of transports from the Łódź Ghetto was directed to Auschwitz. This claim creates several fundamental problems:

1) How many Jews were deported there?
2) In how many transports?
3) How many people were in each transport?
4) On what days did the Jewish transports arrive at Auschwitz?
5) How many transports arrived each day?
6) How many Jews were registered?
7) How many Jews were admitted to the Birkenau Transit Camp without registration?

Orthodox Holocaust historians have always limited themselves to dealing merely with Points 1 and 6. Strzelecki also dealt with Point 7, in the way I will expound below.

In his study devoted to the number of Auschwitz victims, Franciszek Piper states that 60,000 to 70,000 Jews were deported to Auschwitz from the Łódź Ghetto in 1944 (Piper 1993, p. 127). In the table titled "Transports with Jews from Poland (in its pre-war borders) to Auschwitz," he lists Jewish transports from Łódź – taken from Danuta Czech's *Auschwitz Chronicle* – and estimates a total of 55,000 to 65,000 deportees (*ibid.*, p. 186). Strzelecki starts from the figure that appears in what he claims to be the report of 31 July 1944 [yet in fact 30 July[378]] of the *Kronika Getta Łódzkiego* (*Chronicle of the Łódź Ghetto*): 68,561 people, from which he subtracts about 1,400 people who avoided deportation. Hence, he assumes that "approximately 67,000 Jews were deported from the Łódź Ghetto to KL Auschwitz" (Strzelecki 2005, p. 37).

The State Archives in Łódź, which contain an incredible amount of documents about the ghetto, including hundreds of statistics of its population and transport lists, curiously retains no statistics pertaining to August

[378] Tagesbericht von Sonntag, den 30. Juli 1944. Tageschronik Nr. 211. APŁ, Mikrofilm Nr. 19704, sygn. 1087, p. 1130. This is the last Tagesbericht/daily report.

1944 and, more importantly, no name lists of transports from August 1944. Chronologically speaking, the last extant lists of transports are those, already examined, for the period 23 June to 14 July. Only one document exists on the deportations of August 1944, which I will examine below. The extant "Daily Reports" stop on 30 July 1944.

Given the unique statistical procedure adopted in the "Daily Reports," it is worthwhile to preliminarily verify the reliability of the figure of 68,561.

The "Daily Reports" list daily changes in the ghetto population, with the indication of "population," "death cases," "births," "departures," and "admissions." The entries for "death cases" and "departures" (mostly transports from 23 June to 14 July) constitute deductions, while "births" and "admissions" were additions.

Theoretically, the ghetto population of a given day is obtained in this way: population of the day before minus deductions plus additions. For example, on 23 June, the ghetto population was 76,379; the next day, there were 18 death cases, so on 24 June, the ghetto population was (76,379 – 18 =) 76,361.

In fact, however, this procedure is followed only occasionally in the "Daily Reports." At first glance, the figures there appear scrambled. In the following table, I report them in Columns II-V. The last two columns contain the actual figures resulting from the above procedure.

Table 2.10: Łódź Ghetto Population Figures in "Daily Reports" versus Calculated Figures

Date	Deaths	Births	Departures Daily Rep.	Population Daily Reports	Actual Departures	Actual Population

30/7	1	1*	/	68561	/	68630

For 2-5, 12 and 16-17 July, the population is not given. The figures in the table are taken from the "File memo: number of Jewish inhabitants in the Ghetto" (see above, Table 2.6).

As is clear from the table, first of all, departures are never recorded on the day they took place, which followed a specific order, as I explained earlier. What is more, only seven transports are mentioned, and incorrectly too, because on 13 and 15 July, the same transport is counted (the fifth, that of 3 July), and even the ninth transport, that of 12 July, is recorded twice, both on 20 and 23 July.

On June 30, the population is 76,259 people. The next day, there were 17 death cases, so the proper figure should be (76,259 – 17 =) of 76,242, whereas it is 73,234, a decrease of 3,025 persons; the departures of the first four transports, of 561 + **912** + 803 + 700 = 2,976 persons (according to the figures in the "Daily Reports"), should be included here, but adding the above-mentioned deduction of 17 persons, the total shortfall results in 2,993, not 3,025.

The departure of **912** people (second transport) appears on 6 July, however, but is not deducted from the population of the next day, which still remains unexplained:

74,646 [6 July] – 18 (death cases) + 2 (births) [7 July] = 76,630, but in the relevant "Daily Report," the figure 74,643 appears.

On 1 July, the population is 73,234 people. On 6 July, it is 74,646, an increase of 1,412 people, with no admissions to the ghetto.

This brief analysis shows that the daily population statistics are unreliable. However, by virtue of shrewd manipulations, the final figure, that of 30 July, is almost identical to the real one: 68,561 versus 68,630.

As for the transportation issues (items 2-5 in the list mentioned earlier), a single document allows us to shed full light on a significant part of them. It is to be found in a file containing the ghetto's administrative documents, in particular the forms of payment by the ghetto administration for supplies, services or work it had received. For these transactions, the administration had a "Special Account No. 12300," into which also the sums of monies due were paid. The document in question is a "receipt" of RM 2,331, paid by the ghetto administration on 9 September 1944 to the 4th Company of Police Guard Battalion XIII, for the following activities:[379]

"With carrying out a total of nine transports, the following Jews were delivered to Auschwitz Concentration Camp:

On 5 Aug. 44	*562*
" 8 Aug. 44	*485*
" 11 Aug. 44	*2,508*
" 15 Aug. 44	*2,021*
" 18 Aug. 44	*2,496*
" 21 Aug. 44	*2,191*
" 24 Aug. 44	*2,146*
" 27 Aug. 44	*2,297*
" 30 Aug. 44	*2,254*
Total:	*16,960 Jews*

[signature]."

Another document, headlined "Pol. Guard Company Regensburg" and dated "Litzmannstadt, 7 Aug. 1944," lists "Leaders, subleaders and men of the transport unit," and includes 26 names. The first is that of the compiler of the document, First Lieutenant of the Protective Police and Company Commander Heinrich Herbst, who signed it (p. 216; see Doc. 14). The same signature is also found at the bottom of the "receipt" mentioned earlier. Next to each name is written in pencil the amount due: 135 RM for the first lieutenant, 108 RM each for one *Meister* and one *Hauptwachtmeister*,

[379] APŁ, Mikrofilm Nr. 21412, syg. 29326a, p. 215; document reproduced by Smolorz, p. 295. See Doc. 13. Subsequent page numbers from there unless stated otherwise.

90 RM each for one *Bezirksoberwachtmeister*, four *Zugwachtmeister* and 18 *Wachtmeister,* in total 2,331 RM. Each of these figures is divisible by 9 and, from the division, the amounts for each transport result, in order: RM 15, 12 and 10; RM 259 for all 26 men.

The nine transports mentioned earlier cover approximately 25 percent of the total number of deportees. They were escorted by the 4th Company of Police Guard Battalion XIII, which would suggest that the remaining 75% were accompanied by other companies of this battalion.

However, the document mentioned above is unique, and one cannot think of gaps in the above-mentioned file, because it provides the complete picture of payments made in August and September 1944.

Periodically, in fact, an account statement of "Special Account No. 12300" was prepared, which contained all payments made by the ghetto administration. We are interested in "Account statement of 20 September 1944 Special Account Nr. 12300," which covers the period from 1 March to 20 September 1944 (pp. 188-190). Here, the payment mentioned above is recorded in this way, dated 6 September (p. 189):

"Payment to Pol.Guard Battl. XIII, Litzmannstadt / Debit RM. 2,331"

In addition to this, there is only one other payment to a police battalion, dated 5 August, worded as follows (p. 188):

"Zahlung an Schutzpolizei, Transportkosten / Ausgang RM. 2.250 RM."

"Payment to protective police, transport costs / Debit RM. 2.250 RM."

The pertinent payment form states (p. 243):

"Receipt.

It is hereby confirmed to have received from the ghetto administration for the 1st Comp. 2nd Guard Battl. 9, of the protective polic RM 2.250,--. Litzmannstadt, 5 Aug. 1944."

This payment, however, referred to the ten transports of June to July mentioned earlier, as can be seen from an undated "Proof on transportation costs" (p. 244) consisting of seven columns, of which only the first four are filled in ("Serial No.," "Rank," "Last Name," "First Name"). It contains a list of 22 names with ranks of the protective police. A handwritten note next to the header reads, "10 transports Tel 12262 1 Comp. 1st Lt. Brandt" (First Lieutenant of the Protective Police Richard Brandt is the first name on the list). The following three empty columns are headed "Fees f. June," "Fees f. July," and "Receipt." At the bottom, again handwritten, is the number 2,250, the same amount as on the "Receipt."

Also linked to these transports is an "invoice" from the "Litzmannstadt Electric Streetcar Inc." to the ghetto administration dated 3 August, which states (p. 224):[380]

> *"For the provision of special trains for the journeys from Schlesing* [a Łódź city district] *to Main Cemetery on 5, 10, 12, and 14 July 1944 on the basis of the telephonic requests by 1st Lt. Gernhuber /each 1 car and 20 performed wagon km).*
>
> *4 cars = 80 wagon km at RM 0.48 = RM 38.48"*

Payment was made on 23 August, as is reflected in the account statement mentioned earlier, which states, "Payment to Litzmannstadt Electric Streetcar Inc., Litzmannstadt" (p. 189).

The file mentioned earlier contains only one other document that explicitly refers to the general evacuation of the ghetto, a "Payment instruction to the main treasury of the ghetto administration," dated 8 August 1944, in the amount of RM 50,000. It was paid to the "*Deutsche Reichsbahn*, Railway Station East," with the subject: "Payment at the behest of Head of Office, Mr. Hans Biebow, for transportation costs of Jews" (p. 242).

No doubt also related to Jewish transportation were the four payments to the Main Railway Station, bearing the wording "Payment to Railway Treasury Litzmannstadt, Main Railway Station" (pp. 188f.):

– 9 August: 50,000 RM
– 24 August: 50,000 RM
– 29 August: 50,000 RM
– 7 September: 26,790 RM.

The "Receipt" of the "Ticket Office Litzmannstadt East" of 16 August, in the amount of RM 120,000 (p. 239), also concerns evacuation transports.[381]

Three announcements issued by Chaim Rumkowski help to understand how the evacuation of the ghetto was carried out. "Announcement No. 420" of 5 August 1944 states:[382]

> *"At the instigation of the mayor of Litzmannstadt, the following is announced:*

---

[380] One "Wagenkm" corresponds to 2 km, because the wagon had to return to the starting point (*Zeitschrift für Transportwesen und Strassenbau*, Vol. XI, Berlin, 1894, p. 148). In this case, 4 cars had to travel 10 kilometers out and back again.

[381] The "Proof of Jews processed between 16 March and 2 April 1942 – Special Train" gives the travel costs per person (with 50% reduced fare) as RM 2.95 for the 147 km from Radegast Station (Litzmannstadt) to Prybylów (located 5 km southeast of Koło). (See Hilberg 1981, p. 146). If we extrapolated this data to the present case, it follows that the ticket price for the approximately 245 km to Auschwitz was about RM 4.90, and that the above-mentioned RM 120,000 covered the transportation costs of about 24,500 people.

[382] YVA, O.6-277.

On Tuesday, 8 Aug. 1944, are evacuated:
Enterprise 3 – tailor shop, Hanseatenstr. 53
and Enterprise 4 – tailor shop, Froschweg 13.
All preparations are to be made for the departure of these enterprises. The machines are to be packed as soon as possible.
The managers will be instructed to ensure that the employees of the enterprises line up together. They must also make all the necessary preparations at home to be ready for transport.
The maximum luggage weight is 15-20 kg.
Family members of employees will join the transport. This is to avoid separation of the relatives.
The departing persons have to gather at the responsible police stations."

"Announcement No. 421" dated 6 August 1944 advised that "Mr. Head of Office Biebow" would give a speech on 7 August at 10 a.m. "in the yard of the tailor shop, Hanseatenstr. 53, to the workers of the tailor enterprises Hanseatenstr. 53," then at 4 p.m. "in the yard of the tailor shop, Rembrandtstr. 16, to the workers of the tailor enterprises Mühlg 2." The presence of the workers' family members was also recommended "so that they receive clarification from Mr. Biebow about the program of relocation of the ghetto."[382]

"Announcement No. 423" was issued on 7 August 1944, and had the subject "Further sequence of enterprises to be relocated." It stated:[382]

"At the instigation of the Lord Mayor will leave the ghetto:
Wednesday, 9 August 1944,
the complete tailor shops: Mühlgasse 2 and Neustadtstrasse 28.
The members of these enterprises must gather with their family members at the central prison on Tuesday, 8 August 1944, until 12 noon at the latest. Food and lodging will be provided.
On Thursday, 10 August 1944,
the complete tailor shops: Rembrandtstrasse 8,
Rembrandtstrasse 14
and Rembrandtstrasse 16.
The members of these enterprises must gather with their family members at the central prison on Wednesday, 9 August 1944, until 12 noon at the latest. As mentioned above, food and lodging will be provided."

It can be inferred from this that the evacuation of the ghetto was carried out by departments, that families were not separated, and that machinery was packed up and taken along.

In addition, the already mentioned "List of employees, cut-off date: 22 July 1944" /based on the reports of the following work sites" allows us to know how many Jews belonging to the above departments were deported.

"Announcement No. 420" states that, on 8 August 1944, workers from tailor shop Hanseatenstrasse 53, which employed 179 men and 253 women, a total of 432, and tailor shop Froschweg 13, in which 249 men and 259 women were employed, a total of 508, were all to be evacuated. Therefore, on 8 August, (432 + 508 =) 990 workers plus their family members were to be evacuated, but according to the document cited earlier, the 4th Company of Guard Battalion XIII escorted 485 people on 8 August, presumably the 432 in question plus some family members.

"Announcement No. 420" contains two numbers:

On 9 August, workers from tailor shop Mühlgasse 2 (282 men and 373 women, a total of 655) and those from tailor shop Neustadtsstrasse 28 (276 men and 377 women, a total of 653 people) were to leave. The evacuees were thus to be (655 + 653 =) 1,308, plus their families.

On 10 August, three more shops of the tailor department, located at Rembrandtstrasse No. 8 (288 men and 388 women, total 676), No. 14 (355 men and 310 women, total 665) and No. 16 (237 men and 459 women, total 696), were to be evacuated. Therefore, (676 + 665 + 696 =) 2,037 workers plus their families were to be deported on this day.[383]

In the speech Biebow gave on 7 August 1944 to the workers of the tailor shop at Rembrandtstasse 16, to which I will return later, he stated:

> *"Subsequently, Mühlg. and Neustadt 8 will leave. According to the Eldest, this is 1000 men, with family members at least 2000 persons. So, if the wife works in the tailor shop, the husband currently in the carpet department, he goes along. Families go together to the various camps, are relocated; factories are built."* (Eisenbach 1946, pp. 267f.)

Reports from the ghetto administration show the following:

11 August 1944:[384]

> *"Finally, Czarnulla remarks that 3,000 Jews are being loaded at Radegast station today."*

12 August 1944:[385]

> *"On the evening of 11 August, Biebow reports to Czarnulla from the ghetto administration that 2710 (Jews?) left today. He (Biebow) had started at 6:00 a.m. sharp, and wanted to do it again the next day."*

---

[383] APŁ, Mikrofilm Nr. 21344, sygn. 29260, p. 16. "Aufstellung der Beschaeftigten Stichtag: 22. Juli 1944 /auf Grund der Berichte der nachstehenden Arbeitsstellen/." This is a list of all the enterprises in the ghetto, with their identifying number, the name of the work place, the address, the number of men and women who worked there, and the total number. It is divided into three parts: I: 86 enterprises; II: 32 enterprises; III: 25 enterprises. A total of 63,856 people were employed there, 26,273 men and 37,583 women.

[384] 11. August 1944. Verwaltungsstelle Getto, Litzmannstadt. YVA, O.51-13, p. 49.

[385] 12. August 1944. Verwaltungsstelle Getto, Litzmannstadt. YVA, O.51-13, p. 47.

In contrast to this, the report of the 4th Company of Police Guard Battalion XIII mentions 2,508 deportees.

28 August 1944:[386]

> *"Czarnulla from the Litzmannstadt ghetto administration, who is staying with the district leadership in Posen, asks Biebow on 28 August for numbers. Biebow states that about 60,000 Jews have been transported away, so that 8,000 are still in the ghetto. The next day, two more trains would be on their way, and it could be expected that everyone would be gone by 31 August."*

To draw more-precise elements from the documents set out above, we need to examine them in the context of the Glaser List.

2.6. The Glaser List

In the following table, I compare the data resulting from the Glaser List and the "List of Jewish Transports" regarding the arrival of deportees from the Łódź Ghetto at Auschwitz during the period in which they were recorded there (9 August to 18 September 1944).

Table 2.11: Jews Arriving at Auschwitz from the Łódź Ghetto – Glaser List versus Registered Deportees

18/9	/	150	B-10270–10419
Totals:	15,424	3,074[388]	

On 17 August, the Glaser List has eight arrivals, while the List of Jewish Transports has 270. On 24 August, the Glaser List has no arrival, while in the List of Jewish Transports has 222. This confirms that, even for the Jews from the Łódź Ghetto, the Glaser List refers to inmates sent to the Transit Camp, and does not include those regularly registered.

Jews from the Łódź Ghetto were registered on their day of arrival until 31 August; registrations after this date concern drafts from the Transit Camp. Until 31 August, 1,423 Jews had been registered, so the total number of Jews who arrived at Auschwitz was (15,424 + 1,423 =) 16,839.

[388] Strzelecki found 3,055 registered Jews (2005, pp. 56f.).

A problem arises here, however. Strzelecki publishes eleven inmate personnel cards concerning Jews residing ("*Wohnort*") in the Łódź Ghetto, which give the inmates' personal data, including the admission day at Auschwitz Camp ("Admitted on..."). In five cases, the admission date is incongruent. The relevant inmates are (page nos. of Strzelecki 2005):

– Abbe, Hersz, born in 1910, "Admitted on 8 Aug. 44" (p. 260)
– Ajzen, Hersz, 1928, "Admitted on 8 Aug. 44" (p. 244)
– Abramsohn, Dawid, 1929, "Admitted on 12 Aug. 44" (p. 244)
– Glowacka, Laja, "Admitted on 12 Aug. 44" (p. 262)
– Auer, Idek, 1923, "Admitted on 25 Aug. 44" (p. 261)

None of them appears as having been admitted on these dates on the List of Jewish Transports. To these, we can add the inmate personnel card of Dymant Marek, born in Łódź in 1927, who was admitted on 14 August 1944,[389] but there were no registrations on this day either.

The case of Pankowski Abram, born in Łódź in 1928, is problematic, because the archives of the former Sachsenhausen Camp have two inmate personnel cards for him: according to the first, he was admitted at Auschwitz on 12 August 1944,[390] according to the other on 24 August[391]

The registration numbers of the "B" series are consecutive and continuous, without any gaps, so one cannot imagine that the above-mentioned inmates were registered there. Moreover, the female List of Jewish Transports does not contain any records of Jews from Łódź, but Laja Glowacka was precisely a woman. The most likely thing, therefore, is that these Jews did not come directly from the Łódź Ghetto, but from other locations. We need to remember that, from March to July 1944, at least 8,841 Jews were transferred "for work" from the ghetto. To these, we must also add 90 Jews transferred on 4 May 1944;[392] 50 on 17 May;[393] 30 on 27 May;[394] 60 on 30 May;[395] and 50 on June 23. This yields a total of 280 Jews. Thus, before the beginning of the August mass deportation, more than 9,000 Jews had already been transferred, who had their residence in the ghetto. This residence passed into their inmate personnel card, which were compiled at the destination camps.

The account of the 4th Company of Police Guard Battalion XIII mentions nine transports to Auschwitz totaling 16,960 people. The first two

[389] ISD, 1424855.
[390] ISD, 1671771.
[391] ISD, 1671773.
[392] APŁ, PSZ, 1223, pp. 11f., list of names.
[393] *Ibid.*, p. 9, list of names.
[394] *Ibid.*, pp. 10, list of names.
[395] *Ibid.*, pp. 5f., list of names.

were rather small (562 on 5 August and 485 on the 8th), while the remaining seven transported included altogether 15,913 people, averaging 2,273 people per transport.

This police company carried out its mission every third day (with one exception: after the transport on 11 August, its next mission was four days later, on the 15th). This probably corresponds to one day out, one day back and one day off.

This poses a fundamental problem: since the 4th Company of Police Guard Battalion XIII escorted only nine transports, which police unit accompanied the others?

According to a rational organization of work, there should have been two more police companies, for example a 1st and a 2nd company of this battalion. These three units could have had to the following *hypothetical* order of service:

– 4th Company: 5 August → Auschwitz; 6 August → Łódź; 7 August: day off; 8 August → Auschwitz
– 1st Company: 6 August → Auschwitz; 7 August → Łódź; 8 August: day off; 9 August → Auschwitz
– 2nd Company: 7 August → Auschwitz; 8 August → Łódź; 9 August: day off; 10 August → Auschwitz
– 4th Company: 8 August → Auschwitz; 9 August → Łódź; 10 August: day off; 11 August → Auschwitz.

But in the extant documentation, there is no trace of any involvement of the other two companies, or any other escort unit, in these deportations.

Roman Smolorz, the only scholar who has published and examined the document in question, rightly notes that the 16,960 deportees who were escorted to Auschwitz by the 4th Company of Police Guard Battalion XIII constitute "one quarter (25.31%) of all Jews transferred there" (Smolorz, p. 294). However, he does not even ask by whom the remaining roughly 50,000 deportees were escorted, let alone address this question. In this regard he merely states (ibid., p. 297):

> *"Since the evacuation of the Litzmannstadt Ghetto had already begun before August 1944, it can be assumed that the 4th Company of the Guard Battalion XIII for special use also accompanied the ten transports with 7,000 people to Chełmno for extermination between 23 June and 14 July 1944. For the perpetrators, money was less of a motivation for conscientious service: the fees for the transports, as paid to the protective police, amounted to RM 2,250.00 in August 1944, according to a surviving source, and were paid from a special account no. 12300. However, since the Regensburg guard company was paid RM 2,331.00 from the same account*

(cf. Fig. 3), monthly running costs must be assumed here; further research is required here."

As demonstrated earlier, however, the escort for the ten transports in June-July 1944 was done by the "1. Comp. 2. Guard Battal. 9," which received for this amount of 2,250 RM.

Furthermore, Smolorz does not explain that all payments from the ghetto administration went through "Special Account No. 12300." He also fails to address the fact that the "Account statement for 20 September 1944 Special Account No. 12300," which, as demonstrated earlier, list all payments from 1 March to 20 September 1944, contains only this one payment of RM 2,331 to the 4th Company of Police Guard Battalion XIII for the above-mentioned nine transports.

Therefore, Smolorz sidesteps the fundamental problem stated above: who escorted the remaining approximately 50,000 deportees?

The statements quoted earlier by G. Fuchs, who in August 1944 was Gestapo commissar in Łódź, leave no doubt about this: he had been instructed by his direct superior "to supervise the transports," and:

"The Jewish Order Service led the transports to the ghetto train station, and handed them over to the police's transport escort squad there."

The problem to solve is: why is there no trace in the ghetto administration's account for any corresponding payments to these other police units for any service rendered?

In the "Account statement for 20 September 1944 Special Account No. 12300" mentioned above also appears a "Payment to Gestapo" of RM 20,000 dated 29 August, but also another one in the same amount already on 31 July.[396] This leads me to exclude that it was a payment for escort service of Jewish transports. The large amount also speaks against this: If a group of 26 policemen whose total pay was RM 259 was sufficient to escort one transport, these RM 20,000 would have been enough to cover (20,000 ÷ 259 =) over 77 transports, which is far too much.

Without more documents, it is impossible to solve this problem, and for the time being it is enough to have raised it.

Returning to the subject of deportation to Auschwitz, one must first fix its chronological limits.

Strzelecki states that the evacuation of the ghetto began on 8 or 9 August 1944 (Strzelecki 2005, p. 35), and that the last transport left on 29 August (ibid., p. 36). Julian Baranowski gives the period 9-29 August (Baranowski, p. 100). There is, however, a communication from Biebow dated 30 August that states:[397]

---

[396] APŁ, Mikrofilm Nr. 21412, syg. 29326a, pp. 1034-1035.

[397] Verwaltungsstelle Getto, Litzmannstadt. 31. August 1944. YVA, O.51-13, p. 42.

> *"Today (30 Aug.) at 6.00 o'clock, the ghetto had been cleared of the last Jews."*

A. Eisenbach states instead that the evacuation of the ghetto took place from 2 to 30 August (Eisenbach 1946, p. 266). However, the "Announcement No. 417" of 2 August 1944 says explicitly (Strzelecki 2005, p. 204):

> *"At the instigation of the mayor of Litzmannstadt, the ghetto has to be relocated. The factories go to work united with their families. The first transport leaves on 3 August 1944. Every day, 5,000 people have to turn themselves in. The luggage must not exceed 15-20 kg."*

The deportations thus took place from 3 to 30 August 1944, within 28 days. On average, (67,000 ÷ 28 =) 2,393 people were evacuated each day. It is documented that in seven transports (on 11, 15, 18, 21, 24, 27 and 30 August) 15,913 people were evacuated, an average of 2,273 per transport, which is almost the same average.

If the first two, decidedly anomalous transports of 562 and 485 deportees are also taken into account, this results in about 17,000 deportees in nine transports, and about 50,000 in 19, an average of about 2,630. This figure is somewhat higher than the highest documented figure: 2,508 persons for the 11-August transport. This is also the order of magnitude resulting from testimonies.

Szyja Lajzerowicz stated that he arrived at Auschwitz with a transport of 2,500 people (see Chapter 2.7). Jehuda Widawski asserted that his transport numbered 2,000 people (*ibid*., p. 336). Clandestine messages from the Auschwitz resistance, which I will deal with in Chapter 2.9, stripped of their fictitious embellishments, offer two other important clues. They mention a transport from the Łódź Ghetto containing 2,500 people – the same figure given by Lajzerowicz – and one of 40 railway cars, which means (2,500 ÷: 40 =) about 62 people per car, with luggage of 15-20 kg.

Therefore, to fall within the normal average, one would have to assume 21 transports = 2,380 people per transport. This implies that on 5 and 8 August, two transports left instead of just one. Sending just 562 and 485 deportees to Auschwitz, considering that on average each car contained 60 people, thus eight or ten cars, is implausible. I showed earlier that, according to "Announcement No. 420," 990 workers plus their family members were to be deported on 8 August. In the 7-August speech quoted earlier, Biebow alluded to the deportation of "1000 men, with family members at least 2000 persons." Hence, it is likely that about 2,000 people were deported that day. The same is undoubtedly true for 5 August. "Announcement No. 417" ordered that 5,000 people show up each day, evidently the number for two consecutive transports.

"Announcement No. 418" of 4 August 1944, which had as its object "Relocation of the Ghetto," stated (Eisenbach 1946, p. 269):

> *"Since Enterprises I and III (tailor shop, Hanseatenstrasse 34/36 and Hanseatenstrasse 45)*[398] *did not comply with Announcements No. 417 of 2 Aug. 44 concerning the relocation of the ghetto, the following was ordered with immediate effect:*
>
> *1. The food rations for the members of the tailor shops I and II will be suspended with immediate effect.*
>
> *2. Whoever harbors, hides or feeds a member of tailor shops I and II will be punished by death.*
>
> *Sgd. The Lord Mayor of Litzmannstadt."*

It is therefore possible that only 562 and 485 people were present at the morning assembly on 5 and 8 August, and that only these were deported. The remainder was rounded up and deported in the afternoon or evening of that day. However, these are mere speculations based on the clues presented above.

Another problem arises here: why do the first transports (including the ascertained one of 562 people on 5 August) not appear on the Glaser List? And why do the Glaser List and the List of Jewish Transports contain no entries for 12 and 14 August?

In the orthodox perspective, the only possible explanation is that these transports were "gassed" in their entirety. In view of the very high percentage of Jews interned at Auschwitz, however, this hypothesis is untenable, not least because the evacuation of the ghetto, as I explained earlier, took place by labor departments. The transports encompassed working men and women, plus children from the age of 9 (see above, Table 2.5), and also their family members. Transports exclusively containing persons unfit for work destined for alleged comprehensive gassing simply do not fit into this logistical organization.

The only sensible explanation is that they did not pass through the *Zentralsauna* – so they were not recorded on the Glaser List – but through the disinfestation building of the Gypsy Camp. After the transfer of the remaining Gypsies on 2 August 1944,[399] this camp section became the Auschwitz camp section for male Jews from Łódź. And it is possible that other transports, or parts of transports, were subsequently admitted to this section as well.

---

[398] These two enterprises had a workforce of 579 and 217 workers, respectively, hence a total of 796 people, who were to be deported with their families. APŁ, Mikrofilm Nr. 21344, sygn. 29260, p. 16. "*Aufstellung der Beschaeftigten Stichtag: 22. Juli 1944 /auf Grund der Berichte der nachstehenden Arbeitsstellen*/."

[399] About D. Czech's relative extermination obsessions see Mattogno 2022, entry for 2 August 1944, pp. 224-231.

It can moreover be inferred from the above that transports which left the ghetto were usually registered in Auschwitz on the next day, the last one on the 31st.

The Glaser List and the List of Jewish Transports contain 33 entries, but this does not necessarily mean that there were 33 transports. In fact, this can be ruled out. If the first entry (9 August) refers to the transport of 485 people on 8 August, there were at least five other transports from 3 to 7 August, so in total they would be 38. Some (67,000 ÷ 38 =) 1,760 people would have been deported per transport on average. However, this clashes with the average of the seven transports mentioned earlier, which was 2,273 deportees. Therefore, the nine transports with double or triple registrations on the same day as per the Glaser List (9 to 31 August) were actually subdivisions of a single transport.

The fact that Glaser List and the List of Jewish Transports contain 33 entries therefore means that several transports were split into two or more parts before being admitted to the *Zentralsauna*.

The report of the ghetto administration office of 14 August 1944 reports about Biebow's communications of the previous day:[400]

> *"In his opinion, at least another 150 railway cars would be needed for the removal, since it would be necessary to take care that the barracks were also included."*

The report of 31 August sets out the planned deportation of 500 Jews from the ghetto to Obersitz (Polish Obrzycko), an subcamp of the Stutthof Camp, and to Samter (Posznan District). The antecedents are not known, nor is it known what happened next. Strzelecki outlines the fate of the "metal group" in the ghetto, stating that

> *"the entire 'department,' its equipment and its Jewish workforce were originally to be transferred to Szamotuły near Poznań (or nearby Obrzyck* [sic]*), but the decision was changed and they were sent to Dresden instead."*

The inmates of the "metal group" were sent to Auschwitz and then to Stutthof, from where they

> *"were sent for a time to Szamotuły (or Obrzyck) first to unload machinery exported from the Ghetto and then to load it into freight cars that would take it to Dresden.* […] *There in the factory halls the work group had to install the machinery that had been brought over from the Ghetto."* (Strzelecki 2005, p. 86)

On 22 July 1944, the so-called "metal group" consisted of three groups, which were called Metal Department I, II and III. 2,154 people worked in it (1,581 men and 573 women).[401]

---

[400] 14. August 1944. Verwaltungsstelle Getto, Litzmannstadt. YVA, O.51-13, p. 46.

Neither the Glaser List nor the List of Jewish Transports records women from the Łódź Ghetto who came to Auschwitz. Strzelecki mentions four (registration numbers 87095-87098), who would have been registered on 22 August, and "probably several dozen" in November 1944, "between A-27700 and A-27871" (Strzelecki 2005, p. 56). No sources are not given. Czech states that two inmates were registered on 22 August with numbers 87095 and 87096 (Czech 1990, p. 694). However, in this case they would have been in the "A" series, in which the Jews were registered. According to the Arolsen Tracing Service, numbers 87096 and 87096 were in fact attributed to "Dds 'Adriatic Coastland.'"[402]

The lists of detainees found by the Soviets in the Auschwitz-Birkenau complex[403] contain few numbers between A-27700 and A-27871 belonging to Polish female detainees, and only one was from Łódź (A-27665).[404]

Strzelecki attempted to reconstruct the transfer of female inmates from Łódź admitted to the Auschwitz Camp on the basis of transports of Łódź Ghetto Jews from Auschwitz to other camps. He presents this study in his Chapter 4, headlined "'Deposit' prisoners and their deportation into the Reich's interior" (Strzelecki 2005, pp. 72-117), and summarizes the relevant transfers as follows (*ibid.*, p. 114):

– Stutthof: "circa 7,000 prisoners, chiefly women"
– Gross-Rosen: "at least 7,000 prisoners, mainly men"
– Bergen-Belsen: "c. 2,000 women"
– Dachau: "c. 2,000 men"
– Neuengamme: "at least 450 prisoners, mainly men"
– Flossenbürg: "at least 600 prisoners, mainly women"
– Buchenwald, KL Mauthausen, KL Sachsenhausen: "around 1,000, mainly women."

Hence, Strzelecki concluded that about 9,450 male Jews and about 10,600 female Jews from the Łódź Ghetto were lodged in the Birkenau Transit Camp, about 20,000 in total.

Strzelecki states that, of the approximately 67,000 deportees, 67% were killed in the alleged gas chambers (*ibid*., p. 48). He then reiterates this by adding that the remaining 33% "were not immediately exterminated"

402 Internationaler Suchdienst Arolsen (International Tracing Service). Arolsen, den 15. Dezember 1957. *Häftlingsnummernverteilung in Konzentrationslager*. Auschwitz. Nummern-Serie (Frauen), p. 34 of the ist.

403 GARF, 7021-108-22 and 7021-108-23.

404 GARF, 7021-108-22, p. 30. Five inmates from Łódź who arrived at Auschwitz in August 1944 had numbers B-14764, B-14820, B-14827, B-14828 and B-14894 (*ibid.*, pp. 66, 77, 95, 181). They had undoubtedly been registered by the "Transit Camp," probably with other inmates.

(*ibid*., p. 56), and finally specifies that this corresponds to 22,000 admitted to the camp, with 19,000 of them not getting registered in the Transit Camp, while the remaining 3,000 were registered (*ibid*., p. 114).

I note at once that the number of male Jews he adduced (9,450) is much lower than that resulting from the lists examined earlier (16,839). As far as the female Jews are concerned, I first report a collection of testimonies of former female inmates (but also of former male inmates). These were deposited in the immediacy of events (1945-1946) and were not considered by Strzelecki. The intent is to establish when these women were deported to Auschwitz, how long they stayed there, and where they were transferred later.[405]

2.7. Testimonies of Jews Deported from the Łódź Ghetto in August 1944

Since 1945, the British have been questioning huge numbers of former camp inmates during their investigations leading up to their various show trials against so-called German "war criminals." Some of these former inmates were male and female Jews who had been deported from the Łódź Ghetto in August 1944. I report the essentials of the most important testimonies.

Pola Hineberg was

> *"deported to Auschwitz from the Łódź ghetto in August 1944. After several days in Birkenau, she was transferred to the Freiburg sub-camp of Flossenbürg Concentration Camp."*

She stated furthermore (Świebocka, p. 133):

> *"I spent a very short time in the Auschwitz camp. As far as I remember, it was only two or three days.* […] *My whole group of Jewish women from Łódź must have been designated from the start for transfer to another camp and because of this we were kept outside until we left Auschwitz, on a concrete (cement) square 'behind the barracks'."*

Jehuda Widawski was

> *"deported from the Łódź ghetto to Auschwitz Concentration Camp, along with his parents, three brothers and sister, on August 30, 1944.* […] *After eight days in the former 'Gypsy camp' (sector BIIe) in Auschwitz, Jehuda Widawski was transferred to the Friedland sub-camp of Gross-Rosen Con-*

[405] Strzelecki devoted a section of his book to "Accounts and recollections" (2005, pp. 281-338), but these are mostly very late statements selected for the purpose of showing living conditions at Auschwitz and other camps.

centration Camp, where he was liberated. Auschwitz was a 'deposit camp' for him – that is, he was not registered or given a camp number."

The witness stated furthermore:

"I spent eight days in Birkenau. Along with the others transported from the ghetto, I was sent from the sauna to the so-called Gypsy camp. Along with a large number of my fellow veterans of the ghetto, I was taken back to the sauna on September 8, 1944, but this was not the same sauna where we had gone through the procedure of admission to the camp. […] *We were again given other clothing, this time consisting entirely of worn but laundered striped camp uniforms. On this same day, we were transferred to the Gross-Rosen sub-camp in Friedland."* (*ibid.*, pp. 134f.)

Natek Jakobowicz:[406]

"I was a prisoner for 9 1/2 months and then taken to the Ghetto at Lodz, where I remained until August 1944. I was then taken to Auschwitz and remained here for about three months before being sent to a working camp at Brunswick [Braunschweig]*."*

Gedaljahn Wyrobnik:[407]

"I am 23 years of age and of Polish Nationality. I was arrested in May 1940 and taken to the Ghetto at Lodz. In August 1944 I was transferred to Auschwitz and in September to Braunschweig."

Julius Jacubowicz:[408]

"I am 18 years of age and of Polish nationality. I was arrested and taken to the Ghetto al Lodz in May 1940 and transferred to Auschwitz on 24th. August 1944. After spending 10 days there I was taken to Braunschweig where I remained for two weeks before being sent to Vechelde, 12 kilometers from Braunschweig."

Sala Zuker:[409]

"I am Jewish and in August 1944 was arrested at the LODZ Ghetto and take to AUSCHWITZ Concentration Camp. I was there for three days and was then sent to WALDESLUST Concentration Camp. Hambühren."

Josia Lichtman:[410]

"I am a Jewess and in August 1944 the Germans arrested me in the Ghetto at Lodz. I was taken to AUSCHWITZ concentration camp, were I remained for three days and was then sent to WALDESLUST concentration camp,

Aron Jakubowicz:[430]

"In September 1939 I was drafted into the Polish Army as a Tank Driver. In early November 1939, when things locked quite hopeless for the Poles I deserted near KUTNA and returned to my home at LODZ. In March 1940 German officials appointed me their Driver and I had to live at Brunnerstrasse 19, WARTA, near LODZ. At the end of August 1942 I had to return to my home at the LODZ Ghetto and lived there until August 1944, when I was transferred to the FRIEDLAND Labour Camp near BRESLAU, where the Russians liberated me on 9th May 1945."

David Lipka:[431]

"In May 1940 I was sent to the LODZ Ghetto, because I am a Jew, and remained there until August 1944, when I was taken to the AUSCHWITZ Concentration Camp. In September 1944 I was transferred to the Concentration Camp at HANNOVER-STECKEN... […] *On our arrival from AUSCHWITZ at HANNOVER-STECKEN I, together with between 350 to 400 other men from this transport, was put into Block 2."*

Gedalie Fuchs:[432]

"On 17th May 1942 I was moved to the Ghetto at LODZ, Zawisza 38. In August 1944 I was sent to AUSCHWITZ and three days later to the GLEIWITZ Labour Camp."

Leon Fajwlowicz:[433]

"On the 28 August '44 I was taken from the Lodz ghetto to the concentration camp at Auschwitz, from which, after 8 days, I was taken with a group of about 1000 Lodz Jews to Hannover-Stocken."

Motek Diament:[434]

"On 27th Aug. 1944, I was deported from LODZ Ghetto together with other Jews to Concentration Camp OSWIECIM (Auschwitz). Ten days later I was transferred with another party of Jews to Concentration Camp in STOCKEN."

Lajb Kochanski:[435]

"On 28th August 1944 I was deported from the Lodz ghetto together with other Jews to OSWIECIM (Auschwitz) Concentration Camp. On 7th of September 1944 I was transferred to STECKEN concentration Camp […]*"*

"During the liquidation of LODZ Ghetto I was deported with my wife and my daughter to OSWIECIM (Auschwitz) Concentration Camp in a party of 2,500 Jews. I spent there eight days and was sent away with a transport of about 1,020 Jewish men to NORDHAVEN Concentration Camp, which was a part of HANNOVER-STOECKEN Concentration Camp."

Moniek Miedzinski:[437]

"On 27th August 1944, I was deported with other Jews to Auschwitz and 10 days later to STECKEN concentration camp."

Josef Rosenberg:[438]

"I was arrested on the 26th February 1940, because I am a Jew, and taken to the Ghetto in LODZ where I stayed until I was sent to AUSCHWITZ Concentration Camp on the 23nd August 1944. On the 2nd September 1944 I was transferred to HANNOVER-STECKEN […]*"*

Anneliese Dawidowicz:[439]

"In Sept 1944 our transport from C.C. AUSCHWITZ arrived on BELSEN station. We were 1000 women who have spent four years in the GHETTO in LODZ (POLAND) or as it was called by the SS the Dying Camp. We have spent four weeks in the AUSCHWITZ camp where our men, children, parents, brothers and sisters, were separated from, us, probably never to see again."

Ruchla Koppl:[440]

"I am 29 years of age. In January 1940 the Germans converted Lodz, where I lived, into a Ghetto and I was held there until about June [sic] *1944 when I was transferred to AUSCHWITZ concentration camp. After about a fortnight at AUSCHWITZ I was transferred to Belsen."*

The destinations of the evacuations were thus Waldeslust, Hannover-Stöcken, Braunschweig, Friedland, and moreover Freiburg, Stutthof, Althammer, Gleiwitz, Dora, Harburg, Kaufering and Bergen-Belsen.

The *Encyclopedia of Camps and Ghettos, 1933-1945* provides useful information regarding the first three destinations.

Waldeslust (subcamp of Bergen-Belsen).

"The Hambüren subcamp was located about 12 kilometres (7.5 miles) south of Bergen-Belsen in the village Ovelgönne, a part of the Hambüren municipality. The subcamp was a little off the track in a wooded area and was also known as Waldeslust. The first transport probably arrived in Hambüren on August 23, 1944, with 400 Jewish, predominantly Polish

[438] Summary of Examination of Josef Rosenberg, 24 December 1945. Exhibit No. 504. TNA, WO 311-1326.

[439] Anneliese Dawidowicz, Report dated 11 October 1944. TNA, WO 309-425.

[440] Deposition of Ruchla Koppl, 15 June 1945. TNA, WO 235-24.

> *women. The women and girls were from the Łódź ghetto and had spent a few days in Auschwitz before being sent to Hambüren. The transport comprised altogether probably about 1,400 women, most of whom were brought to Bergen-Belsen, or to the Unterlüss subcamp, while the remaining 400 went directly to Hambüren."* (Megargee, Part B, p. 284)

The witnesses were transferred there after two to three days in Birkenau; according to Sala Najman, the transport contained 400 inmates.

Hannover-Stöcken (subcamp of Neuengamme)

> *"On September 10, 1944, about 1,000 Jews were brought from Auschwitz to Hannover on a grueling transport by freight train that lasted several nights.* […]
>
> *The prisoners in the Hannover-Stöcken camp at the Continental factory were male Jews who had been deported from the Łódź ghetto to Auschwitz and selected for work outside the camp."* (*ibid.*, p. 1146)

Braunschweig (subcamp of Neuengamme)

> *"A large number of the prisoners deployed in Braunschweig near Büssing were Polish Jews. They had survived the Łódź ghetto and, after the ghetto's liquidation, were deported to Auschwitz. In Auschwitz, representatives of the Büssing NAG selected them for labor details in Braunschweig. Above all, metalworkers were in demand. In addition to the prisoners' claims of being skilled laborers, their physical appearance was the main criterion for selection. The prisoners arrived at Braunschweig in three transports between September and November 1944. The first transport of 350 prisoners left Auschwitz in mid-September 1944."* (*ibid.*, p. 1086)

Harburg

There is no known presence of an subcamp in Harburg, which is a suburb of Hamburg. Two former inmates, Bella Kopik and Rosa Kamelgarn, stated that they were transferred there from Auschwitz in August 1944; the second was sent on to Sasel after two weeks, in September 1944, which is documented.

Hamburg-Sasel (subcamp of Neuengamme).

> *"The Sasel-Poppenbüttel camp for women was probably occupied by 500 Polish Jewish female prisoners on September 13, 1944. This date is taken as the date the camp opened because most of the customs officials who were to guard the women commenced duty at the camp on September 13, 1944. The prisoners had been sent from the Neuengamme/Hamburg-Geilenberg (Dessauer Ufer) subcamp for women to the camp at Sasel-Poppenbüttel. Before that they had been in Auschwitz and then sent to Dessauer Ufer in the middle of August 1944. Most of the Polish women were held for a short time in the so-called C Camp of Auschwitz II-Birkenau, ar-*

riving there in early August 1944. Prior to that they had been in the Łódź ghetto." (*ibid.*, p. 1125)

Friedland (subcamp of Gross-Rosen)

On 8 September 1944, 300 Jews were transferred from Auschwitz to the Friedland Labor Camp. The relevant transport list contains the headings "Reg. No.," "First Name" "Last Name," "Birth Date" and "Profession." These were Polish skilled workers (electricians, locksmiths, mechanics, assemblers, electrician-assemblers, plumbers, printers, etc.).[441] who were previously employed in the Łódź Ghetto.

Althammer (subcamp of Auschwitz)

Jews from the Łódź Ghetto were transferred there on 2, 7 and 8 September 1944 (the number is not given; Piper 1971, p. 146). These were undoubtedly already registered inmates, because a list of eleven sick inmates dated 7 November 1944 mentions inmate registration nos. B-8660, 8661, 8707, 8730, 8901 and 9096, who were assigned on 2 September 1944 (within the series B-8603-9102), and also the numbers B-9781 and 9816 who were assigned on 7 September (ibid, p. 152).

Gleiwitz

Gleiwitz was the name of four labor camps subordinate to Auschwitz Camp III (Monowitz), and designated I, II, III and IV. Jews from the Łódź Ghetto – registered inmates – were sent to Gleiwitz I in September 1944 (Strzelecka, p. 75).

Hannover-Ahlem (Außenkommando del KL Neuengamme)

"1. In November 1944 an Aussenkommando of the main camp Neuengamme was formed at HANNOVER-AHLEM. The prisoners were Polish Jews and had been sent from Lodz via Auschwitz after the liquidation of the Ghetto in the former place.

2. The first transport of prisoners which arrived at HANNOVER-AHLEM in November of 1944 consisted of some 1000 Polish Jews. They were employed in the Aussenkommando as labour for the Continental factory working in stone mines."[442]

2.8. Transfer Balance Sheet

Stzelecki points out that these transfers concerned "Transit Jews" who were in the Birkenau Transit Camp (Strzelecki 2005, p. 72). Registered inmates were transferred only to subcamps of the Auschwitz Camp (such as Althammer, Gleiwitz and Trzebinia[443]).

I note only in passing that, for the Neuengamme Complex, 2,350 male and 500 female inmates are documented (for Strzelecki only 450 inmates). For Mauthausen, at least 193 Jews from Łódź are documented.

On 20 September 1944, 600 Jews arrived at this camp (in a transport with altogether 1,300 inmates), including 395 Hungarians, 193 Poles, nine Czechs, two Germans, and one Luxembourger.[444] The Polish Jews were mostly born in Łódź and in the Warthegau localities whose Jews had been deported to the ghetto (Konskie, Zdunska, Pabianice, Wieluń, Warta, Piotrków, Łask). Of the nine Czech Jews, eight had been deported from Prague to the Łódź Ghetto in 1941. Their names are recorded in the official book of deportees to and from Theresienstadt. They are the following inmates (page number refer to Kárný 1995, Vol. 1):

– Alt, Leo, List No. 706; born 12 Aug. 1916, deported with the transport of 26 October 1941 (p. 104).
– Blass, Karl, No. 732; born 6 May 1913, deported with the transport of 31 October 1941 (p. 116).
– Doktor, Otto, No. 771; born 13 Oct. 1910, deported with the transport of 31 October 1941 (p. 118).
– Edelstein, Vladimir, No. 779; born 17 Apr. 1902, deported with the transport of 31 October 1941 (p. 118).
– Grünberger, Franz, No. 876; born 9 Jan. 1917, deported with the transport of 31 October 1941 (p. 98).
– Lustig, Alfred, No. 1025; born 14 Dec. 1891, deported with the transport of 26 October 1941 (p. 104).
– Planer, Peter, No. 1069; born 12 Oct. 1918, deported with the transport of 21 October 1941 (p. 104).
– Steckler, Robert, No. 1247; born 27 Feb. 1894, deported with the transport of 21 October 1941 (p. 100).

---

[443] The 97 inmates registered on 15 September 1944 (Reg. Nos. B-10173-B-10269) were transferred to the Trzebinia oil refinery. *Lista imienna więźniów zatrudnionych w Rafinerii Nafty w Trzebini*. AGK, NTN, 145, pp. 95-97.

[444] Konzentrationslager Mauthausen. Schutzhaftlager. Mauthausen, den 21. September 1944. Liste der Zugänge vom 20. September 1944 (1300 Häftlinge vom K.L. Auschwitz, davon 700 Polen Schutz. 600 Juden). ISD, 1319967-1319992. The 700 Jews had the numbers 701-1300.

We can infer from this that the Polish inmates mentioned earlier also came from the Łódź Ghetto.

As for the Jewesses, Strzelecki states that about 7,000 were transferred to Stutthof, but Danuta Drywa explicitly states that "in June, July and August, 10,602 Hungarian female Jews came to Stutthof, and in September, 11,464 male Jews from Łódź" (Drywa 1990, p. 17). However, the latter were not male Jews (Żydów), but female Jews (Żydówek) like the ones from Hungary.

The official history of Stutthof Camp, compiled by various historians at the local museum, explicitly asserts that only two transports of Jews from the Łódź Ghetto arrived at the camp from Auschwitz, one on 28 August with 2,800 people, the other on 10 September with 1,750 (Drywa 1996, p. 309). Two other transports of with female Jews arrived from Auschwitz during this period: one of 2,405 on 3 September (Reg. Nos. 81968-84372), the other of 4,501 on 27 September (Reg. Nos. 87812-92312), which contained 1,849 female Jews from Hungary, 2,615 from Poland and the Protectorate, and 37 more from other countries.[445] Three fragments of the list of the 3-September transport have been preserved, to which I will return later. From these fragments, it can be deduced that the deportees were almost all Polish. Like the 2,615 deportees mentioned earlier, these also could only have come from the Łódź Ghetto, as I will explain immediately.

Among those transferred with the transport of 3 September 1944[446] were also a number of Jews from the Protectorate. These had been deported to Łódź from the Theresienstadt Ghetto at the end of 1941;[447] among others:

Table 2.12: Łódź Ghetto Residents from Theresienstadt, Transferred from Auschwitz to Stutthof on 3 September 1944

[447] The names of these inmates appear in the official book of deportees to and from Theresienstadt (Kárný, Vol. I, pp. 85, 98, 101).

The transport of 27 September 1944[448] also contained a few dozen Jews from the Protectorate who had been deported to the from Łódź Ghetto in 1941.[449] Among others:

Table 2.13: Łódź Ghetto Residents from Theresienstadt, Transferred from Auschwitz to Stutthof on 27 September 1944

The "Transport list to Flossenbürg Camp – Company Bernsdorf & Co. Dresden" concerning the transfer of 284 Polish Jewesses on 24 November 1944 from Stutthof contains seven inmates from the 28-August transport (non-consecutive Reg. Nos. 75101 to 76880), 234 from the 3-September transport (Reg. Nos. 81970 to 84127; 82016 to 83755; 82375 and 82014) and six from the 27-September transport (Reg. Nos. 88184, 88298, 88845, 88525, 87815 and 87812).[450] This list also contains the names of a dozen children (see Chapter 2.10).

The men's "Transport List," also dated 24 November 1944 and bearing the heading "The following Jews were transferred to Flossenbürg Concentration Camp today,"[451] records 216 names of detainees, of whom 193 had arrived at Stutthof with the 3-September transport (non-consecutive Reg. Nos. 84128-84372) and 28 with that of October 28 (non-consecutive Reg. Nos. 99132-100456). This transport included altogether 1,500 deportees, who were assigned Reg. Nos. 99130-100629.

[448] AMS, I-IIB12, list of names of the transport.
[449] Kárný, Vol. I, pp. 80, 91, 93, 94, 97, 101, 113, 117, 122, 125.
[450] AMS, I-IIC-3, pp. 119-122.
[451] AMS, I-IIC-3, pp. 124-127.

The Jews and Jewesses in the above two transports came from the Łódź Ghetto, where they had been part of the "metal group." As I mentioned earlier, Strzelecki devotes a couple of pages of his book to this issue (Strzelecki 2005, pp. 85f.). The *Encyclopedia of Camps and Ghettos* reports the 1967 testimony by a former deportee, Abraham S. (Megargee, Part A, p. 578):

> *"In November 1944, I was brought to the Bernsdorf and Co.-Dresden camp with about five hundred Jews of both sexes and varying ages. Even in the Łódź ghetto, where I lived before my deportation to the camp. The core of this group was the so-called metal group. The metal group consisted of specialists and their family members. The metal group was supposed to remain – by order of the German authorities – a closed organization, and thus we had to leave Łódź in late August, with the last leaving in early September 1944, and were first brought to Stutthof via Auschwitz, we passed through the gate at Auschwitz without selection."*

This is confirmed by the telegram dated 23 November 1944 and sent by SS *Sturmbannführer* Gerhard Maurer, who was head of Office DII/Labor Deployment of the WVHA, "to the commandant of Stutthof Camp – commandant of Flossenbürg Camp" with the subject "Inmate Transfer Bensdorf & Co. Dresden."[452]

> *"Stutthof Camp transfers as documented to Flossenbuerg Camp 300 male inmates who had already been employed by Berndsdorf & Co., Obersitz, and two hundred male inmates who had been discharged by the aptitude examiner Czarnulla, and immediately sets them in motion for the Bernsdorf & Co. Labor Camp, Dresden A 21, Schandauerstrasse 68, railroad station: Dresden-Reick unloading station. Stutthof Camp will provide transport escorts."*

It must therefore be assumed that the Jews from the ghetto transferred to Stutthof via Auschwitz were (2,800 + 1,750 + 2,405 + 2,615 =) 9,570. The figure given by Drywa evidently comes from the sum 2,800 + 1,750 + 2,405 + 4501 + 8 =11,464, where the final eight are the eight Jews transferred to Auschwitz on 31 August 1944 (Reg. Nos. 80191-80198), so it is incorrect.

Therefore, taking up and completing Strzelecki's data, the Łódź Ghetto Jews transferred from the Auschwitz Transit Camp were:

– 500 to Hamburg-Sasel (Neuengamme) (13 Sept. 44)
– 9.570 to Stutthof (28 Aug. .44)
– 2.000 to Bergen-Belsen (23 Aug. 44)
– 600 to Flossenbürg
– 1.000 to Buchenwald, Mauthausen and Sachsenhausen,

[452] AMS, I-IIC-4, p. 153.

– 1.100 to Gross-Rosen
– 800 to Neuengamme

Hence in total 15.570

It should be pointed out that the above figures are partial.

As I have already noted, on 22 July 1944, there were 63,856 Jews occupied in the ghetto, 26,273 men and 37,583 women. The nominal occupancy was 69,376 The real occupancy was 68,724. In practice, 652 of the 699 people in the 14-July transport had not been subtracted, but this is irrelevant for calculation purposes. It is known that the number of children up to 8 years of age was 4,633 on 19 July, and that there were 2,317 boys and 2,316 girls on 8 July. These are almost identical figures that do not affect the male-female ratio. Thus, it can be said that the percentage of men on 22 July was (26,273 ÷ 63,856 =) 41.14% of all employed male Jews, while that of women was 58.86%. This order of magnitude also applies to the entire ghetto population (68,724 people).

Consequently, the number of female inmates established above – 15,564 – is necessarily underestimated, because the total number of those admitted to the camp, both men and women, turns out to be (16,839 + 15,564 =) 32,403, of which women are only 48%, while they constituted almost 59% of the adult population. This confirms, indeed makes it necessary, that the number of Jews transferred to Stutthof is correct.

It follows that, compared with 16,839 men, there had to be an even larger number of women, on the order of about 23,000, based on the above percentage.

The problem of children will be examined in Chapter 2.10.

It can therefore be concluded that approximately 67,000 Jews from the Łódź Ghetto were deported to Auschwitz, and that a minimum of 32,400 adults were admitted to the camp.

A letter of SS *Sturmbannführer* Wilhelm Burger, head of Office Group D IV of the WVHA, to the head of Office Group B, SS *Gruppenführer* and Lieutenant General of the Waffen SS Georg Lörner, mentions the total occupancy of all concentration camps on 1 August 1944 – 524,286 persons – and specifies:[453]

"In addition, there are the following announced new acquisitions:

1.) from the Hungarian program (Jew Operation) 90,000

2.) from Litzmannstadt (police prison and ghetto) 60,000 […]*"*

The list of "New arrivals" – 612,000 inmates – closed with the following comment:

"A large portion of the inmates are already en route and will arrive in the next few days to be admitted to the concentration camps."

[453] IMT Document PS-1166.

Burger declared that there was no clothing for the new 612,000 incoming inmates, and accordingly requested the allocation of "special contingencies of fabrics." Office D IV/4 was in fact in charge of "clothing."

Regarding the 90,000 Hungarian Jews, Gerlach and Aly explain (Gerlach/Aly, p. 344):

> *"From this number, one can infer a plan for the deportation and clothing of all Jews from Budapest, assuming that they were to be 'selected' according to similar criteria as those already deported to Auschwitz before."*

However, legation councilor Theodor Grell's briefing of 14 August 1944 (Chapter 1.2), reporting on the planned deportation of Jews from the city of Budapest, mentioned 29,000 deportees as of 27 August. About 30,000 (or more) could have come from the Birkenau Transit Camp, which would bring the total to about 60,000. The origin of the remaining 30,000 is unknown.[454]

The case of Litzmannstadt, however, is perfectly explained. Approximately 67,000 Jews were evacuated from the Łódź Ghetto, of whom 60,000 were expected in the concentration camps.[455] By 15 August, the deportation was in full swing, and a portion of the deportees had already arrived at their destination. These were practically the Jews already sent or expected at Auschwitz. If, therefore, at least 32,400 were received there, it is only logical that the remainder (67,000 to 60,000 – 32,400 =) 34,600 to 27,600 were transferred immediately to other camps, without first passing through the Birkenau Transit Camp, or at least the *Zentralsauna*. Jehuda Widawski's assertion that deportees from the ghetto also passed through "the sauna to the so-called Gypsy camp," where they were not registered or, if they were, the relevant documentation was lost, is important in this context. As I anticipated earlier, this also applies to the two transports that arrived in Auschwitz on 12 and 14 August. Strzelecki states that the men were housed in barracks 4, 13, 14, 22 and 25 of the Gypsy Camp (see Chapter 2.11). It is reasonable to assume that they had passed through the disinfestation facility of this camp section. The five barracks in question could simultaneously hold at least 4,000 people, who stayed there for a few

---

[454] The Hungarian Foreign Minister's note of 23 August 1944 quoted in Chapter 1.2 speaks of the possibility of making 60,000 Jews available to the Reich government, which, added to the above 30,000, would bring the total figure to 90,000, but it is not certain that such a readiness on the part of the Hungarian government existed and was known to the German government as early as 15 August.

[455] This figure was perhaps based on the assertion of the ghetto authorities that the ghetto had about 7,000 persons unfit for work (see below). Deducting them from the approximately 67,000 deportees, there would have been precisely 60,000 able-bodied workers left. In fact, the latter were even more. See Chapter 2.10.

days, after which they were transferred to other camps. This means that a huge number of Jews passed through there.

If we rule out the unlikely mass gassing of inmates fit for work – as I noted earlier – the alternative is their direct transfer from the ghetto to other concentration camps. This seems to be alluded to by Hans Biebow, the Łódź Ghetto's administrator, in his speech of August 7, 1944 (Eisenbach 1946, pp. 267f.):

> *"Now during the war, when Germany is struggling for its last, it is necessary to relocate the labor force, because due to Himmler's order, thousands of Germans are sent from factories to the front; these must be replaced.* […]
>
> *Families go to the various camps united, are repositioned, factories are built.* […]
>
> *At Siemens, A.G. Union, Schuckert Werke, everywhere where ammunition is made, workers are needed. In Czenstochau, where the workers are working in the munitions factories,*[456] *they are very satisfied, and the Gestapo is also very satisfied with their performance.* […]
>
> *Arrangements will be made to put food in the railway cars. The trip will take about 10-16 hours. Take along luggage up to 20 kg.* […]
>
> *Come with your families; take pots, drinking vessels and eating utensils. We do not have them in Germany, as they are distributed to households damaged by bombs."*

Among the survivors of the transports that were transferred from Prague to the Łódź Ghetto in late 1941, some were liberated precisely in Częstochowa (Tschenstochau): Leopold Chajemowić,[457] František Kafka,[458] Sylva Stiborská,[459] Jan Büchler and Františka Haasová.[460]

Strzelecki cites the letter from SS *Sturmbannführer* Wilhelm Burger, but tries to downplay its significance with inappropriate commentary (Strzelecki 2005, p. 37):

> *"In this letter, written in the final stages of the Łódź Ghetto's 'evacuation,' Burger mentions as potential concentration camp prisoners 400,000 Poles (then involved in the Warsaw Uprising) and 60,000 persons from the police prison and Ghetto in Łódź."*

By 15 August 1944, at least 31,000 Jews had already been evacuated from the ghetto (based on the average of 2,393 per day calculated earlier), who

---

[456] At Tschenstochau (Polish Częstochowa) existed the *Judenlager* Hasag-Apparatenbau, *Arbeitslager* Hasag-Raków, *Arbeitslager* Hasag-Pelzery, *Arbeitslager* Hasag-Warta and *Arbeitslager* Hasa-Częstochowianka that employed Jewish inmates. (*Główna*… 1979, pp. 146f.).

[457] Transport of 16 October 1941; Kárný, Vol. I, p. 90.

[458] Transport of 21 October 1941; *ibid.*, p. 102.

[459] Transport of 26 October 1941; *ibid.*, p. 114.

[460] Transport of 3 November 1941; *ibid.*, p. 137.

were certainly not "potential concentration camp prisoners," but actual inmates. And yet, he avoids explaining why the SS expected such large numbers of deportees from the Łódź Ghetto to arrive in concentration camps.

2.9. The Łódź Ghetto in Messages of the Auschwitz Camp Resistance

In the orthodox Holocaust perspective, the number of (67,000 – 22,000 =) 45,000 alleged gassing victims in one month is certainly significant. One should expect that the Auschwitz resistance had proffered precise and detailed information about it. With a rare lack of any sense of proportion (and ridicule), Strzelecki claimed that the relevant information constitutes "irrefutable evidence of the crimes committed at Auschwitz Camp" (*ibid*., p. 39). All that remains, therefore, is to examine them.

The most comprehensive collection of reports and messages related to Auschwitz during the period of 1941 through 1944 is a collection whose titled translates to "The Auschwitz Concentration Camp in the Light of the Proceedings of the Delegation of the Government of the Polish Republic in the Country" (Bezwińska et al. 1968). However, it inexplicably stops on 10 July 1944, so that it contains no reference to the August-1944 evacuation of the Łódź Ghetto. There are, however, important reports covering precisely this period.

The "Periodic Report from 1 August to 1 September 1944" ("*Sprawozdanie okresowe /od 1.VIII do 1. IX/*") elaborates on various topics: concentration camp inmates, "The Auschwitz executioners 'Political Department,'" the arrival of Rudolf Höss at Auschwitz to direct "the killing of the Jews/Aktion Höss-Reinhardt," the murder of 20,000 persons by lethal injection by "Camp Physician Untersturmführer Entress" and 14,000 by Unterscharführer Scherpe and Rottenführer Kantel. The report is wrapped up with statistics on the camp's occupancy, divided into Auschwitz I, II, III and the Women's Camp; also into Poles, Polish Jews, inmates of other nationalities. The total occupancy was 105,168 persons, 65,934 men and 32,234 women.[461]

[461] APMO, RO, Vol. VII. Sygn. D-RO/91, Nr. inw. 72786, pp. 455-458.

"Urban's" report of 22 August 1944, details the occupancy of individual camps (the total is still 105,168), and mentions 30,000 unregistered Hungarian Jews.[462]

The first reference to Jews from the Łódź Ghetto is found in the "Periodic Report from September 1 to September 20, 1944 Special Communiqué" ("*Sprawozdanie okresowe /od 1. IX 1944 do 20 IX 1944/ Komunikat specialny*"). It discusses the arrival of transports of Warsaw inmates at Auschwitz, and the bombing of the camp on 13 September. There is also a section headlined "Gassing continues," which states:[463]

> *"The gas chambers* [*gazownie*] *and crematoria at Birkenau still carry on their monstrous activity heedless of the rapidly approaching judgment. Recently, Jews from the Łódź Ghetto were gassed and burned, liquidating the last remnants in this way."*

An undated report written by "Stakło" (Stanisław Kłodziński) has a reference in two of its 13 points. They concern alleged gassings of Jews:[464]

> *"4/ Jewish transports from Płaszów went partly into the gas – a small group was admitted to the camp.*
>
> *5/ The gassing continues. Today, for example, 40 railway cars arrived with Jews from Łódź – all completely gassed."*

A "Note" added by an employee of the Auschwitz Museum who typed up the message reads:[465]

> *"The original contains no date, but there are subsequent pencil entries in it: ok.* [ca. on] *23.VIII.44 and also PWOK*[466] *23.VIII.44. Therefore, the transport from Łódź mentioned in the letter arrived on 22 August 1944, so the letter is from this same day, although in the text it is stated 'Today, for example, 40 railway cars arrived with Jews from Łódź.'"*

If the report's date is 23 August 1944, then it is unclear how the adverb "today" can mean the day before, 22 August. However, the fact remains that on 22 August 1944, 688 male Jews from Łódź were sent to the Transit Camp, and probably a roughly similar (or even greater) number of female Jews (the next day, 557 men and at least as many women were admitted). Therefore, "Stakło's" claim that the Jews who arrived that day were "all completely gassed" is patently false.

The last such reference is found in a report dated 26 September 1944:[467]

---

462 AGK, NTN, 155, pp. 94-96 (the report goes up to page 118).
463 APMO, RO, Vol. VII. Sygn. D-RO/91, Nr. inw. 72786, p. 460.
464 AGK, NTN, 155, p. 117 (APMO, RO, t.II, p. 117).
465 *Ibid.*, p. 118.
466 *Pomoc Więźniom Obozów Koncentracyjnych*, Relief for Concentration-Camp Inmates
467 APMO, Ruch Oporu, Vol. II, p. 167. D-RO/85.

> *"Currently, 2,500 Jews from the Birkenau Camp have been gassed, including 80% of the children aged 13-16, who were transferred from the Lodz Ghetto."*

Danuta Czech interpreted this message as follows in her entry on 18 September 1944 (Czech 1990, p. 712):

> *"An RSHA transport with 2,500 Jews arrives from the Lodz ghetto. After the selection 150 men are admitted to the camp and given Nos. B-10270–B-10419. Up to 80 percent of the transport consists of children between 13 and 16 years of age. The remaining 2,350 persons were killed in the gas chambers."*

First, it should be noted that the report containing this message is headed "*Tell. Boruta pilne!* [urgent!] *26.9.44*," so the exact date is precisely 26 September, not the 18th.

Next, the registration numbers assigned (B-10270 – B-10419) were indeed assigned on 18 September 1944 according to the "List of Jewish Transports" (p. 19).[468] However, this could not have been a transport from Łódź, because the last transport left the ghetto on 30 August. The aforementioned entry thus concerned Jews who had been in the Birkenau Transit Camp for a while.

Finally, the meaning that Czech ascribes to the message is forced: in the camp resistance's lore, this message refers to a "selection" of 2,500 inmates taken from ("z") the Birkenau Camp, 80% of which were boys aged 13-16. This means that (2,500 × 0.8 =) 2,000 boys had passed the initial "selection" for admission to the camp, and had been lodged in the Transit Camp. Then, after at least a couple of weeks, they were allegedly and inexplicably selected again in order to be gassed!

These references by the resistance are incredibly sparse and superficial, considering that it refers to an event that lasted for 28 days and allegedly involved the massacre of 45,000 people, if we believe Strzelecki. This betrays the fictitious nature of these claims, and that nature can be demonstrated.

Hördler *et al*. report the "Air photo of the Royal Air Force of Auschwitz Il (Birkenau), 23 Aug. 1944" with this comment (Hördler et al. 2019, p. 47):

> *"In August 1944, the Auschwitz SS murdered several tens of thousands of people from the evacuated Litzmannstadt Ghetto as well as from the disbanded 'Gypsy Camp' in Auschwitz-Birkenau, who had previously been housed in Construction Section B Il. Several train sections can be seen on the ramp (tracks 21 and 22). Smoke from the incineration pits north of*

[468] This is the last record in chronological order concerning Jews from the Łódź Ghetto. Precisely for this reason, Czech falsely attributed the date of 18 September 1944 to the resistance message.

Crematorium V is clearly visible from a bird's eye view, as are the installations and pits (without smoke) around 'Bunker II' to the west of the camp. NCAP, No. 000-000-029-091."

This photograph shows a small column of smoke rising from a location behind Crematorium V. This smoking site is about 30 meters further west[469] than the site that appears in the 31-May-1944 photograph, but the ground area here is also very limited: its length does not exceed 12 meters, its width does not exceed 4 meters (see Photos 16).

As early as 2005, I had linked this photograph to the two photographs taken clandestinely by Auschwitz inmates presumably depicting a scene of open-air corpse incineration, showing that the burning site seen there appears to be identical to the one from which the column of smoke rises in the 23-August-1944 photograph (Mattogno 2016a, p. 38).

In 2022, Auschwitz Museum historian Igor Bartosik confirmed this interpretation,[470] but without even hinting at the resulting devastating consequences for the orthodox Holocaust thesis.

He sets the chronological limits of the two ground photos by noting that Alter Feinsilber (aka Jankowski), who claims to have participated in taking these photos, stated that there was a watchtower with SS sentries just in front of the entrance to the "gas chamber." Bartosik then mentions a letter written on 5 July 1944, by the head of the Central Construction Office, SS *Obersturmführer* Werner Jothan, to the head of the Auschwitz farms, SS *Obersturmbannführer* Joachim Cäsar, asking him for permission to cut down some trees "at Crematorium IV" because two large and six small watchtowers had to be built in Camp Section III. This was evidently an urgent request, because the work was to begin the next day (Bartosik, p. 207, Doc. 58).

Another self-proclaimed participant in taking the two ground photos, Alberto Errera, died in early August 1944, so it could not have been later than that. Considering these dates, Bartosik concludes that "it may be assumed that the photographs were taken between July 5 and 20, 1944" (*ibid*., p. 78).

The earlier date makes no sense, however, because Jothan's letter is dated precisely 5 July, and states that work would only begin the next day. Bartosik also runs into a major misunderstanding, because he believes that the watchtower evoked by Feinsilber-Jankowski is the one seen in a 1945

---

[469] The two photos, attributed by the three authors to Alberto Errera, and showing an outdoor cremation scene, were taken from inside Crematorium V at an angle perfectly compatible with the site in question. See Mattogno 2016a, Photos 18 (p. 162) and 27 (p. 171).

[470] Bartosik, pp. 208f. Documents 59 and 59a are a section enlargement of the air photo dated 23 August 1944, as is my Document 16.

photograph he published (*ibid*., p. 207), whereas this is a simple open high seat of rather crude workmanship. The small watchtowers were enclosed two-story structures with an entrance door, an interior staircase, the first-floor guard post surrounded on each side by windows, and a real roof. They had a base of 3 × 2.70 meters and a total height of 7.20 meters. The floor of the guard post was at a height of 5.2 meters above the ground. This type of guard tower was even equipped with an indoor toilet, which was connected to an almost completely buried septic tank excavated next to the tower.[471] A tower of this type is clearly visible in another photograph taken in the north yard of Crematorium V in 1945.[472]

It is obvious that the construction of this type of tower would have taken at least a week, so it was probably occupied by any guards only after 11 July 1944, when the last transport of Hungarian Jews had already arrived at Auschwitz. But in the second and third decades of July, there were no mass exterminations – according to Czech's *Auschwitz Chronicle*, a few thousand gassing victims in all. But if that is so, then what was the purpose of the "cremation pit" visible in the two ground photos? Why was it necessary?

The 23 August 1944 air photo raises additional problems that Holocaust historians prefer to ignore. In Part One, I showed that, from 16 to 30 May 1944, within 15 days, 126,700 Jews were allegedly murdered in Birkenau, according to the orthodox narrative. In round numbers, this amounts to an average of about 8,450 per day. Despite this claimed immense extermination, there is no trace of any immense incineration pits in the air photo of 31 May 1944. But without them, the bodies of the alleged victims could not have been disposed of, and the crematorium chimneys did not smoke either.

The 23-August photograph is supposed to document the alleged extermination of the Jews from Łódź – according to Strzelecki, 45,000 people within 21 days (9-29 August). This would have amounted to some 2,140 per day, or some 25% of the alleged daily Hungarian victims mentioned earlier. Yet the scenario on the ground is exactly the same: the chimneys do not smoke, and the area around "Bunker 2" also has no smoke sources.

The small smoking area of about 50 square meters behind Crematorium V therefore allegedly proves at the same time the extermination of more than 8,400 Jews per day (on 31 May 1944), a few hundred per day (during the second and third decades of July), and more than 2,100 per day (on 23 August). This patently absurd fact proves that the smoking area visible on

[472] APMO, Mikrofilm Nr. 938.

the various photographs had no relation to any claimed mass extermination. Furthermore, since this small area is the only smoking area on any photo, this proves that the claimed mass exterminations fall completely within the realm of fairy tales.

2.10. Surviving Children

Danuta Czech states that in 1944 in Auschwitz "children under 14 years of age" were gassed.[473]

On 1 March 1944, there were 11,181 children up to the age of 14 in the Łódź ghetto, of whom 5,287 were up to 9 years old, and 5,894 were 10 to 14 years old. On 15 July, there were 5,415 children up to age 9. In the June-July 1944 transports, 195 children aged 6 to 14 were deported, of whom 173 were aged 10 to 14.

In the documentable period from 1 March through 9 July 1944, there were 108 deaths of children.[474] For the period from 29 May through 25 June 1944, and 3-9 July 1944, name lists exist of deceased persons (a total of 539) with all biographical data. 31 children up to 9 years old (72 percent) and 12 from 10 to 14 years old (about 28 percent) are recorded these lists.[475] It can therefore be assumed that the (108 – 12 =) 96 deaths mentioned above correspond to (96 × 0.72 =) 69 total deaths of children up to 9 years old, so that those of children 10 to 14 years old should be approximately (108 – 69 =) 39.

Concluding, there were a total of (5,894 – 173 – 39 =) 5,682 children ranging from 10 to 14 years old in the ghetto, in addition to the 5,415 up-to-9-year-old kids, hence in total about 11,100.

The maximum age of admission to the camp is not indicated by any source, but several lists of registered Jews help establish it with a sufficient degree of certainty.

1. List of 5,271 names of former inmates containing registrations from 25 June 1942 to 20 October 1944, compiled by Judge Jan Sehn on the basis

[473] Czech 1990, p. 563; the German edition says "children up to the age of 14 years"; 1989, p. 698

[474] These data are derived from the "Tagesberichte" (APŁ, Mikrofilm Nr. 19704, syg. 1087), and the "Aktennotiz" series of reports (APŁ, Mikrofilm Nr. 21322, syg. 29238), which daily record the departure (by death) of children.

[475] APŁ, Mikrofilm Nr. 20184, syg. 1570, pp. 11-24; Mikrofilm Nr. 20539, syg. 1925, pp. 104-107 (this list was mistakenly included in the file of 1943 death cases).

of personal files (*Personalbogen*) found at the camp.[476] The oldest inmates were 64 (No. 5057 on the list) and 60 (No. 4,016) years old.
2. List of 2,348 names from the "Unit Book Labor Unit Golleschau."[477] The oldest inmates were 64 (No. 397) and 63 years old (No. 1257).
3. List of 813 names from the Trzebinia oil refinery, already reviewed in Part One: the oldest inmates were 68 (No. 458) and 65 (No. 382) years old.

One can therefore conservatively assume an age of 60 (but, as I will show below, there were conspicuous exceptions).

On 1 March 1944, there were 2,803 adults over 60 years old, of whom 24 left in the above transports. During the period from 29 May to 25 June 1944, 37 Jews over the age of 60 (born before 1884) died out of 403 deaths,[478] approximately 9.2%. The death rate was 1.3 per day. In the period from 3 January to 6 February 1944,[479] 44 elderly people died, and the death rate was similarly 1.3% per day. Therefore, from 1 March to 30 July 1944, about 200 elderly people presumably died. In the same period, the general mortality was about 2,100 deaths. If we assume the percentage found above, the Jews over the age of 60 who died were (2,100 × 0.092 =) 193, so the figure of 200 is reliable.

Consequently, at the beginning of the deportations, there were still about 2,600 elderly Jews in the ghetto.

In conclusion, at the beginning of the evacuation, there were (11,100 children and 2,600 elderly =) 13,700 Jews in the ghetto purportedly destined for gassing. However, if we follow Strzelecki, the supposedly gassing victims incomprehensibly numbered 45,000. Hence, in addition to the 13,700 persons deemed unfit due to their age, 31,300 deportees fit for work were allegedly also gassed!

A few weeks before the general evacuation of the ghetto began, the vast majority of its inhabitants were employed in its many departments, so they were all fit for work, and this is a documented fact.

As I have shown earlier, the "Application for allocation of allowance cards for long-hours, long-distance and nighttime workers" for the period of 10 to 17 July 1944 records the presence of 64,366 workers in the ghetto. On 3 July, the ghetto population was distributed as follows:[480]

477 ROD, c[21-23].31. Certified copy of the original prepared by the Dutch Red Cross on 15 December 1947.
478 APŁ, PSZ 1570, pp. 11-24.
479 APŁ, PSZ 1925, pp. 153-163.
480 Der Aeltesten der Juden in Litzmannstadt-Getto. Statistische Abt. Litzmannstadt, den 3.Juli 1944. GFHA, Catalog No. 342.

Table 2.14: Gender Distribution of Łódź Ghetto Population on 3 July 1944

Adults		Children		Total
male	female	male	female	
28,616	42,363	2,320	2,316	75,615
- 820	- 1,595	/	/	- 2,415
27,796	40,768	2,320	2,316	73,200

A note states that, from the 75,615 figure, had not been subtracted the 2,415 evacuated from the ghetto in the transports from 26 June to 2 July, of whom the same documentation gives an account with breakdowns of men, women and children (see Table 2.2), data which I have included in the table.

At that time, therefore, out of 73,200 inhabitants of the ghetto, 64,366 were deployed for work, while 8,834 were unemployed. Of them, 4,636 were children under the age of 10.

It should also be mentioned that a "List of employees, cut-off date: July 22, 1944" /based on the reports of the following work sites" states that 63,856 Jews were deployed for work in the ghetto (26,273 men and 37,583), out of a total population of 68,724, hence, practically everybody except the children (up to 8 years of age: 4,633 on 19 July) and just over 200 adults.[481]

Returning to Danuta Czech, her hypothesis of the killing of children and young people up to the age of 14 is refuted by several documents.

1) The 3-September-1944 transport to Stutthof included at least 41 children from 6 months to 14 years old. If Czech were right, they all should have ended up in the "gas chambers" of Auschwitz, but instead were transferred with their mothers to Stutthof and duly registered there. I list them in the following table.

Table 2.15: Children on Transport from Auschwitz to Stutthof on 3 September 1944

#	Last Name	First Name	Birth Date [d/m/y]	Reg. No. Stutthof
1588	Baude	Golda	12/9/1937	83555
1590	Brin	Hala	23/4/1937	83557
1592	Darl	Dina Sissel	30/6/1938	83559
1594	Borenstein	Lotte	14/6/1934	83561
1595	Borenstein	Eva	14/11/1939	83562
1597	*Brijmann*	*Lilianna*	*14/7/1938*	*83564*
1599	Chimonovits	Josef	22/11/1935	83566

[481] It is unclear how the statement in the Daily Report for 19 July 1944 that there were about 7,000 persons unfit for work in the ghetto can be reconciled with these figures.

#	Last Name	First Name	Birth Date [d/m/y]	Reg. No. Stutthof
1600	Chimonovits	Mejer	2/11/1936	83567
1601	Chimonovits	Izak	19/10/1943	83568
1603	Chimowicz	Eugenia	6/11/1935	83570
1604	Chirug	Zila	9/9/1941	83571
1606	Chirug	Ruth	21/4/1937	83573
1608	Czariska	Sara	30/6/1932	83575
1610	Danziger	Arjela	19/3/1937	83577
1811	Feinsilber	Eva	4/1/1940	83578
1614	Fürstenberg	Abram Meier	9/2/1932	83581
1616	Gutmann	Dora	17/1/1937	83583
1618	Glückmann	Schmul	24/3/1935	83585
1619	Glückmann	Chaja	12/8/1930	83586
1621	Jacob	Gittel	6/3/1944	83588
1623	Jalanowicz	Felga	10/1/1940	83590
1627	Kupferschmidt	Abraham	29/10/1938	83594
1629	*Kasz*	*Bronia*	*21/2/1930*	*83596*
1631	Frantz	Noemi	2/11/1937	83598
1633	Lachmann	Kazimierz	1/3/1937	83600
1635	Neuberg	Lila	10/10/1936	83602
1637	Potok	Trunseb	24/2/1944	83604
1638	*Rosenblum*	*Bronka*	*27/12/1931*	*83605*
1641	Rotstein	Regina	12/8/1932	83608
1942	Rotstein	Sala	3/10/1938	83609
1643	*Richer*	*Tela*	*14/6/1932*	*83610*
1645	*Reingold*	*Elchanan*	*12/12/1937*	*83612*
1646	Steier	Frema	25/7/1942	83613
1648	Stelowicka	Ruchla	1/4/1936	83615
1650	*Szyper*	*Adam*	*6/12/1939*	*83617*
1653	*Salomonowicz*	*Michael*	*6/10/1933*	*83620*
1654	*Salomonowicz*	*Josef*	*1/7/1938*	*83621*
1656	Skura	Estera	27/12/1933	83623
1657	*Tabackschmeker*	*Jochwet*	*25/3/1930*	*83624*
1660	Wolman	Kristina	25/9/1930	83627
1735	Wolf	Helga	2/7/1935	83702

These children were all Polish, except for the two Salomonowicz brothers, who were traveling with their mother, Salomonowicz Dora, born 28 August 1904, number 1652 on the transport list, registered in Stutthof under number 83619. All three were from the Theresienstadt Ghetto, from where

they had been deported on 3 November 1941. All three survived the War (Kárný, Vol. I, p. 138). Michael and Josef were thus 8 and 3 years old, respectively, when they were deported to Łódź and, despite this, they survived both the "selections" for "extermination" at Chełmno and those for "extermination" at Auschwitz!

The nine names I have put in italics also appear in the "Transport list to Flossenbürg Camp – Company Bernsdorf & Co. Dresden" of 24 November 1944 that I mentioned earlier.

On 14 April 1945, 143 Jews from the subcamp Bernsdorf & Co. Dresden were transferred to Zwodau.[482] Among them were the children Kasz, Rosenblum, Reingold, Szyper, the Salomonovic brothers and Tabakschmeker from the above list.

2) As Strzelecki notes, about 500 female inmates were transferred to the Sachsenhausen Camp, "mainly Polish Jewish women who had arrived from the Łódź Ghetto, via KL Auschwitz" (Strzelecki 2005, p. 109). In a letter from the "*Kulturlandschaft Dahme – Spreewald e.V.*" to the Yad Vashem Institute dated 21 November 2004, we read that at the Sachsenhausen Camp "there were about 600 Jewish forced laborers from the former Litzmannstadt Ghetto (Lodz in Poland)." On the basis of various documents, it was possible to reconstruct a list with the names of 427 Jewesses, in which basic data (serial number, first and last name, date of birth, registration number in Sachsenhausen) are recorded.[483] This list includes 37 children from 3 to 14 years of age, which I reproduce in the following table. The list also includes two Jews aged 72 and 70.

Table 2.16: Children at Sachsenhausen Camp, arriving from Łódź Ghetto via Auschwitz

#	Last Name	First Name	Birth Year	Reg. No. Sachsenhausen

375	Überbaum	Arkadius	1933	79338
382	Weicmann	Szmul	1941	?
392	Weissbrot	Luba	1930	79280
393	Weissbrot	Paula	1933	79281
410	Winograd	Ilona	1940	79334
414	Wiszogrodzki	Jakob	1939	79313
423	Zimmermann	Lewek	1941	79276
130	Grundmann	Shimson	1872	?
353	Szmulewicz	Regina	1874	79443

There is no doubt that the remaining children – all Polish – were also from Łódź.

3) At least five other children survived the war who had been deported to the Łódź Ghetto from Prague with the 21 October 1941 transport (Kárný, Vol. I, p. 90).

Table 2.17: Surviving Prague Children Deported to Łódź Ghetto

Last Name	First Name	Birth Date [d/m/y]	Liberated at	Age in 1941	Age in 1944
Krausová	Hana	6.10.1929	Weisswasser	12 years	15 years
Lederer	František	11.7.1930	?	11 years	14 years
Petrovský	Mario	20.4.1932	Auschwitz	9 years	12 years
Popperová	Ireana	21.1.1932	Malchow	9 years	12 years
Rössler	Ludvik Petr	4.6.1930	Allach	11 years	14 years

These children survived three full years in the ghetto and then also the "selection" at Auschwitz.

Strzlecki himself gives another example of two children who were admitted into Auschwitz: Chaim Liss, born 25 March 1931, who was 13 years old in 1944 (Strzelecki 2005, p. 163), and Leon Frydman, born in 1930, registration number B 7593 (ibid., p. 247). Stella Levinska (Lewinska), mentioned in Chapter 7, was born on 21 June 1931, hence was 13 years old in August 1944.

4) A list titled "Jewish Survivors Registered in Lodz July 1945. Received by the Jewish Immigrant Aid Society of Canada" contains about 5,100 names recorded alphabetically (A-H) by "Name," "Year of birth," and "Address before 1939."[484] There were about 2,030 Jews residing in Łódź and therefore in the ghetto, 145 of whom were children born between 1930 and 1945.

5) There is also a list titled "Lodź [sic] Ghetto List of Survivors Surnames R-Z only 1945."[485] The title line in Polish gives the serial number (usually 60 names per page, but there are various exceptions), first and last name, date of birth, then address, parents' names, and the 1939 address. In a many cases, the first and last names are illegible,[486] in many cases also the year of birth. The 1939 address is often omitted.

The total number of registered Jews is about 5,750, among whom are at least 279 children born between 1930 and 1945. The decipherable names of children who resided in Łódź in 1939 and were therefore in the ghetto are at least 56. The total number is about 1,800.

6) The archives of the International Tracing Service in Arolsen contain various lists of "Jewish Survivors Registered in Lodz" sponsored by the "Jewish Immigrant Aid Society Canada." They are structured like the one mentioned earlier ("Name," "Year of birth," "Address before 1939"). The layout, however, is different. These lists are divided into groups of letters,

484 YVA M.7-1227.
485 TWL, Documents 054. Roll 7/46.
486 These are low-quality microfilms of typed carbon copies.

but their classification is rather chaotic. I try keep it ordered in the following table.

Table 2.18: Jewish Survivors from Łódź Ghetto (Canadian List)

Initials	Pages	Reference Code	# registered persons
A-B	1-11	?	~ 1,400
B-F	12-25	378785630-78785643	~ 1,700
F-F	26-30	?	~ 650
F-H	31-44	78785550-78785564	1,800
H-L	45-71	78785565-78785593	3,484
L-O	72-94	78785595-87855720	1,468
P-Z	1-80	78785725-78785808	~ 5,500
		Total:	~ 16,000

Each page of lists B-F, F-H, H-L contains two columns of names, averaging about 130. The remaining lists contain only one column of names.

The A-H list mentioned in 4) is not part of these lists; in fact, the names recorded under the same letters are different.

As can be seen from the table above, pages 1-11 and 26-30 are missing, also some scattered pages. The number of registered persons is given explicitly for letter groups F-H, H-L, L-O and P-Z. For groups A-B and B-F, it was calculated from the average number of names per page (130) multiplied by the number of pages.

In total, the lists mentioned above contain the names of at least 405 children born between 1930 and 1945 who resided in Łódź in 1939 (or their mothers, if born after 1939; see Table 2.III in the Appendix).

The list of adults also included very old people, including:

Table 2.19: Examples of Very Old Jewish Survivors from Łódź Ghetto (Canadian List)

8) A "List 3 of Polish Jewish women released from the camp of Bergen-Belsen. Submitted by the World Jewish Congress", dated 29 May 1945,[488] which contains the names of 20 children born between 1930 and 1945, two of them in the Łódź Ghetto:

– ISD, 3399237: Grabes, Salla, born in 1930
– ISD, 3399237: Gerecht, Sabina, born in 1936

9) A "List of Polish children in Theresienstadt. Submitted by the World Jewish Congress, New York," dated "Aug. 24, 1945,"[489] records 247 names, including 107 of children born between 1930 and 1945. Of these, 16 were residents of Łódź in 1939.

10) A "List of Polish Jewish survivors at Buchenwald submitted by the World Jewish Congress," dated "5/14,45" (sic),[490] lists 762 names of former inmates, of whom 49 were born between 1930 and 1945. Of these, nine were residents of Łódź in 1939.

11) List of children from Buchenwald who are currently in the Rheinfelden refugee camp. 7 August 1945. ISD, 78776724-78776726: seven Polish Jewish children, two born in Łódź, one in Piotrków.

In the following table, I summarize the data from lists 8) through 11):

Table 2.21: Data of several lists of Jewish Children with Łódź Ghetto Survivors

There are many other lists of Polish Jewish children compiled in 1945 and 1946 in which, in addition to first and last name and date of birth, the birth location is given. As for the locations Łódź and the Warthegau ghettos, it is most likely that the relevant children were in the Łódź Ghetto in 1944; their number, however, is rather small: 57 children in all.

12) List of refugee children in the Selvino home near Bergamo (Italy). (Communicated by the Israelite Community of Milan). 14 December 1945. ISD, 78781973-78781974: 35 Polish Jewish children, five born in Łódź, two in Kalisz.

13) List of children and young people rescued from the Buchenwald Camp who left France for Palestine on 8 July 1945. ISD, 78779358-78779359: six Polish Jewish children, one born in Łódź, two in Piotrków.

14) Children brought from Poland to Belgium by the Vaad Hatzala, 9 December 1946. ISD, 78793193: 26 Polish Jewish children, six born in Łódź.

15) List of children at the childrens' home of Rymbach, Poland. Submitted by World Jewish Congress, New York. March 1946. ISD, 78786494: 32 Polish Jewish children (without indication of birthplace).

16) List of Polish children who arrived in Great Britain. August 23, 1946. YVA, M.7-1699: 66 Polish Jewish children, seven born in Łódź.

17) List of Jewish children at the childrens' home at province Czenstochau, Poland. Submitted by World Jewish Congress, New York. March 1946. 78785138: 24 Polish Jewish children, two born in Łódź and one in Piotrków.

18) List of children from Poland at present in transit – Camp School Cadorna – Milan. 28 November 1946. ISD, 78781632-78781633: 84 Polish

Jewish children, six born in Łódź, three born in Kalisz and one in Piotrków.

19) List of children brought to France by the Vaad Hahatzala. February 1947. ISD, 78779257-78779265: 58 Polish Jewish children, one born in Kalisz.

20) List of children brought from Poland to France by the Vaad Hahatzala. 3rd list. ISD, 78779273: 58 Polish Jewish children (without indication of birthplace).

21) List of children in France. 5 December 1945. ISD, 78779290: 15 Polish Jewish children, five born in Łódź.

22) List of boys and grown-ups. 11 November 1946. ISD, 78779261-78779265: 142 Polish Jewish children, six born in Łódź, two in Kalisz.

23) List of children at the childrens' home at Otwock, Poland. Submitted by World Jewish Congress, New York. March 1946. ISD, 78786348-78786350: 107 Polish Jewish children, three born in Łódź, one in Kalisz.

A total of 705 Polish Jewish children appears on these lists, of whom 41 were born in Łódź, nine in Kalisz and five in Piotrków. Their ages are broken down as follows:

Table 2.22: Data of various lists of surviving Jewish Children born in three Polish Cities

	Total	Łódź	Kalisz	Piotrków		Total	Łódź	Kalisz	Piotrków

1945	0	0	0	0	0	0	0	0
Totals:	2	8	30	10	42	3	4	99

The total number of children born between 1930 and 1944 who were transferred from the Łódź Ghetto to Auschwitz in 1944 (or who were born in 1945 to parents transferred there) that can be documented (last and first name, date of birth) is thus at least (591 + 99 =) 690, plus an additional 57 born in these localities who were probably in the ghetto in 1944.

The above lists show 2,138 children, of whom at least 690 resided in the ghetto in 1939, or were born in this city. The remainder (except for the 57 mentioned above) came from localities in which the Jewish population had allegedly been exterminated, at least the old people and children. The cases of the Warsaw, Wilna and Lida Ghettos are well known. In Nowogródek, only about 110 adult Jews survived (Jäckel *et al*., Vol. 2, pp. 1018f.). From many locations, the Jewish population was deported to Treblinka (Ciechanowec, Gniewoszów, Kaluszyn, Kosów, Krymki, Międzyrzec, Mordy, Opatów, Ostrowiec, Otwock, Radomsk, Stanisławów, Starachowice, Suchedniów, Szydłowiec, Wegrów, Wolomin), to Treblinka and Auschwitz (Białystok, Grodno, Radom), to Treblinka and Sobibór (Dęblin, Ryki), to Sobibór (Belżyce, Chełm, Włodawa), to Bełżec (Nowy Sącz, Tyczen), to Bełżec and Treblinka (Sokolów), to Bełżec and Auschwitz (Przemyśl), to Auschwitz (Będzin, Sosnowiec) (Schwarz, pp. 113-122).

Two girls were born in Chełmno: Gur Zonia in 1935,[491] and Gur Pinia in 1937.[492]

As I explained earlier, these figures refer to about 16,000 Jews, but the relevant lists of names I mentioned earlier are deficient, so that the percentage of children can be considered to be around (1,400 ÷ 16,000 =) 8.7%. According to statistics from the Institute of Jewish Affairs, titled "Jewish Survivors and Jewish Dead in European Countries under Axis Domination," there were between 475,000 and 525,000 surviving Polish Jews in 1945 (Institute..., p. 2). Even taking the lower figure, assuming the aforementioned percentage, there would have been over 33,000 surviving children.

It is true that the total number of children I have traced – 690, undoubtedly only a fraction of the actual survivors – is roughly 6.2% of the children deported from the Łódź Ghetto (11,100), but it is also true that, from the orthodox perspective, this percentage should be zero.

The data presented in this paragraph show that the children deported to Auschwitz were not gassed, but were admitted to the Transit Camp together with their mothers, and the case of the children born in 1945 is proof that pregnant Jews were also admitted there.

---

[491] YVA, M.7-1227, p. 65.
[492] ISD, 78785558.

In a table titled "Łódź Ghetto Jews killed in the gas chambers of KL Auschwitz or in unknown circumstances at Auschwitz or other camps (mentioned in the accounts of or questionnaires answered by former KL Auschwitz prisoners from the Łódź Ghetto)," Strzelecki, lists the following six children allegedly gassed (Strzelecki 2005, pp. 138-144):

Table 2.25: Data of six Jewish Children Allegedly Gassed at Auschwitz

Last Name	First Name	Birth Date [d/m/y]
Fabrykant	Awiwa	24/5/1938
Faktor	Hala	24/2/1930
Kiersz	Malka	31/5/1936
Klugman	Szlama	9/5/1938
Koplowicz	Abraham	18/2/1930
Pelcman	Chaim Dawid	16/11/1935

As mentioned earlier, Strzelecki mentions in another table a child who passed through the Birkenau Transit Camp: Chaim Liss, born on 25 March 1931 (*ibid.*, p. 163).

From the fragmentary documents that have been preserved, it can be added – although this does not directly concern the Jews of Łódź – that the following Dutch Jewish children were evidently registered on 6 June 1944:[493]

Table 2.26: Dutch Children Registered at Auschwitz on 6 June 1944

Last Name	First Name	Birth Date [d/m/y]	Reg. No.
Jacobson	Heinie	19/12/1935	188930
Noach	Hans	4/6/1933	188932
Slager	Jack	4/6/1933	188932
Viskoper	Jack Robert	20/4/1938	188934

There is no need to point out that none of this fits at all with an alleged policy of extermination at Auschwitz of those unfit for work, in particular children. And it is easy to object to those who argue otherwise that, while there is no documentary evidence of the gassing of a single child at Auschwitz, every surviving child is living proof that no such policy was implemented.

In this particular case, the **six** children allegedly gassed are opposed by at least **690** children who were transferred, obviously alive, from Auschwitz – and Strzelecki should explain why some were gassed and others were not.

[493] AGK, NTN, 156, p. 175.

The number of children transferred was undoubtedly much higher, given that the documented figure results from very a limited number of sources. This obviously affects the total figure of Jews from the ghetto registered at Auschwitz. It was a well-established practice to leave children with their mothers. Therefore, to the minimum figure of 15,564 adult inmates, an unspecified number of children must be added, on the order of at least hundreds.

It should also be considered that Western Jews were also deported to the ghetto in 1941, as shown in the table below:

Table 2.27: Western Jews Deported to the Łódź Ghetto in 1941

Origin	I	II	III	IV	V	Totals

Totals:	6,847	2,910	3,030	3,030	2,000	17,817

Due mainly to mortality (4,159 deaths) and resettlements, only 3,141 Jews remained in the ghetto on 1 November 1942.[494]

The series of reports titled "Evidenz," which have been preserved for January through August 1943, lists the occupancy on the first day of each month of transports from 21 locations: Prague, Berlin, Vienna, Cologne, Frankfurt, Düsseldorf, Hamburg, Luxemburg, Leslau (Włocławek), **Pabianice**, **Löwenstadt** (Brzeziny), Osorków, Belchatów, Zelów, **Kalisch** (Kalisz), Heidemühl, **Wieluń**, Sieradz, Warta, Zduńska Wola, Łask. The names in bold are those of the localities I examined earlier (Table 2.23).

On 31 August 1943, the total number of Jews in the Łódź Ghetto who had been deported from the above-mentioned localities was 17,368;[495] they represented more than 20 percent of the total population of the ghetto,

[494] APŁ, PSZ, 174, pp. 1-4.
[495] APŁ, PSZ, 1203, p. 12.

which on that day was 84,140 persons.[496] From September to December 1943, there were no additions of note to the ghetto (admissions), because on 31 December, its population was 83,132 persons,[497] and this was also true for 1944.

The survivors among these more than 17,000 inmates are not considered in these reports, so neither are the children, who, based on the percentage given above, must have numbered about 1,500.

To sum up, to the certain figure of 32,400 Jews from the Łódź Ghetto registered at Auschwitz, we must add:

1) a surplus of women over the documented number, resulting from their preponderant proportion to men;
2) men who passed through the disinfestation facility at the Gypsy Camp, who were not registered on the Glaser List;
3) children who were not registered.

Having made these clarifications, the (67,000 – 32,400 =) 34,600 missing Jews were presumably gassed, if we follow the orthodox narrative. But the data set forth above show that such an assumption is unreasonable. As noted earlier, on 22 July 1944, the ghetto population stood at 68,724, of whom 63,856 were deployed at work in the various departments. There were 4,633 children, hence there were (68,724 – 63,856 – 4,633 =) 235 unemployed persons, presumably because they were unfit for work.

Since the missing persons number 34,600, it follows that the SS at Auschwitz is said to have gassed the (4,633 + 235 =) 4,868 children and adults unfit for work, plus, in round numbers, another 29,700 persons perfectly fit for work. This fact – especially at a time of severe labor shortages, as I remarked earlier – is in itself an absurdity. And this does not even consider the fact that the documents refute the alleged policy of exterminating all Children.

According to Strzelecki's thesis, 45,000 of these 63,856 deportees – obviously Jews fit for work – became inexplicably incapacitated after a few weeks, such that they had to be exterminated at Auschwitz! Alternatively, the SS in the camp intentionally "gassed" huge numbers of Jews who were it for work.

This is all the more absurd since on 30 July 1944, Greiser had decreed total mobilization for work precisely in the Warthegau for men and women

[496] APŁ. Mikrofilm Nr. 19703, syg. 1085, p. 361, "Tagesbericht vom Dienstag, den 31. August 1943."

[497] *Ibid.* p. 598, "Tagesbericht vom Freitag, den 31. Dezember 1943."

aged 15 to 65. The daily newspaper *Litzmannstädter Zeitung* spread the news as follows in its issue of 1 August:[498]

> *"Posen, 30 July 1944. The Reich Defense Commissioner for the Reich Defense District of Wartheland has issued the following order:*
> *Effective 1 August 1944, I order:*
> *(1) All men and women fit for work, of German and Polish and other foreign nationalities, from the age of 15 to 65, who are resident or presently residing in the Reichsgau Wartheland, are obligated to perform emergency service for a short time for the purpose of the Reich's defense. They shall obey the instructions of the labor authorities.* […]
> *(4) Anyone who fails to comply with the instructions of the labor authorities issued on the basis of this order will be punished according to martial law."*

The second absurdity is that the SS at Auschwitz inexplicably saved hundreds of children, allegedly slated for murder, from the "gas chambers."

2.11. Łódź Ghetto Jews in the Birkenau Transit Camp: an Open Problem

Strzelecki mentions in a footnote a statement by the Auschwitz resistance dated 22 August 1944, "which indicates that apart from those who were registered there were also 30,000 unregistered Jews from Hungary" (Strzelecki 2005, p. 72, footnote 1). However, he adds the following without further comment (*ibid.*, p. 73):

> *"It is estimated that from July to September 1944 some 30,000 Hungarian and Polish Jewish men and women were held in 'deposit' in various transit camps within Birkenau, including sectors BIIc and BIII (which the prisoners called 'Mexico') as well as isolated barracks in sector BIIe (which until 2nd August had served above all as the Gypsy Camp – Zigeunerlager) and BIIb (which until July 1944 had been the family camp for the Jews from Theresienstadt). So far it has been established that Jews from the Łódź ghetto were held in the former Gypsy Camp (some of the men in barracks 4, 13, 14, 22 and 25) and in sector BIIc (in this case only the women)."*

There is no doubt that, in round numbers, at least 28,000 male and female Jews from the Łódź Ghetto were admitted to the Transit Camp in August 1944 alone. On the other hand, as I demonstrated in Part One, the presence

---

[498] "Notdienstverpflichtung im Reichsgau Wartheland. Ein Erlaß des Reichsverteidigungskommissars / Die näheren Einzelbestimmungen," in: *Litzmannstädter Zeitung*, Year 27, No. 214, 1. August 1944, p. 1.

of 30,000 Hungarian male and female Jews in the Transit Camp on 22 August 1944 is perfectly congruent with the Glaser List. One wonders then: why did the Auschwitz resistance never mention the presence in, or passing through, the Transit Camp of at least 28,000 people from the Łódź Ghetto?

With their puerile fairy tales quoted earlier they might have hoped to make people believe that these deportees had all been exterminated. Strzelecki adds the following to this topic (*ibid.*, p. 114):

> *"Not so long ago it was accepted that in 1944 the Nazi authorities had 'transferred' through KL Auschwitz to work in other camps approximately 25,000 male and female 'deposit' prisoners – Jews from Hungary and Poland. But more recent estimates suggest that the figure was actually higher and that Łódź Ghetto Jews did not even account for the majority."*

He does not provide any new estimates, but as early as 1995, he had carried out a detailed analysis of evacuation transports from Auschwitz. He arrived at the following conclusion (Strzelecki 1995, p. 353):

> *"In the period May through October 1944, several tens of thousands, most probably up to one hundred thousand Jewish prisoners passed through the Birkenau Camp without being registered."*

In fact, the figure of about 100,000 is still too conservative, because just the Jews deported from Hungary who passed through the Transit Camp, as shown in Part One, numbered about 93,700 (63,700 transferred up to 22 August 1944, and 30,000 still present on this date), to which must be added at least 31,000 Jews from the Łódź Ghetto (about 15,400 men and 15,600 women), which brings the total to 124,700.

As for the 7,500 Jews who were transferred back to Auschwitz from Płaszów in the first ten days of August 1944, and who allegedly housed in the Transit Camp, these were unregistered inmates (at most about 6,900) who had been transferred to Płaszów in June 1944 and who, when they returned to Auschwitz, were duly registered, so they did not go to the Transit Camp.

Conclusions

In early June 1944, Himmler ordered the evacuation of the Łódź Ghetto. After the war, the former German officials Fuchs, Biebow and Bradfisch stated, and some documents confirm, that the plan was to relocate the entire ghetto "as an armament factory" to Germany proper and Czechoslovakia. This probably concerned the transports of June and July. In August,

the ghetto's occupants were transferred to Auschwitz. Some orthodox historian inferred that the initial plan was later modified, so that these Jews were sent to Auschwitz to be mostly killed there. However, the facts are very clear: the machinery was shipped directly to the specified destinations, while the men were sent to Auschwitz as a labor sorting center.

A sentence from the report dated 22 January 1944, as mentioned earlier, explicitly states:

> *"The greater part of the enterprises is labor-intensive: only some factories, for example weaving, are machine-intensive."*

In practice, the work of the 99 Ghetto enterprises that existed at that time was based essentially on Jewish labor and only partly on machinery. For logistical and organizational reasons, the Jews of Łódź were first sent to Auschwitz, from where they were then relocated to the destination camps. This is also explicitly stated by Strzelecki (2005, p. 75):

> *"Auschwitz also served as a transit camp (particularly from the spring of 1944) for prisoner slaves to be transported deep into the German interior."*

In this camp, a portion of the deportees were registered, but

> *"thousands of others, including many Jewish men and women from the Łódź Ghetto, were transported to concentration camps in the Reich's interior to work in industries contributing to the German war effort."* (*ibid.*, pp. 72f.)

From this perspective, the claimed extermination of 45,000 Jews fit for work does not make sense, just as the transfer from Auschwitz of at least 690 children does not make sense from the orthodox Holocaust perspective.

Häftl.Bekleidung-Kammern
K.L.Auschwitz II

Auschwitz II,den 14 Juli 1944.

Betreff: Bekleidung u. Wäsche f. jüd. Häftlinge
Bezug : Schreiben KL.Dachau v. 26.6.44.AZ: V/3 151a/6.44. -H
Anlagen: 3

An die
Verwaltung, Abt. Bekleidung
K.L. Auschwitz

Vor dem 29.Juni 1944 wurde vom K.L.Auschwitz II nur 1 Transport u. zw.am 15.6. nach dem K.L.Kaufering abgefertigt. Zur Aufklärung des Sachverhalteswird im Nachstehenden der gesamte Vergang vom Eintreffen der ungarischen Judenhäftlinge bis zur Bahnverladung beschrieben. Nach Eintreffen der Zugänge im hiesigen Konzentrationslager werden den Häftlingen die gesamte Zivil-Bekleidungsstücke abgenommen und nach gründlichst durchgeführter Entlausung werden diese Häftlinge mit den von der Verwaltung zur Verfügung gestellten Häftl.Bekleidungsorten eingekleidet. Die Bekleidungsstücke sind mit Ausnahme der Wäsche und der Schuhe neu-. Hemden und Unterhosen werden aus den jüdischen Sammelbeständen der Effektenkammer entnommen, nachdem diese entlaust und mit Lausetto bespritzt wurden. Eine vorherige Reinigung dieser Wäschestücke ist mit Rücksichkeit auf den Umfang der Transporte und mangels neuer Wäschegarnituren nicht möglich. Die Unterwäsche wird aber vor Angabe sorgfältigst sortiert, sodass nur einwandfreie, also nicht zerrissene Wäsche gelangt. Die Schuhe werden den Häftlingen beim Zugang nicht abgenommen. Es behalten daher die Häftlinge ihre eigenen Schuhe, nachdem diese gründlichst desinfeziert wurden. Jene Häftlinge, deren stark beschädigt bezw, unbrauchbar sind, erhalten nach Weisung der Standortverwaltung neue Holzschuhe. Strümpfe oder Fusslappen, wie in obzitierten Schreiben erwähnt,erhalten die Häftlinge überhaupt nicht. Sie erhalten ausschliesslich die im K.L.Auschwitz II angefertigten Füsslinge. Das Einkleiden der

Document 1: Letter by the department head of the inmate clothing department Birkenau to the local administration dated 14 July 1944, with the subject "Bekleidung u. Wäsche f. jüd. Häftlinge" ("Clothes and laundry for Jewish Inmates.") Source: AGK, NTN, 88, pp. 111-113.

Zugänge wird vom Kammerwart und dem Capo der Häftl. Bekleid.Kammer-
streugstens überwacht. Nachdem die einzelnen Zugangstransporte ein-
gekleidet sind, werden diese in das Durchgangslager K.L.Auschwitz
II überstellt und vom Arbeitsdienstführer Uscha Olexiuk übernommen.
Dieser stellt über die Bekleidungssorten mit denen die Zugänge be-
kleidet sind eine Quittung aus, aus welcher ersichtlich ist, mit
welchem Bekleidungsstücken die Häftlinge versehen sind. Diese Quit-
tung wird zur Einsichtsnahme vorgelegt. Im Durchgangslager verblei-
ben die Zugänge mehrere Tage /bis zu 2-3 Wochen/. mit Rücksicht auf
den Mangel an ausreichenden Unterkünften sind in jeder Barake,wel-
che für einen Normalbeleg von 300 Häftlingen vorgesehen ist, 1000-
1200 Häftlinge untergebracht. Schon dieser Umstand bedingt eine
starke Verunreinigung der Bekleigungsstücke. Im Durchgangslager wer-
den aus den dort untergebrachten Häftlingen Transporte zusammenge-
stellt und diese ins Quarantenlager verlegt, wo sie bis zum Abtrans-
port mehrere Tage verbleiben. Vor dem Abtransport werden die Häftlin-
ge von dem Capo der Häftl.Bekl.Kammer des Quarantänelagers einer ge-
nauen Kontrolle unterzogen. Sämtliche Bekleidungsstücke, welche
sich bei dieser Kontrolle als schadhaft erweisen, werden vor dem
Abtransport ausgetauscht. Der Kammerwaer überzeugt sich von der Durc
führung dieser Bestimmung. Der Arbeitsdienstführer SS-Uscha Olexiuk
der den Transport zusammengestellt an den Transportführer übergibt,
bestätigt auf einem Lieferschein die Übernahme jener Bekleidunge-
stücke mit denen die Häftlinge ausgestattet sind.
Der fragliche Transport, der zur Beanstandung Anlass gegeben hat,
wurde lt.Lieferschein Nr.12, der in der Anlage beigefügt ist, am
15.6.1944 abgefertigt. Nach diesem Lieferschein wurden die Häftlin-
ge mit neuen Drellgarnituren versehen, lediglich 47 Drelljacken und
43 Drellhosen waren nicht neu, sondern gebraucht, aber in gewasche-
nem und einwandfreiem Z-ustand. Diese alten Drellgarnituren mussten
ausgegeben werden, da mit Rücksicht auf die umfangreichen Zugänge

Document 1, continued

-3-

112

die neuen Drellgarnituren in entsprechenden Umfang nicht rechtzeitig angeliefert wurden. Es wurde daher von der Verwaltung Auftrag gegeben in einem solchen Notfall alte Drellgarnituren auszugeben um eine Stockung zu vermeiden und eine reibungslose Abfertigung der umfangreichen Zugänge zu sichern. Zu diesem Zweck hat die Verwaltung in Auschwitz mit Schreiben vom 5.6.44 den Auftrag gegeben sämtliche im Lager befindlichen überzähligen alten Drellgarnituren einzuziehen und für die Einkleidung von Zugängen zur Verfügung zu halten. Wenn die Häftlinge,wie im obzitierten Schreiben behauptet,mit Hosen,die nur ein oder anderthalb Hosenbeine hatten oder mit Röcken mit einem sogar ohne Ärmel bekleidet gewesen wären,wären diese Transporte vom Arbeitsdienstführer bei der Übernahme beanständet bezw.überhaupt nicht übernommen worden. Es ist für diese Beanstandung nur eine Erklärung möglich, d.i.,dass die Häftlinge sich während der Fahrt bei der herrschenden Hitze in den geschlossenen Waggons ausgezogen haben und die Bekleidungsstücke, welche dann beim Transport schadhaft wurden, weggeworfen haben.Die Erfahrung hat weiterhin gezeigt,dass speziell Durchfall-Kranke, Hemd und Unterhose,die beschmutzt werden,wegwerfen oder zerreissen und sie an Stelle von Toilettenpapier benützen.Die Bekleidungskammern K.L.Auschwitz II haben seit dem 16.V.1944 bis heute ca 57.000 Häftlinge eingekleidet und 48 Transporte mit 45.152 Häftlingen für den Abtransport abgefertigt, ohne dass bisher die geringste Beschwerde eingelaufen wäre. Die Beanstandungen können daher nur während des Transportes entstanden sein.

H K D Ambulanz B II/a. 27.6.44. Ausch. III-IIa

Monatsbericht über vorübergehend im Lager untergebrachte u. ungar. Juden

In der Berichtszeit /26. Juni bis 26. Juli 1944/ wu. durchschnittlich 2500 ungar. Juden transportbereit im Lager i in 8 Blocks, verblieben 3 - 10 Tage im Lager.

Sie wurden jeweils bei Zugang und Abgang einer genauen ärztlichen Untersuchung unterzogen und auf Läuse kontrolliert. Vgl. Flecker und Läusekontrolle. Ermittelte Läuseträger ind. der Lagerseite entlaust, Kleider und Wäsche in Dampfkessel desinfiziert und la. naß-trockniert. Bei den Kontrollen festgestellte ernste Erkrankte nach B II/f 76 rückübergeführt o. der in einem eigenen Lager verlegt.

Am 1.7. abds. Zugang von 450 jugendl. ungar. Juden aus B II/d. Bei der ärztl. Untersuchung 2 Fälle verdächtiger Angina isoliert und 3 Tage darauf als Scharlach erkannt. Block wurde sofort gesperrt, Kranke nach anderem Lager verlegt. Zur genauen tgl. Kontrolle und Einhaltung strengster Absperrung aus B II/f ein Arzt als Blockarzt und Blockältester eingesetzt. Während der Quarantänezeit Auftreten von Ruhrerkrankungen. Diese Kranken wurden im Inf. Krankenblock des Lagers / Bl. 16 / untergebracht. Ebenso ein bereits in Sperrung befindl. Scharlach. Nach Ablauf der Sperrquarantäne Bad und Desinfektion von Kleidern und Wäsche. Block ausgespritzt. Abds. bei der Blockkontrolle Fälle von Masern eruiert. Daraufhin neuerliche Sperrquarantäne verhängt. Die von Favus wurden in P K L Rävensbrück überstellt.

Bei einem Zugang transportarbeiter ungar. Juden vom 30. Juni 1. Juli ein Scharlachfall. /Bl. 9 / Der Kranke nach Abg. vom Lager verl. der Block gesperrt und der Ausn. Observationsblock des Arztes von Bl. 25 / ungar. Juden / untergebracht. Da keine Neuerkrankung die Sperrquarantäne 1. Juli aufgehoben. Desinfektion wie bei Bl. 12 beschrieben. Nach Ablauf neuer Scharlachfall. Daher neuerliche Sperrquarantäne. Der Kranke nach Abtlg. des Lagers verlegt.

Zur Versorgung der Sperrblocks ein eigenes Kommando eingesetzt, [illegible] Wasser und Kohlen d. Blocks zuführt und die Kübeltoilette abträgt.

Am 12. 7. morgens ein ungar. Jude aus Bl. 10 bei den elektr. Drähten in der Sperrzone zwischen Lager B II/a und b nächst Block 7 tot aufgefunden. Elektr. Strom tödl. Ob Selbstmord oder Unfall nicht festgestellt.

Da zuviele Häftlinge jeweils auf den Blöcken untergebracht wurden, // bis zu 1000 / mussten viele auf dem nackten Erdstandboden bezw. kalten Erdboden schlafen, wodurch Häufung von Erkältungskrankheiten und Durchfällen. Die in Sperrquarantäne befindlichen Jugendlichen auf Bl. 12 haben seit 10 Wochen, die Ungarn auf Bl. 8 seit 6 Wochen keine Wäsche gewechselt. Da beide Gruppen nicht zur Lagerstärke gehören, konnte auch keine Waschseife an die zur Ausgabe gebracht werden. Zuweisung von Seife dringend erforderlich.

Krankenbehandlung: In der Berichtszeit 3130 Häftlg. in der Ambulanz behandelt. Davon:

chirurg. Fälle	1426,	Skabies	62	Infektionskrankheiten:	
Durchfall	327	Pneumonie	78	Scharlach	5

Abschrift

3686-PS
018/240

Direktor Leo Glaser

Lambach, den 5. August 1945

An die
Amerikanische Militaerregierung
in L i n z

Betrifft: SS- Hauptsturmfuehrer Kramer des Konzentrationslagers Bergen-Belsen.

Durch die Presse und den Rundfunk habe ich erfahren, dass SS Hauptsturmfuehrer Kramer, der Lagerkommandant des Konzentrationslagers Bergen-Belsen, wegen Mordes an 27.000 Juden angeklagt ist. Kramer war im Jahre 1944 Lagerkommandant des Konzentrationslagers Auschwitz II (Birkenau).

In der Zeit von Mai 1944 bis 2o September 1944 wurden in den Krematorien des Lagers Auschwitz II (Birkenau) unter seiner Leitung ca 65o,ooOJuden (Maenner, Frauen und Kinder) durch Giftgas getoetet und in den Krematorien verbrannt. Es ist dies der groesste Massen - mord aller Zeiten. In dem vorgenannten Zeitabschnitt kamen ca. 825,OO Juden aus allen Herrenlaendern nach Auschwitz, ca. 2o % der Gesamt - zahl (Maenner und Frauen) kamen ins Lager, der Rest wurde vernichtet.

In der Anlage erlaube ich mir eine detaillierte Aufstellung der in der obengenannten Zeit in Birkenau eingelangten maennlichen Transporte zu ueberreichen. Die Anzahl der Frauentransporte im glei - chen Zeitabschnitte ist annaehernd dieselbe, wenn nicht hoeher.

Ich war sieben Jahre in verschiedenen Konzentrationslagern als politischer Haeftling bis zu meiner am 6. Mai d.J. erfolgten Befreiung festgehalten und befand mich von Oktober 1942 bis zum 8 Janner 1945 in Auschwitz-Birkenau. Ich bin Augenzeuge dieser oben- genannten Greueltaten gewesen und hatte Gelegenheit, mir ueber alle einlangenden Transporte Aufzeichnungen zu machen. Diese Aufzeichnungen habe ich unter staendiger Lebensgefahr bis zu meiner Befreiung bei mir getragen.

Der von Adolf Hitler fuer diese " Ungarische Judenaktion" ernannte Sonderbevollmaechtigte war der durch seine Brutalitaet und besondere Grausamkeit beruchsichtigte SS Obersturmbannfuehrer Hoss, der Lagerkommandant SS Hauptsturmfuehrer Kramer und der erste Schutz- haftlagerfuehrer war SS Hauptsturmfuehrer Schwarzhuber. Ganz beson - ders grausam und bestialisch betrieb SS Hauptscharfuehrer Moll sein blutiges Handwerk. Ihm oblag die Oberaufsicht und Organisation der 4 Krematoriumsbetriebe.

Ich bitte die Amerikanische Militaerregierung, dieses Schreiben fuer den Fall, als meine Angaben von Interesse sein soll- ten, an die zustaendige Stelle weiterleiten zu wollen. Ich bin jeder- zeit bereit, meine Angaben zu beeiden.

gez. Leo Glaser
Direktoer der Vers. Anstalt der
Oesterreichischen Bundeslaender Wien.
derzeit: Wien 1, Elisabethstr.24
